The Book of Human Emotions Tiffany Watt Smith 2016-06-07 A thoughtful, gleeful encyclopedia of emotions, both broad and outrageously specific, from throughout history and around the world. How do you feel today? Is your heart fluttering in anticipation? Your stomach tight with nerves? Are you falling in love? Feeling a bit miffed? Do you have the heebie-jeebies? Are you antsy with iktsuarpok or filled with nakhes? Recent research suggests there are only six basic emotions. But if that makes you feel uneasy, suspicious, and maybe even a little bereft, THE BOOK OF HUMAN EMOTIONS is for you. In this unique book, you'll get to travel across the world and through time, learning how different cultures have articulated the human experience and picking up some fascinating new knowledge about yourself along the way. From the familiar (anger) to the foreign (zal), each entertaining and informative alphabetical entry reveals the surprising connections and fascinating facts behind our emotional lives. Whether you're in search of the perfect word to sum up that cozy

feeling you get from being inside on a cold winter's night, surrounded by friends and good food (what the Dutch call gezelligheid), or wondering how nostalgia evolved from a fatal illness to enjoyable self-indulgence, Tiffany Watt Smith draws on history, anthropology, science, art, literature, music, and popular culture to find the answers. In reading THE BOOK OF HUMAN EMOTIONS, you'll discover feelings you never knew you had (like basorexia, the sudden urge to kiss someone) and gain unexpected insights into why you feel the way you do. Besides, aren't you curious what nginyiwarrarringu means?

Radically Human Paul Daugherty 2022-04-26 Technology advances are making tech more . . .

human. This changes everything you thought you knew about innovation and strategy. In their groundbreaking book, *Human + Machine*, Accenture technology leaders Paul R. Daugherty and H. James Wilson showed how leading organizations use the power of human-machine collaboration to transform their processes and their bottom lines. Now, as new AI powered technologies like the metaverse, natural language processing, and digital twins begin to rapidly impact both life and work, those companies and other pioneers across industries are tipping the balance even more strikingly toward the human side with technology-led strategy that is reshaping the very nature of innovation. In *Radically Human*, Daugherty and Wilson show this profound shift, fast-forwarded by the pandemic, toward more human—and more humane—technology. Artificial intelligence is becoming less artificial and more intelligent. Instead of data-hungry approaches to AI, innovators are pursuing data-efficient approaches that enable machines to learn as humans do. Instead of replacing workers with machines, they're unleashing human expertise to create human-centered AI. In place of lumbering legacy IT systems, they're building cloud-first IT architectures able to continuously adapt to a world of billions of connected devices. And they're pursuing strategies that will take their place alongside classic, winning business formulas like disruptive innovation. These against-the-grain approaches to the basic building blocks of business—Intelligence, Data, Expertise, Architecture, and Strategy (IDEAS)—are transforming competition. Industrial giants and startups alike are drawing on this radically human IDEAS framework to create new business models, optimize post-pandemic approaches to work and talent, rebuild trust with their stakeholders, and show the way toward a sustainable future. With compelling insights and fresh examples from a variety of industries, *Radically Human* will forever change the way you think about, practice, and win with innovation.

**City** Clifford D. Simak 2015-07-21 This award-winning science fiction classic explores a far-future world inhabited by intelligent canines who pass down the tales of their human forefathers. Thousands of years have passed since humankind abandoned the city—first for the countryside, then for the stars, and ultimately for oblivion—leaving their most loyal animal companions alone on Earth. Granted the power of speech centuries earlier by the revered Bruce Webster, the intelligent, pacifist dogs are the last keepers of human history, raising their pups with bedtime stories, passed down through generations, of the lost “websters” who gave them so much but will never return. With the aid of Jenkins, an ageless service robot, the dogs live in a world of harmony and peace. But they now face serious threats from their own and other dimensions, perhaps the most dangerous of all being the reawakened remnants of a warlike race called “Man.” In the Golden Age of Isaac Asimov and Robert A. Heinlein, Clifford D. Simak’s writing blazed as brightly as anyone’s in the science fiction firmament. Winner of the International Fantasy Award, City is a magnificent literary metropolis filled with an astonishing array of interlinked stories and structures—at once dystopian, transcendent, compassionate, and visionary.

