The Economics of Tourism Destinations Guido Candela 2012-06-30 The book aims at providing an overview of the main economic issues related to tourism activities. While tourism is an important sector, contributing to more than 10% of the European Union's GDP, research and teaching at the university level has only recently grown to a considerable level, and the field still lacks a firm research methodology. This book approaches tourism economics as an applied field of study in which tourism markets are represented as imperfect markets, with asymmetric and incomplete information among agents, bounded rationality, and with a strong presence of externalities and public goods. The economic issues studied in the book are approached both intuitively, largely using examples and case studies, and formally, with mathematical formalizations in text boxes.

Space in the Medieval West Dr Fanny Madeline 2014-07-28 In the last two decades, research on spatial paradigms and practices has gained momentum across disciplines and vastly different periods, including the field of medieval studies. Responding to this 'spatial turn' in the humanities, the essays collected here generate new ideas about how medieval space was defined, constructed, and practiced in Europe, particularly in France. Essays are grouped thematically and in three parts, from specific sites, through the broader shaping of territory by means of socially constructed networks, to the larger geographical realm. The resulting collection builds on existing scholarship but brings new insight, situating medieval constructions of space in relation to contemporary conceptions of the subject.

Slow Wine 2014 doesn't simply select and review Italy's finest bottles. An essential guide for armchair oenophiles and better still for those who get out of that chair once in a while: over half the producers listed will offer a discount of at least 10% to anyone who visits them with a copy of Slow Wine in hand.

Philosophy of Science in the Twentieth Century Donald Gillies 1993-04-08 This book traces the development during the 20th century of four central themes in the philosophy of science. The themes, chosen for their importance are expounded in a way which does not presuppose any previous knowledge of philosophy or science. The book thus constitutes an excellent introduction to the philosophy of science.

The Lost Tetrads of Marshall McLuhan Marshall McLuhan 2017-05 Marshall McLuhan was the visionary theorist best known for coining the phrase "the medium is the message." His work prefigures and underlies the themes of writers and artists as disparate and essential as Andy Warhol, Nam June Paik, Neil Postman, Seth Godin, Barbara Kruger, and Douglas Rushkoff, among countless others. Shortly before his death, together with his media scholar son Eric, McLuhan worked on a new literary/visual code—almost a cross between hieroglyphics and poetry—that he called "the tetrads." This was the ultimate theoretical framework for analyzing any new medium, a koan-like poetics that transcends traditional means of discourse. Some of the tetrads were published, but only a few. Now Eric McLuhan has recovered all the "lost" tetrads that he and his father

developed, and accompanies them here with accessible explanations of how they function.

Child Migration and Human Rights in a Global Age Jacqueline Bhabha 2016-05-17 The first comprehensive look at the global dilemma of child migration Why, despite massive public concern, is child trafficking on the rise? Why are unaccompanied migrant children living on the streets and routinely threatened with deportation to their countries of origin? Why do so many young refugees of war-ravaged and failed states end up warehoused in camps, victimized by the sex trade, or enlisted as child soldiers? This book provides the first comprehensive account of the widespread but neglected global phenomenon of child migration, exploring the complex challenges facing children and adolescents who move to join their families, those who are moved to be exploited, and those who move simply to survive. Spanning several continents and drawing on the stories of young migrants, *Child Migration and Human Rights in a Global Age* provides a comprehensive account of the widespread and growing but neglected global phenomenon of child migration and child trafficking. It looks at the often-insurmountable obstacles we place in the paths of adolescents fleeing war, exploitation, or destitution; the contradictory elements in our approach to international adoption; and the limited support we give to young people brutalized as child soldiers. Part history, part in-depth legal and political analysis, this powerful book challenges the prevailing wisdom that widespread protection failures are caused by our lack of awareness of the problems these children face, arguing instead that our societies have a deep-seated ambivalence to migrant children—one we need to address head-on. *Child Migration and Human Rights in a Global Age* offers a road map for doing just that, and makes a compelling and courageous case for an international ethics of children's human rights.

The Making of Medieval Sardinia 2021-08-16 This landmark volume combines classic and revisionist essays to explore the historiography of Sardinia's exceptional transition from an island of the Byzantine empire to the rise of its own autonomous rulers, the iudikes, by the 1000s.

