What We Owe Each Other Minouche Shafik 2021-04-27 From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience—raising children, getting educated, falling ill, working, growing old—and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. *What We Owe Each Other* identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, *What We Owe Each Other* provides practical solutions to current challenges and demonstrates how we can build a better society—together.

Economic Competence and Financial Literacy of Young Adults Eveline Wuttke 2016-05-23 The authors take a detailed look at the economic competence and financial literacy of young adults, especially of those who start an apprenticeship or who take up their studies at a university. Economic competence and financial literacy are of special interest within this group, because these young people are - mostly for the first time in their lives - responsible for autonomously managing their own financial affairs and deal with economic challenges.

Making a Difference in Education Robert Cassen 2015-04-24 What is working in education in the UK - and what isn't? This book offers a highly readable guide to what the latest research says about improving young people's outcomes in pre-school, primary and secondary education. Never has this issue been more topical as the UK attempts to compete in the global economy against countries with increasingly educated and skilled work-

forces. The book discusses whether education policy has really been guided by the evidence, and explores why the failings of Britain's educational system have been so resistant to change, as well as the success stories that have emerged. Making a Difference in Education looks at schooling from early years to age 16 and entry into Further Education, with a special focus on literacy, numeracy and IT. Reviewing a large body of research, and paying particular attention to findings which are strong enough to guide policy, the authors examine teacher performance, school quality and accountability, and the problematically large social gap that still exists in state school education today. Each chapter concludes with a summary of key findings and key policy requirements. As a comprehensive research review, Making a Difference in Education should be essential reading for faculty and students in education and social policy, and of great interest to teachers and indeed to anyone who wants to know about the effectiveness of UK education policy and practice, and where they should be going.

Economics for High Schools and Academies Frank W. Blackmar 2015-06-05 Excerpt from Economics for High Schools and Academies The public high school has become a people's college whose chief purpose is the preparation for citizenship. As the politics of the modern state has much to do with economics, no one could have an ordinary preparation for citizenship without at least a foundation in the elementary principles of the science of economics. Many educators have urged that the subject is too difficult for the secondary school curriculum, and therefore it should be reserved for university work. It is, however, the experience and observation of the writer of the present volume that economics, if properly presented, is as readily handled as any other subject found in the senior year of the well-equipped high school. Moreover, because only a small number of their graduates continue work in the university, it is essential that it be taught, if the school is to fulfill its great purpose of preparing its pupils for citizenship. True it is that the science of economics cannot be mastered in the high school; but what subject is mastered there? It is a mistake to exclude those subjects from instruction which are best calculated to prepare for citizenship and the conduct of life. International Practices to Promote Budget Literacy Harika Masud 2017-06-28 Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy

objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.

Good Economics for Hard Times Abhijit V. Banerjee 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Effective Economic Education in the Schools William B. Walstad 1991 The Developmental Economic Education Program (DEEP) was launched in 1964 by the Joint Council on Economic Education as an experimental program in three school districts. By 1989 there were 1,836 school districts enrolled in DEEP, covering some 39 percent of the precollege student population. This book tells the story of DEEP, an effort to improve the economics education curriculum by involving teachers, administrators, universities, and businesses in a curriculum change partnership. This current look at the DEEP experience is divided into five major parts. Part I consists of four chapters that give a rationale for economic education and explain in more detail the features of the DEEP model. Part II focuses on the research and evaluation that have been conducted over the 25-year history of DEEP and on related studies of economic understanding among students in secondary and elementary grades. The next two parts offer case studies of how DEEP works. Part III looks at DEEP operations and issues in four diverse states. Part IV shows how the DEEP process works in six different school districts. In part V the focus shifts from the present to the future; these chapters discuss the future of DEEP in the context of educational reform, requirements for new curriculum materials, needs of school districts, and leadership from the Joint Council on Economic Education.
