European Defence Policy Frédéric Mérand 2008-05-22 This book explains the creation of the European Union's Security and Defence Policy - to this day the most ambitious project of peacetime military integration. Whether hailed as a vital step in the integration of Europe or berated as a wasteful threat to U.S. power, European citizens are increasingly interested in the common defence policy. Today, "European Defence" is more popular than the European Union itself, even in Great Britain. Mérand addresses the fundamental challenge posed by military integration to the way we think about the state in the 21st Century. Looking back over the past 50 years, he shows how statesmen, diplomats and soldiers have converged towards Brussels as a "natural" solution to their concerns but also as something worth fighting over. The actors most closely associated to the formation of nation-states are now shaping a transgovernmental security and defence arena. As a result, defence policy is being denationalized. Exploring the complex relations between the state, the military, and citizenship in today's Europe, Mérand argues that European Defence is a symptom, but not a cause, of the transformation of the state. This book is an original contribution to the theory of European integration. Drawing on the work of Pierre Bourdieu, Mérand develops a political sociology of international relations which seeks to bridge institutionalism and constructivism. His careful study of practices, social representations and power structures sheds new light on security and defence cooperation, but also on European cooperation more generally.

The Traffic in Praise Leslie Kurke 2013 Reprint, 2013, with minor corrections, of the edition published in 1991. The corrections constitute revisions of the translations of some of the Greek text; but these do not substantially change the argument of the book.

Sociocultural Anthropology Barbara Miller 2019-12-12 This is the first multi-volume collection of major writings on cultural anthropology, the sub-field of anthropology which is concerned with how people in different places live and understand the world around them. It covers key methodologies (participant observation, ethnography) and topics (kinship, ritual, values) and maps the development of the field from its beginnings in the mid-nineteenth century through to recent and current debates on the 'critique of anthropology' and the rise of new methodologies such as multi-sited research. The

four volumes are arranged thematically and each is separately introduced. Drawing upon essays from anthropology and related disciplines, the volumes together chart the origins of the field, explore its core theories and methods, and trace the proliferation of sub-fields that it has generated, including anthropology of art, urban anthropology, medical anthropology and the anthropology of gender and sexuality. With key texts from James George Frazer, Lewis Henry Morgan, Bronislaw Malinowski, Franz Boas, Ruth Benedict, Margaret Mead, Lucy Mair, Claude Levi Strauss, Melford Spiro, Marshall Sahlins, Laura Nader, Maurice Godelier, David Graeber, Suad Joseph and many more, this set is an essential resource for scholars and students of the subject.

Plato's Introduction of Forms R. M. Dancy 2004-09-16 Scholars of Plato are divided between those who emphasize the literature of the dialogues and those who emphasize the argument of the dialogues, and between those who see a development in the thought of the dialogues and those who do not. In this important book Russell Dancy focuses on the arguments and defends a developmental picture. He explains the Theory of Forms of the *Phaedo* and *Symposium* as an outgrowth of the quest for definitions canvassed in the Socratic dialogues, by constructing a Theory of Definition for the Socratic dialogues based on the refutations of definitions in those dialogues, and showing how that theory is mirrored in the Theory of Forms. His discussion, notable for both its clarity and its meticulous scholarship, ranges in detail over a number of Plato's early and middle dialogues, and will be of interest to readers in Plato studies and in ancient philosophy more generally.

Eroi dello sport. Storie di atleti, vittorie, sconfitte Daniele Marchesini 2016

The Wall of the Earth Giorgio Caproni 1992 "The work of Giorgio Caproni has been translated into French, German, and Chinese, among others, but this collection is his first book-length English publication. His works are finely tuned to modern man's preoccupations with existence in a world deprived of certainties (for example, the existence or inexistence of God). Most are touched by experiences such as the Second World War and its atrocities, the Resistance Movement, or the death of loved ones, events that represent the conviction of a subject that will do its best to survive all adversity, uncompromised" -- from the Introduction by Pasquale Verdicchio

