Delancey Molly Wizenberg 2015-05-26 "When Molly Wizenberg married Brandon Pettit, she vowed always to support him, to work with him to make their hopes and dreams real. She evinced enthusiasm about Brandon's enthusiasms: building a violin, building a boat, and opening an ice cream store--none of which came to pass. So when Brandon started making plans to open a pizza restaurant, Molly felt sure that the restaurant would join the list of Brandon's abandoned projects. When she finally realized that Delancey really was going to happen, that Brandon was going to change all of her assumptions about what their married life would be like, it was too late. She faced the first crisis in their young marriage. Opening a restaurant is not like hosting a dinner party every night. Molly and Brandon's budget was small, and the tasks at hand were often overwhelming. They had to find a space they could afford, gut renovate it themselves, find second-hand furniture and equipment, build what furniture they couldn't find, buy and install a wood-burning oven, pass health inspections, hire staff, and establish a billing and payroll system. They lost a financial partner. Their cook disappeared the day they opened. Still, their restaurant was a success, and Molly managed to convince herself that she was happy in their new life. Until Halloween night, when she was forced to admit she could no longer pretend. While Delancey is a funny and frank look at behind-the-scenes restaurant life, it is also a bravely honest and moving portrait of a tender young marriage and two partners who had to find out how to let each other go in order to come together"--

Food Warren Belasco 2008-10-15 "Food: The Key Concepts presents an exciting, coherent and interdisciplinary introduction to food studies for the beginning reader. Food Studies is an increasingly complex field, drawing on disciplines as diverse as Sociology, Anthropology and Cultural Studies at one end and Economics, Politics and Agricultural Science at the other. In order to clarify the issues, Food: The Key Concepts distills food choices down to three competing considerations: consumer identity; matters of convenience and price; and an awareness of the consequences of what is consumed. The book concludes with an examination of two very different future scenarios for feeding the world's population: the technological fix, which looks to science to provide the solution to our future food needs; and the anthropological fix, which hopes to change our expectations and behaviors. Throughout, the analysis is illustrated with lively case studies. Bulleted chapter summaries, questions and guides to further reading are also provided."--P. [4] of cover.

Psychomagic Alejandro Jodorowsky 2010-06-18 A healing path using the power of dreams, theater, poetry, and shamanism • Shows how psychological realizations can cause true transformation when manifested by concrete poetic acts • Includes many examples of the surreal but successful actions Jodorowsky has prescribed to those seeking his help While living in Mexico, Alejandro Jodorowsky became familiar with the colorful and effective cures provided by folk healers. He realized that it is easier for the unconscious to understand the language of dreams than that of rationality. Illness can even be seen as a physical dream that reveals unresolved emotional and psychological problems. Psychomagic presents the shamanic and genealogical principles Jodorowsky discovered to create a healing therapy that could use the powers of dreams, art, and theater to empower individuals to heal wounds that in some cases had traveled through generations. The concrete and often surreal poetic actions Jodorowsky employs are part of an elaborate strategy intended to break apart the dysfunctional persona with whom the patient identifies in order to connect with a deeper self. That is when true transformation can manifest. For a young man who complained that he lived only in his head and was unable to grab hold of reality and advance toward the financial autonomy he desired, Jodorowsky gave the prescription to paste two gold coins to the soles of his shoes so that all day he would be walking on gold. A judge whose vanity was ruling his every move was given the task of dressing like a tramp and begging outside one of the fashionable restaurants he loved to frequent while pulling glass doll eyes out of his pockets. The lesson for him was that if a tramp can fill his pockets with eyeballs, then they must be of no value, and thus the eyes of others should have no bearing on who you are and what

you do. Taking his patients directly at their words, Jodorowsky takes the same elements associated with a negative emotional charge and recasts them in an action that will make them positive and enable them to pay the psychological debts hindering their lives.

