Mobile Museums Felix Driver 2021-04-19 Mobile Museums presents an argument for the importance of circulation in the study of museum collections, past and present. It brings together an impressive array of international scholars and curators from a wide variety of disciplines – including the history of science, museum anthropology and postcolonial history – to consider the mobility of collections. The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re-mobilisation, notably in the context of Indigenous community engagement. Contributors seek to explore processes of circulation historically in order to re-examine, inform and unsettle common assumptions about the way museum collections have evolved over time and through space. By foregrounding questions of circulation, the chapters in Mobile Museums collectively represent a fundamental shift in the understanding of the history and future uses of museum collections. The book addresses a variety of different types of collection, including the botanical, the ethnographic, the economic and the archaeological. Its perspective is truly global, with case studies drawn from South America, West Africa, Oceania, Australia, the United States, Europe and the UK. Mobile Museums helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today. Praise for Mobile Museums 'This book advances a paradigm shift in studies of museums and collections. A distinguished group of contributors reveal that collections are not dead assemblages. The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism, travel and the history of knowledge – and have implications for the remobilisation of museums in the future.' – Nicholas Thomas, University of Cambridge 'The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another, it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re-mobilisation.' – Arthur MacGregor

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective – to nurture young children and secure their future success – the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The World of UCL Negley Harte 2018-05-21 From its foundation in 1826, UCL embraced a progressive and pioneering spirit. It was the first university in England to admit students regardless of religion and made higher education affordable and accessible to a much broader section of society. It was also effectively the first university to welcome women on equal terms with men. From the outset UCL showed a commitment to innovative ideas and new methods of teaching and research. This book charts the history of UCL from 1826 through to the present day, highlighting its many contributions to society in Britain and around the world. It covers the expansion of the university through the growth in student numbers and institutional mergers. It documents shifts in governance throughout the years and the changing social and economic context in which UCL operated, including challenging periods of reconstruction after two World Wars. Today UCL is one of the powerhouses of research and teaching, and a truly global university. It is currently seventh in the QS World University Rankings. This completely revised and updated edition features a new chapter based on interviews with key individuals at UCL. It comes at a time of ambitious development for UCL with the establishment of an entirely new campus in East London, UCL East, and Provost Michael Arthur's 'UCL 2034' strategy which aims to secure the university's long-term future and commits UCL to delivering global impact.

Library as Place Geoffrey T. Freeman 2005 What is the role of a library when users can obtain information from any location? And what does this role change mean for the creation and design of library space? Six authors – an architect, four librarians, and a professor of art history and classics – explore these questions in this report. The authors challenge the reader to think about new potential for the place we call the library and underscore the growing importance of the library as a place for teaching, learning, and research in the digital age.

Pandora's Jar Natalie Haynes 2022-03-29 NEW YORK TIMES BESTSELLER "Funny, sharp explications of what these sometimes not-very-nice women were up to, and how they sometimes made idiots of . . . but read on!"—Margaret Atwood, author of *The Handmaid's Tale* The national bestselling author of *A Thousand Ships* returns with a fascinating, eye-opening take on the remarkable women at the heart of classical stories: Greek mythology from Helen of Troy to Pandora and the Amazons to Medea. The tellers of Greek myths—historically men—have routinely sidelined the female characters. When they do take a larger role, women are often portrayed as monstrous, vengeful or just plain evil—like Pandora, the woman of eternal scorn and damnation whose curiosity is tasked with causing all the world's suffering and wickedness when she opened that forbidden box. But, as Natalie Haynes reveals, in ancient Greek myths there was no box. It was a jar . . . which is far more likely to tip over. In *Pandora's Jar*, the broadcaster, writer, stand-up comedian, and passionate classicist turns the tables, putting the women of the Greek myths on an equal footing with the men. With wit, humor, and savvy, Haynes revolutionizes our understanding of epic poems, stories, and plays, resurrecting them from a woman's perspective and tracing the origins of their mythic female characters. She looks at women such as Jocasta, Oedipus' mother-turned-lover-and-wife (turned Freudian sticking point), at once the cleverest person in the story and yet often unnoticed. She considers Helen of Troy, whose marriage to Paris "caused" the Trojan war—a somewhat uneven response to her decision to leave her husband for another man. She demonstrates how the vilified Medea was like an ancient Beyoncé—getting her revenge on the man who hurt and betrayed her, if by extreme measures. And she turns her eye to Medusa, the original monstered woman, whose stare turned men to stone, but who wasn't always a monster, and had her hair turned to snakes as punishment for being raped. *Pandora's Jar* brings nuance and care to the millennia-old myths and legends and asks the question: Why are we so quick to villainize these women in the first place—and so eager to accept the stories we've been told?

