The Most Important Thing Antonella Abbatiello 2022-03-15 The animals of the forest have assembled to discuss what is the most important thing: to have a trunk like an elephant, quills like a porcupine, or a long neck like a giraffe? Naturally, every animal is convinced that its particular trait is the most important one and that everyone should have it. But when the double pages open to show all the animals with the quills of a porcupine, the long neck of a giraffe, or the trunk of the elephant, everyone must agree that the true importance lies precisely in their collective 'diversity'. It is that which makes them all unique and essential to life of the forest. The Most Important Thing received a UNESCO honorable mention for peace and collaboration. An important message of diversity and inclusion delivered in the form of a charming modern fable.

Human Strike and the Art of Creating Freedom Claire Fontaine 2020-12-29 The first English-language publication of writings by the collective artist Claire Fontaine, addressing our complicity with anything that limits our freedom. This anthology presents, in chronological order, all the texts by collective artist Claire Fontaine from 2004 to today. Created in 2004 in Paris by James Thornhill and Fulvia Carnevale, the collective artist Claire Fontaine creates texts that are as experimental and politically charged as her visual practice. In these writings, she uses the concept of "human strike" and adopts the radical feminist position that can be found in *Tiqqun*, a two-issue magazine cofounded by Carnevale. Human strike is a movement that is broader and more radical than any general strike. It addresses our inevitable subjective complicity with everything that limits our freedom and shows how to abandon these self-destructive behaviors through desubjectivization. Human strike, Claire Fontaine writes, is a subjective struggle to separate from the inevitable harm we do to ourselves and others simply by living within postindustrial neoliberalism. Human Strike is the first English-language publication of Claire Fontaine's influential and important theoretical writings.

Convention and Materialism Paolo Virno 2021-08-03 The first English translation of the book that established Paolo Virno as one of the most influential Italian thinkers of his generation. With the 1986 publication of this book in Italy, Paolo Virno established himself as one of the most

influential Italian thinkers of his generation. Astonishingly, this crucial work has never before been published in an English translation. This MIT Press edition, translated by Italian philosopher and Insubordinations series editor Lorenzo Chiesa, is its first English-language version. Virno here engages, in an innovative and iconoclastic way, with some classical issues of philosophy involving experience, singularity, and the relation between ethics and language, while also offering a profoundly transformative political perspective that revolves around the Marxian notion of the "general intellect." Virno reconsiders Walter Benjamin's idea of a "loss of the aura" (brought on, Benjamin argued, by technical reproducibility), and postulates instead the existence of a new experience of uniqueness that, although deprived of every metaphysical aura, resides in the very process of late-capitalist serial reproduction. Writing after the defeat of contemporary leftist revolutionary movements in the West, Virno argues for the possibility of a "good life" originating immanently from existential and political crises. Taking speculative detours through the thought of philosophers ranging from Aquinas and Berkeley to Heidegger and Wittgenstein, with a specific focus on Kant and Hegel, Virno shows how a renewed reflection on basic theoretical problems helps us to better grasp what is happening now. This edition features a preface written by Virno in 2011.

In Cold Blood Truman Capote 2013-02-19 Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice gentleman," he says of Herb Clutter. "Soft-spoken. I thought so right up to the moment I cut his throat." Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers' flight, Capote's account is so detailed that the reader comes to feel almost like a participant in the events.

Atlas of Poetic Zoology Emmanuelle Pouydebat 2019-05-07 A catalog of wonders, from walking fish to self-medicating chimpanzees. This Atlas of Poetic Zoology leads readers into a world of wonders where turtles fly under the sea, lizards walk on water, insects impersonate flowers, birds don't fly, frogs come back from the dead, and virgin sharks give birth. Animals, writes Emmanuelle Pouydebat, are lyric poets; they discover and shape the world when they sing, dance, explore, and reproduce. The animal kingdom has been evolving for millions of years, weathering many crises of extinction; this book allows us to draw inspiration from animals' enduring vitality. Pouydebat's text, accompanied by striking color illustrations by artist Julie Terrazoni, offers a catalog of wondrous beings. Pouydebat describes the African bush elephant—the biggest land mammal of them all, but the evolutionary descendant of a tiny animal that stood less than fifty centimeters (nineteen inches) high sixty million years ago; the scaly, toothless pangolin, the world's most endangered mammal—and perhaps its most atypical; the red-lipped batfish, which walks, rather than swims, across the ocean floor; and the great black cockatoo, a gifted percussionist. Chimpanzees, she tells us, self-medicate with medicinal plants; the jellyfish, under stress, reverts to juvenile polyp-hood; and the sweetly named honey badger feeds on reptiles, termites, scorpions, and earthworms. Pouydebat, a researcher at the French Museum of Natural History, and Terrazoni capture the astonishment promised by any excursion into nature—the happiness that comes from watching a dragonfly, spider, frog, lizard, elephant, parrot, mouse, orangutan, or ladybug. It's the joy of witnessing life itself. We need only open our eyes to see.

The Putin Interviews Oliver Stone 2017-06-16 WITH SUBSTANTIAL MATERIAL NOT INCLUDED IN THE DOCUMENTARY Academy Award winner Oliver Stone was able to secure what journalists, news organizations, and even other world leaders have long coveted: extended, unprecedented access to Russian President Vladimir Putin. The Putin Interviews are culled from more than a dozen interviews with Putin over a two-year span—never before has the Russian leader spoken in such depth or at such length with a Western interviewer. No topics are off limits in the interviews, which first occurred during Stone's trips to meet with NSA whistleblower Edward Snowden in Moscow and most recently after the election of President Donald Trump. Prodded by Stone, Putin discusses relations between the United States and Russia, allegations of interference in the US election, and Russia's involvement with conflicts in Syria, Ukraine, and elsewhere across the globe. Putin speaks about his rise to power and details his relationships with Presidents Clinton, George W. Bush, Obama, and Trump. The exchanges are personal, provocative, and at times surreal. At one point, Stone asks, "Why did Russia hack the election?"; at another, Stone introduces him to Stanley Kubrick's 1964 Cold War satire "Dr. Strangelove," which the two watch together. Stone has interviewed controversial world leaders before, including Hugo Chavez, Fidel Castro, and Benjamin Netanyahu. But The Putin Interviews, in its unmediated access to one of the most enigmatic and powerful men in the world, can only be compared to the series of conversations between David Frost and Richard Nixon we now refer to as "The Nixon Interviews" of 1977. The book will also contain references and sources that give readers a deeper understanding of the topics covered in the interviews and make for a more robust reading experience.
