October 16, 1943/Eight Jews Giacomo Debenedetti 2020-11-15 For more than fifty years, Giacomo Debenedetti's October 16, 1943 has been considered one of the best and most accurate accounts of the shockingly brief and efficient roundup of more than one thousand Roman Jews from the oldest Jewish community in Europe for the gas chambers of Auschwitz. Completed a year after the event, Debenedetti's intimate details and vivid glimpses into the lives of the victims are especially poignant because Debenedetti himself was there to witness the event, which forced him and his entire family into hiding. Eight Jews, the companion piece to October 16, 1943, was written in response to testimony about the Ardeatine Cave Massacres of March 24, 1944. In this essay, Debenedetti offers insights into that grisly horror and into assumptions about racial equality. Both of these stunning works are appearing together, along with Alberto Moravia's preface to Debenedetti's October 16, 1943, for the first time in an American translation. October 16, 1943/Eight Jews gives American readers a first glimpse into the extraordinary mind of the man who was Italy's foremost critic of twentieth-century literature. In addition to probing the deeper, haunting questions of the Holocaust, Debenedetti briefly describes the seizure of the Roman Jewish community's library of early manuscripts and incunables, the most valuable Jewish library in all of Italy. Following the roundup, this library was never seen again. Award-winning translator Estelle Gilson offers an additional essay on the history of the library and modern-day attempts to locate it. October 16, 1943/Eight Jews is a moving work that will continue to challenge readers long after they have closed its pages.

The Mission of the Prophets Adrienne Von Speyr 2012-05-04 Adrienne von Speyr, whom Hans Urs von Balthasar credits with having an incalculable influence on his own writing, examines the mission of thirty-four figures in salvation history, from Abraham, through Moses, David, Elijah, and Isaiah, to the New Testament era and Our Lady. Mission is central to Christian life, and if we are to do justice to what God chooses for us, we can profit from looking at the chosen ones in scripture and seeing how they accepted their callings and lived out a life of service. Adrienne's contemplation on these unique missions helps us to open ourselves and respond to the call of God in our own lives.

Perhaps we are in fact disembodied brains, floating in vats at the whim of some deranged puppetmaster. The Diary of Kaspar Hauser Febbraro Paolo 2017-04-30 Part notebook, part ethical treatise, part fantasized autobiography, The Diary of Kaspar Hauser is a striking collection of forty or so haiku-like compositions, diary entries imagined to have been penned by the "idiot" Kaspar Hauser and discovered, by chance, after his death by brutal murder, among the papers of his patron, Franz Paul Webern.

1848 Mike Rapport 2009-02-03 In 1848, a violent storm of revolutions ripped through Europe. The torrent all but swept away the conservative order that had kept peace on the continent since Napoleon's defeat at Waterloo in 1815—but which in many countries had also suppressed dreams of national freedom. Political events so dramatic had not been seen in Europe since the French Revolution, and they would not be witnessed again until 1989, with the revolutions in Eastern and Central Europe. In 1848, historian Mike Rapport examines the roots of the ferment and then, with breathtaking pace, chronicles the explosive spread of violence across Europe. A vivid narrative of a complex chain of interconnected revolutions, 1848 tells the exhilarating story of Europe's violent "Spring of Nations" and traces its reverberations to the present day.

The Quotable Feynman Richard P. Feynman 2015-09-29 A treasure-trove of illuminating and entertaining quotations from beloved physicist Richard P. Feynman "Some people say, 'How can you live without knowing?' I do not know what they mean. I always live without knowing. That is easy. How you get to know is what I want to know."—Richard P. Feynman Nobel Prize-winning physicist Richard P. Feynman (1918–88) was that

