Forensic Ballistics in Court Brian J. Heard 2013-03-11 Forensic Ballistics in Court: Interpretation and Presentation of Firearms Evidence is an accessible introduction to firearms and ballistics evidence and how this is analysed and presented as evidence in a court of law. The book approaches the subject in terms of the realities of case work, opening with a clear and illustrated explanation of the correct nomenclature for various weapon types and their parts. Ammunition is also extensively covered, again with annotated illustrations. Basic external and terminal ballistics, wounding capabilities are likewise covered to give an overview of the subject. A key aspect of the book covers the theory and philosophy behind striation matches and the associated statistics, how positive matches should be peer reviewed and the importance accreditation has on this subject. Gunshot residue formation and identification and the various methods used in its analysis are reviewed in depth. This includes a critical examination of the pros and cons of each type of examination and the evidential weight which can be applied to each method. Accessible and reader-friendly introduction to firearms and ballistics. Clarifies the limitations of firearms evidence. Extensive use of global case-studies throughout. Focus on the interpretation and assessment of the weight of firearms/ballistics evidence presented at court. Covers the importance of witness and accused statements and their interpretation in relation to the investigation under review. Includes coverage of gunshot residue collection, examination and interpretation and the potential for contamination of GSR samples. Includes numerous real life case studies that the author has dealt with over the past 45 years. Takes an applied approach to the subject.

Ballistic Imaging National Research Council 2008-10-10 Ballistic Imaging assesses the state of computer-based imaging technology in forensic firearms identification. The book evaluates the current law enforcement database of images of crime-related cartridge cases and bullets and recommends ways to improve the usefulness of the technology for suggesting leads in criminal investigations. It also advises against the construction of a national reference database that would include images from test-fires of every newly manufactured or imported firearm in the United States. The book also suggests further research on an alternate method for generating an investigative lead to the location where a gun was first sold:

"microstamping," the direct imprinting of unique identifiers on firearm parts or ammunition.

The Great Utopia Solomon R. Guggenheim Museum 1992 "In this volume, which accompanies the largest exhibition ever mounted at the Guggenheim Museum, twenty-one essays by eminent scholars from Germany, Great Britain, Russia, and the United States explore the activity of the Russian and Soviet avant-garde in all its diversity and complexity. These essays trace the work of Malevich's Unovis (Affirmers of the New Art) collective in Vitebsk, which introduced Suprematism's all-encompassing geometries into the design of textiles, ceramics, and indeed whole environments; the postrevolutionary reform of art education and the creation of Moscow's Vkhutemas (Higher Artistic-Technical Workshops), where the formal and analytical principles of the avant-garde were the basis of instruction; the debates over a "proletarian art" and the transition to Constructivism, "production art," and the "artist-constructor"; the organization of new artist-administered "museums of artistic culture"; the "third path" in non-objective art taken by Mikhail Larionov; the return to figuration in the mid-1920s by the young artists - and former students of the avant-garde - in Ost (the Society of Easel Painters); the debates among photographers, in the late 1920s and early 1930s, on the superiority of the fragmented or continuous image as a representation of the new socialist reality; book, porcelain, fabric, and stage design; and the evolution of a new architecture, from the experimental projects of Zhivskul'ptarkh (the Synthesis of Painting, Sculpture, and Architecture Commission) to the multistage competition, in 1931-32, for the Palace of Soviets, which "proved" the inapplicability of a Modernist architecture to the Bolshevik Party's aspirations."

Evidentiary Foundations Liz Heffernan 2008 Irish Law Based on the 6th edition of Professor Imwinkelried's authoritative American text, Evidentiary Foundations, and amended for the Irish market, this title is a practical guide which explains how the various evidentiary doctrines are applied on a daily basis in the Irish courts. Combining discussion of law and practice, the authors outline a step-by-step approach to laying the necessary foundations for the introduction of items of evidence. Using hypothetical examples, the title illustrates how the substantive rules of evidence convert into concrete lines of questioning in the courtroom. This is the first book of its kind on the Irish market and will provide invaluable practical guidance for practitioners and students of the law of evidence.

