A Nation of Women Luisa Capetillo 2021-09-14 The groundbreaking feminist and socialist writings of Puerto Rican author and activist Luisa Capetillo A Penguin Classic In 1915, Puerto Rican activist Luisa Capetillo was arrested and acquitted for being the first woman to wear men's trousers publicly. While this act of gender-nonconforming rebellion elevated her to feminist icon status in modern pop culture, it also overshadowed the significant contributions she made to the women's movement and anarchist labor movements of the early twentieth century-- both in her native Puerto Rico and in the migrant labor belt in the eastern United States. With the volume *A Nation of Women*, Capetillo's socialist and feminist activism is given the spotlight it deserves with its inclusion of the first English translation of Capetillo's landmark *Mi opinión sobre las libertades, derechos y deberes de la mujer*. Originally published in Spanish in 1911, *Mi opinión* is considered by many to be the first feminist treatise in Puerto Rico and one of the first in Latin America and the Caribbean. In concise prose, Capetillo advocates a workers' revolution, forcefully demanding an end to the exploitation and subordination of workers and women. Her essays challenge big

business in favor of socialism, call for legalizing divorce and the acceptance of "free love" in relationships, and cover topics such as sexuality, mental and physical health, hygiene, spirituality, and nutrition. At once a sharp critique and a celebration of the gathering fervor of world politics, A Nation of Women embraces the humanistic thinking of the early twentieth century and envisions a world in which economic and social structures can be broken down, allowing both the worker and the woman to be free.

### **Models and Frameworks for Implementing Evidence-Based Practice**

Jo Rycroft-Malone 2011-09-07 The Evidence-Based Nursing Series is co-published with Sigma Theta Tau

International (STTI). The series focuses on implementing evidence-based practice in nursing and mirrors the remit of Worldviews on Evidence-Based Nursing, encompassing clinical practice, administration, research and public policy. Models and Frameworks for Implementing Evidence- Based Practice: Linking Evidence to Action looks at ways of implementing evidence gained through research and factors that influence successful implementation. It acknowledges the gap that exists between obtaining evidence and the practicalities of putting it into practice and provides direction to help to close this gap. This, the first book in the series, helps the reader to make decisions about the appropriateness of using various models and frameworks. A selection of models and frameworks are examined in detail including examples of their use in practice. The book concludes with an analysis and synthesis of the included models and frameworks. The models and frameworks that have been included are based on a number of criteria: that they are internationally recognised, have undergone widespread evaluation and testing, are transferable across different settings, and can be used by different disciplines. Models and frameworks include: Stetler Model Ottawa Model of Research Use IOWA model of evidence-based practice Advancing Research and Clinical Practice through Close Collaboration (ARCC) model Dobbins' dissemination and

use of research evidence for policy and practice framework  
Joanna Briggs Institute model Knowledge to Action framework  
Promoting Action on Research Implementation in Health Services (PARIHS) Key Points: Includes an overview of implementation issues and the use of theory and frameworks in implementing evidence into practice Chapters are written by the developers of the model or framework Each chapter provides background on an implementation model or framework, suitable applications, underlying theory and examples of use Each chapter examines strengths and weaknesses of each model alongside barriers and facilitators for its implementation

*Time-Varying Effect Modeling for the Behavioral, Social, and Health Sciences* Stephanie T. Lanza 2021-05-06 This book is the first to introduce applied behavioral, social, and health sciences researchers to a new analytic method, the time-varying effect model (TVEM). It details how TVEM may be used to advance research on developmental and dynamic processes by examining how associations between variables change across time. The book describes how TVEM is a direct and intuitive extension of standard linear regression; whereas standard linear regression coefficients are static estimates that do not change with time, TVEM coefficients are allowed to change as continuous functions of real time, including developmental age, historical time, time of day, days since an event, and so forth. The book introduces readers to new research questions that can be addressed by applying TVEM in their research. Readers gain the practical skills necessary for specifying a wide variety of time-varying effect models, including those with continuous, binary, and count outcomes. The book presents technical details of TVEM estimation and three novel empirical studies focused on developmental questions using TVEM to estimate age-varying effects, historical shifts in behavior and attitudes, and real-time changes across days relative to an event. The volume provides a walkthrough of the process for conducting each of these studies,