Paul Rand Michael Kroeger 2012-08-10 As one of the most influential and inspirational graphic designers of the twentieth century, Paul Rand defined modern American graphic design. His iconic logo designs for IBM, UPS, and the ABC television network distilled the essences of modernity for his corporate patrons. His body of work includes advertising, poster, magazine, and book designs—characterized by simplicity and a wit uniquely his own. His ability to discuss design with insight and humor made him one of the most revered design educators of our time. This latest volume of the popular Conversations with Students series presents Rand's last interview, recorded at Arizona State University one year before his death in 1996. Beginners and seasoned design professionals alike will be informed by Rand's words and thoughts on varied topics ranging from design philosophy to design education.

The Whole Picture Alice Procter 2020-03-19 "Probing, jargon-free and written with the pace of a detective story... [Procter] dissects western museum culture with such forensic fury that it might be difficult for the reader ever to view those institutions in the same way again. " Financial Times 'A smart, accessible and brilliantly structured work that encourages readers to go beyond the grand architecture of cultural institutions and see the problematic colonial histories behind them.' - Sumaya Kassim Should museums be made to give back their marbles? Is it even possible to 'decolonize' our galleries? Must Rhodes fall? How to deal with the colonial history of art in museums and monuments in the public realm is a thorny issue that we are only just beginning to address. Alice Procter, creator of the Uncomfortable Art Tours, provides a manual for deconstructing everything you thought you knew about art history and tells the stories that have been left out of the canon. The book is divided into four chronological sections, named after four different kinds of art space: The Palace, The Classroom, The Memorial and The Playground. Each section tackles the fascinating, enlightening and often shocking stories of a selection of art pieces, including the propaganda painting the East India Company used to justify its rule in India; the tattooed Maori skulls collected as 'art objects' by Europeans; and works by contemporary artists who are taking on colonial history in their work and activism today. The Whole Picture is a much-needed provocation to look more critically at the accepted narratives about art, and rethink and disrupt the way we interact with the museums and galleries that display it.

Papermaking Dard Hunter 1978-01-01 The classic work on papermaking, this book traces the craft's history from its invention in China to its introductions in Europe and America. The foremost authority on the subject covers tools and materials; hand moulds; pressing, drying, and sizing; hand- and machine-made paper; watermarking; and more. Over 320 illustrations. Conversation Pieces Mark Carnall 2013-07-21 This book, beautifully illustrated with specially commissioned photography, is a celebration of UCL's unique collections, with leading academics from the university invited to select and write about an object each found inspiring. From a jar of moles to an Egyptian unguent spoon, a finger X-ray to some prehistoric cereal grains, their choices were often surprising, their responses always fascinating.

Petrie Museum of Egyptian Archaeology Alice Stevenson 2015-06-04 The Petrie Museum of Egyptian Archaeology first opened its doors in 1915, and since then has attracted visitors from all over the world as well as providing valuable teaching resources. Named after its founder, the pioneering archaeologist Flinders Petrie, the Museum holds more than 80,000 objects and is one of the largest and finest collections of Egyptian and Sudanese archaeology in the world. Richly illustrated and engagingly written, the book moves back and forth between recent history and the ancient past, between objects and people. Experts discuss the discovery, history and care of key objects in the collections such as the Koptos lions and Roman era panel portraits. The rich and varied history of the Petrie Museum is revealed by the secrets that sit on its shelves.

