Handbook of Mixed Methods in Social & Behavioral Research Abbas Tashakkori 2003 The Handbook contains a gold mine of articles by leading scholars on what has come to be known as the third methodological movement in social research. Aimed at surveying the differing viewpoints and disciplinary approaches of mixed methods, this breakthrough book examines mixed methods from the research enterprise to paradigmatic issues to application. The book also discusses the strengths and weaknesses of mixed methods designs, and provides an array of specific examples in a variety of disciplines, from psychology to nursing. The book closes with a brief section on how to teach and perform collaborative research using a mixed methods research design. Written so that it can be used either as a pedagogical tool or as a reference for researchers, the book is rich in examples and includes a glossary, easy-to-follow diagrams, and tables to help readers become more familiar with the language and controversies in this evolving area.

Research on Technology in Social Studies Education John Lee 2009-11-01 Despite technology's presence in virtually every public school, its documented familiarity and use by youth outside of school, and the wealth of resources it provides for teaching social studies, there has been relatively little empirical research on its effectiveness for the teaching and learning of social studies. In an effort to begin to fill this gap in research literature, this book focuses on research on technology in social studies education. The objectives of this volume are threefold: to describe research frameworks, provide examples of empirical research, and chart a course for future research endeavors. Accordingly, the volume is divided into three overarching sections: research constructs and contexts, research reports, and research reviews. The need for research is particularly acute within the field of social studies and technology. As the primary purpose of social studies is to prepare the young people of today to be the citizens of tomorrow, it is necessary to examine how technology tools impact, improve, and otherwise affect teaching and learning in social studies. Given these circumstances, we have prepared this collection of research conceptualizations, reports, and reviews to achieve three goals. 1. Put forward reports on how research is being conducted in the field 2. Present findings from well-designed research studies that provide evidence of how specific applications of technology are affecting teaching and learning in social studies. 3. Showcase reviews of research in social studies It is with this framework that we edited this volume, *Research on Technology and Social Studies Education*, as an effort to address emerging concerns related to theorizing about the field and reporting research in social studies and technology. The book is divided into four sections. The first section of the book includes three descriptions of research constructs and contexts in social studies and technology. The second section is focused on research reports from studies of student learning in social studies with technology. The third section contains research reports on teachers' pedagogical considerations for using technology in social studies. In the fourth and final section, we present work that broadly reviews and critiques research in focused areas of social studies and technology. This volume contains twelve chapters, each of which focuses on social studies content and pedagogy and how the field is affected and enhanced with technology. The volume includes research and theoretical works on various topics, including digital history, digital video, geography, technology use in the K-12 social studies classroom, and artificial intelligence.

Innovation in Commoditized Service Industries Maximilian Rothkopf 2009 The passenger airline industry is a prominent service industry that is becoming increasingly commoditized. As little empirical work in this field exists, this study contributes to research by exploring how passenger airlines leverage innovation in such market conditions from a strategic and organizational view. Comprehensive case studies of a sample of eight passenger airlines constitute the empirical basis. The analysis detects patterns of innovations and draws conclusions on the strategic innovation behavior in the airline industry. The study proposes an organizational concept and a strategic approach for airlines to innovate in an increasingly commoditized market.

Scholarly Inquiry in Academic Advising Craig M. McGill 2023-07-03 Co-published with NACADAA large and growing number of academic advisors are interested in researching and publishing scholarly inquiry in academic advising. Since the first edition of this book was published, the scope of relevant inquiry has widened and deepened, and public attention and accountability is at an all-time high. This second edition of *Scholarly Inquiry in Academic Advising* provides scholar-practitioners with methodological perspectives from each of the major ways of knowing: the social sciences, including qualitative, quantitative, and now mixed methods approaches; the arts; the humanities; and the natural sciences. This book is a vade mecum for researchers in academic advising to formulate research questions, structure research, point to useful theoretical and methodological approaches, guide analysis, and help find publication outlets. Authors from a multitude of backgrounds seek to raise the level of discourse about academic advising, to illustrate its history, to reflect on how research can foster new perspectives, and to connect with and foster social justice, internationality, and inclusivity. This volume will assist those who seek to push back the frontiers of knowledge in the field, because it serves as a handbook for advising scholars, whatever their epistemological, theoretical, axiological, and methodological predilections. As for practitioners, this book "raises the bar" and conveys to even non-researching practitioners that scholarly inquiry in academic advising is a desirable avenue to professional development that must inform their practice.

Case Study Research Dan Remenyi 2013-04-01 Although the case study research method is increasingly important and used by many researchers it is still not well understood. *Case Study Research in the Quick Guides Series* explains the main issues which have to be considered before case study research is undertaken as well as providing check lists as to how to go about using this research approach. Case study research is not an easy option and this book points out where the challenges are and what needs to be done to become a competent case study researcher. Issues which are given particular attention include different types of case study, the issue of how many cases are required, research proposals and research protocols when using case studies, the collection and analysis of data. *Case Study Research* also addressed the analysis of case study data, the case study write up and how to evaluate a case study.

