*India in the Global Software Industry* Anthony P. D'Costa  
2003-12-18 In this timely and unique study, the innovations in India's information (IT) industry are examined in detail. Globally the IT Industry has experienced phenomenal growth. For many economies, IT is expected to be the engine of growth for many countries. Already in India, the IT industry has made a mark in the global economy. However, India faces major challenges in meeting the basic needs of all its people and simultaneously meeting the requirements of competing in the increasingly globalized post-WTO world economy. The Indian IT sector provides a unique window to understand the process of development in an era of global economic integration. This unique study examines the issues surrounding the analysis of the Indian IT sector on a global, national, regional, firm, and product level and the significance of national policies to sustain the competitiveness of the Indian IT sector.

**Multinational Enterprises and the Global Economy** John H.

Dunning 2008-01-01 For many years to come this volume. . . is surely going to be the ultimate reference work on international business. . . thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, International Business Review Multinational Enterprises and the Global Economy has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . In addition to being a remarkably useful reference book, Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, Journal of International Business Studies The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the

multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political

economy and strategic management, a systematic overview of the developments in scholarly thinking is present

*Industry 4.0 and Regional Transformations* Lisa De Propris

2020-04-07 This edited volume brings together a group of expert contributors to explore the opportunities and the challenges that Industry 4.0 (smart manufacturing) is likely to pose for regions, firms and jobs in Europe. Drawing on theory and empirical cases, it considers emerging issues like servitization, new innovation models for local production systems and the increase in reshoring. *Industry 4.0 and Regional Transformations* captures the complexity of this new manufacturing model in an accessible way and considers its implications for the future. It will be essential reading for advanced students and researchers and policy makers in regional studies, industrial policy, economic geography, innovation studies, operations management and engineering.

*Successfully Doing Business/Marketing In Eastern Europe* V H

Kirpalani 2012-12-06 *Successfully Doing Business/Marketing in Eastern Europe* is a unique collection of instructive and detailed essays that will help readers to understand and navigate the complexities of the business world and marketplace of Eastern Europe. The respected authors in this collection seamlessly blend sophisticated analysis and practical advice to enlighten the reader to the peculiarities of consumer behavior, industry policy, and the economic and social demographics in the region. These informative essays are further complemented by a number of in-depth case studies that demonstrate the difficulties and potentials for success faced by any business person looking to trade in Eastern European markets. For students, educators, entrepreneurs, and business people everywhere, *Successfully Doing Business/Marketing in Eastern Europe* is an essential resource and guidebook to understanding and profiting in this unique and often unpredictable region.

**The Korean Economy** You-il Lee 2019-05-01 *The Korean*

Economy: From Growth to Maturity takes an in-depth, amalgamated look at the evolution of Korea's globalization drive from the early 2000s (Kim Dae-jung regime, 1998-2003) to the present period (Park Geun-hye, 2013-2017). The book discusses the role of foreign companies on the sustainability of Korea's economic growth, the relationship between the chaebol and the MNCs, the evolution of Korea's nation brand, and the role of the state in Korea's new economic trajectory (globalization) since the 2000s. With data collected from fieldwork, the book provides both empirical and qualitative insights (economic, socio-cultural and political economic analysis) into the Korean political economy and would be a very useful reference to other emerging economies experiencing similar globalization paths.

Structural change, fundamentals, and growth : a framework and case studies McMillan, Margaret 2017-05-11

*Systems of Innovation* Charles Edquist 2013-01-11 The systems of innovation approach is considered by many to be a useful analytical approach for better understanding innovation processes as well as the production and distribution of knowledge in the economy. It is an appropriate framework for the empirical study of innovations in their contexts and is relevant for policy makers. This text is the result of the work within an international inter-disciplinary network or "working seminar" with the task of building a more solid and sophisticated conceptual and theoretical foundation for the continued study of innovations in a systemic context. The book has three parts. The first presents an overview and tries to work out some conceptual problems. In the second, the systems of innovation approach is related to innovation theory. Part three is devoted to increasing understanding of the functioning and dynamics of systems of innovation. There is also an introduction where the genesis and anatomy of different systems of innovation approaches are discussed and where the systems of innovation approach is characterized in nine dimensions.

