Medieval Illuminators and Their Methods of Work Jonathan James Graham Alexander 1992-01-01 Who were the medieval illuminators? How were their hand-produced books illustrated and decorated? In this beautiful book Jonathan Alexander presents a survey of manuscript illumination throughout Europe from the fourth to the sixteenth century. He discusses the social and historical context of the illuminators' lives, considers their methods of work, and presents a series of case studies to show the range and nature of the visual sources and the ways in which they were adapted, copied, or created anew. Alexander explains that in the early period, Christian monasteries and churches were the main centers for the copying of manuscripts, and so the majority of illuminators were monks working in and for their own monasteries. From the eleventh century, lay scribes and illuminators became increasingly numerous, and by the thirteenth century, professional illuminators dominated the field. During this later period, illuminators were able to travel in search of work and to acquire new ideas, they joined guilds with scribes or with artists in the cities, and their ranks included nuns and secular women. Work was regularly collaborative, and the craft was learned through an apprenticeship system. Alexander carefully analyzes surviving manuscripts and medieval treatises in order to explain the complex and time-consuming technical processes of illumination - its materials, methods, tools, choice of illustration, and execution. From rare surviving contracts, he deduces the preoccupation of patrons with materials and schedules. Illustrating his discussion with examples chosen from religious and secular manuscripts made all over Europe, Alexander recreates the astonishing variety and creativity of medieval illumination. His book will be a standard reference for years to come.

Gli animali a Roma. Tre millenni di interazione con l'uomo Jacopo De Grossi Mazzorin 2022-06-30 In passato gli animali hanno avuto un ruolo fondamentale nella vita dell'uomo, fornendogli cibo, protezione, compagnia, svago, agevolazione nel movimento e di questa lunga interazione uomo-animale rimangono tracce nei documenti letterari, epigrafici, archivistici e iconografici, ma soprattutto negli scavi archeologici che ne restituiscono i resti. Il libro racconta tre millenni di storia di animali e uomini a Roma, partendo dai resti animali studiati in quarant'anni di ricerche e rinvenuti nei numerosissimi scavi archeologici che sono stati effettuati nell'area urbana e nel territorio limitrofo, integrando le conoscenze che ne derivano con quelle ricavate dalle altre fonti.

Physiologus 1979 One of the most popular and widely read books of the Middle Ages, "Physiologus" contains allegories of beasts, stones, and trees both real and imaginary, infused by their anonymous author with the spirit of Christian moral and mystical teaching. Accompanied by an introduction that explains the origins, history, and literary value of this curious text, this volume also reproduces twenty woodcuts from the 1587 version. Originally composed in the fourth century in Greek, and translated into dozens of versions through the centuries, "Physiologus" will delight readers with its ancient tales of ant-lions, centaurs, and hedgehogs and their allegorical significance. An elegant little book . . . still diverting to look at today. . . . The woodcuts reproduced from the 1587 Rome edition are alone worth the price of the book. Raymond A. Bestiario Haraway Federica Timeto 2020-07-23 00:00:00+02:00 I saggi di Donna Haraway, autrice tra gli altri di *Manifesto cyborg*, brulicano da sempre di folle non umane. Questo libro approfondisce i concetti chiave della filosofa americana ed elabora una teoria femminista multispecie, seguendo le tracce delle molte vite che la animano, dai primati ai cani, dagli organismi transgenici ai simbionti dello Chthulucene. Per Haraway, gli animali umani e non umani sono specie compagne, che divengono insieme in una ininterrotta storia di coevoluzione. In questo bestiario contemporaneo, gli animali - che sono stati modelli, strumenti e figure dell'umano - sono agenti sociali, si muovono, agiscono e resistono. Ogni capitolo traccia delle piccole storie natural-culturali, ibridando filosofia, mitologia, scienze e arti.