Songs of the Women Trouvères Eglal Doss-Quinby 2008-10-01 This groundbreaking anthology brings together for the first time the works of women poet-composers, or trouveres, in northern France in the twelfth and thirteenth centuries. Refuting the long-held notion that there are no extant Old French lyrics by women from this period, the editors of the volume present songs attributed to eight named female trouveres along with a varied selection of anonymous compositions in the feminine voice that may have been composed by women. The book includes the Old French texts of seventy-five compositions, extant music for eighteen monophonic songs and nineteen polyphonic motets, English translations, and a substantial introduction.

Le Bestiaire D'Amour Richard de Fournival 2017-09-09 Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our

collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

Mexico Beach Al Cathey and Cathey Parker Hobbs 2014 Hurricane Michael may have taken away some of the landmarks, but these images reveal the history of Florida's Mexico Beach, once known as the "Unforgettable Coast". As French interests in the Americas dwindled, records indicate very little activity around Mexico Beach until rumors of buried riches and sunken ships brought treasure hunters to the coast. In the early 1900s, businessman Felix du Pont purchased the land known today as Mexico Beach. Resin to make turpentine was harvested from the native pine trees, and fishermen could not resist the migratory fish passing through the area's waters. By the 1930s, US Highway 98 was completed, and visitors could finally reach the sugar-soft sand beaches of the "Unforgettable Coast." By 1941, Tyndall Field was constructed and became a training site for Air Force pilots. In 1946, a group of farsighted businessmen, led by Gordon Parker, W.T. McGowan, and J.W. Wainwright, purchased 1,850 acres along the beach for \$65,000. Parker's son Charlie moved to the area in 1949 with his wife, Inky, and their family. He soon took over development responsibilities for the Mexico Beach Corporation and laid the groundwork for the beach town known and loved today. Charlie went on to become the city's first mayor and a lifelong advocate of the family-friendly community.

Emma & Knightley Rachel Billington 2008-03-01 "... the wishes, the hopes, the confidence, the predictions of the small band of true friends who witnessed the ceremony, were fully answered in the perfect happiness of the union." Thus the last line of Jane Austen's Emma. A year later, Emma and Knightley are still living at Hartfield, surrounded by the Westons, the Eltons and the Bateses. But as events unfold, the couple must deal with the return of Frank Churchill, now widowed, and Knightley's apparently endless patience is tried by events in his brother's family, as well as his beloved Emma's whims and fancies. But the irrepressible Emma is restless ... Emma wants Knightley to stop treating her like a child. Knightley meanwhile wants his young bride to love him as a husband, not as the man she's always looked up to. With tragedy in the offing, and events unfolding that include beloved characters from Emma, the couple must find their way to each other, and to perfect happiness. With a wonderful grasp of the manners and style of the day, this warm and witty exploration of a marriage between a sheltered (not to say spoiled) young lady and the man she looked upon as an older brother fulfills the romantic longings of Jane Austen lovers everywhere.

Shooting Incident Reconstruction Michael G. Haag 2011-06-29 Forensic scientists, law enforcement, and crime scene investigators are often tasked with reconstruction of events based on crime scene evidence, and the subsequent analysis of that evidence. The use and misuse of firearms to perpetrate crimes from theft to murder necessitates numerous invitations to reconstruct shooting incidents. The discharge of firearms and the behavior of projectiles create many forms of physical evidence that, through proper testing and interpretation by a skilled forensic scientist, can establish what did and what did not occur. This book is generated from the authors' numerous years of conducting courses and seminars on the subject of shooting incident reconstruction. It seeks to thoroughly address matters from simple to complex in providing the reader an explanation of the factors surrounding ballistics, trajectory, and shooting scenes. The ultimate objectives of this unique book are to assist investigators, crime scene analysts, pathologists, ballistics experts, and lawyers to understand the terminology, science, and factors involved in reconstructing shooting incident events to solve forensic cases. The book will cover the full range of related topics including the range from which a firearm was discharged, the sequence of shots in a multiple discharge shooting incident, the position of a firearm at the moment of discharge, the position of a victim at the moment of impact, the probable flight path of a projectile, the manner in which a firearm was discharged and much more. Written by the most well-respected shooting scene and ballistics experts in the world Contains over 200 full-color diagrams and photographs that support and illustrate key concepts Case studies illustrate real-world application of technical concepts