**Global Capitalism at Bay** Professor John H Dunning 2000-12-14  
In this collection of his latest essays, John H. Dunning - renowned authority in international business - elaborates his theories on the current situation of foreign direct investment and multinational enterprises. *Global Capitalism at Bay* considers the unique characteristics of contemporary capitalism, and what must be done if it is to survive and prosper in the twenty first century.

*The Global Restructuring of the Steel Industry* Anthony D'Costa 2013-04-15 Drawing upon case studies of the steel industry in the US, Japan, South Korea, Brazil and India, this book explains how and why the steel industry has shifted from advanced capitalist countries to late industrializing countries. Anthony P. D'Costa examines the relationship between industrial change and institutional responses to technological diffusion. He reveals the governments' and firms' differing responses to innovations lead to an uneven diffusion of technology and industrial reorganization. Moreover, when it becomes clear that existing institutional arrangements no longer serve the industry well, new arrangement are created which allow for innovative behaviour. Often this has created opportunities for technological 'leapfrogging' and the emergence of new technologies in unexpected places.

**The British National Bibliography** Arthur James Wells 2001

*The Chinese and Indian Corporate Economies* Raj Brown 2017-02-03 This is a compelling analysis of the corporate economies of China and India, which are having a huge impact not just on the international economy, but also in the geopolitical and international strategy sphere as a result of an accelerated globalisation by these two countries, which is unleashing powerful economic challenges to corporate structures, economic institutions and law worldwide. The big question is how after centuries of underdevelopment China and now India are emerging powerfully and pulling ahead of Western European

economies. Analysing the role of the state and the adroit use of law, and their impact on the corporate evolution of both China and India, provides greater clarity and insight into why China has evolved as a manufacturing nation utilizing cheap abundant labour while India has not exploited such advantages but instead focused on IT and higher value industries, even abroad as Tata has demonstrated in the motor industry in Europe. Again while Chinese corporations have expanded abroad as an arm of the state into Asia, Middle East, Africa, Europe, Latin America and parts of the southern states of the USA, India has pushed principally into Europe through the efforts of powerful minority capitalists of Parsi and Gujarati background, overcoming technological gaps and differences through acquisitions and absorptions of existing corporations in particular industries, especially in steel, automobiles and textiles. In China, state owned corporations have been dominant. In India, though state owned enterprises have been powerful since 1951, it has been private capitalists with an established stronghold since the colonial period and even under the Socialist period from 1951-1991 who have been the more productive main actors both in India and abroad.

### **Retailing in Emerging Markets** Malobi Mukherjee 2014-09-25

Retailing is changing extremely rapidly in the emerging economies, both as a driver of social and economic change, and a consequence of economic development and the rise of consumer societies. Changes that took many decades in Europe or North America are happening at a much greater speed in emerging markets, while regulations continue to be hotly contested in these markets, raising questions about appropriate business strategies for both globalising firms and local contenders. While much has been written about retail in emerging markets, the focus has been primarily on the nature of entry strategies for Western retail companies. This book seeks to capture the impact of both internal and external regulations on retail development and strategy in

emerging markets. It provides a comprehensive and up-to-date assessment of the development of retailing in a wide range of emerging economies, and seeks to capture the interplay between both retail policy and retail strategy and the theoretical implications of this on retail development as a whole. This book will be of interest to academics, researchers and advanced students with an interest in retail development in emerging markets, international business/strategy and international marketing.