A History of Postcolonial Lusophone Africa Patrick Chabal 2002-06-13 " . . . useful, timely, and important . . . a good and informative book on the Lusophone countries, Portuguese colonialism, and postcolonial influences." —Phyllis Martin, Indiana University "This book, produced by the obvious—and distinguished—corps of country specialists . . . fills a real gap in both state-level and 'regional' (broadly defined) studies of contemporary Africa." —Norrie MacQueen, University of Dundee Although the five Portuguese-speaking countries in Africa that gained independence in 1974/75—Angola, Mozambique, Guinea-Bissau, Cape Verde, and São Tomé e Príncipe—differ from each other in many ways, they share a history of Portuguese rule going back to the 15th century, which has left a mark to this day. Patrick Chabal and his co-authors assess the nature of the Portuguese legacy, using a twofold approach. In Part I, three analytical, thematic chapters by Chabal examine what the five countries have in common and how they differ from the rest of Africa. In Part II, individual chapters by leading specialists, each devoted to a specific country, survey the histories of those countries since independence. The book places the postcolonial experience of the Lusophone countries within the context of their precolonial and colonial past and compares and contrasts their experience with that of non-Lusophone African states. The result is a comprehensive, readable, and up-to-date text and reference work on the evolution of postcolonial Portuguese-speaking Africa.

Obsolete Objects in the Literary Imagination Francesco Orlando 2008-10-01 Translated here into English for the first time is a monumental work of literary history and criticism comparable in scope and achievement to Eric Auerbach's *Mimesis*. Italian critic Francesco Orlando explores Western literature's obsession with outmoded and nonfunctional objects (ruins, obsolete machinery, broken things, trash, etc.). Combining the insights of psychoanalysis and literary-political history, Orlando traces this obsession to a turning point in history, at the end of eighteenth-century industrialization, when the functional becomes the dominant value of Western culture. Roaming

through every genre and much of the history of Western literature, the author identifies distinct categories into which obsolete images can be classified and provides myriad examples. The function of literature, he concludes, is to remind us of what we have lost and what we are losing as we rush toward the future.

Cultural Strategy Douglas Holt 2010-10-28 How do we explain the breakthrough market success of businesses like Nike, Starbucks, Ben & Jerry's, and Jack Daniel's? Conventional models of strategy and innovation simply don't work. The most influential ideas on innovation are shaped by the worldview of engineers and economists - build a better mousetrap and the world will take notice. Holt and Cameron challenge this conventional wisdom and take an entirely different approach: champion a better ideology and the world will take notice as well. Holt and Cameron build a powerful new theory of cultural innovation. Brands in mature categories get locked into a form of cultural mimicry, what the authors call a cultural orthodoxy. Historical changes in society create demand for new culture - ideological opportunities that upend this orthodoxy. Cultural innovations repurpose cultural content lurking in subcultures to respond to this emerging demand, leapfrogging entrenched incumbents. *Cultural Strategy* guides managers and entrepreneurs on how to leverage ideological opportunities: - How managers can use culture to out-innovate their competitors - How entrepreneurs can identify new market opportunities that big companies miss - How underfunded challengers can win against category Goliaths - How technology businesses can avoid commoditization - How social entrepreneurs can develop businesses that appeal to more than just fellow activists - How subcultural brands can break out of the 'cultural chasm' to mass market success - How global brands can pursue cross-cultural strategies to succeed in local markets - How organizations can maximize their innovation capabilities by avoiding the brand bureaucracy trap Written by leading authorities on branding in the world today, along with one of the advertising industry's leading visionaries, *Cultural Strategy* transforms what has always been treated as the "intuitive" side of market innovation into a systematic strategic discipline.

Theological Incorrectness Jason Slone 2007-12-03 Why do religious people believe what they shouldn't -- not what others think they shouldn't believe, but things that don't accord with their own avowed religious beliefs? D. Jason Slone terms this phenomenon "theological incorrectness." He argues that it exists because the mind is built in such a way that it's natural for us to think divergent thoughts simultaneously. Human minds are great at coming up with innovative ideas that help them make sense of the world, he says, but those ideas do not always jibe with official religious beliefs. From this fact we derive the important lesson that what we learn from our environment -- religious ideas, for example -- does not necessarily cause us to behave in ways consistent with that knowledge. Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn't.

Comedy of Vanity & Life-terms Elias Canetti 1983 "'Comedy of Vanity, ' a dark satire on mass movements and narcissism, is a prophetic vision of fascism; in 'Life Terms' everybody in a new society is assigned the number of years he or she may live. Canetti's plays provide a missing link in the European dramatic heritage."--Publisher's description.