presenting decisions that were made, and offering sufficient detail so that readers may embark on similar studies in their own research. The book concludes with comments about additional uses of TVEM in applied research as well as software considerations and future directions. Throughout the book, proper interpretation of the output provided by TVEM is emphasized. Time-Varying Effect Modeling for the Behavioral, Social, and Health Sciences is an essential resource for researchers, clinicians/practitioners as well as graduate students in developmental psychology, public health, statistics and methodology for the social, behavioral, developmental, and public health sciences.

**Cognition, Metacognition, and Reading** Donna-Lynn Forrest-Pressley 2013-03-12 We had our first conversation about cognition, metacognition, and reading in September of 1976. Our particular concern was with reading and learning to read, and what, if anything, meta cognition might have to do with it all. We didn't really know much about metacognition then, of course, but then most other people were in the same predicament. Some people had been working with interesting approaches and results on metalanguage and reading, among them J. Downing, L. Ehri, L. Gleitman, I. Mattingly, and E. Ryan, and it also was about that time that people were becoming aware of E. Markman's first studies of comprehension monitoring. Other than that perhaps the most influential item around was the perhaps already "classic" monograph by Kruetzer, Leonard, and Flavell on what children know about their own memory. Also in the air at that time were things like A. Brown's notions about "knowing, knowing about know ing, and knowing how to know," D. Meichenbaum's ideas about cognitive behavior modification, and the work by A. Brown and S. Smiley on the awareness of important units in text. Even though these developments were cited as new and innovative, it was not the case that psychologists had never before been of questions. They certainly interested in, or concerned with

metacognitive sorts had, as clearly evidenced by the notion of "metaplans", in Miller, Galanter, and Pribram's *Plans and the Structure of Behavior*.

**Mythodologies** Joseph A. Dane 2018-05-17 Mythodologies challenges the implied methodology in contemporary studies in the humanities. We claim, at times, that we gather facts or what we will call evidence, and from that form hypotheses and conclusions. Of course, we recognize that the sum total of evidence for any argument is beyond comprehension; therefore, we construct, and we claim, preliminary hypotheses, perhaps to organize the chaos of evidence, or perhaps simply to find it; we might then see (we claim) whether that evidence challenges our tentative hypotheses. Ideally, we could work this way. Yet the history of scholarship and our own practices suggest we do nothing of the kind. Rather, we work the way we teach our composition students to write: choose or construct a thesis, then invent the evidence to support it. This book has three parts, examining such methods and pseudo-methods of invention in medieval studies, bibliography, and editing. Part One, "Noster Chaucer," looks at examples in Chaucer studies, such as the notion that Chaucer wrote iambic pentameter, and the definition of a canon in Chaucer. "Our" Chaucer has, it seems, little to do with Chaucer himself, and in constructing this entity, Chaucerians are engaged largely in self-validation of their own tradition. Part Two, "Bibliography and Book History," consists of three studies in the field of bibliography: the recent rise in studies of annotations; the implications of presumably neutral terminology in editing, a case-study in cataloguing. Part Three, "Cacophonies: A Bibliographical Rondo," is a series of brief studies extending these critiques to other areas in the humanities. It seems not to matter what we talk about: meter, book history, the sex life of bonobos. In all of these discussions, we see the persistence of error, the intractability of uncritical assumptions, and the

dominance of authority over evidence. TABLE OF CONTENTS // Part I. Noster Chaucerus Chap. 1. How Many Chaucerians Does it Take to Count to Eleven? **Posthuman and Political Care Ethics for Reconfiguring Higher Education Pedagogies** Vivienne Bozalek 2020-11-05

This book makes an important contribution to ongoing debates about the epistemological, ethical, ontological and political implications of relational ethics in higher education. By furthering theoretical developments on the ethics of care and critical posthumanism, it speaks to contemporary concerns for more socially just possibilities and enriched understandings of higher education pedagogies. The book considers how the political ethics of care and posthuman/new feminist materialist ethics can be diffracted through each other and how this can have value for thinking about higher education pedagogies. It includes ideas on ethics which push those boundaries that have previously served educational researchers and proposes new ways of conceptualising relational ethics. Chapters consider the entangled connections of the linguistic, social, material, ethical, political and biological in relation to higher education pedagogies. This topical and transdisciplinary book will be of great interest for academics, researchers and postgraduate students in the fields of posthuman and care ethics, social justice in education, higher education, and educational theory and policy.