On the Nature of Human Resource Development Monica Lee 2016-03-31 The nature of human resource development (HRD) has been, and remains, a contested topic – the debate was sparked in part by Monica Lee’s seminal 2001 paper which refused to define the discipline of HRD, but has been accentuated by increasing globalization, political unrest, inequality and the erosion of boundaries. Should HRD now be seen as more than ‘training,’ or a sub-function of large western bureaucracy? This book represents a very wide view of HRD: that it is at the core of our ‘selves’ and our relationships, and that we continually co-create ourselves, our organisations and societies. These ideas are hung upon a model of Holistic Agency, and supported from sources as diverse as evolutionary psychology, science fiction, the challenges of transitional economies, and the structural uncertainties of contemporary society. Examining the tensions between self and other, agency and structure, the book draws inspiration from an almost-autoethnographic approach. This yields a text that is personal, entertaining, and easier to read than many academic tomes – yet considers the depth and development of the human condition, and locates HRD within that.

The Sugarcane Complex in Brazil Felix Kaup 2015-03-28 This book offers an in-depth analysis of the Brazilian sugarcane complex with a special focus on technological advances that promote sustainable development. It first examines the question why sugarcane-based ethanol from Brazil is considered a superior alternative to fossil fuel compared to other biofuels produced on an industrial scale and subsequently analyzes the most dynamic areas within the sugarcane sector with regard to relevant actors, technologies and markets in order to determine if the sector can be considered an innovation system. The empirical research presented here is based on multiple research methods and derives its data from interviews with Brazilian experts of the sugarcane sector and by a thorough literature review. The book will be of special interest to researchers and practitioners interested in understanding the key mechanisms in successful innovation systems that promote a transition towards sustainable development and mobility.

The SAGE Handbook of Social Research Methods Pertti Alasuutari 2008-02-25 The SAGE Handbook of Social Research Methods is a must for every social-science researcher. It charts the new and evolving terrain of social research methodology, covering qualitative, quantitative and mixed methods in one volume. The Handbook includes chapters on each phase of the research process: research design, methods of data collection, and the processes of analyzing and interpreting data. The volume maintains that there is much more to research than learning skills and techniques; methodology involves the fit between theory, research questions research design and analysis. The book also includes several chapters that describe historical and current directions in social research, debating crucial subjects such as qualitative versus quantitative paradigms, how

to judge the credibility of types of research, and the increasingly topical issue of research ethics. The Handbook serves as an invaluable resource for approaching research with an open mind. Information Asymmetries in Equity Crowdfunding Simon Kleinert 2019-11-26 Digital fundraising platforms diffused all over the globe and enabled entrepreneurs to exploit opportunities for which traditional financing is not yet available. While several new financing alternatives emerged, equity crowdfunding is the preferred choice for entrepreneurs with particularly innovative business models, high capital needs and growth aspirations. Although of great potential for entrepreneurs, equity crowdfunding involves severe information asymmetries because amateur funders with little investment experience invest in risky new ventures. Resolving this kind of asymmetric information is not only a condition for the success of entrepreneurial funding campaigns but also the durability of equity crowdfunding markets at all. This doctoral thesis comprises three scientific studies that shed light on information asymmetries in equity crowdfunding, its consequences, and solutions. The first study uses a mixed-method approach and explores 574 discussions that were initiated by investors to communicate with their peers and the entrepreneurs. The second study draws on a dataset of 221 funding campaigns and provides evidence for a strong signaling effect of prior financing that is of particular relevance for uncertain and less developed companies. Based on a cross-platform panel dataset of 13,531 funding days and a conjoint experiment with 127 amateur investors, the third study examines the relationship between information asymmetries and herd behavior. The results of the three empirical investigations contribute to an emerging research field and provide practical implications for entrepreneurs, platform providers, and policy makers.

Rehabilitation of Street Children in Kenya John Kabutha Mugo 2004 The reality of children working and living on the streets has posed a great challenge in Kenya. Scholars have made efforts to explain why it occurs and what might be done about the situation through various studies and research projects. However, research with these children has so far been centered mainly on the causal factors and the nature and impact of life on the streets, through bibliographic details. This book offers an analysis of present interventions. Through qualitative social research, the author focuses on the dynamics in the educational rehabilitation of children working and living on the streets of Kenya. John Kabutha Mugo studied music education at Kenyatta University in Kenya and education for children with special needs at the University of Hannover, where he was awarded a doctorate. He has written about children, child labor, and violation of children's rights.

