The third part deals with the role of media and literature in the development narratives of South Asia. The last part highlights the inter-linkages between gender narratives and development. Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Violence against Women and Girls Jennifer L. Solotaroff 2014-09-04 This report documents the dynamics of violence against women in South Asia across the life cycle, from early childhood to old age. It explores the different types of violence that women may face throughout their lives, as well as the associated perpetrators (male and female), risk and protective factors for both victims and perpetrators, and interventions to address violence across all life cycle stages. The report also analyzes the societal factors that drive the primarily male — but also female — perpetrators to commit violence against women in the region. For each stage and type of violence, the report critically reviews existing research from Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka, supplemented by original analysis and select literature from outside the region. Policies and programs that address violence against women and girls are analyzed in order to highlight key actors and promising interventions. Finally, the report identifies critical gaps in research, program evaluations, and interventions in order to provide strategic recommendations for policy makers, civil society, and other stakeholders working to mitigate violence against women in South Asia.

Global Governance 2025 Álvaro de Vasconcelos 2010 "Global governance - the collective management of common problems at the international level - is at a critical juncture. Although global governance has been a relative success since its development after the Second World War, the growing number of issues on the international agenda, and their complexity, is outpacing the ability of international organizations and national governments to cope. Power shifts are also complicating global governance."--Introduction.

Global Trends 2025: A Transformed World Office of the Director of National Intelligence (U.S.) 2013-08-15 "Global Trends 2025: A Transformed World" is the fourth unclassified report prepared by the National Intelligence Council (NIC) in recent years that takes a long-term view of the future. It offers a fresh look at how key global trends might develop over the next 15 years to influence world events. Our report is not meant to be an exercise in prediction or crystal ball-gazing. Mindful that there are many possible "futures," we offer a range of possibilities and potential discontinuities, as a way of opening our minds to developments we might otherwise miss. South Asia in the World Ramesh Chandra Thakur 2004 Presents issues of particular relevance to the region, and explores the potential for improvement both in domestic and international efforts at alleviating the problems of South Asia.

The Worldwide Governance Indicators Project: Answering the Critics Daniel Kaufmann 2007 Abstract: The Worldwide Governance Indicators, reporting estimates of six dimensions of governance for over 200 countries between 1996 and 2005, have become widely used among policymakers and academics. They have also attracted some explicit written criticisms. In this short paper the authors synthesize 11 critiques offered by four recent papers. They then refute them as either conceptually incorrect or empirically unsubstantiated.

Public Administration in South Asia Meghna Sabharwal 2013-06-13 A state-of-the-art, one-stop resource, Public Administration in South Asia: India, Bangladesh, and Pakistan examines public administration issues and advances in the Indian subcontinent. The book fulfills a critical need. These nations have the largest public administration programs in South Asia, yet existing knowledge on them is fragmented at best. Bringing together leading scholars from these countries, this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region. Focusing on the machinery of government, the book explores questions such as: What is the history of public administration development? How are major decisions made in the agencies? Why are anti-corruption efforts so much a challenge? What is the significance of intergovernmental relations? What is the success of administrative reform? What are examples of successful social development programs? How successful is e-government, and what are its challenges? Why is civil service reform difficult to achieve? How is freedom of information being used as a means to combat corruption and invoke grassroots activism? What can be learned from the successes and failures? While public administration practice and education have become considerably professionalized in the last decade, a sufficiently in-depth and well-rounded reference on public administration in these countries is sorely lacking. Most available books tackle only aspects of public administration such as administrative reforms, civil service, economic developments, or public policy, and are country specific. None provide the in-depth analysis of the sphere of public action in South Asia found in this book. It supplies an understanding of how public administration can be either the source of, or solution to, so many of the problems and achievements in the Indian subcontinent.

