The Fakeaway Manual Fergal Connolly 2018-09-04 Settling down with your favorite takeaway might be easier than ever, with online ordering and delivery to your door, but this is an expensive way to eat and it's impossible to ensure top quality ingredients, or food at its crispy, piping-hot best. The Fakeaway Manual contains the global scope of our most popular take outs and street food, crossing the contemporary and the traditional with a collection of outstanding recipes that will withstand the fashions of food and time. The book includes classic, familiar dishes as well as emerging contemporary street and festival dishes, and covers Indian, Asian, American, British and South American cuisines with fresh and authentic recipes. Author Fergal Connolly deconstructs intimidating methods and techniques to make everything entirely accessible, from deep frying chicken katsu to flaming marinated lamb for a spicy schwarma.

**The Grand Domestic Revolution** Dolores Hayden 1982-06-17 "This is a book that is full of things I have never seen before, and full of new things to say about things I thought I knew well. It is a book about houses and about culture and about how each affects the other, and it must stand as one of the major works on the history of modern housing." - Paul Goldberger, The New York Times Book Review Long before Betty Friedan wrote about "the problem that had no name" in *The Feminine Mystique*, a group of American feminists whose leaders included Melusina Fay Peirce, Mary Livermore, and Charlotte Perkins Gilman campaigned against women's isolation in the home and confinement to domestic life as the basic cause of their unequal position in society. *The Grand Domestic Revolution* reveals the innovative plans and visionary strategies of these persistent women, who developed the theory and practice of what Hayden calls "material feminism" in pursuit of economic independence and social equality. The material feminists' ambitious goals of socialized housework and child care meant revolutionizing the American home and creating community services. They raised fundamental questions about the relationship of men, women, and children in industrial society. Hayden analyzes the utopian and pragmatic sources of the feminists' programs for domestic reorganization and the conflicts over class, race, and gender they encountered. This history of a little-known intellectual tradition challenging patriarchal notions of "women's place" and "women's work" offers a new interpretation of the history of American feminism and a new interpretation of the history of American housing and urban design. Hayden shows how the material feminists' political ideology led them to design physical space to create housewives' cooperatives, kitchenless houses, day-care centers, public kitchens, and community dining halls. In their insistence that women be paid for domestic labor, the material feminists won the support of many suffragists and of novelists such as Edward Bellamy and William Dean Howells, who helped popularize their cause. Ebenezer Howard, Rudolph Schindler, and Lewis Mumford were among the many progressive architects and planners who promoted the reorganization of housing and neighborhoods around the needs of employed women. In reevaluating these early feminist plans for the environmental and economic transformation of American society and in recording the vigorous and many-sided arguments that evolved around the issues they raised, Hayden brings to light basic economic and spacial contradictions which outdated forms of housing and inadequate community services still create for American women and for their families.

The Earth Care Manual Patrick Whitefield 2004 The long-awaited exploration of permaculture specifically for cooler Northern Hemisphere climates is finally here! Already regarded as the definitive book on the subject, *The Earth Care Manual* is accessible to the curious novice as much as it is essential for the knowledgeable practitioner. Permaculture started out in the 1970s as a sustainable alternative to modern agriculture, taking its inspiration from natural ecosystems. It has always placed an emphasis on gardening, but since then it has expanded to include many other aspects, from community design to energy use. It can be seen as an overall framework that puts a diversity of green ideas into perspective. Its aims are low work, high output, and genuine sustainability.

Food Britannia Andrew Webb 2012-08-31 British food has not traditionally been regarded as one of the world's great cuisines, and yet Stilton cheese, Scottish raspberries, Goosnargh duck and Welsh lamb are internationally renowned and celebrated. And then there are all those dishes and recipes that inspire passionate loyalty among the initiated: Whitby lemon buns and banoffi pie, for example; pan haggerty and Henderson's relish. All are as integral a part of the country's landscape as green fields, rolling hills and rocky coastline. In *Food Britannia*, Andrew Webb travels the country to bring together a treasury of regional dishes, traditional recipes, outstanding ingredients and heroic local producers. He investigates the history of saffron farming in the UK, tastes the first whisky to be produced in Wales for one hundred years, and tracks down the New Forest's foremost expert on wild mushrooms. And along the way, he uncovers some historical surprises about our national cuisine. Did you know, for example, that the method for making clotted cream, that stalwart of the cream tea, was probably introduced from the Middle East? Or that our very own fish and chips may have started life as a Jewish-Portuguese dish? Or that Alfred Bird invented his famous custard powder because his wife couldn't eat eggs? The result is a rich and kaleidoscopic survey of a remarkably vibrant food scene, steeped in history but full of fresh ideas for the future: proof, if proof were needed, that British food has come of age.

**Slides for Students** Gary D. Fisk 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. *Slides for Students* does just that. *Slides for Students* is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, *Slides for Students* discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded "death by powerpoint."

**Good Economics for Hard Times** Abhijit V. Banerjee 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

**Seriously Funny** Barbara Hamby 2010 Can serious poetry be funny? Chaucer and Shakespeare would say yes, and so do the authors of these 187 poems that address timeless concerns but that also include comic elements. Beginning with the Beats and the New York School and continuing with both marquee-name poets and newcomers, Seriously Funny ranges from poems that are capsized by their own tomfoolery to those that glow with quiet wit to ones in which a laugh erupts in the midst of terrible darkness. Most of the selections were made in the editors' battered compact car, otherwise known as the Seriously Funny Mobile Unit. During the two years in which Barbara Hamby and David Kirby made their choices, they'd set out with a couple of boxes of books in the back seat, and whoever wasn't driving read to the other. When they found that a poem made both of them think but laugh as well, they earmarked it. Readers will find a true generosity in these poems, an eagerness to share ideas and emotions and also to entertain. The singer Ali Farka Tour said that honey is never good when it's only in one mouth, and the editors of Seriously Funny hope its readers find much to share with others.

**A God Entranced Vision of All Things** John Piper 2004-08-10 "Useful men are some of the greatest blessings of a people. To have many such is more for a people's happiness than almost anything, unless it be God's own gracious, spiritual presence amongst them; they are precious gifts of heaven." Certainly one of the most useful men in evangelical history was the man who preached those words, pastor and theologian Jonathan Edwards. Commemorating his 300th birthday, general editors John Piper and Justin Taylor chose ten essays that highlight different aspects of Edwards's life and legacy and show how his teachings are just as relevant today as they were three centuries ago. Even within the church, many people know little more about Edwards than what is printed in American history textbooks—most often, excerpts from his best-known sermon, "Sinners in the Hands of an Angry God." They unjustly envision Edwards preaching only fire and brimstone to frightened listeners. But he knew and preached God's heaven as much as Satan's hell. He was a humble and joyful servant, striving to glorify God in his personal life and public ministry. This book's contributors investigate the character and teachings of the man who preached from a deep concern for the unsaved and a passionate desire for God. Studying the life and works of this dynamic Great Awakening figure will rouse slumbering Christians, prompting them to view the world through Edwards's God-centered lens.

**The Sumerians** Samuel Noah Kramer 2010-09-17 The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless

derive stimulation."—American Journal of Archaeology "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal
