Mass Torts in Europe Willem H. van Boom 2014-10-14 in recent years, there has been a growing interest in the legal aspects of mass torts in Europe. Both academics, legislatures, courts and policymakers throughout the whole of Europe have been struggling with the challenges that such 'massification' of private law relationships poses both in and outside of tort law. The subject moves between the law of civil procedure, substantive tort law, access to justice debates and regulatory frameworks for mass disputes. This volume offers both a kaleidoscopic review of real-life key cases of mass tort and an in-depth reflection on the broader implications of mass tort in Europe. Thus, the challenges posed by mass torts are explored, mapped and analysed.

You will need to purchase a new print book to get access to the full experience, including: lifetime access to the online ebook with highlight, annotation, and search capabilities; practice questions from your favorite study aids; an outline tool and other helpful resources. Tort doctrine is complex and nuanced on its own; a torts casebook that mystifies first year students will not help them develop the core skill of legal analysis. Tort Law in Focus presents concepts in a way that students can understand and apply. Rather than hide the ball, Geoffrey Rapp explains new terms clearly, and guides students in the specific techniques of applying tort law to practice-based problems. Along with concrete examples, Tort Law in Focus provides clear and thorough introductions to those areas of tort law (such as proximate cause under the dominant and new Restatement approaches; res ipsa; factual cause, including but-for cause and alternatives in special cases like indivisible injuries and alternative causes; the duty of owners and occupiers of land; and comparative negligence) that are especially challenging for first-year law students. Professors and Students Will Benefit From: Clear introductions and transitional text that frame key rules, concepts, and cases A wide selection of modern, high-interest cases that apply dominant legal rules, and which, where possible, interpret and apply the Restatement (Third) Summaries and discussion of canonical cases that convey the history and context of modern tort law Examples, flow charts and maps that illustrate concepts, rules, and the relationships among parties and interests Consistent use of problems that encourage students to implement "IRAC" (or equivalent) strategies for structuring their analysis Samples of documents commonly used in tort law practice, such as demand letters and complaints

Essential Cases on Damage Benedict Winiger 2012-01-01 With an emerging *ius commune* in the field of tort law, the extensive range of experiences derived from national court practice on the basis of prior laws will in certain respects be of comparatively less importance. A major lacuna is thus apparent: While publications of court decisions and databases exist, none provide access to a comparative selection of recurring issues in the various European legal systems. Along the lines of the previous Digest project on Causation, this study covers another key element of tort law - damage. The publication contains a systematic selection of cases from 27 countries across Europe in addition to ECJ case-law, with each case benefiting from an analysis and commentary from a national and, where appropriate, a comparative perspective. Further, the impact of these rulings on a future European law of torts is highlighted. Finally, the publication also looks into how key cases would be resolved under unified European tort law drafts. The object of the study is thus to bridge domestic case-law with the new body of uniform tort law thus facilitating the continuity of legal development in Europe.

Cases and Materials on Torts Richard A. Epstein 2020-02-13 Cases and Materials on Torts preserves historical and conceptual continuity between the present and the past, while addressing the most significant contemporary controversies in such fast-moving areas like public nuisance, global warming, and product liability, with new litigation against internet providers. Toward these dual ends, Richard A. Epstein and Catherine M. Sharkey have retained in the Twelfth Edition the great older cases, both English and American, that have proved themselves time and again in the classroom, and which continue to exert great influence on the

modern law. Our book also provides a rich exploration of the dominant corrective justice and law-and-economics approaches to tort law, as exemplified both in the retained and new cases and materials. New to the Twelfth Edition: Extensive new treatment of public nuisance cases to address the profound expansion of the once-sleepy area of public nuisance law into the realms of the opioid crisis, toxic torts, and global warming. Tort Law Thomas C. Galligan 2007 The Fourth Edition of this unique casebook has been dramatically revised. This new edition presents the important cases, statutes, empirical data, and competing tort theories in a problems-oriented format that is designed to help students acquire a sophisticated understanding of tort law through active learning. As before, the text includes a large number of problems. Now, however, the Problems, updated and considerably expanded, are organized in Sets at the end of each substantive chapter. This extensively re-written and reorganized edition includes the classic common law torts cases, but is updated throughout with teachable, cutting-edge decisions that will demand student interest and hold their attention. Particular care has been to take account of the most recent commentaries on tort law, such as the growing importance of the Restatement (Third) of Torts. Chapter One is unique among American torts casebooks in its examination of how the dominant twenty-first century tort theories influence judicial decisionmaking and scholarship. That chapter explains six key perspectives on tort law: Law and Economics; Corrective Justice; Critical Race Theory; Critical Feminism; Pragmatism; and Social Justice Chapter One references the famous McDonald's hot coffee litigation as a case study to illustrate these perspectives in action. Subsequent chapters continue to work through that case study and continually reference the perspectives to explain or challenge the decided cases. The authors seek to provide students with innovative cases and problems, empowering them with practical skills. By exposing students to the most important contemporary tort law theories, the Fourth Edition of this casebook encourages students to go beyond passively memorizing case holdings and the voyeuristic experience of reading appellate opinions and truly gain perspectives on tort law. This book also is available in a three-hole punched, alternative loose-leaf version printed on 8.5 x 11 inch paper with wider margins and with the same pagination as the hardbound book.

Landmark Cases in the Law of Tort Charles Mitchell 2010-02-18 Landmark Cases in the Law of Tort contains thirteen original essays on leading tort cases, ranging from the early nineteenth century to the present day. It is the third volume in a series of collected essays on landmark cases (the previous two volumes having dealt with restitution and contract). The cases examined raise a broad range of important issues across the law of tort, including such diverse areas as acts of state and public nuisance, as well as central questions relating to the tort of negligence. Several of the essays place cases in their historical context in ways that change our understanding of the case's significance. Sometimes the focus is on drawing out previously neglected aspects of cases which have been - undeservedly - assigned minor importance. Other essays explore the judicial

methodologies and techniques that worked to shape leading principles of tort law. So much of tort law turns on cases, and there are so many cases, that all but the most recent decisions have a tendency to become reduced to terse propositions of law, so as to keep the subject manageable. This collection shows how important it is, despite the constant temptation to compression, not to lose sight of the contexts and nuances which qualify and illuminate so many leading authorities.