The Dynamics of Conflict and Peace in Contemporary South Asia Minoru Mio 2020-12-23 This book engages with the concept, true value, and function of democracy in South Asia against the background of real social conditions for the promotion of peaceful development in the region. In the book, the issue of peaceful social development is defined as the conditions under which the maintenance of social order and social development is achieved – not by violent compulsion but through the negotiation of intentions or interests among members of society. The book assesses the issue of peaceful social development and demonstrates that the

maintenance of such conditions for long periods is a necessary requirement for the political, economic, and cultural development of a society and state. Chapters argue that, through the post-colonial historical trajectory of South Asia, it has become commonly understood that democracy is the better, if not the best, political system and value for that purpose. Additionally, the book claims that, while democratization and the deepening of democracy have been broadly discussed in the region, the peace that democracy is supposed to promote has been in serious danger, especially in the 21st century. A timely survey and re-evaluation of democracy and peaceful development in South Asia, this book will be of interest to academics in the field of South Asian Studies, Peace and Conflict Studies and Asian Politics and Security.

Rebel Governance in Civil War Ana Arjona 2015-10-22 This is the first book to examine and compare how rebels govern civilians during civil wars in Latin America, Africa, Asia, and Europe. Drawing from a variety of disciplinary traditions, including political science, sociology, and anthropology, the book provides in-depth case studies of specific conflicts as well as comparative studies of multiple conflicts. Among other themes, the book examines why and how some rebels establish both structures and practices of rule, the role of ideology, cultural, and material factors affecting rebel governance strategies, the impact of governance on the rebel/civilian relationship, civilian responses to rebel rule, the comparison between modes of state and non-state governance to rebel attempts to establish political order, the political economy of rebel governance, and the decline and demise of rebel governance attempts.

Understanding Governance in South Asia Adluri Subramanyam Raju 2020-09-30 The concept of good governance in South Asia poses a challenge at the implementation level, mainly due to ethnocentricity, regional disparities, division between poor and rich, and rural and urban division among the people. Concepts such as decentralization, citizen engagement, lean public service, privatization, autonomy, public-private partnership may work well in developed countries but may not produce the same results in the region where the majority of poor people expect their government to fulfill their basic needs. Governance in South Asia needs to be reformed to ensure that poverty can be reduced, if not completely eradicated. Poor governance and the various means by which governance has fallen short, has led to lack of development and continuance of poverty in South Asian societies. South Asian countries have more or less similar objectives, structures, value systems, cultures, and standards of governance despite different forms of government. The colonial legacy of British administrative system had its impact on centralization. Secrecy, elitism, rigidity, and social isolation is common to all South Asian countries. The post-colonial administrative system is built upon pre-colonial administrative traditions throughout the region. These countries can learn from each other's experiences. They need to develop an indigenous model to find pragmatic solutions to the challenges of good governance. This book argues that countries in South Asia can achieve good results through good governance if they develop and adopt an indigenous model rather than simply borrowing models and ideas from the West. Please note: This title is co-published with Manohar Publishers, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Internal Conflict and Regional Security in South Asia Shiva Hari Dahal 2003 The South Asia region is one of the most populous and ethnically diverse in the world, but its social, political and economic development has been severely hindered by numerous inter-state and intra-state conflicts. This paper seeks to provide a more effective multidimensional framework for the analysis and management of internal conflict and security issues in this region, through the establishment of 'Peace Commissions'. These bodies could operate at national and regional levels in a similar manner to a human rights commission in order to establish effective institutional mechanisms to resolve social and political differences and so avoid violent conflict.

Human Capital Development in South Asia Asian Development Bank 2017-12-01 Human capital is an important factor for economic growth in South Asia. Between 1981 and 2010, human capital contributed about 22% of annual gross domestic product per worker growth in India. During the same period, it contributed around 21% in Bangladesh, and 16% in Sri Lanka. However, education and skills remain the binding constraint. Raising the quality of education and skills in South Asia's workforce can play a critical role in catching up to the level of development of the People's Republic of China, the Republic of Korea, and other successful Southeast Asian economies. This study reviews the development of human capital in South Asia and analyzes contributing factors to human development including policies and strategies that countries in South Asia follow.