La storia della Biblioteca della FAO 65° anniversario Food and Agriculture Organization of the United Nations 2018-05-11 La Biblioteca della FAO celebra il suo 65° anniversario nel 2017. La pubblicazione vuole commemorare questo evento offrendo una panoramica degli eventi storici che hanno portato alla nascita della biblioteca ed alla sua evoluzione fino ad oggi, illustrando l'importante ruolo svolto nella gestione delle informazioni sull'agricoltura a livello mondiale. La storia della Biblioteca della FAO ha inizio con la sua antesignana, la Biblioteca dell'Istituto Internazionale di Agricoltura (IIA). L'IIA fu fondato a Roma nel 1905 da Re Vittorio Emanuele III per realizzare il sogno di David Lubin (1849-1909), cittadino statunitense di origini polacche che aveva dedicato la sua vita al servizio di quello che chiamava "gli Stati Uniti del Mondo"¹. Quando venne fondata nel 1945, la FAO prese sotto la propria egida l'IIA poiché "la differenza tra le due organizzazioni riguarda più le dimensioni che gli intenti fondamentali. Alla base dei programmi di entrambe vi è la preoccupazione per il contadino e per l'agricoltura"². Tale connubio riguardava principalmente la Biblioteca dell'IIA, che a quel tempo comprendeva una delle più grandi collezioni al mondo relativa alla ricerca agricola, con i suoi 400.000 volumi sull'agricoltura, tra cui una raccolta di 400 libri rari e 32 incunaboli, un'eredità preziosa per una biblioteca che ancora oggi ha l'obiettivo di sostenere la FAO nel suo ruolo di diffondere la conoscenza. La Biblioteca della FAO venne inaugurata ufficialmente a Roma nel giugno del 1952 con il nome Biblioteca David Lubin, "come riconoscimento della lungimiranza, della leadership e dello straordinario contributo di David Lubin alla cooperazione internazionale nel settore dell'agricoltura"³. Nel corso degli ultimi 65 anni la Biblioteca ha accorpato al patrimonio dell'IIA la sua collezione composta da pubblicazioni FAO e non, raccogliendo e conservando ogni singolo documento della FAO pubblicato. Oggi la Biblioteca della FAO non solo ospita un milione e mezzo di volumi, che costituiscono la memoria dell'Organizzazione, ma svolge anche un ruolo di primo piano nella digitalizzazione dei contenuti, nella disseminazione delle pubblicazioni della FAO e rappresenta una fonte inesauribile di informazioni sull'agricoltura a livello mondiale.

Slow Wine Guide USA Slow Wine Guide 2022-02-15 A year in the life of the vineyards and wines of the USA Slow Wine Guide USA is a new and revolutionary guide to the wines of California, Oregon, New York, and Washington. Thanks to the help of a handful of expert contributors, we've selected the best wineries from each state and reviewed their most outstanding bottles. The idea behind Slow Wine is simple: it acknowledges the unique stories of people and vineyards, of grape varieties and landscapes, and of their wines. The awareness that wine is more than just liquid in a glass helps wine lovers make better, more conscious choices and enhances the very enjoyment of this beverage. Since its beginnings in Italy twelve years ago, Slow Wine has combined its tasting sessions with equally important moments of exchange and debate with producers. The direct contact with winegrowers and winemakers allows for a genuine, authentic, and always up-to-date report on what's happening in America's vineyards and cellars. Each winery receives a review divided in three sections: the first one is dedicated to the people who live and work at the winery, the second to the vineyards and the way they're farmed, and the third to the finest wines currently available on the market. The very best wines are awarded the Top Wine accolade. Among these we have the Slow Wines—which beyond their outstanding sensory quality are of particular interest for their sense of place, environmental sustainability or historical value—and the Everyday Wines, representing excellent value at prices within \$30. The most interesting wineries on the other hand are awarded the Snail, for the way they interpret Slow Food values (sensory perceptions, territory, environment, identity) while offering good value for money; the Bottle, to wineries whose wines are of outstanding sensory quality throughout the range; the Coin to those estates offering excellent value for money.

65 Years of the FAO Library, 1952-2017 Food and Agriculture Organization of the United Nations 2018-05-10 The Story of the FAO Library - 65th Anniversary 1952-2017 is a journey through the events that led to what has become one of the world's finest collections of materials (both digital and print) on food, agriculture and international development. Today, the library is the depository of over one and a half million volumes, plus a collection of 400 rare books, 32 incunabula (books printed before 1501) and thousands of digital publications. Its origins lie in the International Institute of Agriculture (IIA), founded in Rome in 1905 by King Vittorio Emanuele III to defend and modernize agriculture, with the encouragement of David Lubin, an American citizen and passionate promoter of agricultural knowledge. Lubin committed to creating and developing the Institute's library, soon the reference point for research centres, governments and other agencies specialized in agricultural matters. In the aftermath of World War II, the legacy of the IIA and its unique library were closely safeguarded by FAO. FAO's library, which officially opened in 1952, was named after Lubin "in recognition of the foresight, leadership, and outstanding contribution ... to international co-operation in the field of

agriculture." This publication unveils the library's precious collections, ranging from those inherited from the Marquise Raffaele Cappelli, second President of the IIA, to the atlases, periodicals, yearbooks and even an edition of Alexander von Humboldt's *Cosmos* from the Centre International de Sylviculture collection. The publication's text is accompanied by photographs and images taken from the archives, showing rare pieces ranging from the incunabula to exquisite hand-drawn illustrations. And what about today? Already as of the 1970s, the library had embarked on digitalization, providing access to technologies and supporting libraries in some 90 developing countries via FAO's decentralized offices. As the book reveals, the Library continues to rise to the digital challenge, maintaining its pivotal role in knowledge dissemination.

The Architecture of Pica Ciamarra Associati Antonietta Iolanda Lima 2019-04 Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlights the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embrace innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life.

World Economic Outlook, April 2019 International Monetary Fund. Research Dept. 2019-04-09 After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies. China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States. The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards; investment dropped in Italy as sovereign spreads widened; and external demand, especially from emerging Asia, softened. Elsewhere, natural disasters hurt activity in Japan. Trade tensions increasingly took a toll on business confidence and, so, financial market sentiment worsened, with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year, weighing on global demand. Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US-China trade deal, but they remain slightly more restrictive than in the fall.

Innovation and Technological Catch-Up Elisa Giuliani 2011-01-01 'This book overturns the old paradigm ideas about natural-resource-based activities. It sheds light on the new opportunities for technological dynamism and catching-up by using science to open novel directions in traditional sectors. It should become a classic in what I expect will be a very important academic debate and a new trend in development policy.' - Carlota Perez, Tallinn University of Technology, Estonia, Cambridge University and University of Sussex, UK 'This excellent book provides a deep understanding of why and how emerging countries are able to catch-up and enter international markets in an industry that once was considered as traditional, but which has now become a relatively articulated and sciencebased sectoral system.' - Franco Malerba, KITeS, Bocconi University, Italy 'This excellent book demonstrates better than any other I know the strengths and limits of the concept of a national system of innovation for understanding economic development today. Any careful student of innovation or development will want to read it.' - Charles Sabel, Columbia Law School, US 'In the New World, viticulture and wine production has had to develop with verve and enthusiasm, to be able to survive and to flourish. In countries like Chile and Argentina, the continuing decline of domestic wine consumption has forced technicians and entrepreneurs to conquer the world with innovation and technology, to produce wines of international taste and to attract potential buyers to these markets. This book is a very professional account of these phenomena, which have profoundly changed the marketing of wines in the past 20 years.' - Aurelio Montes, President of Viña Montes, Chile 'This book takes a fresh look at the innovations that have changed the global wine sector, presenting established thinking in a new light. Building on the world's knowledge base

in wine production, the book encourages novel thinking for both Old World and New World producers. The content is topical, current and well written. This is a must-read for anyone with an interest in wine innovation.'

Jole de Boer is just fifteen years old the first time she accompanies her father—a tobacco grower named Augusto—as he smuggles his product across the Italian border into Austria. She knows the dangers of the treacherous high mountain passes—border guards, brigands, wild animals, ferocious weather—but she is proud that her father has asked her to join him. After all, without the extra money Augusto’s smuggling brings in, their family would starve. But when Augusto mysteriously disappears during one of his trips, Jole must retrace the route he took to both find a buyer for her family’s tobacco—and the truth behind her father’s disappearance. An epic tale of revenge, corruption, and salvation, *The Soul of the Border* is an unforgettable journey into the wild.

A Natural History of Wine Ian Tattersall 2015-11-28 “Wine is art. Wine is ritual. Wine is culture. Wine is romance. But in the hands of Tattersall and DeSalle . . . we learn that wine is also science.”—Neil deGrasse Tyson *A Wall Street Journal* Best Book for Wine Lovers An excellent bottle of wine can be the spark that inspires a brainstorming session. Such was the case for Ian Tattersall and Rob DeSalle, scientists who frequently collaborate on book and museum exhibition projects. When the conversation turned to wine one evening, it almost inevitably led the two—one a palaeoanthropologist, the other a molecular biologist—to begin exploring the many intersections between science and wine. This book presents their fascinating, freewheeling answers to the question “What can science tell us about wine?” And vice versa. Conversational and accessible to everyone, this colorfully illustrated book embraces almost every imaginable area of the sciences, from microbiology and ecology (for an understanding of what creates this complex beverage) to physiology and neurobiology (for insight into the effects of wine on the mind and body). The authors draw on physics, chemistry, biochemistry, evolution, and climatology, and they expand the discussion to include insights from anthropology, primatology, entomology, Neolithic archaeology, and even classical history. The resulting volume is indispensable for anyone who wishes to appreciate wine to its fullest. “Chemistry. Evolutionary biology. Genetics. This book is an excellent layman’s refresher on these diverse topics, and many more, and how they fit into the grand scheme of wine . . . A fact-packed and accessible read that goes a long way toward explaining why and how wine became such an important component in our enjoyment of the natural world.”—*Wine Spectator*