An Autobiographical Account by a Leading Sardinian Republican Politician of Resistance to Fascism in Sardinia from 1918-1930 Emilio Lussu 1992 Readers seeking to understand the resurgence of fascism in the world today should profit from Emilio Lussu's account. This is an autobiography through which the reader encounters men and women caught up in the brutalizing of a State whose opponents suffer the consequences of holding to principle. In Sardinia in the 1920's a bourgeois

class fell easy prey to fascism. Lussu's personal, humorous, warm, perceptive, ironic and telling account of his own humiliation and punishment, affords the reader the unique perspective of a man at the centre of opposition to a movement which would eventually plunge Europe into war.

De Malo Saint Thomas (Aquinas) 2001 The De Malo represents some of St. Thomas Aquinas' most mature thinking on goodness, badness, and human agency. Together with the second part of the Summa Theologiae, it is one of his most sustained contributions to moral philosophy and theology. Aquinas examines the full range of questions associated with evil: its origin, its nature, its variety, its relation to good, and its compatibility with the existence of an omnipotent, benevolent God. This edition offers the Leonine Commission's authoritative edition of the Latin text with a new, clear, and readable English translation by Richard Regan with an extensive introduction and notes by Brian Davies.

Writing With Power Peter Elbow 1998-07-09 A classic handbook for anyone who needs to write, *Writing With Power* speaks to everyone who has wrestled with words while seeking to gain power with them. Here, Peter Elbow emphasizes that the essential activities underlying good writing and the essential exercises promoting it are really not difficult at all. Employing a cookbook approach, Elbow provides the reader (and writer) with various recipes: for getting words down on paper, for revising, for dealing with an audience, for getting feedback on a piece of writing, and still other recipes for approaching the mystery of power in writing. In a new introduction, he offers his reflections on the original edition, discusses the responses from people who have followed his techniques, how his methods may differ from other processes, and how his original topics are still pertinent to today's writer. By taking risks and embracing mistakes, Elbow hopes the writer may somehow find a hold on the creative process and be able to heighten two mentalities--the production of writing and the revision of it. From students and teachers to novelists and poets, *Writing with Power* reminds us that we can celebrate the uses of mystery, chaos, nonplanning, and magic, while achieving analysis, conscious control, explicitness, and care in whatever it is we set down on paper.

The Vatican Connection Richard Hammer 2016-08-09 Winner of the Edgar Award: The riveting account of an audacious fraud scheme that stretched from a Mafia hangout on the Lower East Side to the Vatican. With a round, open face and a penchant for tall tales, Matteo de Lorenzo resembled everyone's kindly uncle. But Uncle Marty, as he was known throughout the Genovese crime family, was one of the New York mob's top earners throughout the 1960s and '70s, the mastermind of a billion-dollar trade in stolen and counterfeit securities. In the spring of 1972, de Lorenzo and his shrewd and ruthless business partner, Vincent Rizzo, traveled to Europe to discuss a plan to launder millions of dollars worth of phony securities. Shockingly, the plot involved Archbishop Paul Marcinkus, the scandal-plagued president of the Vatican Bank. Unbeknownst to de Lorenzo and Rizzo, however, the NYPD was already on the case—thanks to the crusading work of Det. Joseph

Coffey. Coffey, the legendary New York policeman who investigated the Lufthansa heist and took the Son of Sam's confession, first learned of the scheme in a wiretap related to the attempted mob takeover of the Playboy Club in Manhattan. From those unlikely beginnings, Detective Coffey worked tirelessly to trace the fraudulent stocks and bonds around the world and deep into the corridors of power in Washington, DC, and Rome. Meticulously researched and relentlessly gripping, *The Vatican Connection* is a true story of corruption and deceit, packed with "all the ingredients of a thriller" (San Francisco Chronicle).

The Bounded Field Jaro Stacul 2018-01-15 Regionalism is one of the most debated issues in contemporary western Europe. Yet why the region, rather than the nation state, can have such a strong appeal for the construction of social and political identity remains largely unexplored. Drawing on data collected in the mountainous Trentino region of northern Italy, the author investigates how ideas about village boundaries and private property form the background against which regionalist ideologies are understood. In suggesting that ideas about regionalism largely reflect views about private property, he provides an alternative to theories of nationalism that overlook the articulation between official ideologies and discourses at the local level.