Transforming Acquisitions and Collection Services Michelle Flinchbaugh 2019-09-15 This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

Cognitive Approaches to Human Perception Soledad Ballesteros 2014-02-25 Examining the current state of the research in perception stressing contributions in visual information processing, this volume provides an original and timely account of recent results obtained in this and other related areas of cognitive psychology. The scope of the book is intended to be broad, featuring state-of-the-art contributions from a number of outstanding researchers from different parts of the world -- the United States, Europe, and Australia. The intention is to update areas of considerable theoretical implications and active experimental investigation in this broad field called the "psychology of perception." This volume's main purpose is to highlight, from a cognitive position, a selected number of important theoretical and empirical topics which deal with critical issues in perception and other high level, related cognitive processes such as attention, mental representation, memory, word naming and semantic categorization. The studies reported were designed to answer many far-reaching questions including: * Is the global precedence effect due to low or high level processing? * Can veridical and illusory perception be explained by the same theory? * What is the relationship between attention and perception? * Is perception "direct" or an inferential process? * What mechanisms are involved in picture and word naming and categorization? * How can word and picture processing be modeled? The answers to these questions seek to unite theoretical perspectives on very important areas of cognitive psychology such as attention, perception, representation of visual objects and words, and human memory.

Drawing Futures Bob Sheil 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and

computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Paradata and Transparency in Virtual Heritage Anna Bentkowska-Kafel 2012 Computer-Generated Images (CGIs) are widely used and accepted in the world of entertainment but the use of the very same visualization techniques in academic research in the Arts and Humanities remains controversial. The techniques and conceptual perspectives on heritage visualization are a subject of an ongoing interdisciplinary debate. By demonstrating scholarly excellence and best technical practice in this area, this volume is concerned with the challenge of providing intellectual transparency and accountability in visualization-based historical research. Addressing a range of cognitive and technological challenges, the authors make a strong case for a wider recognition of three-dimensional visualization as a constructive, intellectual process and valid methodology for historical research and its communication.

Chasing Aphrodite Jason Felch 2011-05-24 A “thrilling, well-researched” account of years of scandal at the prestigious Getty Museum (Ulrich Boser, author of *The Gardner Heist*). In recent years, several of America’s leading art museums have voluntarily given up their finest pieces of classical art to the governments of Italy and Greece. Why would they be moved to such unheard-of generosity? The answer lies at the Getty, one of the world’s richest and most troubled museums, and scandalous revelations that it had been buying looted antiquities for decades. Drawing on a trove of confidential museum records and candid interviews, these two journalists give us a fly-on-the-wall account of the inner workings of a world-class museum, and tell a story of outlandish characters and bad behavior that could come straight from the pages of a thriller. “In an authoritative account, two reporters who led a Los Angeles Times investigation reveal the details of the Getty Museum’s illicit purchases, from smugglers and fences, of looted Greek and Roman antiquities. . . . The authors offer an excellent recap of the museum’s misdeeds, brimming with tasty details of the scandal that motivated several of America’s leading art museums to voluntarily return to Italy and Greece some 100 classical antiquities worth more than half a billion dollars.” —Publishers Weekly, starred review “An astonishing and penetrating look into a veiled world where beauty and art are in constant competition with greed and hypocrisy. This engaging book will cast a fresh light on many of those gleaming objects you see in art museums.” —Jonathan Harr, author of *The Lost Painting*

Museums and Higher Education Working Together Jos Boys 2016-04-22 Over the last twenty years the educational role of the museum has come to be central to its mission. There are now far more educational opportunities, new spaces, new interfaces - both digital and physical, and a growing number of education and interpretation departments, educational curators and public engagement programmes. Despite these developments, however, higher education has remained a marginal collaborator compared to primary and secondary schools and to other forms of adult learning. This has meant that the possibilities for partnerships between universities, colleges, museums and galleries has remained relatively unexplored, especially in relation to their potential for generating innovative patterns of research and learning. This book addresses the key issues which are preventing such partnerships and examines how to enable more effective and creative connections between museums and higher education. The authors identify conceptual and practical barriers and explore whether current academic models are fit for purpose. They argue that as pressures mount on public educational resources around the world, there needs to be an urgent increase in the exchange of knowledge across these sectors and the forging of world-class scholarly partnerships. Examples of research undertaken internationally offer best practice models for collaboration and integration. This book will be compulsory reading for museum and educational specialists and those interested in engaging in museum/higher education partnerships. It will also be of interest to those involved in policy and decision-making in education, the museum sector and national and local government.

