Science Fiction and the Moral Imagination Russell Blackford 2017-09-05 In this highly original book, Russell Blackford discusses the intersection of science fiction and humanity's moral imagination. With the rise of science and technology in the 19th century, and our continually improving understanding of the cosmos, writers and thinkers soon began to imagine futures greatly different from the present. Science fiction was born out of the realization that future technoscientific advances could dramatically change the world. Along with the developments described in modern science fiction - space societies, conscious machines, and upgraded human bodies, to name but a few - come a new set of ethical challenges and new forms of ethics. Blackford identifies these issues and their reflection in science fiction. His fascinating book will appeal to anyone with an interest in philosophy or science fiction, or in how they interact. "This is a seasoned, balanced analysis of a major issue in our thinking about the future, seen through the lens of science fiction, a central art of our time. Everyone from humanists to technologists should study these ideas and examples. Blackford's book is wise and savvy, and a delight to read as well." Greg Benford, author of *Timescape*.

The Dialectics of Liberty Roger E. Bissell 2020-01-15 These essays explore ways that liberty can be better defended using a dialectical approach. In addition to libertarian theory and dialectics, some of the areas examined include evolutionary biology, psychology, economics, and sociology of the family and of American popular songs, social justice, and political change.

[Ayn Rand](#) Chris Matthew Sciabarra 2015-06-13 Author of *The Fountainhead* and *Atlas Shrugged*, Ayn Rand (1905–1982) is one of the most widely read philosophers of the twentieth century. Yet, despite the sale of over thirty million copies of her works, there have been few serious scholarly examinations of her thought. *Ayn Rand: The Russian Radical* provides a comprehensive analysis of the intellectual roots and philosophy of this controversial thinker. It has been nearly twenty years since the original publication of Chris Sciabarra's *Ayn Rand: The Russian Radical*. Those years have witnessed an explosive increase in Rand sightings across the social landscape: in books on philosophy, politics, and culture; in film and literature; and in contemporary American politics, from the rise of the Tea Party to recent presidential campaigns. During this time Sciabarra continued to work toward the reclamation of the dialectical method in the service of a radical libertarian politics, culminating in his book *Total Freedom: Toward a Dialectical Libertarianism* (Penn State, 2000). In this new edition of *Ayn Rand*, Chris Sciabarra adds two chapters that present in-depth analysis of the most complete transcripts to date documenting Rand's education at Petrograd State University. A new preface places the book in the context of Sciabarra's own research and the recent expansion of interest in Rand's philosophy. Finally, this edition includes a postscript that answers a recent critic of Sciabarra's historical work on Rand. Shoshana Milgram, Rand's biographer, has tried to cast doubt on Rand's own recollections of having studied with the famous Russian philosopher N. O. Lossky. Sciabarra shows that Milgram's analysis fails to cast doubt on Rand's recollections—or on Sciabarra's historical thesis.

Professional Issues in Nursing Carol J. Huston 2013-01-15 Using an approach that fosters critical thinking and values clarification, this textbook examines the full range of professional issues facing contemporary nursing. Coverage includes critical issues such as the nursing shortage, mandatory staffing ratios, violence in nursing, legal and ethical issues, plus the latest HIPAA regulations, career advancement and evaluations, and best practices for today and the future. This edition includes two NEW chapters: 1) a NEW chapter on developing effective leaders to meet 21st century healthcare challenges, and 2) a NEW chapter on the use of residencies for new graduate nurses as a transition to practice. In addition to these exciting additions, content has been updated throughout the book to reflect cutting-edge trends in healthcare including the impact of healthcare reform, and recommendations from the Institute of Medicine (IOM). This edition promises to be an integral tool to providing effective nursing care in an increasingly global, rapidly changing, technology driven world.

An Educator's Guide to Humanizing Nursing Education Chantal Cara, PhD, RN, FAAN, FCAN 2020-06-05 Delivers specific guidelines for implementing human caring within teaching practices along with a wealth of examples Grounded in the belief that translating caring science within teaching practices will humanize nursing education, this important book emphasizes the ways in which teachers can translate Human Caring and Caritas in order to include strategies for establishing authentic caring pedagogical relationships with their students. It aims to strengthen Human Caring as the basis for humanitarian teaching and to infuse the learning environment with caring practices for both students and teachers. The work provides an antidote for the continuous dominant biomedical and behavioral paradigm in nursing education. It includes specific guidelines for implementing Human Caring ethics, ontology, and epistemology throughout the teaching-learning community and describes how to translate caring values and assumptions into living Caritas as the nurse teachers' moral ideal and praxis of authentic caring pedagogical relationships. Pragmatic examples provided by administrators, teachers, and students illustrate the value of a humanitarian caring science paradigm for nursing education and caring praxis. Key Features: Delivers an internationally renowned scholars' perspective on teaching grounded in Human Caring Includes exemplars of educators' lived teaching experiences guided by their caring pedagogical praxis Provides examples of students' lived learning experiences within a caring- teaching environment Offers reflective practice exercises for nurse teachers to enhance their caring pedagogical relationships with students Provides guided caring artistic activities to promote ways of knowing, doing, being, and becoming in nursing education

Tomboy Nina Bouraoui 2007-01-01 Tomboy is the story of a girl whose father calls her Brio, whose alter ego is Amine, and whose mother is a blue-eyed blond. But who is she? Born five years after Algerian independence in 1967, she navigates the cultural, emotional, and linguistic boundaries of identity living in a world that doesn't seem to recognize her.

Creating a Caring Science Curriculum Jean Watson, PhD, RN, HNC, FAAN 2011-04-15 The hallmark text for nursing faculty seeking to promote the transformative teaching of caring science, this book reflects the paramount scholarship of caring science educators. The volume intertwines visionary thinking with blueprints, living exemplars, and dynamic directions for the application of fundamental principles. It features emancipatory teaching/learning scholarship, and student/teacher, relation/evaluation models for adoption into education and practice regimens. Divided into five units, the text addresses the history of the caring curriculum revolution and its reemergence as a powerful presence within nursing. Unit II introduces intellectual and strategic blueprints for caring-based education, including action-oriented approaches for faculty-student relations, teaching/learning skills, emancipatory pedagogical practices, critical-reflective-creative approaches to evolving human consciousness, and power relation dynamics. The third unit addresses curriculum structure and design, the evolution of a caring-based college of nursing, the philosophy of caring-human science, caring in advanced practice education, caring as a pedagogical approach to nursing education, and teaching-learning

professional caring based on Watson's theory of human caring. Unit IV explores an alternative approach to evaluation. The final unit explores the future of the caring science curriculum as a way of emancipating the human spirit, with caritas nursing as a transformative model. Key Features: Expands upon the premiere resource for maximizing caring science in education, research, and practice (Bevis and Watson's *Toward a Caring Curriculum: A New Pedagogy for Nursing*, 1989) Provides a broad application of caring science for graduate educators, students, and nursing leaders Features case studies from two leading U.S. and Canadian universities Distills the expertise of world-renowned scholars Includes reflexive exercises to maximize student engagement