Narrative Networks Brian Alleyne 2014-12-08 "We are invited to think about the now ubiquitous everyday practices of interpreting and producing narratives across a range of modalities. The result is a text that inspires readers to think in new ways about narratives, invites them to analyse narrative texts available on the Web and, for those who wish, suggests how best to employ specialist software." - Ann Phoenix, Institute of Education, University of London "It's high time we have a book like this. Brian Alleyne has managed to produce the best, clearest, and most comprehensive overview of narrative theory for social scientists I have yet to see. I wish I'd had access to a book like this when I was a student. It would have made my life so much easier. It will surely become the universally recognised go-to book on the subject." - David Graeber, London School of Economics & Political Science Narrative is a fundamental means whereby we make sense of our own lives and of the world around us. The stories we tell, and are being told, shape our identities, relationships and world-views. In a rapidly changing digital society where blogging and social networking have become fundamental communication channels, the platforms for the creation and exchange of all kinds of narratives have greatly expanded. This book responds to the dynamic production and consumption of stories of all kinds in popular and academic cultures. It offers a comprehensive discussion of the underlying philosophical and methodological issues of narrative and personal narrative research as well as applying these to the current digital landscape. The book provides practical guidance on data management and use of software for the narrative researcher. Illustrated with examples from a range of fields and disciplines as well as the author's own work on hacking cultures and cultural activism, this title is a must for anyone wanting to learn about narrative approaches in social research and how to conduct successful narrative research in a digital age.

Social Presence and Identity in Online Learning Patrick R. Lowenthal 2020-06-09 This book is an investigation into the role which social presence and identity play in online learning environments. Scholars across disciplines have grappled with the questions of what it means for a person to be and to interact online. In the context of online learning, these questions reflect specific concerns related to how well people can learn in a setting limited to mediated interactions and lacking various communication cues. For example, how can a teacher and students come to know each other if they cannot see each other? How can they effectively understand and communicate with each other if they are separated by space and, in many instances, time? These concerns are related to social presence and identity, both of which are complex, multi-faceted, and closely interrelated constructs. The chapters in this book consider how online learning has developed and changed over time in terms of technology, pedagogy, and familiarity. Collectively these chapters show the diverse ways that educational researchers have explored social presence and identity. They also highlight some of the nuanced concerns online educators might have in these areas. This book was originally published as a special issue of Distance Education.

Using Social Research for Social Justice Margot Rawsthorne 2023-08-15 This book will inspire the next generation of social work and human service practitioners to integrate research into their everyday social justice practice. Through highlighting the centrality of values to the task of research and the possibilities for enacting social justice through our research practice, it argues for respectful, meaningful, and just

relationships with the people with whom we do research and build knowledge; acknowledges the ongoing impact of colonialism; respects diversity; and commits to working towards social change. With First Nations Worldviews – ways of knowing, ways of being, ways of doing – weaved throughout the text, this book seeks to both reclaim ancient knowledges and disrupt Western research traditions. Divided into three sections, this book provides a strong rationale for the importance of research skills to social work and human service practice; a step-by-step guide on doing social research aimed at novice researchers; a series of examples of applied social justice projects Bringing the authors' passion for finding new ways of 'doing' research and contesting traditional research paradigms of objectivity and the scientific, it advocates for knowledge building that is participatory, emancipatory, and empowered. It will be required reading for all social work and human service students at both the undergraduate and master's level as well as professionals looking to put research into practice.

Marketing for Sustainable Tourism Xavier Font 2019-12-13 Tourism marketing has typically been seen as exploitative and fuelling hedonistic consumerism. Sustainability marketing can, however, use marketing skills and techniques to good purpose, by understanding market needs, designing more sustainable products and identifying more persuasive methods of communication to bring behavioural change. This book summarises the latest research on the theories, methods and results of marketing that seeks to make tourist destinations better places to live in, and better places to visit. It shares evidence on the motivations, mechanisms and barriers that businesses encounter, and on successes in changing consumer behaviour and pursuing sustainability goals. Particular attention is given to the methodologies of sustainable tourism marketing, to the subject's breadth and complexity, and to its many innovations. Further research is called for to fully understand what contextual aspects influence these pro-sustainability interventions to achieve which outcomes in other settings, in order to validate some of the exploratory studies discussed, and establish the feasibility of scaling up pilot studies for more general use. This book was originally published as a special issue of the Journal of Sustainable Tourism.

How Survivors of Abuse Relate to God Susan Shooter 2016-04-29 Grappling with theological issues raised by abuse, this book argues that the Church should be challenged, and ministered to, by survivors. Paying careful attention to her interviews with Christian women survivors, Shooter finds that through painful experiences of transformation they have surprisingly become potential agents of transformation for others. Shooter brings the survivors' narratives into dialogue with the story of Job and with medieval mystic Marguerite Porete's spirituality of 'annihilation'. Culminating in an engagement with contemporary feminist theology concerning power and powerlessness, there emerges a set of principles for authentic community spirituality which crosses boundaries with God, supports appropriate human boundaries and, crucially, listens attentively. Appealing to Church leaders, students, practitioners and practical theologians, this book offers a creative and ethical theological enquiry as well as some spiritual anchor points for survivors.