Revolutionary Mothers Carol Berkin 2007-12-18 A

groundbreaking history of the American Revolution that “vividly recounts Colonial women’s struggles for independence—for their nation and, sometimes, for themselves.... [Her] lively book reclaims a vital part of our political legacy" (Los Angeles Times Book Review). The American Revolution was a home-front war that brought scarcity, bloodshed, and danger into the life of every American. In this book, Carol Berkin shows us how women played a vital role throughout the conflict. The women of the Revolution were most active at home, organizing boycotts of British goods, raising funds for the fledgling nation, and managing the family

business while struggling to maintain a modicum of normalcy as husbands, brothers and fathers died. Yet Berkin also reveals that it was not just the men who fought on the front lines, as in the story of Margaret Corbin, who was crippled for life when she took her husband's place beside a cannon at Fort Monmouth. This incisive and comprehensive history illuminates a fascinating and unknown side of the struggle for American independence.

*Operation X* Captain M.N.R. Samant 2019-06-25 In April 1971, the Indian Navy's Directorate of Naval Intelligence set up a covert maritime warfare unit - Naval Commando Operations (X) (NCO[X]). This black unit's existence was known to very few even within the navy. Its covert operation aimed at disrupting the maritime commerce lines that sustained the Pakistan Army in its eastern province. Over the next few months, this irregular unit, comprising Indian naval officers, divers, and former Pakistani submariners, set to work. They transformed over 400 Bengali youths from East Pakistan into combat swimmers, trained to assault merchant ships. The gunboats of NCO(X)'s naval wing mined shipping channels and harassed shipping entering East Pakistan. The ferocious campaign waged by this tiny unit was without precedent in the annals of naval warfare. They sank and disabled over 100,000 tonnes of shipping in the province, in support of the government of Bangladesh in exile. Their actions contributed towards India's ultimate victory in the eastern theatre of the December 1971 Indo-Pak war. Revealed for the very first time, here is the explosive authentic account - co-authored by a key NCO(X) member - of the guerrilla operation that went for the maritime jugular of Pakistan, and facilitated the birth of Bangladesh.

### **Underrepresentation and the Question of Diversity**

Rosemary Gillett-Karam 1991 Within the context of the history of educational discrimination and related social movements in the United States, this book examines the underrepresentation of women and of racial and ethnic minorities in community college leadership. Chapter 1, "Finding Equality in Egalitarian Educational Institutions," presents the premise of the book, that community colleges have not met their responsibilities to these underrepresented groups. In chapter 2, "Confronting the Language of Diversity," the debates concerning equality and inequality, the meaning of justice, the critical role of culture, and American democracy and pluralism are explored. Chapter 3, "Women: Expression and Experience in Academic Literature," looks at the historical and philosophical premises upon which the "woman question" rests, and reviews recent findings concerning the role of women in education and leadership. In chapter 4, "Minorities: Expression and Experience in Academic Literature," the dilemmas and controversies surrounding racial and ethnic equality are scrutinized, drawing on the legal and educational histories of minority groups. Chapter 5, "Affirmative Action: Then and Now," examines the issues and politics of social movements and their challenges to the status quo. In chapter 6, "Inclusionary Practices: Highlighting Exemplary Programs," the achievements of several organizations, programs, and policies now existing throughout the United States are discussed. Chapter 7, "What the Leaders Are Saying: The Voices of Diversity," presents the views of community college leaders from underrepresented groups. Finally, chapter 8, "Getting There from Where You Are: Increasing Representation and Recognition," provides a timeline