Engaging the Senses: Object-Based Learning in Higher Education Helen J. Chatterjee 2016-03-09 The use of museum collections as a path to learning for university students is fast becoming a new pedagogy for higher education. Despite a strong tradition of using lectures as a way of delivering the curriculum, the positive benefits of ‘active’ and ‘experiential learning’ are being recognised in universities at both a strategic level and in daily teaching practice. As museum artefacts, specimens and art works are used to evoke, provoke, and challenge students’ engagement with their subject, so transformational learning can take place. This unique book presents the first comprehensive exploration of ‘object-based learning’ as a pedagogy for higher education in a broad context. An international group of authors offer a spectrum of approaches at work in higher education today. They explore contemporary principles and practice of object-based learning in higher education, demonstrating the value of using collections in this context and considering the relationship between academic discipline and object-based learning as a teaching strategy.

The Mobile Story Jason Farman 2013-09-11 What happens when stories meet mobile media? In this cutting-edge collection, contributors explore digital storytelling in ways that look beyond the desktop to consider how stories can be told through mobile, locative, and pervasive technologies. This book offers dynamic insights about the new nature of narrative in the age of mobile media, studying digital stories that are site-specific, context-aware, and involve the reader in fascinating ways. Addressing important topics for scholars, students, and designers alike, this collection investigates the crucial questions for this emerging area of storytelling

and electronic literature. Topics covered include the histories of site-specific narratives, issues in design and practice, space and mapping, mobile games, narrative interfaces, and the interplay between memory, history, and community.

Witnesses to History Lyndel V. Prott 2009-01-01 This Compendium gives an outline of the historical, philosophical and ethical aspects of the return of cultural objects (e.g. cultural objects displaced during war or in colonial contexts), cites past and present cases (Maya Temple Facade, Nigerian Bronzes, United States of America v. Schultz, Parthenon Marbles and many more) and analyses legal issues (bona fide, relevant UNESCO and UNIDROIT Conventions, Supreme Court Decisions, procedure for requests etc.). It is a landmark publication that bears testament to the ways in which peoples have lost their entire cultural heritage and analyses the issue of its return and restitution by providing a wide range of perspectives on this subject. Essential reading for students, specialists, scholars and decision-makers as well as those interested in these topics.

Book Arts of Isfahan Alice Taylor 1995-12-01 In the seventeenth century, the Persian city of Isfahan was a crossroads of international trade and diplomacy. Manuscript paintings produced within the city's various cultural, religious, and ethnic groups reveal the vibrant artistic legacy of the Safavid Empire. Published to coincide with an exhibition at the Getty Museum, Book Arts of Isfahan offers a fascinating account of the ways in which the artists of Isfahan used their art to record the life around them and at the same time define their own identities within a complex society.

Museum Object Lessons for the Digital Age Haidy Geismar 2018-05-14 Museum Object Lessons for the Digital Age explores the nature of digital objects in museums, asking us to question our assumptions about the material, social and political foundations of digital practices. Through four wide-ranging chapters, each focused on a single object - a box, pen, effigy and cloak - this short, accessible book explores the legacies of earlier museum practices of collection, older forms of media (from dioramas to photography), and theories of how knowledge is produced in museums on a wide range of digital projects. Swooping from Ethnographic to Decorative Arts Collections, from the Google Art Project to bespoke digital experiments, Haidy Geismar explores the object lessons contained in digital form and asks what they can tell us about both the past and the future. Drawing on the author's extensive experience working with collections across the world, Geismar argues for an understanding of digital media as material, rather than immaterial, and advocates for a more nuanced, ethnographic and historicised view of museum digitisation projects than those usually adopted in the celebratory accounts of new media in museums. By locating the digital as part of a longer history of material engagements, transformations and processes of translation, this book broadens our understanding of the reality effects that digital technologies create, and of how digital media can be mobilised in different parts of the world to very different effects.