*Catching Fire* Richard Wrangham 2010-08-06 In this stunningly original book, Richard Wrangham argues that it was cooking that caused the extraordinary transformation of our ancestors from apelike beings to *Homo erectus*. At the heart of *Catching Fire* lies an explosive new idea: the habit of

eating cooked rather than raw food permitted the digestive tract to shrink and the human brain to grow, helped structure human society, and created the male-female division of labour. As our ancestors adapted to using fire, humans emerged as "the cooking apes". Covering everything from food-labelling and overweight pets to raw-food faddists, *Catching Fire* offers a startlingly original argument about how we came to be the social, intelligent, and sexual species we are today. "This notion is surprising, fresh and, in the hands of Richard Wrangham, utterly persuasive ... Big, new ideas do not come along often in evolution these days, but this is one." -Matt Ridley, author of *Genome*

Raising Humans with Heart Sarah Maclaughlin 2021-06-15 Becoming a parent is a seismic shift. For most, that sparkling newborn rocks your world with their smooth skin and fuzzy head you just can't stop sniffing. But as soon as you get the hang of caring for them, they change! Soon enough they are three-years-old and screaming in what seems like ACTUAL pain that they have to wear clothing (the nerve!). Then comes the hard eye rolls and sarcasm in 4th grade. And eventually a teenager who can outright refuse to do something. What then? Alternating yelling and ignoring gets you nowhere and the authoritarian approach isn't working. You know what NOT to do, but what TO do? This book brings what's important into focus: who you are as a person and parent, and how that affects your relationships with children. What if self-awareness and personal development were the ways to improve your family life? It is possible that building emotional intelligence and self-regulation skills will create a more peaceful home. Maybe we need to move beyond self-care into self-advocacy! And sometimes a reminder about child development or a tip about communication will shift the dynamic and help you get out of your own way. When we get out of our heads and into OUR hearts, it becomes clear how to best interact with children: with love and compassion. Our intentions and behavior towards our children can help them grow up with heart; the big hearts that the world needs right now.

Mowzl needs Pip to write his story to help him remember where he came from and how to get back, and Pip writes everything that happens. **Humankind** Rutger Bregman 2020-06-02 AN INSTANT NEW YORK TIMES BESTSELLER The “lively” (The New Yorker), “convincing” (Forbes), and “riveting pick-me-up we all need right now” (People) that proves humanity thrives in a crisis and that our innate kindness and cooperation have been the greatest factors in our long-term success as a species. If there is one belief that has united the left and the right, psychologists and philosophers, ancient thinkers and modern ones, it is the tacit assumption that humans are bad. It's a notion that drives newspaper headlines and guides the laws that shape our lives. From Machiavelli to Hobbes, Freud to Pinker, the roots of this belief have sunk deep into Western thought. Human beings, we're taught, are by nature selfish and governed primarily by self-interest. But what if it isn't true? International bestseller Rutger Bregman provides new perspective on the past 200,000 years of human history, setting out to prove that we are hardwired for kindness, geared toward cooperation rather than competition, and more inclined to trust rather than distrust one another. In fact this instinct has a firm evolutionary basis going back to the beginning of Homo sapiens. From the real-life Lord of the Flies to the solidarity in the aftermath of the Blitz, the hidden flaws in the Stanford prison experiment to the true story of twin brothers on opposite sides who helped Mandela end apartheid, Bregman shows us that believing in

human generosity and collaboration isn't merely optimistic—it's realistic. Moreover, it has huge implications for how society functions. When we think the worst of people, it brings out the worst in our politics and economics. But if we believe in the reality of humanity's kindness and altruism, it will form the foundation for achieving true change in society, a case that Bregman makes convincingly with his signature wit, refreshing frankness, and memorable storytelling. "The Sapiens of 2020." —The Guardian "Humankind made me see humanity from a fresh perspective." —Yuval Noah Harari, author of the #1 bestseller *Sapiens* Longlisted for the 2021 Andrew Carnegie Medal for Excellence in Nonfiction One of the Washington Post's 50 Notable Nonfiction Works in 2020

*The Humane Gardener* Nancy Lawson 2017-04-18 In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. *The Humane Gardener* fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

Along the way, they learn about the power of kindness and the importance of being there for each other. In the end, Lily and Robby's friendship becomes a bond that lasts a lifetime, and they continue to have adventures and learn new things together. **Landscape with Small Humans** John Whitworth 1993 This is the fifth volume of verse by the author of *Tennis and Sex and Death*. The 52 short poems evoke a middle-class '50s childhood - the first half spent in semi-rural Bakerloo-land, the second half in an Edinburgh fiercely hostile to English incomers.

*Animated Lands* Andrea Mubi Brighenti 2020-11 In *Animated Lands* Andrea Mubi Brighenti and Mattias Kärrholm focus on territory as a living phenomenon--and territoriality as an active and constantly reshaping force. They explore the complexity of territorial production through a series of parallel investigations into fundamental territorial themes, such as rhythm, synchronization, melody, morphogenesis, and animism. The notion of territory is excavated through case studies including the analysis of urban playgrounds, homemaking, the transformations of urban walls, and the stabilization of peculiar building types such as the house-museum. These empirical examples span such cities as Ahmedabad, Amsterdam, London, and Rome. *Animated Lands* provides a broad introduction to what a theory of territories could be and how it could help to advance sociospatial studies.

**An Immense World** Ed Yong 2022-06-21 NEW YORK TIMES BESTSELLER • A “thrilling” (The New York Times), “dazzling” (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective, by Pulitzer Prize-winning science journalist Ed Yong “One of this year’s finest works of narrative nonfiction.”—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time, People, The Philadelphia Inquirer, Slate, Reader’s Digest, Chicago

Public Library, Outside, Publishers Weekly, BookPage ONE OF THE BEST BOOKS OF THE YEAR: Oprah Daily, The New Yorker, The Washington Post, The Guardian, The Economist, Smithsonian Magazine, Prospect (UK), Globe & Mail, Esquire, Mental Floss, Marginalian, She Reads, Kirkus Reviews, Library Journal The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth's magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile's scaly face is as sensitive as a lover's fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called "the only true voyage . . . not to visit strange lands, but to possess other eyes." WINNER OF THE ANDREW CARNEGIE MEDAL • FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD • LONGLISTED FOR THE PEN/E.O. WILSON AWARD

*Nurturing Little Humans* Jay Lilawala 2018-08-30 Being born in the year 1984 and being raised

amidst a Big Fat Indian Family amongst the love and warmth of grandparents, timely and firm advice from parents, spirit of oneness from uncles-aunts and the feeling of camaraderie that is free from any distinguishes amongst the cousins, I have lived an eventful childhood in the 20th century with my family and moved in the 21st century with my growth as a human. So I have memories of both the centuries and now I am standing at the equidistant of the 21st century that connects the lifestyles of two different eras. We did not have a childhood with the hi-tech technology where we could video call a long distant relative or play online Ludo with my friends. In our times we would meet at a cousin's place over tea and samosas followed by gully cricket. Since we have been imbibed with the skills of both the centuries which has made us capable enough to embrace any challenge with open arms, it is our responsibility to help and guide the 21st century kids towards understanding the real joy of life. Let's not complicate things for them with high management fundas and rather use our simple and playful tricks of past centuries and make life and childhood more memorable for them. The correct blend of old times with the current techno world will help us Nurture a Perfect Little Human who will in future build a Nation to be proud of.

