The Custodians of Biodiversity Pablo Balbontín Arenas 2003 Agricultural biodiversity is a precious legacy which we have a moral duty to pass on intact to future generations. As farming systems modernise, these crucial resources risk being lost, unless effective conservation measures are put in place and sufficient recognition is given to the role of the farmer in food security and agricultural development. This publication contains a number of black and white photographs by Pablo Balbontân Arenas, which give an insight into the life and customs of small farmers who foster, maintain and use genetic diversity in traditional agricultural systems, deploying local techniques and knowledge accumulated over many centuries, focusing on four crops: wheat, rice, maize and potato. The accompanying text is written in English, Spanish and Italian.

In limine. Storie di una comunità ai margini della laguna Sauro Gelichi 2018-06-06 Il volume correda un breve percorso espositivo a pannelli (testi e immagini) per presentare i risultati delle ricerche e degli scavi svolti dal 2011 ad oggi nel sito archeologico 'Antiche Mura' di Jesolo. 'In limine' è una poesia di Eugenio Montale (introduce la raccolta "Ossi di Seppia"). Il titolo, e la poesia stessa, sono sembrati pertinenti a sintetizzare il senso del progetto archeologico sull'antica Equilo, di cui si pubblicano in questo volume i primi risultati. 'In limine' significa 'sulla soglia': indica cioè un punto di passaggio, un confine; e, nel nostro caso, metaforicamente rimarca il discrimine tra passato e presente, il luogo archeologico dove la materia inerte diviene narrazione. Qui, in limine, è anche uno spazio fisico preciso, quello dell'area delle 'Antiche Mura', luogo anche tangibile della memoria collettiva. Un luogo, ieri come oggi, ai margini. Se l'antica Equilo era stato un insediamento sul confine instabile tra mare e laguna, la moderna Jesolo, che ne ha ereditato il nome, ha lasciato che i ruderi della sua memoria restassero al di fuori del centro abitato: nel punto dove la città diventa campagna, lì sorgono le rovine dell'antica cattedrale, lì rimane il reliquiario della comunità, come una sorta di giardino 'dove affonda un morto viluppo di memorie' (di nuovo Montale). Gli archeologi hanno cercato nel tempo di recuperare quelle memorie e quel passato, con pazienza e fatica. Così, il progetto nato qualche anno fa per iniziativa del Dipartimento di Studi Umanistici dell'Università Ca' Foscari di Venezia, non costituisce che l'ultimo atto di un percorso che ha inizio dalla metà del secolo scorso, con gli scavi nell'area della cattedrale e nel vicino sito della chiesa di San Mauro. I contributi che si pubblicano in questa circostanza raccontano e sintetizzano i risultati degli ultimi anni di scavi. L'interconnessione tra le

varie strategie di indagine ci ha consentito di proporre una ricostruzione storico-insediativa del sito del tutto inedita e sorprendente.

The Years of Alienation in Italy Alessandra Diazzi 2019-06-11 *The Years of Alienation in Italy* offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.

Wisdom Poured Out Like Water J. Harold Ellens 2018-10-22 This collection presents innovative research by scholars from across the globe in celebration of Gabriele Boccaccini's sixtieth birthday and to honor his contribution to the study of early Judaism and Christianity. In harmony with Boccaccini's determination to promote the study of Second Temple Judaism in its own right, this volume includes studies on various issues raised in early Jewish apocalyptic literature (e.g., 1 Enoch, 2 Baruch, 4 Ezra), the Dead Sea Scrolls, and other early Jewish texts, from Tobit to Ben Sira to Philo and beyond. The volume also provides several investigations on early Christianity in intimate conversation with its Jewish sources, consistent with Boccaccini's efforts to transcend confessional and disciplinary divisions by situating the origins of Christianity firmly within Second Temple Judaism. Finally, the volume includes essays that look at Jewish-Christian relations in the centuries following the Second Temple period, a harvest of Boccaccini's labor to rethink the relationship between Judaism and Christianity in light of their shared yet contested heritage.

