Before You Were Born... My Wish for A Baby - SMC Donor Egg/Donor Sperm Or Donor Embryo 2005-10-01

One Little Egg Kimberly F Demeo 2013-05-01 One Little Egg by Kimberly F. DeMeo is a children's book which was written to teach kids about egg donation in a colorful, lively, kid friendly way. The theme of this book is important because today more and more people are getting married and waiting to have children at an older age. For a staggering number of women, it is not easy to conceive a child on their own, so they have to use methods such as in vitro fertilization (IVF). Unfortunately, a large number of these IVF cases are unsuccessful. That is where the miracle of egg donation comes into play. For families who want to have a child and cannot on their own, egg donation is their last resort. But what about the children of egg donation? How does learning about how they were conceived affect them? Unfortunately, there is still an unnecessary negative stigma when it comes to using an egg donor in order to get pregnant. This should not be!

Explaining to children of egg donation how they were conceived at an early age is vital in raising a well-adjusted, happy and successful child! Children will love reading this book. This story is

unique in that it is told from the viewpoint of the egg and is relatable to children. Exsie the donor egg is the main character in One Little Egg. It is her job to explain egg donation to the younger eggs, or "recruits" as they are called in the book. She explains the crucial role they have in helping a family's dream of having a baby come true. Children will relate to an adorable little egg named Sara who struggles with her existence. She is at the "Egg Donor Academy" being taught what her role is in helping couple who is yearning to have a baby. This story is filled with action, emotion and of course, education about egg donation. The author was compelled to write this children's book for two very important reasons, and their names are Miranda and Sydney! After five long years of unsuccessful procedures, she and her husband decided to have a baby through egg donation.

Going Solo Genevieve Roberts 2019-04-18

Going Solo is the empowering and uplifting story of one woman's choice to become a single mother. 'I hope this story gives hope to anyone who wants children and to anyone who finds themselves single. Not to follow this path necessarily, but to remember that there are always many options.' Aged thirty-seven, single and having experienced two miscarriages, Genevieve Roberts found out that her fertility levels were dwindling. On hearing this news, she made the courageous decision to embark on motherhood solo and eventually became pregnant using a sperm donor. Genevieve describes her initial fear of the prospect of birth without a partner, and the trepidation she felt towards all the responsibility she has taken on. She recounts all the milestones of pregnancy and motherhood that most women share with their partner -- going to NCT classes alone, taking part in birthing workshops with her sister-in-law, her amazement that two people in her pregnancy yoga class are following the same path as her. But ultimately what triumphs is Genevieve's excitement at meeting her daughter. She recalls the first months of parenthood, navigating the love, worry and tiredness of life with a newborn without a partner. She describes the beautiful simplicity of the relationship between herself and her daughter, as she gets to know Astrid without having to consider a partner. *Going Solo* is for anyone whose life has taken an unexpected twist; for people who are interested in modern families and for those who want to take control of their life and follow their dreams of parenthood. It celebrates the fulfilment that comes from following what makes

you happy, and reminds us that beauty may be found when life offers a surprise or a deviation from convention.

The Gift of Embryo Donation Irene Celcer 2006 As outspoken in his day as Richard Dawkins or Christopher Hitchens are today, American freethinker and author ROBERT GREEN INGERSOLL (1833-1899) was a notorious radical whose uncompromising views on religion and slavery (they were bad, in his opinion), women's suffrage (a good idea, he believed), and other contentious matters of his era made him a wildly popular orator and critic of 19th-century American culture and public life. As a speaker dedicated to expanding intellectual horizons and celebrating the value of skepticism, Ingersoll spoke frequently on such topics as atheism, freedom from the pressures of conformity, and the lives of philosophers who espoused such concepts. This collection of his most famous speeches includes the lectures: ["The Gods" (1872) ["Humboldt" (1869) ["Thomas Paine" (1870) ["Individuality" (1873) ["Heretics and Heresies" (1874)

It allows the mother to embrace all of the love, caring, nurturing, and desire she gave to the child from contemplation to birth and beyond. It takes so much love to tell the story of how the child came to be, and this..... is a love story. This book is a gift that parents and their children will appreciate and treasure!" Dr. Miriam Pineles, DACM, L.AC. "A reproductive tissue donor (egg, sperm or embryo) is an important partner in family building for hundreds of thousands of families. They say that DNA does not make a family- LOVE does. That resonates with many of us who have adopted aunties, uncles, cousins etc into their tribe, who have strained or non-existent relationships with "blood relatives", who have blended families of any kind. Biology is not destiny! "Who we are" is shaped by our environment, by our education and upbringing. Being a parent is NOT defined by genetics. *I 'Dreamed of You'* is a comforting ritual for anyone on a family building (through reproductive tissue donation or otherwise) journey." Who is responsible if the baby is handicapped at birth? Does keeping DI hidden cause any problems? How do family and friends react when told about DI? What rights does the child have concerning knowledge of DI? Will the same donor be used for a second baby? Does the donor have any legal rights concerning the child? How many times is a donor used? What records are kept of treatment?