and strategies for transforming community colleges. (JMC)  
Now: The Physics of Time Richard A. Muller 2016-09-20 From the celebrated author of the best-selling *Physics for Future Presidents* comes “a provocative, strongly argued book on the fundamental nature of time” (Lee Smolin). You are reading the word “now” right now. But what does that mean? “Now” has bedeviled philosophers, priests, and modern-day physicists from Augustine to Einstein and beyond. In *Now*, eminent physicist Richard A. Muller takes up the challenge. He begins with remarkably clear explanations of relativity, entropy, entanglement, the Big Bang, and more, setting the stage for his own revolutionary theory of time, one that makes testable predictions. Muller’s monumental work will spark major debate about the most fundamental assumptions of our universe, and may crack one of physics’ longest-standing enigmas.

Distributed Learning provides evidence based information on a variety of issues, surrounding online teaching and learning from the perspective of librarians. Includes extensive literature search on distributed learning Provides pedagogy, developing content, and technology by librarians Shows the importance of collaboration and buy-in from all parties involved

Microbiome and Cancer Erle S. Robertson 2019-02-20 This book ventures into a new and exciting area of discovery that directly

ties our current knowledge of cancer to the discovery of microorganisms associated with different types of cancers. Recent studies demonstrate that microorganisms are directly linked to the establishment of cancers and that they can also contribute to the initiation, as well as persistence of, the cancers. *Microbiome and Cancer* covers the current knowledge of microbiome and its association with human cancers. It provides important reading for novices, senior undergraduates in cancer and microbiology, graduate students, junior investigators, residents, fellows and established investigators in the fields of cancer and microbiology. We cover areas related to known, broad concepts in microbiology and how they can relate to the ongoing discoveries of the micro-environment and the changes in the metabolic and physiologic states in that micro-environment, which are important for the ongoing nurturing and survival of the poly-microbial content that dictates activities in that micro-environment. We cover the interactions of microorganisms associated with gastric carcinomas, which are important for driving this particular cancer. Additional areas include oral cancers, skin cancers, ovarian cancers, breast cancers, nasopharyngeal cancers, lung cancers, mesotheliomas, Hodgkin's and non-Hodgkin's lymphomas, glioblastoma multiforme, hepatocellular carcinomas, as well as the inflammatory response related to the infectious agents in cancers. This book covers the metabolic changes that occur because of infection and their support for development of cancers, chronic infection and development of therapeutic strategies for detection and control of the infection. The field of microbiome research has exploded over the last five years, and we are now understanding more and more about the context in which microorganisms can contribute to the onset of cancers in humans. The field of microbiome research has demonstrated that the human body has specific biomes for tissues and that changes in these biomes at the specific organ sites can result in disease. These changes can result in dramatic

differences in metabolic shifts that, together with genetic mutations, will produce the perfect niche for establishment of the particular infection programmes in that organ site. We are just beginning to understand what those changes are and how they influence the disease state. Overall, we hope to bring together the varying degrees of fluctuations in the microbiome at the major organ sites and how these changes affect the normal cellular processes because of dysregulation, leading to proliferation of the associated tissues.

*Meeting Regional Stemm Workforce Needs in the Wake of Covid-19* National Academies of Sciences Engineering and Medicine 2021-07-23

The COVID-19 pandemic is transforming the global economy and significantly shifting workforce demand, requiring quick, adaptive responses. The pandemic has revealed the vulnerabilities of many organizations and regional economies, and it has accelerated trends that could lead to significant improvements in productivity, performance, and resilience, which will enable organizations and regions to thrive in the next normal. To explore how communities around the United States are addressing workforce issues laid bare by the COVID-19 pandemic and how they are taking advantage of local opportunities to expand their science, technology, engineering, mathematics, and medicine (STEMM) workforces to position them for success going forward, the Board of Higher Education and Workforce of the National Academies of Sciences, Engineering, and Medicine convened a series of workshops to identify immediate and near-term regional STEMM workforce needs in the wake of the COVID-19 pandemic. The workshop planning committee identified five U.S. cities and their associated metropolitan areas - Birmingham, Alabama; Boston, Massachusetts; Richmond, Virginia; Riverside, California; and Wichita, Kansas - to host workshops highlighting promising practices that communities can use to respond urgently and appropriately to their STEMM workforce needs. A sixth workshop discussed how the lessons learned during the five region-focused workshops could be applied in other communities to meet STEMM workforce needs.