The Book of Touch Constance Classen 2020-09-03 This book puts a finger on the nerve of culture by delving into the social life of touch, our most elusive yet most vital sense. From the tortures of the Inquisition to the corporeal comforts of modernity, and from the tactile therapies of Asian medicine to the virtual tactility of cyberspace, The Book of Touch offers excursions into a sensory territory both foreign and familiar. How are masculine and feminine identities shaped by touch? What are the tactile experiences of the blind, or the autistic? How is touch developed differently across cultures? What are the boundaries of pain and pleasure? Is there a politics of touch? Bringing together classic writings and new work, this is an essential guide for anyone interested in the body, the senses and the experiential world.

Communicating Archaeology John Beavis 1999 A volume of essays on communicating archaeology by every imaginable means provides an excellent tribute to the work of Bill Putnam - always a communicator. Learning by doing (Philip Rahtz), field archaeology in the 70s and 80s (John Hinchliffe), ignore good communication at your peril (Andrew Lawson), the IFA: what it means to be a member of a professional body (Timothy Darvill), talking to ourselves (Ellen McAdam), commissioning knowledge or making archaeology for books (Peter Kemmis Betty), arcane to ARC: the York experience (Andrew Jones), the National Curriculum (Mike Corbishley), past experience: the view from teacher education (Tim Copeland), child's play: archaeology out of school (Kate Pretty), university archaeology: ivory tower or white elephant? (Kevin Andrews), liberal adult education in the second half of the twentieth century (Trevor Rowley), the local societies (John Manley), archaeology in museums (Roger Peers).

Touch in Museums Helen Chatterjee 2020-08-25 The value of touch and object handling in museums is little understood, despite the overwhelming weight of anecdotal evidence which confirms the benefits of physical interaction with objects. Touch in Museums presents a ground-breaking overview of object handling from both historical and scientific perspectives. The book aims to establish a framework for understanding the role of object handling for learning, enjoyment, and health. The broad range of essays included explores the many different contexts for object handling, not only within the museum, but extending beyond it to hospitals, schools and the wider community. The combination of theoretical analysis, policy assessment and detailed case material make Touch in Museums invaluable reading for students and professionals of museology or cultural heritage.

Understanding Conversation Pieces Inspirational Objects In UCLs Historic Collections

Before you embark on your journey to find Conversation Pieces Inspirational Objects In UCLs Historic Collections online, it's essential to grasp the concept of Conversation Pieces Inspirational Objects In UCLs Historic Collections eBook formats. Conversation Pieces Inspirational Objects In UCLs Historic Collections come in various formats, each with its own unique features and compatibility. Understanding these formats will help you choose the right one for your device and preferences.

Different Conversation Pieces Inspirational Objects In UCLs Historic Collections eBook Formats Explained

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted text.

They are highly compatible but lack advanced formatting features.

Choosing the right Conversation Pieces Inspirational Objects In UCLs Historic Collections eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:

EPUB: Compatible with most eReaders, except for some Amazon Kindle devices. Also suitable for reading on smartphones and tablets using dedicated apps.

MOBI: Primarily compatible with Amazon Kindle devices and apps.

PDF: Readable on almost all devices, but may require zooming and scrolling on smaller screens.

AZW/AZW3: Exclusive to Amazon Kindle devices and apps.

HTML: Requires a web browser or specialized eBook reader with HTML support.

TXT: Universally compatible with nearly all eReaders and devices.

Understanding Conversation Pieces Inspirational Objects In UCLs Historic Collections eBook formats and their compatibility will help you make informed decisions when choosing where and how to access your favorite eBooks.
