Fondamenti di pianificazione dei trasporti Paolo Ferrari 2001

Infrastrutture e investimenti Marco Percoco 2022-10-14T00:00:00+02:00 Gli investimenti in infrastrutture rivestono un ruolo strategico all'interno dello sviluppo sociale ed economico di un Paese. L'Italia si è storicamente contraddistinta per un ritardo significativo nella dotazione di capitale fisico rispetto ai partner europei, soprattutto nel settore dei trasporti ed ancor di più nel Mezzogiorno. La necessità di incrementare lo stock in infrastrutture, l'obiettivo di incrementarne l'efficienza, l'esigenza di sostenere la domanda aggregata con politiche di espansione della spesa pubblica sono i fondamenti economici di un momento particolarmente vivace per gli investimenti. Lo stesso Codice dei contratti pubblici introduce l'obbligo di redigere un "progetto di fattibilità" affinché un progetto di investimento possa essere ammesso al finanziamento. Questo volume presenta le recenti tendenze nella valutazione economica degli investimenti in infrastrutture, all'interno del quadro istituzionale italiano, tenendo conto dei risultati ultimi della letteratura internazionale. Alternando disamine normative, teoriche e metodologiche a casi empirici, il libro si propone come un manuale rivolto sia ai professionisti del settore che agli studenti universitari.

Contemporary Challenges for Agile Project Management Naidoo, Vannie 2021-11-05 Given the pace at which projects must be completed in an era of global hypercompetition and turbulence, examining the project management profession within the contexts of international trade and globalization is essential to encourage the highest level of efficiency and agility. Agile project management provides a flexible approach to managing projects as it allows a team to break large projects down into more manageable tasks that can be tackled in short iterations or sprints, thus enabling a team to adapt to change quickly and deliver work fast. Contemporary Challenges for Agile Project Management highlights the modern struggles that face businesses and leaders as they work to implement agile project management within their processes and try to gain a competitive edge through cross-functional team collaboration. Covering many underrepresented topics related to areas such as critical success factors, data science, and project leadership, this book is an essential resource for project leaders, managers, supervisors, business leaders, consultants, researchers, academicians, and students and educators of higher education.

Didattica e ricerca nell'ingegneria dei trasporti Ferrari 2006

Fondamenti della geografia economica Attilio Celant 2017-09-01 Questo volume, dopo una fortunata edizione cartacea interamente fotocomposta dall'autore e pubblicata da Kappa editore nel 1990, costituisce la "summa" del corso avanzato di Geografia economica che l'autore ha tenuto nell'a.a. 1989-1990. Edito sottoforma di dispense, le lezioni, esaurita la tiratura, per anni sono state relegate nei magazzini informatici del Dipartimento (l'attuale MEMOTEF), saltuariamente consultate da qualche laureando a sostegno bibliografico della propria tesi di laurea. L'autore ha deciso di rendere disponibile questo testo alla più ampia comunità di ricercatori. I contenuti dell'opera spaziano dai modelli classici della localizzazione delle attività produttive ai modelli di assetto territoriale; dall'approccio microeconomico a quello macro-; dall'impresa al territorio. Così dal minimo

trasportazionale il testo perviene alla soglia soddisfacente di profitto, dalle prime teorie sulle relazioni città-territorio ai concetti di rete urbana e spazio funzionale, dai costi di trasporto ai modelli di interazione spaziale.

Sinderesi: fondamenti di etica pubblica Sangalli Samuele 2012 Per affrontare gli ambiti principali in cui si tracciano i Fondamenti di Etica Pubblica, gli articoli nel presente volume riflettono su argomenti tipici del dibattito odierno: lo Stato e i corpi intermedi tra federalismo e sussidiarietà; l'identità culturale e nazionale nell'odierno contesto migratorio; la democrazia, l'economia e il lavoro in epoca di globalizzazione; il significato dell'Unione Europea e l'urgenza di una nuova governance mondiale. Ogni tema, nell'orizzonte di riferimento della Dottrina Sociale della Chiesa e sulla base della relazione introduttiva - Definire la giustizia: la dignità della persona e bene comune - è stato trattato offrendo in una prima parte dell'articolo una sintesi dell'attuale status quaestionis e presentando poi una o più proposte originali, frutto di studio e/o di prime esperienze professionali. In questo lungo lavoro di analisi e confronto sta il pregio dell'opera, frutto del lavoro, coordinato da un team di qualificati docenti, dei giovani iscritti al Corso Sinderesi del Centro Alberto Hurtado della Pontificia Università Gregoriana. Il testo si offre come esempio e modello di confronto serio, da parte delle nuove generazioni, con le problematiche attuali alla luce del Magistero sociale della Chiesa. Un'opportunità dove sperimentare: la possibilità di un'autentica formazione della persona, che comporti una buona capacità di orientarsi nella vita, di trovarvi significati e motivi di impegno e fiducia, rapportandosi agli altri in maniera costruttiva e non smarrendosi davanti alle difficoltà e alle contraddizioni.