rarest of creatures—a towering scientific genius who could make himself understood by anyone and who became as famous for the wit and wisdom of his popular lectures and writings as for his fundamental contributions to science. The Quotable Feynman is a treasure-trove of this revered and beloved scientist's most profound, provocative, humorous, and memorable quotations on a wide range of subjects. Carefully selected by Richard Feynman's daughter, Michelle Feynman, from his spoken and written legacy, including interviews, lectures, letters, articles, and books, the quotations are arranged under two dozen topics—from art, childhood, discovery, family, imagination, and humor to mathematics, politics, science, religion, and uncertainty. These brief passages—about 500 in all—vividly demonstrate Feynman's astonishing yet playful intelligence, and his almost constitutional inability to be anything other than unconventional, engaging, and inspiring. The result is a unique, illuminating, and enjoyable portrait of Feynman's life and thought that will be cherished by his fans at the same time that it provides an ideal introduction to Feynman for readers new to this intriguing and important thinker. The book features a foreword in which physicist Brian Cox pays tribute to Feynman and describes how his words reveal his particular genius, a piece in which cellist Yo-Yo Ma shares his memories of Feynman and reflects on his enduring appeal, and a personal preface by Michelle Feynman. It also includes some previously unpublished quotations, a chronology of Richard Feynman's life, some twenty photos of Feynman, and a section of memorable quotations about Feynman from other notable figures. Features: Approximately 500 quotations, some of them previously unpublished, arranged by topic A foreword by Brian Cox, reflections by Yo-Yo Ma, and a preface by Michelle Feynman A chronology of Feynman's life Some twenty photos of Feynman A section of quotations about Feynman from other notable figures Some notable quotations of Richard P. Feynman: "The thing that doesn't fit is the most interesting." "Thinking is nothing but talking to yourself inside." "It is wonderful if you can find something you love to do in your youth which is big enough to sustain your interest through all your adult life. Because, whatever it is, if you do it well enough (and you will, if you truly love it), people will pay you to do what you want to do anyway." "I'd hate to die twice. It's so boring."

Atlas of Poetic Zoology Emmanuelle Pouydebat 2019-05-07 A catalog of wonders, from walking fish to self-medicating chimpanzees. This Atlas of Poetic Zoology leads readers into a world of wonders where turtles fly under the sea, lizards walk on water, insects impersonate flowers, birds don't fly, frogs come back from the dead, and virgin sharks give birth. Animals, writes Emmanuelle Pouydebat, are lyric poets; they discover and shape the world when they sing, dance, explore, and reproduce. The animal kingdom has been evolving for millions of years, weathering many crises of extinction; this book allows us to draw inspiration from animals' enduring vitality. Pouydebat's text, accompanied by striking color illustrations by artist Julie Terrazoni, offers a catalog of wondrous beings. Pouydebat describes the African bush elephant—the biggest land mammal of them all, but the evolutionary descendant of a tiny animal that stood less than fifty centimeters (nineteen inches) high sixty million years ago; the scaly, toothless pangolin, the world's most endangered mammal—and perhaps its most atypical; the red-lipped batfish, which walks, rather than swims, across the ocean floor; and the great black cockatoo, a gifted percussionist. Chimpanzees, she tells us, self-medicate with medicinal plants; the jellyfish, under stress, reverts to juvenile polyp-hood; and the sweetly named honey badger feeds on reptiles, termites, scorpions, and earthworms. Pouydebat, a researcher at the French Museum of Natural History, and Terrazoni capture the astonishment promised by any excursion into nature—the happiness that comes from watching a dragonfly, spider, frog, lizard, elephant, parrot, mouse, orangutan, or ladybug. It's the joy of witnessing life itself. We need only open our eyes to see.

As readers travel from the the Maya heartland of Guatemala and the Yucatan to the Aztec stronghold of the Valley of Mexico, and all the way to the northern hinterlands of Mesoamerica, they will gain an appreciation of both the unity and the diversity of the region's architecture. The concluding chapter is devoted to the descriptions of architecture that have survived in Mayan and Aztec texts; it includes a unique and valuable glossary of the relevant glyphs. The main text is illustrated with color photographs of the spectacular remains of pyramids, palaces, and plazas, while a scholarly appendix presents maps, plans, and drawings of the most important sites and structures.