Building Trust in Government G. Shabbir Cheema 2010 The ability of governments and the global community to achieve the Millennium Development Goals, ensure security, and promote adherence to basic standards of human rights depends on people's trust in their government. However, public trust in government and political institutions has been declining in both developing and developed countries in the new millennium. One of the challenges in promoting trust in government is to engage citizens, especially the marginalized groups and the poor, into the policy process to ensure that governance is truly representative, participatory, and benefits all.

Bulletin of the Atomic Scientists 1986-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Corporate Governance in South Asia Tom Kirchmaier 2021-01-01 This publication looks at several corporate governance issues, and provides an analysis of four core areas of corporate governance in South Asia in light of global trends and best practices. These include: i) corporate governance legal frameworks; ii) board structure and board diversity; iii) corporate governance of state-owned enterprises; and iv) anti-money laundering and compliance. The publication assesses the necessary regulatory preconditions for strong financial and economic development, and identifies areas for regulatory action. The findings are relevant for many developing countries around the world, as corporate governance will impact evolving challenges such as the COVID-19 pandemic, climate change, and sustainable global trade.

Achieving Sustainable Development and Promoting Development Cooperation Department of Economic & Social Affairs 2008 This book presents an overview of the key debates that took place during the Economic and Social Council meetings at the 2007 High-level Segment, at which ECOSOC organized its first biennial Development Cooperation Forum. The discussions also revolved around the theme of the second Annual Ministerial Review, "Implementing the internationally agreed goals and commitments in regard to sustainable development."--P. 4 of cover.

The Political Economy of Ethnic Conflict in Sri Lanka Nikolaos Bizziouras 2014-03-26 At the point of independence in 1948, Sri Lanka was projected to be a success story in the developing world. However, in July 1983 a violent ethnic conflict which pitted the Sinhalese against the Tamils began, and did not come to an end until 2009. This conflict led to nearly 50,000 combatant deaths and approximately 40,000 civilian deaths, as well as almost 1 million internally-displaced refugees and to the permanent migration abroad of nearly 130,000 civilians. With a focus on Sri Lanka, this book explores the political economy of ethnic conflict, and

examines how rival political leaders are able to convince their ethnic group members to follow them into violent conflict. Specifically, it looks at how political leaders can influence and utilize changes in the level of economic liberalization in order to mobilize members of a certain ethnic group, and in the case of Sri Lanka, shows how ethnic mobilization drives can turn violent when minority ethnic groups are economically marginalized by the decisions that the majority ethnic group leaders make in order to stay in power. Taking a political economy approach to the conflict in Sri Lanka, this book is unique in its historical analysis and provides a longitudinal view of the evolution of both Tamil and Sinhalese ethnic drives. As such, this interdisciplinary study will be of interest to policy makers as well as academics in the field of South Asian studies, political science, sociology, development studies, political economy and security studies.

Regionalism and Regional Security in South Asia Zahid Shahab Ahmed 2016-04-08 Zahid Shahab Ahmed evaluates the progress of the South Asian Association for Regional Cooperation (SAARC). This study goes beyond economic integration to present a detailed appraisal of cooperation under the overarching themes of economic cooperation, environmental security, human welfare, and cooperation in security matters. According to the author, SAARC is making progress in addressing the myriad of issues on its agenda. The transition from agreements to actions and frequent interactions among the member states has boosted confidence. The progress of SAARC is more evident in the less controversial areas of human security, such as poverty alleviation, health and safety, human resources development, and higher education. Notwithstanding enthusiastic commitments reflected in agreements and action plans, there is a gulf between rhetoric and implementation most notably in sensitive areas relating to traditional security. In the light of the findings of this study, the author proposes that greater cooperation in common human security areas has a potential to pave the way for a cooperation on issues of a 'contentious' nature, particularly terrorism.