This proceedings of a virtual workshop series summarizes the presentations and discussions from the six public workshops that made up the virtual workshop series and highlights the key points raised during the presentations, moderated panel discussions and deliberations, and open discussions among the workshop participants.

*A Tale of Three Next Generation Sequencing Platforms Applied* Research Press 2015-07-24 Next generation sequencing (NGS) technology has revolutionized genomic and genetic research. The pace of change in this area is rapid with three major new sequencing platforms having been released in 2011: Ion Torrent's PGM, Pacific Biosciences' RS and the Illumina MiSeq. Here we

compare the results obtained with those platforms to the performance of the Illumina HiSeq, the current market leader. In order to compare these platforms, and get sufficient coverage depth to allow meaningful analysis, we have sequenced a set of 4 microbial genomes with mean GC content ranging from 19.3 to 67.7%. Together, these represent a comprehensive range of genome content. Here we report our analysis of that sequence data in terms of coverage distribution, bias, GC distribution, variant detection and accuracy. All three fast turnaround sequencers evaluated here were able to generate usable sequence. However there are key differences between the quality of that data and the applications it will support. Proceeds from the sale of this book go to the support of an elderly disabled person.

*Successful Strategies for Teaching Undergraduate Research*

Marta Deyrup 2013-09-11 Editors Marta Deyrup and Beth Bloom have brought together well-known educators from the fields of library science, communication, composition, and education to show you how to develop successful strategies for teaching undergraduates how to conduct basic research and write papers. Chapters cover each step of the research process, beginning appropriately with separate pieces from a librarian and from an academic on how to construct good research assignments. Following chapters cover establishing the research question, assessing the research process, information ethics and the protocols of research, and using new modes and media to communicate research findings. The book fully explores current theories on pedagogy and provides practical demonstrations of how library instruction can reinforce critical thinking and set the groundwork in place for life-long learning. Each chapter contains an extensive bibliography for further reading.

Virtually Embedded Elizabeth Leonard 2014 This treatment of embedded librarianship showcases strategies for successfully embedding librarians and library services across higher

education. Chapters feature case studies and reports on projects from a wide variety of colleges and universities, including some surprising settings and results. In this collection, librarians are seen using the embedded model to become valuable collaborators, trusted instructors, and partners in shaping the curriculum and broad institutional goals beyond the boundaries of the library.

*Expanding Underrepresented Minority Participation* Institute of Medicine 2011-07-29 In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. *Expanding Underrepresented Minority Participation* explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. *Expanding Underrepresented Minority Participation* analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. *Expanding*

Underrepresented Minority Participation suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

The concluding chapter by the editors delineates points of convergence and divergence among the contributions and distills important implications for future theory and research.

**Instructional Design: The ADDIE Approach** Robert Maribe Branch 2009-10-05 The Analyze, Design, Develop, Implement, and Evaluate (ADDIE) process is used to introduce an approach to instruction design that has a proven record of success.

Instructional Design: The ADDIE Approach is intended to serve as an overview of the ADDIE concept. The primary rationale for this book is to respond to the need for an instruction design primer that addresses the current proliferation of complex educational development models, particularly non-traditional approaches to learning, multimedia development and online learning environments. Many entry level instructional designers and students enrolled in related academic programs indicate they are better prepared to accomplish the challenging work of creating effective training and education materials after they have a thorough understanding of the ADDIE principles. However, a survey of instructional development applications indicate that the overwhelming majority of instructional design models are based on ADDIE, often do not present the ADDIE origins as part of their content, and are poorly applied by people unfamiliar with the ADDIE paradigm. The purpose of this book is to focus on fundamental ADDIE principles, written with a minimum of professional jargon. This is not an attempt to debate scholars or other educational professionals on the finer points of instructional design, however, the book's content is based on sound doctrine and supported by valid empirical research. The only bias toward the topic is that generic terms will be used as often as possible in order to make it easy for the reader to apply the concepts in the

book to other specific situations.
