**Verbal Hygiene** Deborah Cameron 2012-03-15 In *Verbal Hygiene*, Deborah Cameron takes a serious look at popular attitudes towards language and examines the practices by which people attempt to regulate its use. Instead of dismissing the practice of 'verbal hygiene', as a misguided and pernicious exercise, she argues that popular discourse about language values – good and bad, right and wrong – serves an important function for those engaged in it. A series of case studies deal with specific examples of verbal hygiene: the regulation of 'style' by editors, the teaching of English grammar in schools, the movements for and against so-called 'politically correct' language and the advice given to women on how they can speak more effectively. This Routledge Linguistics Classic includes a new foreword which looks at how the issues covered in the case studies have developed over time and a new afterword which discusses new concerns which have emerged in the last 15 years, from the regimentation of language in the workplace to panics about immigration and terrorism, which are expressed in linguistic terms. Addressed to linguists, to professional language-users of all kinds, and to anyone interested in language and culture, *Verbal Hygiene* calls for legitimate concerns about language and value to be discussed, by experts and lay-speakers alike, in a rational and critical spirit.

Phraseology and Culture in English Paul Skandera 2007-01-01 The proposition that there is a correlation between language and culture or culture-specific ways of thinking can be traced back to the views of Herder and von Humboldt in the late 18th and early 19th centuries. It is generally accepted today that a language, especially its lexicon, influences its speakers' cultural patterns of thought and perception in various ways, for example through a culture-specific segmentation of the extralinguistic reality, the frequency of occurrence of particular lexical items, or the existence of keywords or key word combinations revealing core cultural values. The aim of this volume is to explore the cultural dimension of a wide range of preconstructed or semi-preconstructed word combinations in English. The 17 papers of the volume are divided into four sections, focusing on particular lexemes (e.g. enjoy and its collocates), types of word combinations (e.g. proverbs and similes), use-related varieties (such as the language of tourism or answering-machine messages), and user-related varieties (such as Aboriginal English or African English). The sections are preceded by a prologue, tracing the development of the study of formulaic language, and followed by an epilogue, which draws together the threads laid out in the various papers. The relation between

language and culture in general has been explored in a number of important works over the past ten years. However, the study of the relation between English phraseology and culture in particular has been largely neglected. This volume is the first book-length publication devoted entirely to this topic.

**Historical Dialogue Analysis** Andreas H. Jucker 1999-07-15 Historical dialogue analysis is a new branch of historical pragmatics. The papers of this interdisciplinary volume contribute to charting the developing field by presenting a survey of recent research from the different traditions of English, German and Romance language studies. Both the introductory paper by the editors and the individual papers deal with fundamental theoretical questions, e.g. the question of types of historical developments in dialogue forms, and methodological problems, e.g. the finding and interpretation of relevant data. The fifteen case studies presented in this volume provide a wide range of new data. The range of topics includes the pragmatic form of 16th century religious controversies in Germany, forms of polite answers in Early Modern German conversation culture, forms of dialogue in Early Modern English medical writing, learning English through dialogues in the 16th century, structures of bargaining dialogues in Late Medieval French, and reflections of spontaneous dialogue in Early Romance texts.