The Archaeology of Grotta Scaloria Ernestine S. Elster 2016-12-31 Grotta Scaloria, a cave in Apulia, was first discovered and explored in 1931, excavated briefly in 1967, and then excavated extensively from 1978 to 1980 by a joint UCLA-University of Genoa team, but it was never fully published. The Save Scaloria Project was organized to locate this legacy data and to enhance that information by application of the newest methods of archaeological and scientific analysis. This significant site is finally published in one comprehensive volume (and in an online archive of additional data and photographs) that gathers together the archaeological data from the upper and lower chambers of the cave. These data indicate intense ritual and quotidian use during the Neolithic period (circa 5600-5300 BCE). The Grotta Scaloria project is also important as historiography, since it illustrates a changing trajectory of research spanning three generations of European and American archaeology.

Luoghi e comunità AA. VV. 2022-02-03T00:00:00+01:00 Il volume si propone di indagare percorsi sostenibili che conducono all'attivazione di pratiche di resilienza e di rigenerazione socio-territoriale di spazi "critici" o sottoutilizzati, grazie al coinvolgimento diretto delle comunità locali. La varietà delle esperienze qui presentate si inserisce infatti nel quadro dei paradigmi della sostenibilità e della rigenerazione, i quali conferiscono al volume una cornice epistemologica coerente, che trova applicazione nell'analisi di esperienze e iniziative avviate nel contesto esteso della regione urbana milanese, diventando quest'ultimo laboratorio d'elezione nelle pratiche di risignificazione spaziale avviate dalle comunità e dai soggetti istituzionali locali. Alla base di tali esperienze si pone un forte tratto comune, rappresentato dall'impegno profuso e dalla spinta utopistica che conduce le comunità a far rivivere e risignificare i luoghi, capaci di rispondere a certe urgenze collettive non più procrastinabili. Gli Autori analizzano quattro casi di studio diversi, con l'obiettivo di restituire al lettore, seppur in misura parziale, la complessità delle relazioni attraverso strumenti di

indagine quali-quantitativi tipici delle scienze socio-territoriali come documenti cartografici e fotografici, questionari, interviste in profondità e osservazione partecipante: dalle pratiche di agroforestazione rigenerativa in essere al margine sud-orientale della città, alle iniziative di rivitalizzazione commerciale del quartiere Isola; dai giardini condivisi presenti diffusamente all'interno del perimetro urbano milanese fino ai processi di delocalizzazione delle comunità residenti attorno alla grande infrastruttura aeroportuale di Malpensa.

The Water We Eat Marta Antonelli 2015-04-11 This book pursues a comprehensive, multidisciplinary approach in order to analyze the relationship between water and food security. It demonstrates that most of the world's economies lack sufficient water resources to secure their populations' food requirements and are thus virtual importers of water. One of the most inspiring cases, which this book is rooted in, is Italy: the third largest net virtual water importer on earth. The book also shows that the sustainability of water depends on the extent to which societies recognize and take into account its value and contribution to agricultural production. Due to the large volumes of water required for food production, water and food security are in fact inextricably linked. Contributions from leading international experts and scholars in the field use the concepts of virtual water and water footprints to explain this relationship, with an eye to the empirical examples of wine, tomato and pasta production in Italy. This book provides a valuable resource for all researchers, professionals, policymakers and everyone else interested in water and food security.

Vesuvius Flavio Dobran 2006-06-07 VESUVIUS 2000 is an interdisciplinary project aimed at producing a safe and prosperous habitat for the people living around Vesuvius. To produce this environment requires an effective collaboration between the experts and the public, whereby the danger from the volcano is used to reorganize the territory and thus produce new opportunities for the people surrounding the volcano. As an all inclusive physico-mathematical-computer model of the volcano, the Global Volcanic Simulator is a key tool for determining the effects of different eruption scenarios and thus for urban planning of the territory. Unlike the evacuation plans which tend to manage emergencies, VESUVIUS 2000 aims at preparing the Vesuvius area to confront future eruptions with minimal socio-economic and cultural consequences. * Addresses volcanic risk mitigation in densely populated area surrounding Vesuvius * Provides education about volcanos * Displays physical modeling of eruption processes and integration of models