At Home in Renaissance Bruges Julie De Groot 2022-03-29 Domestic materiality in a remarkable European city How did citizens in Bruges create a home? What did an ordinary domestic interior look like in the sixteenth century? And more importantly: how does one study the domestic culture of bygone times by analysing documents such as probate inventories? These questions seem straightforward, yet few endeavours are more challenging than reconstructing a sixteenth-century domestic reality from written sources. This book takes full advantage of the inventory and convincingly frames household objects in their original context of use. Meticulously connecting objects, people and domestic spaces, the book introduces the reader to the rich material world of Bruges citizens in the Renaissance, their sensory engagement, their religious practice, the role of women, and other social factors. By weaving insights from material culture studies with urban history, *At Home in Renaissance Bruges* offers an appealing and holistic mixture of in-depth socio-economic, cultural and material analysis. In its approach the book goes beyond heavy-handed theories and stereotypes about the exquisite taste of aristocratic elites, focusing instead on the domestic materiality of Bruges' middling groups. Evocatively illustrated with contemporary paintings from Bruges and beyond, this monograph shows a nuanced picture of domestic materiality in a remarkable European city.

Managing Multiple Sclerosis Naturally Judy Graham 2010-06-24 A totally revised and updated edition of the first book to offer a holistic approach to slowing the progression of MS • Provides guidance on special diets and nutritional supplements, exercise, alternative therapies, and the effects of negative and positive thoughts on MS • Explains how to reduce toxic overload from mercury and chemicals • Includes life wisdom and coping strategies from others who suffer with MS Judy Graham is an inspiration. Diagnosed with multiple sclerosis when she was just 26 years old, 35 years later Judy Graham is still walking, working, and has successfully birthed and raised a son who is now an adult. In this totally revised and updated edition of her groundbreaking *Multiple Sclerosis*, first published in 1984, she shares the natural treatments that have helped her and many others with MS stabilize or even reverse the condition. Beginning with the effects of diet, she explains that many people with MS have been eating the wrong foods and shows which foods are “good” and “bad,” how to recognize food sensitivities, and how to correct nutritional deficiencies using dietary supplements. She also looks at reducing the body's toxic overload, whether from mercury amalgam fillings, chemicals, or medications. She presents the exercises with proven benefits for MS she has found most reliable and appropriate, such as yoga, pilates, and t'ai chi, and explores alternative therapies that provide relief and support to the body's efforts to control MS, including acupuncture, reflexology, shiatsu, reiki, and ayurveda. Most important are the insights she provides on the effects of negative thoughts on MS. She demonstrates how a positive mental attitude can actually slow down or even reverse the progression of this disease. Judy Graham is living proof that, as devastating as a diagnosis of MS is, life can still be lived to its fullest.

The Handbook of Food Research Anne Murcott 2013-08-15 The last 20 years have seen a burgeoning of social scientific and historical research on food. The editors have enlisted eminent researchers across the social sciences to illustrate the debates, concepts and analytic approaches of this widely diverse and dynamic

field. This volume will be essential reading, a ready-to-hand reference book surveying the state of the art for anyone involved in, and actively concerned about research on the social, political, economic, psychological, geographic and historical aspects of food. It will cater for all who need to be informed of research that has been done and that is being done.

The Flavors of Modernity Gian-Paolo Biasin 2017-03-14 From Rabelais's celebration of wine to Proust's madeleine and Virginia Woolf's boeuf en daube in *To the Lighthouse*, food has figured prominently in world literature. But perhaps nowhere has it played such a vital role as in the Italian novel. In a book flowing with descriptions of recipes, ingredients, fragrances, country gardens, kitchens, dinner etiquette, and even hunger, Gian-Paolo Biasin examines food images in the modern Italian novel so as to unravel their function and meaning. As a sign for cultural values and social and economic relationships, food becomes a key to appreciating the textual richness of works such as Lampedusa's *The Leopard*, Manzoni's *The Betrothed*, Primo Levi's *Survival in Auschwitz*, and Calvino's *Under the Jaguar Sun*. The importance of the culinary sign in fiction, argues Biasin, is that it embodies the oral relationship between food and language while creating a sense of materiality. Food contributes powerfully to the reality of a text by making a fictional setting seem credible and coherent: a Lombard peasant eats polenta in *The Betrothed*, whereas a Sicilian prince offers a

monumental macaroni timbale at a dinner in *The Leopard*. Similarly, Biasin shows how food is used by writers to connote the psychological traits of a character, to construct a story by making the protagonists meet during a meal, and even to call attention to the fictionality of the story with a metanarrative description. Drawing from anthropology, psychoanalysis, sociology, science, and philosophy, the author gives special attention to the metaphoric and symbolic meanings of food. Throughout he blends material culture with observations on thematics and narrativity to enlighten the reader who enjoys the pleasures of the text as much as those of the palate.