Island Light Alexander Key 2014-07-04 A fugitive from federal justice, Lieutenant Max Ewing returns home to the Gulf port city of Apalachicola determined to seek revenge. The War Between the States has ended, but Apalachicola remains occupied by federal troops and local opportunists, emboldened and empowered by the war. Max's brother Randy has died, a victim of shipboard hostilities in the Bay of Cardenas. Soon, Ewing learns of other losses incurred in his absence: his mother's death from yellow fever, the confiscation of his family's property, and the fates and deaths of many friends. Revenge, loyalty, honor, passion and greed clash in this dramatic tale, which Key sets among the raw and rugged elements of Florida's Gulf coast at a turbulent time in its history.

Evolution Paul J. Greenwood 1987-07-31 John Maynard Smith was originally trained as an engineer but, despite important excursions into animal mechanics, ecology and ethology, he is now best known as an international authority on evolution. His pre-eminence is based in large part on original research contributions coupled with an uncanny ability for revealing simple explanations to apparently intractable problems. This wide-ranging volume contains a collection of new and original essays, all inspired by Maynard Smith's writings. The essays span the whole field of evolutionary biology: from microevolution to macroevolution; from evolutionarily stable strategies to sympatric speciation; and from population processes in plants

to the arithmetic of assessment in animals.

From Song to Book Sylvia Huot 2019-05-15 As the visual representation of an essentially oral text, Sylvia Huot points out, the medieval illuminated manuscript has a theatrical, performative quality. She perceives the tension between implied oral performance and real visual artifact as a fundamental aspect of thirteenth- and fourteenth-century poetics. In this generously illustrated volume, Huot examines manuscript texts both from the performance-oriented lyric tradition of *chanson courtoise*, or courtly love lyric, and from the self-consciously literary tradition of Old French narrative poetry. She demonstrates that the evolution of the lyrical romance and dit, narrative poems which incorporate thematic and rhetorical elements of the lyric, was responsible for a progressive redefinition of lyric poetry as a written medium and the emergence of an explicitly written literary tradition uniting lyric and narrative poetics. Huot first investigates the nature of the vernacular book in the thirteenth and fourteenth centuries, analyzing organization, page layout, rubrication, and illumination in a series of manuscripts. She then describes the relationship between poetics and manuscript format in specific texts, including works by widely read medieval authors such as Guillaume de Lorris, Jean de Meun, and Guillaume de Machaut, as well as by lesser-known writers including Nicole de Margival and Watriquet de Couvin. Huot focuses on the writers' characteristic modifications of lyric poetics; their use of writing and performance as theme; their treatment of the poet as singer or writer; and of the lady as implied reader or listener; and the ways in which these features of the text were elaborated by scribes and illuminators. Her readings reveal how medieval poets and book-makers conceived their common project, and how they distinguished their respective roles.

Conservation Genetics in Mammals Jorge Ortega 2020-01-24 This book focuses on the use of molecular tools to study small populations of rare and endangered mammals, and presents case studies that apply an evolutionary framework to address innovative questions in the emerging field of mammalian conservation genomics using a highly diverse set of novel molecular tools. Novel and more precise molecular technologies now allow experts in the field of mammalogy to interpret data in a more contextual and empirical fashion and to better describe the evolutionary and ecological processes that are responsible for the patterns they observe. The book also demonstrates how recent advances in genetic/genomic technologies have been applied to assess the impact of environmental/anthropogenic changes on the health of small populations of mammals. It examines a range of issues in the field of mammalian conservation genomics, such as the role that the genetic diversity of the immune system plays in disease protection and local adaptation; the use of noninvasive techniques and genomic banks as a resource for monitoring and restoring populations; the structuring of population by physical barriers; and genetic diversity. Further, by integrating research from a variety of areas - including population genetics, molecular ecology, systematics, and evolutionary and conservation biology - it enables readers to gain a deeper understanding of the conservation biology of mammals that are at increasing risk of extinction at local, regional and global scales. As such, it offers a unique resource for a broad readership interested in the conservation biology of mammals and conservation management strategies to better preserve biodiversity.