Pathways for Peace United Nations; World Bank 2018-04-13 Violent conflicts today are complex and increasingly protracted, involving more nonstate groups and regional and international actors. It is estimated that by 2030—the horizon set by the international community for achieving the Sustainable Development Goals—more than half of the world's poor will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. Pathways for Peace is a joint United Nations+World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US\$5 billion and US\$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion—from access to power, natural resources, security and justice, for example—that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts; when risks are high or building up, inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.

The Oxford Handbook of Indian Foreign Policy David Malone 2015 Following the end of the Cold War, the economic reforms in the early 1990s, and ensuing impressive growth rates, India has emerged as a leading voice in global affairs, particularly on international economic issues. Its domestic market is fast-growing and India is becoming increasingly important to global geo-strategic calculations, at a time when it has been outperforming many other growing economies, and is the only Asian country with the heft to counterbalance China. Indeed, so much is India defined internationally by its economic performance (and challenges) that other dimensions of its internal situation, notably relevant to security, and of its foreign policy have been relatively neglected in the existing literature. This handbook presents an innovative, high profile volume, providing an authoritative and accessible examination and critique of Indian foreign policy. The handbook brings together essays from a global team of leading experts in the field to provide a comprehensive study of the various dimensions of Indian foreign policy.

Decolonised and Developmental Social Work Raj Yadav 2019-04-01 This is the first book to cover existing debates on decolonising and developmental social work whilst equipping readers with the understanding of how to translate the idea of decolonisation of social work into practice. Using new empirical data and an extensive detail of social, cultural, and political dimensions of Nepal, the author proposes a new model of 'decolonised and developmental social work' that can be applicable to a wide range of countries and cultures. By using interviews with Nepali social workers, this text goes beyond mere theoretical approaches and uniquely positions itself in a way that embraces rigorous bottom-up, grounded theory method. It will also further ongoing debates on globalisation-localisation, universalisation-contextualisation, outsider-insider perspectives, neoliberal-rights and justice oriented social work, and above all, colonisation-decolonisation of social work knowledge and practice. It also promotes solidarity of, and the struggle for, progress for those in the margins of Western social work and development narrative through an emerging theory-praxis of decolonised and developmental social work. Decolonised and Developmental Social Work is essential reading for students, academics, and researchers of social work and development studies, as well as those striving for a decolonial worldview.

Insurgency and Counterinsurgency in South Asia Moeed Yusuf 2014 In *Insurgency and Counterinsurgency in South Asia*, ten experts native to South Asia consider the nature of intrastate insurgent movements from a peacebuilding perspective. Case studies on India, Pakistan, Nepal, and Sri Lanka lend new insights into the dynamics of each conflict and how they might be prevented or resolved.

Terrorism, Security and Development in South Asia M. Raymond Izarali 2021-04-28 This book provides a rich analysis of the actors and organizations to reflect on the antecedents and trajectories of terrorism and insurgency in South Asia, and the different countermeasures adopted by the countries to deal with the security and developmental challenges. South Asia is a complex geography that has been both a victim and a playing field for indigenous insurgencies, and domestic and transnational terrorist movements. The contributors to this volume explore how this situation has posed serious challenges to the sovereignty of the states, to national and human security, and to the socioeconomic fabric of the communities, and to the ethnic and religious cohesion. The book provides detailed studies of country cases on terrorism, security, and insurgencies, and it underlines the national, regional, and global implications of the threats that emanate from this region. Presenting an opportunity to diversify away from a Western-centric focus on terrorism and security, this book will be valuable to researchers in political science, criminology, defense and security studies, and to policy makers and think tanks.