**Tanqueray** Brandon Stanton 2022-07-12 “A deeply touching memoir . . . A beautiful, sometimes shocking NC-17 story, kept out of the lily-white, upper crust canon of literature—until now.” —The Washington Post The storytelling phenomenon *Humans of New York* and its #1 bestselling books have captivated a global audience of millions with personal narratives that illuminate the human condition. But one story stands apart from the rest... She is a woman as fabulous, unbowed, and irresistible as the city she lives in. Meet TANQUERAY. In 2019, *Humans of New York* featured a photo of a woman in an outrageous fur coat and hat she made herself. She instantly captured the attention of millions. Her name is Stephanie Johnson, but she's better known to HONY followers as “Tanqueray,” a born performer who was once one of the best-known burlesque dancers in New York City. Reeling from a brutal childhood, immersed in a world of go-go dancers and hustlers, dirty cops and gangsters, Stephanie was determined to become the fiercest thing the city had ever seen. And she succeeded. Real, raw, and unapologetically honest, this is the full story of Tanqueray as told by Brandon Stanton—a book filled with never-before-told stories of Tanqueray's struggles and triumphs through good times and bad, personal photos from her own collection, and glimpses of New York City from back in the day when the name “Tanqueray” was on everyone's lips.

Tiny Humans, Big Lessons Sue Ludwig 2022-03-08 What if you cared for your life the way the NICU cares for its patients? Imagine standing over a newborn and whispering, “I hope you work your fingers to the bone chasing someone else’s notion of the ‘good life’ until you’re so exhausted you don’t remember who you are or why you matter.” It’s unthinkable. Yet that’s where many of us find ourselves as adults: depleted, feeling stuck, and certain that life’s opportunities have passed us by. Isn’t it time we treated ourselves with more care? In this remarkable book of personal and professional transformation, Sue Ludwig, a neonatal therapist, shares how her tiny patients in the NICU (neonatal intensive care unit) guided her to step off her hamster wheel of existence and into a new way of living. Through real patient stories, reflection, and practical tools, she reveals how, by following the lead of these in her care, she found her way to a more vibrant, purposeful, and impactful life than she ever imagined possible—and how you can, too. You can break out of survival mode, take charge of your energy, and redirect it toward development and growth—just as Ludwig’s fragile NICU patients do. Moment by moment, baby step by baby step, chapter by chapter, you’ll come to see that your energy and potential aren’t gone. They’re not even lost. They’re simply waiting for you to reclaim them.

*Raising Good Humans* Hunter Clarke-Fields 2019-12-01 “A wise and fresh approach to mindful parenting.” —Tara Brach, author of *Radical Acceptance* A kinder, more compassionate world starts with kind and compassionate kids. In *Raising Good Humans*, you’ll find powerful and practical strategies to break free from “reactive parenting” habits and raise kind, cooperative, and confident kids. Whether you’re running late for school, trying to get your child to eat their vegetables, or dealing with an epic meltdown in the checkout line at a grocery store—being a parent is hard work! And, as parents, many of us react in times of stress without thinking—often by yelling. But what if,

instead of always reacting on autopilot, you could respond thoughtfully in those moments, keep your cool, and get from A to B on time and in one piece? With this book, you'll find powerful mindfulness skills for calming your own stress response when difficult emotions arise. You'll also discover strategies for cultivating respectful communication, effective conflict resolution, and reflective listening. In the process, you'll learn to examine your own unhelpful patterns and ingrained reactions that reflect the generational habits shaped by your parents, so you can break the cycle and respond to your children in more skillful ways. When children experience a parent reacting with kindness and patience, they learn to act with kindness as well—thereby altering generational patterns for a kinder, more compassionate future. With this essential guide, you'll see how changing your own “autopilot reactions” can create a lasting positive impact, not just for your kids, but for generations to come. An essential, must-read for all parents—now more than ever. “To raise the children we hope to raise, we have to learn to become the person we hoped to be.... This wonderful book will help you handle the ride.” —KJ Dell’Antonia, author of *How to Be a Happier Parent* “Hunter Clarke-Fields shares her wisdom and personal experience to help parents create peaceful families.” —Joanna Faber and Julie King, coauthors of *How to Talk So Little Kids Will Listen*