Italian Historical Rural Landscapes Mauro Agnoletti 2012-12-09 Sustainable development and rural policies have pursued strategies where farming has been often regarded as a factor deteriorating the ecosystem. But the current economic, social and environmental problems of the Earth probably call for examples of a positive integration between human society and nature. This research work presents more than a hundred case studies where the historical relationships between man and nature have generated, not deterioration, but cultural, environmental, social and economic values. The results show that is not only the economic face of globalization that is negatively affecting the landscape, but also inappropriate environmental policies. The CBD-UNESCO program on biocultural diversity, the FAO Globally Important Agricultural Heritage Systems and several projects of the International Union of Forest Research Organizations, as well as European rural policies acknowledge the importance of cultural values associated to landscape. This research intends to support these efforts.

Acqua e comunità. Crisi idrica e responsabilità sociale Colin Ward 2003

Una comunità legge il Vangelo di Giovanni Silvano Fausti 2014-10-14T00:00:00+02:00 «Gli altri tre Vangeli sono un racconto storico-teologico della vita di Gesù. Quello attribuito a Giovanni è piuttosto come un teatro, un intreccio di dialoghi e lunghi monologhi, con brevi indicazioni di luogo,

di tempo e di azione. [...] Le molte voci che entrano in scena si riducono a due: quella di Gesù e quella di tutti gli altri, che rappresentano le nostre varie reazioni davanti alla sua. Nel finale tutte le voci si armonizzano in un'unica Parola: quella del Figlio e di ogni fratello che ha riconosciuto e accettato il dono del Padre. È la soluzione a lieto fine del dramma, il nostro passaggio dalla morte alla vita» (dall'Introduzione). Il volume nasce da una lectio continua settimanale sul Vangelo di Giovanni, tenuta dall'autore assieme a Filippo Clerici nella chiesa di S. Fedele (Milano), e intende aiutare il lettore a entrare nel mistero della Parola diventata carne in Gesù, per lasciarsi sempre più coinvolgere nel dialogo con lui. Come nei precedenti commenti a Matteo, Marco e Luca, di ogni singolo passo, dopo una traduzione letterale del testo, si espone il messaggio nel contesto; seguono una lettura del testo e indicazioni per pregarlo; concludono dei testi utili per l'approfondimento. La presente edizione è una risposta alla diffusa richiesta di potere disporre, in un unico volume, dei preziosi contenuti di un'opera che ha conosciuto grande successo tra i lettori.

Religious Life Or Secular Institute Jean Beyer 1970 Many request have been made for the publication of these studies in book form. Much of this material has already appeared as articles in *The Way*. In the first section I discuss the distinction between the forms of consecrated life, following a classification which is also taken up by the Second Vatican Council in its decree *Perfectae Caritatis*. It is by distinguishing between these different ways of the Spirit, and by seeking to enter more deeply into them, that all who lead that life - whether they be monks or nuns, or religious dedicated to the apostolate of the priestly ministry or of charitable works, or those leading a consecrated life in the midst of the world - will gain a better understanding of their vocation and of their special mission in the Church. The second study is an attempt to express the profound meaning of the secular vocation proper to those institutes which were approved by Pope Pius XII in 1947, and of which the *Motu Proprio Primo Feliciter* laid down the essential characteristics. The third section is a discussion of the role of the priest in approved Secular Institutes. This has relevance today, when special questions arise concerning those Institutes whose secular character is less apparent, who live in community and are occupied in their own special works. In the opinion of many who follow the fully secular vocation, those Institutes would do better to revise their statutes or to choose another denomination - for example, that of Apostolic Institute or Society.

Fresh Water from the Sea Alberto Girelli 2016-04-20 *Fresh Water from the Sea* is a collection of papers that discusses the advancement in the technologies and methodologies utilized in the process of desalting seawater. The emphasis of the book is not only on desalting but also on processing the seawater into potable water. The coverage of the text includes the advancement of desalting process in various countries, such as Japan, Israel, and Italy. The text also covers the aspects of the application of ion exchange to the conversion of saline water into fresh water and the evolution of the distillation process for seawater conversion. The text will be of great use to researchers and practitioners in disciplines that directly deal with securing a potable water source.