The City and Its Sciences Cristoforo S. Bertuglia 2012-12-06 Recent developments in the field of urban analysis and management are investigated in this book. It is a wide-ranging collection of essays on the subject drawn from a long-term project and seminar, held in Italy, to review the state of the art and speculate on the future influence on the "sciences of the city" of the complexity concept. Of particular interest is the variety of points of view, often contrasting, and the attempt to go beyond the conventional approaches to the analysis, and the planning of the city. While focussing mainly on the European (and in particular Italian) context, the discussion is of general relevance and valuable to anyone concerned with the prospects for the city in the new millennium.

Contesti - Città, Territori, Progetti 1-2/2011. Il progetto di città nelle politiche regionali Francesco Alberti 2012-04-01 Il tema principale di questo numero è la città, in particolare le politiche messe in atto dalle amministrazioni regionali per la riqualificazione del tessuto urbano e la progettazione dei nuovi insediamenti. In particolare viene preso in esame quanto disposto dalla normativa regionale e nazionale in materia, mettendolo a confronto con quanto deliberato in altri paesi europei. Segue una serie di relazioni sia su casi specificatamente toscani che su temi a carattere più generale. La seconda parte ospita la "Carta della riqualificazione delle città toscane", sintesi delle riflessioni critiche sul tema della riqualificazione della città e delle pratiche messe a punto nell'ultimo trentennio sia in Italia che in Europa per la soluzione dei problemi ad esso legati.

Un'altra modernità Renzo Riboldazzi 2016-01-03T00:00:00+01:00 La storiografia sul rinnovamento dell'architettura e dell'urbanistica del Novecento ha dato grande spazio al contributo dei Congrès Internationaux d'Architecture Moderne (Ciam) che si tengono tra il 1928 e il 1959, mentre ha finora trascurato i congressi dell'International Federation for Housing and Town Planning (Ifhtp), erede della gloriosa Garden Cities and Town Planning Association fondata da Ebenezer Howard alle soglie del primo conflitto mondiale. È in questo ambito che il libro getta il suo sguardo tentando di ricostruire, a partire dal 1923, il portato di questa esperienza alla maturazione della cultura urbanistica moderna in un periodo caratterizzato da grandi trasformazioni urbane e territoriali e forti tensioni politiche, economiche e sociali. Una riflessione che si ferma al secondo conflitto mondiale quando, stravolta dalla guerra e dalla ricostruzione, cambierà la natura stessa delle sfide che la modernità novecentesca aveva posto sul tappeto all'alba del nuovo secolo. Renzo Riboldazzi (Novara, 1966), architetto, svolge attività didattica e di ricerca al Politecnico di Milano. Al centro dei suoi interessi culturali e professionali ci sono il progetto e la ricerca storico-critica nei campi dell'architettura e dell'urbanistica. Alla Facoltà di Architettura Civile ha insegnato, dal 2004, Progettazione urbanistica, Fondamenti di urbanistica, Analisi della città e del territorio e ha tenuto cicli di lezioni di Cultura del Progetto urbano. Presso il Dipartimento di Progettazione dell'architettura si è occupato dal 1998, oltre che del coordinamento delle attività dell'Archivio Piero Bottoni, di studi sulla cultura urbanistica moderna e contemporanea. Ha organizzato incontri e seminari e curato mostre di architettura, urbanistica, pittura e scultura. Dal 2008 è condirettore dell'Archivio Cesare Chiodi. Tra le sue pubblicazioni: (a cura di), Piero Bottoni a Capri. Architettura e paesaggio, 1958-1969, con una testimonianza di Cesare de Seta e uno scritto inedito di Piero Bottoni, Ronca, Cremona 2003; (a cura di), Cesare Chiodi, Scritti sulla città e il territorio, 1913-1969, Unicopli, Milano 2006; Una città policentrica. Urbanistica: fondamenti, procedure e criticità Lorenzo Camarda 2014-11-18T00:00:00+01:00 Il progressivo modificarsi delle norme in materia di urbanistica, che si rincorrono frettolosamente (e anche disorganicamente) a causa di una differenziata legislazione regionale e a un'incessante e derogatoria legislazione di settore, ma soprattutto la necessità di un costante aggiornamento hanno orientato Autore ed Editore a ricorrere a un libro digitale. Una novità editoriale, aggiornata al decreto "Sblocca Italia", pensata e pubblicata al fine di fornire una consultazione veloce e rispondere alle esigenze di primo intervento dei professionisti del settore (urbanisti, architetti, ingegneri, geometri, tecnici della prevenzione e della protezione della salute nei luoghi di lavoro, oltre agli operatori del diritto che sono i primi destinatari) con contenuti che non si limitano alla pianificazione, ma si estendono all'edilizia, alla sicurezza nei cantieri e alla tutela dell'ambiente, conferendo alla materia una dimensione integrata multidisciplinare. Con un taglio che evidenzia il profilo igienico-sanitario e che ha l'ambizione di orientare il lettore ad attraversare il mare magnum
