China's Influence and American Interests Larry Diamond 2019-08-01 While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic "discourse war" waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country's ambitions and methods than they do now.

Colonial Legacies Anne E. Booth 2018-03-31 It is well known that Taiwan and South Korea, both former Japanese colonies, achieved rapid growth and industrialization after 1960. The performance of former European and American colonies (Malaysia, Singapore, Burma, Vietnam, Laos, Cambodia, Indonesia, and the Philippines) has been less impressive. Some scholars have attributed the difference to better infrastructure and greater access to education in Japan's colonies. Anne Booth examines and critiques such arguments in this ambitious comparative study of economic development in East and Southeast Asia from the beginning of the twentieth century until the 1960s. Booth takes an in-depth look at the nature and consequences of colonial policies for a wide range of factors, including the growth of export-oriented agriculture and the development of manufacturing industry. She evaluates the impact of colonial policies on the growth and diversification of the market economy and on the welfare of indigenous populations. Indicators such as educational enrollments, infant mortality rates, and crude death rates are used to compare living standards across East and Southeast Asia in the 1930s. Her analysis of the impact that Japan's Greater Asian Co-Prosperty Sphere and later invasion and conquest had on the region and the living standards of its people leads to a discussion of the painful and protracted transition to independence following Japan's defeat. Throughout Booth emphasizes the great variety of economic and social policies pursued by the various colonial governments and the diversity of outcomes. Lucidly and accessibly written, *Colonial Legacies* offers a balanced and elegantly nuanced exploration of a complex historical reality. It will be a lasting contribution to scholarship on the modern economic history of East and Southeast Asia and of special interest to those concerned with the dynamics of development and the history of colonial regimes. Chinese Lessons from Other Peoples' Wars Andrew Scobell 2019-07-24 The importance of China stems not only from its current international role and its influence on the Asia-Pacific region in particular, but also because China's impact on global developments will likely continue to grow. One of our enduring imperatives is to accurately survey China's experiences as a means to grasp its existing perceptions, motivations, and ambitions. More than ever, solid, evidence-based evaluation of what the PLA has learned from the use of force and conflict elsewhere in the world is needed to shed light on the prospects for its cooperation, or rivalry, with the international community. This volume provides unique, valuable insights on how the PLA has applied the lessons learned from others' military actions to its own strategic planning.

The United States and China in Power Transition David Lai 2019-07-24 The most profound change that the United States and China have experienced in their relations over the past 30 years is perhaps the onset of an apparent power transition between the two nations. This potentially titanic change was set in motion as a result of China's genuine and phenomenal economic development, and the impact of this economic success on the United States and the U.S.-led international system has been growing steadily. This perceived power transition process will continue to be a defining factor in U.S.-China relations for the next 30 years. As China's economic, political, cultural, and military influence continue to grow globally, what kind of a global power will China become? What kind of a relationship will evolve between China and the United States? How will the United States maintain its leadership in world affairs and develop a working relationship with China so that China can join hands with the United States to shape the world in constructive ways? In this book, Dr. David Lai offers an engaging discussion of these questions and others. His analysis addresses issues that trouble U.S. as well as Chinese leaders. Dr. Lai has taken painstaking care to put the conflicting positions in perspective, most notably presenting the origins of the conflicts, highlighting the conflicting parties' key opposing positions (by citing their primary or original sources), and pointing out the stalemates.

This books offers a complete picture of where the Chinese air force is today, where it has come from, and most importantly, where it is headed.

Threatened Amphibians of the World S. N. Stuart 2008 "Amphibians are facing an extinction crisis, but getting to the facts has been difficult. "Threatened Amphibians of the World" is a visual journey through the first-ever comprehensive assessment of the conservation status of the world's 6,000 known species of frogs, toads, salamanders, and caecilians. All 1,900 species known to be threatened with extinction are covered, including a description of threats to each species and an evaluation of conservation measures in place or needed. Each entry includes a photograph or illustration of the species where available, a distribution map, and detailed information on range, population and habitat and ecology. Introductory chapters present a detailed analysis of the results, complemented by a series of short essays written by many of the world's leading herpetologists. Appendices include annotated lists of lower risk species and a country-by-country listing of threatened amphibians."--pub. desc.

The Handbook of Chinese Linguistics C. T. James Huang 2018-03-20 The Handbook of Chinese Linguistics is the first comprehensive introduction to Chinese linguistics from the perspective of modern theoretical and formal linguistics. Containing twenty-five chapters, the book offers a balanced, accessible and thoughtfully organized introduction to some of the most important results of research into Chinese linguistics carried out by theoretical linguists during the last thirty years. Presenting critical overviews of a wide range of major topics, it is the first to meet the great demand for an overview volume on core areas of Chinese linguistics.

Authoritative contributions describe and assess the major achievements and controversies of research undertaken in each area, and provide bibliographies for further reading. The contributors refer both to their own work in relevant fields, and objectively present a range of competitor theories and analyses, resulting in a volume that is fully comprehensive in its coverage of theoretical research into Chinese linguistics in recent years. This unique Handbook is suitable both as a primary reader for structured, taught courses on Chinese linguistics at university level, and for individual study by graduates and other professional linguists.

China and the West Michael Saffle 2017-05-09 Western music reached China nearly four centuries ago, with the arrival of Christian missionaries, yet only within the last century has Chinese music absorbed its influence. As China and the West demonstrates, the emergence of "Westernized" music from China—concurrent with the technological advances that have made global culture widely accessible—has not established a prominent presence in the West. China and the West brings together essays on centuries of Sino-Western musical exchange by musicologists, ethnomusicologists, and music theorists from around the world. It opens with a look at theoretical approaches of prior studies of musical encounters and a comprehensive survey of the intercultural and cross-cultural theoretical frameworks—exoticism, orientalism, globalization, transculturation, and hybridization—that inform these essays. Part I focuses on the actual encounters between Chinese and European musicians, their instruments and institutions, and the compositions inspired by these encounters, while Part II examines theatricalized and mediated East-West cultural exchanges, which often drew on stereotypical tropes, resulting in performances more inventive than accurate. Part III looks at the musical language, sonority, and subject matters of "intercultural" compositions by Eastern and Western composers. Essays in Part IV address reception studies and consider the ways in which differences are articulated in musical discourse by actors serving different purposes, whether self-promotion, commercial marketing, or modes of nationalistic—even propagandistic—expression. The volume's extensive bibliography of secondary sources will be invaluable to scholars of music, contemporary Chinese culture, and the globalization of culture.

Chinese Workers Jackie Sheehan 2002-09-11 Jackie Sheehan traces the background and development of workers clashes with the Chinese Communist Party through mass campaigns such as the 1956-7 Hundred Flowers movement, the Cultural Revolution, the April Fifth Movement of 1976, Democracy Wall and the 1989 Democracy Movement. The author provides the most detailed and complete picture of workers protest in China to date and locates their position within the context of Chinese political history. Chinese Workers demonstrates that the image of Chinese workers as politically conformist and reliable supporters of the Communist Party does not match the realities of industrial life in China. Recent outbreaks of protest by workers are less of a departure from the past than is generally realized.

China and the International System, 1840-1949 David Scott 2008-11-07 Examines the images, hopes, and fears that were evoked during China's century-long subservience to external powers.

The Chinese Language John DeFrancis 1986-03-01 "DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated (cocktail party) ignorance. Who could ask for anything more? There is no other book like it. ... It is one of a kind, a first, and I would not only buy it but I would recommend it to friends and colleagues, many of whom are visiting China now and are adding 'two-week-expert' ignorance to the two kinds that existed before. This is a book for everyone." --Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York "Professor De Francis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry pedantic facts, but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book, for Professor DeFrancis takes nothing for granted." --William S.Y. Wang, professor of linguistics, University of California at Berkeley

New Horizons in Chinese Linguistics C-T James Huang 2012-12-06 The past decade and a half has witnessed a great deal of renewed interest in the study of Chinese linguistics, not only in the traditional areas of philological studies and in theoretically oriented areas of synchronic grammar and language change but also in the cultivation of new frontiers in related areas of the cognitive sciences. There is a significant increase in the number of students studying one area or another of the linguistic structure of Chinese in various linguistic programs in the United States, Europe, Australia and in China, Hong Kong, Singapore, Taiwan, and other parts of Asia. Several new academic departments devoted to the study of linguistics have been established in Taiwan and Hong Kong in the past few years. The increasing research and study activities have also resulted in a number of national and international conferences, including the North American Conference on Chinese Linguistics (NACCL), which has been held annually in the United States; the International Symposium on Chinese Languages and Linguistics (ISCLL), which has had its fourth meeting since it was launched by Academia Sinica in Taiwan in 1990; the International Association of Chinese Linguistics (IACL), created in Singapore in 1992 and now incorporated in Irvine, California, which has held its annual meetings at major institutions in Asia, Europe, and the US.

Education and Reform in China Emily Hannum 2012-11-12 Transformative market reforms in China since the late 1970s have improved living standards dramatically, but have also led to unprecedented economic inequality. During this period, China's educational system was restructured to support economic development, with educational reforms occurring at a startling pace. Today, the educational system has diversified in structure, finance, and content; it has become more market-oriented; and it is serving an increasingly diverse student population. These changes carry significant consequences for China's social mobility and inequality, and future economic prospects. In Education and Reform in China, leading scholars in the fields of education, sociology, demography, and economics investigate the evolution of educational access and attainment, educational quality, and the economic consequences of being educated. Education and Reform in China shows that economic advancement is increasingly tied to education in China, even as educational services are increasingly marketized. The volume investigates the varying impact of change for different social, ethnic, economic and geographic groups. Offering interdisciplinary views on the changing role of education in Chinese society, and on China's educational achievements and policy challenges, this book will be an important resource for those interested in education, public policy, and development issues in China.

China's Arms Acquisitions from Abroad Bates Gill 1995 The People's Republic of China seeks to attain military strength commensurate with its growing regional and international influence and to close the military-technological gap which has long separated it from the other major powers. To achieve its military modernization goals, China will continue its efforts to import the critical weapons and technologies it requires. Yet, for

reasons rooted in both historical and contemporary contexts, China faces many difficulties and setbacks in this quest. China's Arms Acquisitions from Abroad documents and analyses the 150-year effort by China to strengthen its military forces through arms imports. Based on an historical understanding of this process, the report focuses mainly on contemporary transfers of weapons and technologies to China, particularly those from the Soviet Union and Russia, but also including imports from Israel, France, the United Kingdom, the United States and other suppliers. Relying on primary sources as well as on the most comprehensive collection of open-source data and information available on the subject, the report provides extensive documentation and a balanced assessment of past, current and likely future developments regarding Chinese arms imports. This unique study will prove useful to experts and officials concerned with security and regional affairs in East Asia.

The Coming Man from Canton Chris W. Merritt 2017 In The Coming Man from Canton Christopher W. Merritt mines the historical and archaeological record of the Chinese immigrant experience in Montana to explore new questions and perspectives. During the 1860s Chinese immigrants arrived by the thousands, moving into the Rocky Mountain West and tenaciously searching for prosperity in the face of resistance, restriction, racism, and armed hostility from virtually every ethnic group in American society. As second-class citizens, Chinese immigrants remained largely insular and formed their own internal governments as well as labor and trade networks, typically establishing communities apart from the main towns. Chinese miners, launderers, restaurant keepers, gardeners, railroad laborers, and other workers became a separate but integral part of the American experience in the Intermountain West. Although Chinese immigrants constituted more than 10 percent of the Montana Territory's total population by 1870, the historical records provide a biased and narrow perspective, as they were generally written by European American community members. Merritt uses the statewide Montana context to show the diversity of Chinese settlements that has often been neglected by archival studies. His research highlights how the legacy of the Chinese in Montana is, or is not, reflected in modern Montana identity and how scholars, educators, professionals, and the public can alter the existing perception of this population as the "other" and perceive it instead an integral part of Montana's past.

Also, this book provides innovative and unique viewpoints on conceptualizing and mapping the globalization and internationalization of higher education, especially for current Chinese higher education (1949-2016). Chinese for Specific and Professional Purposes Hongyin Tao 2019-08-20 This book, likely the first of its kind in the English language, explores Chinese for specific and professional purposes (CSP) in terms of theorizing and developing practical applications for language teaching and learning. While research in language for specific purposes is thriving for languages such as English, there has been comparatively little such research conducted for Chinese. This volume attempts to fill the gap by bringing together practitioners from a broad international scholarly community, who share common interests yet diverse orientations. Seventeen papers are included, and address four broad thematic categories: (1) academic Chinese, (2) business Chinese, (3) Chinese for medicine and health care, and (4) Chinese for other broadly defined services and industries (diplomacy, tourism, wine-tasting, etc.). Representing the state of the art in CSP research, the book offers an indispensable guide for anyone interested in theoretical and practical issues in this area of applied Chinese language studies.

Chinese Rhetoric and Writing Andy Kirkpatrick 2012-03-07 Andy Kirkpatrick and Zhichang Xu offer a response to the argument that Chinese students' academic writing in English is influenced by "culturally nuanced rhetorical baggage that is uniquely Chinese and hard to eradicate." Noting that this argument draws from "an essentially monolingual and Anglo-centric view of writing," they point out that the rapid growth in the use of English worldwide calls for "a radical reassessment of what English is in today's world." The result is a book that provides teachers of writing, and in particular those involved in the teaching of English academic writing to Chinese students, an introduction to key stages in the development of Chinese rhetoric, a wide-ranging field with a history of several thousand years. Understanding this important rhetorical tradition provides a strong foundation for assessing and responding to the writing of this growing group of students.

The Globalization Paradox Dani Rodrik 2011-03-24 For a century, economists have driven forward the cause of globalization in financial institutions, labour markets, and trade. Yet there have been consistent warning signs that a global economy and free trade might not always be advantageous. Where are the pressure points? What could be done about them? Dani Rodrik examines the back-story from its seventeenth-century origins through the milestones of the gold standard, the Bretton Woods Agreement, and the Washington Consensus, to the present day. Although economic globalization has enabled unprecedented levels of prosperity in advanced countries and has been a boon to hundreds of millions of poor workers in China and elsewhere in Asia, it is a concept that rests on shaky pillars, he contends. Its long-term sustainability is not a given. The heart of Rodrik's argument is a fundamental 'trilemma': that we cannot simultaneously pursue democracy, national self-determination, and economic globalization. Give too much power to governments, and you have protectionism. Give markets too much freedom, and you have an unstable world economy with little social and political support from those it is supposed to help. Rodrik argues for smart globalization, not maximum globalization.

Adult Education in China Carman St John Hunter 2018-08-06 Originally published in 1985. China is currently making a massive effort to educate its workforce in a formal and structured system. A good deal has been written about China's attempts, since 1949, to eradicate illiteracy and to universalise primary and secondary school education but the subject of this book is an educational system established to meet the needs of those already employed whether in government, industry or agriculture. Two study teams, sponsored by the International Council for Adult Education, visited China in 1981 to explore this educational phenomenon. Their findings, updated by subsequent ICAE visits and enriched by further reading, form the basis of this book. This is the story of the Chinese experience of developing adult education. It will be valuable to those involved in extending education in the industrialised world who are pursuing modernisation goals for people long excluded from the formal education system.