India Stephen P. Cohen 2004-05-13 For years, Americans have seen India as a giant but inept state. That negative image is now obsolete. After a decade of drift and uncertainty, India is taking its expected place as one of the three major states of Asia. Its pluralist, secular democracy has allowed the rise of hitherto deprived castes and ethnic communities. Economic liberalization is gathering steam, with six percent annual growth and annual exports in excess of \$30 billion. India also has a modest capacity to project military power. The country will soon have a two-carrier navy and it is developing a nuclear-armed missile capable of reaching all of Asia. This landmark book provides the first comprehensive assessment of India as a political and strategic power since India's nuclear tests, its 1999 war with Pakistan, and its breakthrough economic achievements. Stephen P. Cohen examines the domestic and international causes of India's "emergence," he discusses the way social structure and tradition shape Delhi's perceptions of the world, and he explores India's relations with

neighboring Pakistan and China, as well as the United States. Cohen argues that American policy needs to be adjusted to cope with a rising India—and that a relationship well short of alliance, but far more intimate than in the past, is appropriate for both countries.

Making Politics Work for Development World Bank 2016-07-14 Governments fail to provide the public goods needed for development when its leaders knowingly and deliberately ignore sound technical advice or are unable to follow it, despite the best of intentions, because of political constraints. This report focuses on two forces—citizen engagement and transparency—that hold the key to solving government failures by shaping how political markets function. Citizens are not only queuing at voting booths, but are also taking to the streets and using diverse media to pressure, sanction and select the leaders who wield power within government, including by entering as contenders for leadership. This political engagement can function in highly nuanced ways within the same formal institutional context and across the political spectrum, from autocracies to democracies. Unhealthy political engagement, when leaders are selected and sanctioned on the basis of their provision of private benefits rather than public goods, gives rise to government failures. The solutions to these failures lie in fostering healthy political engagement within any institutional context, and not in circumventing or suppressing it. Transparency, which is citizen access to publicly available information about the actions of those in government, and the consequences of these actions, can play a crucial role by nourishing political engagement.

World Migration Report 2020 United Nations 2019-11-27 Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

The Geopolitics of South Asia Graham P. Chapman 2016-03-09 Anyone who is planning on carrying out research in South Asia or indeed anyone who simply wishes to understand more about this cultural heartland should read this book. It shows how geological movements moulded the land of this unique cradle and how they still impact on it. Discussions are woven around the three major forces of integration. These are 'identitive' forces - bonds of language, ethnicity, religion or ideology; 'utilitarian' forces - bonds of common material interest, and 'coercion' - the institutional use or threat of physical violence. By studying these forces, Professor Chapman shows how the organization of territory has been central to the region's historic, cultural, linguistic and economic development. In addition to the material on the Northwest frontier, Afghanistan and Kashmir which was added for the second edition, the Northeastern borderlands are also now examined in this fully revised third edition. The current geopolitical state of the region is completely updated and greatly enhanced.

Governance Matters V Daniel Kaufmann 2006 Abstract: The authors report on the latest version of the worldwide governance indicators, covering 213 countries and territories and measuring six dimensions of governance from 1996 until end-2005: voice and accountability, political stability and absence of violence, government effectiveness, regulatory quality, rule of law, and control of corruption. The latest indicators are based on hundreds of variables and reflect the views of thousands of citizen and firm survey respondents and experts worldwide. Although global averages of governance display no marked trends during 1996-2005, nearly one-third of countries exhibit significant changes [for better or for worse] on at least one dimension of governance. Three new features distinguish this update. (1) The authors have moved to annual reporting of governance estimates. This update includes new governance estimates for 2003 and 2005, as well as minor backward revisions to biannual historical data for 1996-2004. (2) The authors are, for the first time, publishing the individual measures of governance from virtually every data source underlying the aggregate governance indicators. The ready availability of the individual data sources underlying the aggregate governance indicators is aimed at further enhancing the transparency of the methodology and of the resulting aggregate indicators, as well as helping data users and policymakers identify specific governance challenges in individual countries. (3) The authors present new evidence on the reliability of expert assessments of governance which, alongside survey responses, form part of the aggregate measures of governance.