**Big Business and Economic Development** Barbara

Hogenboom 2006-12-21 Bringing together an international and multidisciplinary group of experts, this is the first comprehensive volume to analyze conglomerates and economic groups in developing countries and transition economies. Using sixteen in-depth case studies it provides a comparative framework for the study of contemporary process of privatization, economic and financial liberalization and neoliberal globalization. Exploring the various causes and economic, social and political effects of the rise of 'big business' in Asia, Latin America, Africa and Eastern Europe, the main issues that are examined include: the nature of contemporary economic concentration the relations between 'local' and 'external' investors the impact on development, and on economic and political control over its direction the new role of the state towards conglomerates and economics groups the effects of economic and political changes on the legitimacy of the state and large companies. This volume is perfect as either a textbook or supplementary reading for students at all levels, as well as researchers and governmental and non-governmental professionals working and studying in the fields of international business and economic development.

Foreign Direct Investment in Emerging Economies Lou Anne A. Barclay 2002-09-11 The Caribbean countries of Jamaica, Barbados and Trinidad-Tobago represent excellent examples of the increasingly important role played by Foreign Direct

Investment (FDI) in less developed, micro-economies. The increased dependence of these countries on FDI, however, calls into question the attractiveness of the business environment of the region to the foreign investor. This volume examines both the investment behaviour and corporate strategies operating in these three countries, and assesses the factors which influence the motivations, location choices and market entry mode of multinationals making investments in the Caribbean.

Petroleum Taxation Carole Nakhle 2008-04-29 Petroleum taxation is the universal instrument through which governments seek to determine the crucial balance between the financial interests of the oil companies and the owners of the resource. This book addresses how governments have and continue to approach this problem, the impacts of different policy choices and how these are being adapted to changing business conditions. Carole Nakhle presents the reader with an illuminating and robust analysis of the entire taxation story, from the basic theoretical considerations through to advanced computations applied to various tax regimes. Nakhle's main argument is that petroleum taxation is a subject of complexity, variety and subject to continued evolution, being surrounded and shaped by multifaceted geological, technical and market factors together with unpredictable political influences. The author challenges the assumption that perfect models of petroleum taxation can be designed and applied to countries and circumstances around the world, arguing that an ideal structure exists only in theory but can be nonetheless a useful benchmark against which to test proposed fiscal systems.

International Mobility, Global Capitalism, and Changing Structures of Accumulation Anthony P. D'Costa 2015-11-19 International mobility is not a new concept as people have moved throughout history, voluntarily and forcibly, for personal, familial, economic, political, and professional reasons. Yet, the mobility of technical talent in the global economy is relatively new, largely

voluntary, structurally determined by market forces, and influenced by immigration policies. With over a decade's worth of extensive research in India, Japan, Finland, and Singapore, this book provides an alternative understanding of how capitalism functions at the global level by specifically analyzing the international movement of technical professionals between India and Japan. There are three factors that inform this study: the services transition away from manufacturing, the movement of technical professionals in the world economy, and the demographic crisis facing Japan. The dynamics of changing capitalism are examined by theorizing the emergence of the services sector in the USA and Japan, analyzing the pronounced social inequality in India that is the basis for the global supply of highly skilled technical professionals, and providing considerable empirical data on the flows of professionals to these two countries to indicate Japan's institutional inflexibility in accommodating foreign talent. The author anticipates that Japanese industry will shed some of its institutional rigidity due to the pressures of competition and the scarcity of technical professionals. Providing a wealth of information on the topic of international mobility, this book is an essential addition for scholars and students in the field of International Development, Business Studies, Asian Studies, Migration Studies, and Political Economy.

*The Long March to Capitalism* A. D'Costa 2005-06-14 The author captures the evolution of Indian industrial capitalism by extending the 'models of capitalism' and 'regulation framework'. Using principally the auto industry and anchoring the analysis to the expansion of markets, he demonstrates that the Indian state and businesses have been important institutions for creating markets. He acknowledges significant market growth, but also underscores several contradictions arising from such capitalist development. There is a wealth of data, which scholars, policymakers, and businesses will find very useful.