Water Law, Policy and Economics in Italy Paolo Turrini 2021-05-12 This book provides the first comprehensive overview of the most important water-related issues that centre on Italy, analysed from several disciplinary perspectives - such as hydrology, economics, law, sociology, environmental sciences and policy studies - in order to promote full understanding of the challenges the country is facing and the ways it could best tackle them. Despite the misconception that Italy is a water-scarce country, is in fact quite rich in water resources. Such resources, however, are unevenly distributed over the Italian territory. Italy's northern regions rely on quite an abundant quantity of freshwater, whereas in the southern area water endowment is limited. Moreover, climatic differences between North and South contribute to widen the divide. This disparity has notable consequences of socio-economic character, some of which, in turn, feed back into the environmental conditions of Italian regions: pollution, floods, landslides and droughts are among the problems affecting the country. There are numerous features of water use and consumption that distinguish Italy from other comparable countries, such as the significant role played by agriculture (a water-intensive activity), a lead position in the consumption of bottled water, lower-than-average prices of water and a far-from-optimal efficiency of waterworks. All such aspects, and many others, make Italy an essential case study.

The human right to water - its multi-level protection and implementation in International, European and National law Riccardo Montaldo 2022-01-01 The object of the research work is the analysis of the multilevel protection of the human right to water and the current degree of implementation that it has received in international, European, and national law, comparing the Italian and German contexts from the constitutional law perspective. Given the absence of an express recognition of the human right to water, another research question concerns the examination of the mechanisms of multilevel protection of human rights, assessing whether the relationships between the different levels of protection can contribute to the realisation of this fundamental human right. The research analyses the main sources of law and jurisprudence of each examined context, to understand the legal basis for the recognition of the human right to water, considering both the necessary protection of environmental aspects, as well as social and economic ones, fundamental for its full realisation. The analysis of normative and jurisprudential sources is supported by the examination of the most relevant doctrine.

The Oxford Handbook of Italian Politics Erik Jones 2015 The Oxford Handbook of Italian Politics provides a comprehensive look at the political life of one of Europe's most exciting and turbulent democracies. Under the hegemonic influence of Christian Democracy in the early post-World War II decades, Italy went through a period of rapid growth and political transformation. In part this resulted in tumult and a crisis of governability; however, it also gave rise to innovation in the form of Eurocommunism and new forms of political accommodation. The great strength of Italy lay in its constitution; its great weakness lay in certain legacies of the past. Organized crime--popularly but not exclusively associated with the mafia--is one example. A self-contained and well entrenched 'caste' of political and economic elites is another. These weaknesses became apparent in the breakdown of political order in the late 1980s and early 1990s. This ushered in a combination of populist political mobilization and experimentation with electoral systems design, and the result has been more evolutionary than transformative. Italian politics today is different from what it was

during the immediate post-World War II period, but it still shows many of the influences of the past.

The Wealth of Communities Matteo Di Tullio 2016-12-05 The early decades of the sixteenth century were a turbulent time for the Italian peninsula as competing centres of power struggled for political control. Nowhere was this more true than the area contested by Milan and Venice, that was constantly crossed and occupied by rival armies. Investigating the impact of successive crises upon the inhabitants of the Po Valley, this book challenges many fundamental assumptions about the relationship between war and economic development and draws conclusion that have implications for early modern Europe as a whole. In traditional historiography, periods of war and general crisis have often been regarded as promoting a shift in resources from the communal towards a small number of individuals. However, through a close micro-study of a single region, this book offers a different perspective. Rather than promoting an aggressive individualism, it is argued that in times of general crisis, social networks aimed to reproduce themselves and the original status quo by developing creative solutions and institutions favouring co-operation. Furthermore the elites could not always exploit 'local' wealth because of the need to protect their position of leadership within the community, which required the preservation of that very community. This thesis not only challenges the received wisdom, but also fuels a new debate about the ways in which economic growth occurred in Early Modern Italy and Europe.
