Strategic Public Relations Leadership Anne Gregory 2022-07-22 Public relations professionals are operating in an increasingly challenging and complex environment. Pressures from outside the organisation include new accountabilities, empowered stakeholders, increased public cynicism and a new communication landscape. Internally, there are increasing demands to demonstrate a strategic contribution, alongside a requirement to coach and counsel senior managers exposed to these environmental pressures. This revised and updated edition provides a framework to enable public relations professionals to clearly articulate and demonstrate their own contribution to organisational effectiveness, while also setting out the specific capabilities public relations leaders must exhibit to operate at the highest levels of the organisation. This edition further develops the pioneering approach to integrating thinking around public relations, leadership, and strategy. It has been updated comprehensively to address contemporary developments and introduce new research and fresh perspectives from the authors. New to this edition are insights from Chief Executives on what they expect from public relations leaders and a comprehensive set of capabilities which scope the demanding role of professionals at the top of their game. Concise and practical, this textbook is suitable for MBA and other postgraduate and executive education qualifications in Public Relations and Corporate Communications - especially for those students who wish to pursue a successful career as a professional public relations specialist, able to operate strategically at the top of successful organisations.

Utopia for Realists Rutger Bregman 2017-03-14 Universal basic income. A 15-hour workweek. Open borders. Does it sound too good to be true? One of Europe's leading young thinkers shows how we can build an ideal world today. "A more politically radical Malcolm Gladwell." -- New York Times After working all day at jobs we often dislike, we buy things we don't need. Rutger Bregman, a Dutch historian, reminds us it needn't be this way -- and in some places it isn't. Rutger Bregman's TED Talk about universal basic income seemed impossibly radical when he delivered it in 2014. A quarter of a million views later, the subject of that video is being seriously considered by leading economists and government leaders the world over. It's just one of the many utopian ideas that Bregman proves is possible today. *Utopia for Realists* is one of those rare books that takes you by surprise and challenges what you think can happen. From a Canadian city that once completely eradicated poverty, to Richard Nixon's near implementation of a basic income for millions of Americans, Bregman takes us on a journey through history, and beyond the traditional left-right divides, as he champions ideas whose time have come. Every progressive milestone of civilization -- from the end of slavery to the beginning of democracy -- was once considered a utopian fantasy. Bregman's book, both challenging and bracing, demonstrates that new utopian ideas, like the elimination of poverty and the creation of the fifteen-hour workweek, can become a reality in our lifetime. Being unrealistic and unreasonable can in fact make the impossible inevitable, and it is the only way to build the ideal world.

Feminism and Ecology Mary Mellor 2013-04-23 The relationship between feminism and ecology has grown in importance in recent years. This book provides a comprehensive introduction to the ecofeminist movement and its history, as well as an extended analysis of the main perspectives within it. Mellor examines the connections between feminism and the green movement, and outlines the contributions of the major participants, while contextualizing them within a wider range of debates. She re-examines classic feminist texts from an ecofeminist perspective, and explores the relationship between ecofeminism and other ecological movements, such as 'deep' ecology, social ecology and ecosocialism. Mellor discusses the association of women with biology and 'nature', and argues that the relationship between women and the environment can help us to understand the relationship between humanity and the natural world. Against the trends towards radical economic liberalism, global capitalism and postmodernist pluralism, she argues that there is within the feminist and green movements the basis of a new radical movement which draws on the principles of both. A useful and engaging account of feminist perspectives on ecology, the book will be welcomed by students and researchers in feminism and gender studies, sociology and political theory.

Teaching Tech Together Greg Wilson 2019-10-08 Hundreds of grassroots groups have sprung up around the world to teach programming, web design, robotics, and other skills outside traditional classrooms. These groups exist so that people don't have to learn these things on their own, but ironically, their founders and instructors are often teaching themselves how to teach. There's a better way. This book presents evidence-based practices that will help you create and deliver lessons that work and build a teaching community around them. Topics include the differences between different kinds of learners, diagnosing and correcting misunderstandings, teaching as a performance art, what motivates and demotivates adult learners, how to be a good ally, fostering a healthy community, getting the word out, and building alliances with like-minded groups. The book includes over a hundred exercises that can be done individually or in groups, over 350 references, and a glossary to help you navigate educational jargon.

Entrepreneurship and Innovation Policy and the Economy Josh Lerner 2022-03-31

Entrepreneurship and innovation are widely recognized as key drivers of long-term economic growth. Understanding the forces that influence them is essential for policy design. Building on the twenty-year legacy of the NBER Innovation Policy and the Economy series, Entrepreneurship and Innovation Policy and the Economy showcases recent research on entrepreneurship and entrepreneurship policy. The volume reports on five research projects. First, leveraging detailed data from the Business Formation Statistics, John Haltiwanger documents a striking uptick in new business formation during the pandemic, and considers the future economic impact of this renewed rate of business dynamism. The next two chapters focus on disparities in the degree of inclusion of women and people of color in innovation and entrepreneurship. Lisa Cook, Janet Gerson, and Jennifer Kuan examine the history of unequal access to education, training, and the practice and commercialization of invention, and the subsequent loss in innovative capacity and productivity. They also consider the potential effects of policies that address these inequalities. Mercedes Delgado and Fiona Murray complement this analysis by characterizing and analyzing the gender gap in patented innovation, including the substantial variation in inclusion of women across locations,

industries, and individual firms. The remaining chapters focus on the organization of research and commercialization. Chiara Franzoni, Paula Stephan, and Reinhilde Veugelers consider the operation of current research funding systems with regard to risky research projects. They also describe the consequences of documented biases against novelty in funding decisions in the context of research on mRNA technology. Drawing on historical lessons from World War II as well as current analysis of innovation policy during COVID-19, Daniel Gross and Bhaven Sampat consider the unique challenges that arise when a crisis necessitates unusually rapid innovation and the deployment, at scale, of research findings.