Cavell talks about his vocation in connection with what he calls voice--the tone of philosophy--and his right to take that tone, and to describe an anecdotal journey toward the discovery of his own voice.

How Philosophers Saved Myths Luc Brisson 2008-11-15 This study explains how the myths of Greece and Rome were transmitted from antiquity to the Renaissance. Luc Brisson argues that philosophy was ironically responsible for saving myth from historical annihilation. Although philosophy was initially critical of myth because it could not be declared true or false and because it was inferior to argumentation, mythology was progressively reincorporated into philosophy through allegorical exegesis. Brisson shows to what degree allegory was employed among philosophers and how it enabled myth to take on a number of different interpretive systems throughout the centuries: moral, physical, psychological, political, and even metaphysical. *How Philosophers Saved Myths* also describes how, during the first years of the modern era, allegory followed a more religious path, which was to assume a larger role in Neoplatonism. Ultimately, Brisson explains how this embrace of myth was carried forward by Byzantine thinkers and artists throughout the Middle Ages and Renaissance; after the triumph of Christianity, Brisson argues, myths no longer had to agree with just history and philosophy but the dogmas of the Church as well.

Public Opinion Walter Lippmann 2018-09-04 Walter Lippmann wrote his "Public Opinion" at a time when something like the 'mass media' was coming into existence. Prior to the age of electronic communication, the only mechanism for reaching large numbers of individuals was the newspapers. In World War I, he saw how opportunistic nations used the newspapers to serve their often nefarious aims. Lippmann, however, believed that in the hands of super-intelligent, disinterested, omnibenevolent 'experts,' the 'mass media' could bring about world peace. The school system, the advent of radio, and of course, the television, were arriving or coming along shortly. Each allowed a small group of people the ability to manage a much larger group, inspiring optimism among liberals and progressives that with the right formula, the horrors seen in World War I would never occur again. Lippmann wrote "Public Opinion" in 1922, shortly after World War I. In 1924, a certain Adolf Hitler would be spending time in jail. If this merited any mention in any newspaper, it is doubtful that no expert paid it any mind. 1939 was, after all, a long way off.

On Civilization, Power, and Knowledge Norbert Elias 1998-02-17 Norbert Elias has been described as among the great sociologists of the 20th century. A collection of his most important writings, this book sets out Elias' thinking during the course of his long career, with a discussion of how his work relates to that of other sociologists.

Holy Ignorance Olivier Roy 2014-01-16 Olivier Roy, world-renowned authority on Islam and politics, finds in the modern disconnection between faith communities and socio-cultural identities a fertile space for fundamentalism to grow. Instead of freeing the world from religion, secularization has encouraged a kind of holy ignorance to take root, an anti-intellectualism that promises immediate, emotional access to the sacred and positions itself in direct opposition to contemporary pagan culture. The secularization of society was supposed to free people from religion, yet individuals are converting en masse to fundamentalist faiths, such as Protestant evangelicalism, Islamic Salafism, and Haredi Judaism. These religions either reconnect adherents to their culture through casual referents, like halal fast food, or maintain their momentum through purification rituals, such as speaking in tongues, a practice that allows believers to utter a language that is entirely their own. Instead of a return to traditional religious worship, we are now witnessing the individualisation of faith and the disassociation of faith communities from ethnic and national identities. Roy explores the options now available to powers that hope to integrate or control these groups; and whether marginalisation or homogenisation will further divide believers from their culture.

Social Identities and Political Cultures in Italy Anna Cento Bull 2000 Emanating from a project begun in 1994 for the European studies program at the U. of Bath, this volume reports the results of a survey completed by 888 respondents from a small manufacturing town near Como and an industrial suburb of Milan, Italy (shown on maps.) Given Italy's diverse regional paths to modernity, the questionnaire addressed individualistic, family, and collective values. The results indicate that while family and social ties remain forte, those to political parties and trade unions have weakened. "Leghist" apparently refers to the Catholic-linked Lega Nord (Northern League) party. Includes the questionnaire and supporting tables and figures. Publication of the results of parallel French case studies is pending. Annotation copyrighted by Book News Inc., Portland, OR