Massive MIMO Hien Quoc Ngo 2015-01-16 The last ten years have seen a massive growth in the number of connected wireless devices. Billions of devices are connected and managed by wireless networks. At the same time, each device needs a high throughput to support applications such as voice, real-time video, movies, and games. Demands for wireless throughput and the number of wireless devices will always increase. In addition, there is a growing concern about energy consumption of wireless communication systems. Thus, future wireless systems have to satisfy three main requirements: i) having a high throughput; ii) simultaneously serving many users; and iii) having less energy consumption. Massive multiple-input multiple-output (MIMO) technology, where a base station (BS) equipped with very large number of antennas (collocated or distributed) serves many users in the same time-frequency resource, can meet the above requirements, and hence, it is a promising candidate technology for next generations of wireless systems. With massive antenna arrays at the BS, for most propagation environments, the channels become favorable, i.e., the channel vectors between the users and the BS are (nearly) pairwise orthogonal, and hence, linear processing is nearly optimal. A huge throughput and energy efficiency can be achieved due to the multiplexing gain and the array gain. In particular, with a simple power control scheme, Massive MIMO can offer uniformly good service for all users. In this dissertation, we focus on the performance of Massive MIMO. The dissertation consists of two main parts: fundamentals and system designs of Massive MIMO. In the first part, we focus on fundamental limits of the system performance under practical constraints such as low complexity processing, limited length of each coherence interval, intercell interference, and finite-dimensional channels. We first study the potential for power savings of the Massive MIMO uplink with maximum-ratio combining (MRC), zero-forcing, and minimum mean-square error receivers, under perfect and imperfect channels. The energy and spectral efficiency tradeoff is investigated. Secondly, we consider a physical channel model where the angular domain is divided into a finite number of distinct directions. A lower bound on the capacity is derived, and the effect of pilot contamination in this finite-dimensional channel model is analyzed. Finally, some aspects of favorable propagation in Massive MIMO under Rayleigh fading and line-of-sight (LoS) channels are investigated. We show that both Rayleigh fading and LoS environments offer favorable propagation. In the second part, based on the fundamental analysis in the first part, we propose some system designs for Massive MIMO. The acquisition of channel state information (CSI) is very important in Massive MIMO. Typically, the channels are estimated at the BS through uplink training. Owing to the limited length of the coherence interval, the system performance is limited by pilot contamination. To reduce the pilot contamination effect, we propose an eigenvalue-decomposition-based scheme to estimate the channel directly from the received data. The proposed scheme results in better performance compared with the conventional training schemes due to the reduced pilot contamination. Another important issue of CSI acquisition in Massive MIMO is how to acquire CSI at the users. To address this issue, we propose two channel estimation schemes at the users: i) a downlink "beamforming training" scheme, and ii) a method for blind estimation of the effective downlink channel gains. In both schemes, the channel estimation overhead is independent of the number of BS antennas. We also derive the optimal pilot and data powers as well as the training duration allocation to maximize the sum spectral efficiency of the Massive MIMO uplink with MRC receivers, for a given total energy budget spent in a coherence interval. Finally, applications of Massive MIMO in relay channels are proposed and analyzed. Specifically, we consider multipair relaying systems where many sources simultaneously communicate with many destinations in the same time-frequency resource with the help of a massive MIMO relay. A massive MIMO relay is equipped with many collocated or distributed antennas. We consider different duplexing modes (full-duplex and half-duplex) and different relaying protocols (amplify-and-forward, decode-and-forward, two-way relaying, and one-way relaying) at the relay. The potential benefits of massive MIMO technology in these relaying systems are explored in terms of spectral efficiency and power efficiency.