## **Consultancy and Innovation** Peter Wood 2003-09-02

Consultancy and Innovation links two important aspects of European economic development in the past thirty years: the pace of technical and management innovation, and the growing significance of technical and business consultancy. This book includes detailed studies of consultancy activities or 'knowledge intensive services' (KIS) in eight EU countries, written by national experts in the field.

## The Challenges of Technology and Economic Catch-up in

## Emerging Economies Jeong-Dong Lee 2021-06-24

This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Innovation is a pivotal driving force behind economic growth. Technological capability deepens and diversifies industrial activity, which fundamentally enhances growth potential. Consequently, failure to build effective technological capability can lead to slow long-term economic growth. This book synthesizes and interprets existing knowledge on technology upgrading failures in order to better understand the challenges of technology upgrading in emerging economies. The objective is to bring together diverse evidence on three major dimensions of technology upgrading: paths of technology upgrading, structural changes in the nature of technology upgrading, and the issues of technology transfer and technology upgrading. Knowledge on these three dimensions is synthesized at the firm, sector, and macro levels across different countries and world macroregions. Compared to the challenges and uncertainties facing emerging economies, our understanding of technology upgrading is sparse, unsystematic, and scattered. The recent growth slowdown in many emerging economies, often known as the middle-income trap, has reinforced the importance of understanding the technology upgrading challenges they experience. While our understanding of these issues from the

1980s and 1990s is relatively more systematised, the more recent changes that took place during the globalization and proliferation of global value chains, and the effects of the 2008 financial crisis, have not been explored and compared synthetically. The current effects of COVID-19, geopolitical struggles, and the growing concern around environmental sustainability add significant complexity to an already problematic situation. The time is ripe to take stock of our existing knowledge on processes of technology upgrading in emerging economies and make further inroads in research on this crucial issue.

**Transnational Corporations** Grazia Ietto-Gillies 2002-09-26

This volume examines the role of transnational corporations (TNCs) in the geography of international production, covering both theoretical and empirical aspects.

Global Strategies in Retailing John Dawson 2013-10-08 Large and medium sized retailers have increased their international operations substantially over the last 25 years. This is evident in: the number of countries to which these retailers expand; the growing international sales of retailers; and the heightening of the level of commitment of retailers to their international activity – a trend that is likely to continue over the next decade as general globalization in the service industries increases. The managerial implications of the moves to become global are considerable. Different retailers are pursuing different approaches, to varying degrees of success and are no longer simply multi-national, but are also multi-continental. Consequently, existing concepts and theories of international business fit uneasily in explanations of international retailing, so new corporate strategies need to be explored. Featuring in-depth studies of seven retailers, by international scholars from Japan, the UK and Sweden, Global Strategies in Retailing explores recent developments in strategy that are related to international retailing and in particular, the emergence of a Global Portfolio Strategy. As such, this book will be important reading for all international business and retailing

students and academics researching in these areas.

The Political Economy of Oil and Gas in Africa Soala

Ariweriokuma 2008-10-22 The evolution of the Nigerian oil and gas industry spanned about a century during which several challenges were encountered and surmounted by major International Oil Companies (IOCs). This book provides a thoroughly researched guide to the Nigerian oil and gas industry. The author examines the increasing role of Africa in the contribution of oil and gas resources to the global energy market and provides an overview of oil and gas exploration and production activities in Algeria , Libya , Egypt and Angola . The book presents an in-depth review of the growth and challenges of the Nigerian oil and gas industry. It also highlights the geological features of the oil and gas bearing regions of the country. In particular, the emerging prominence of the Gulf of Guinea as a prolific hydrocarbon bearing zone is extensively evaluated.

**Telecommunications** Willem Hulsink 2012-12-06 This book combines a detailed, sector-specific study of comparative telecommunications regimes set in the context of the EC, with an extensive historical and empirical analysis of individual policy management and change as experienced by three diverse regulatory cultures, namely, Britain, the Netherlands and France. By adopting a comprehensive analytical framework based on far-reaching literature, the author explores a wide-range of theories, addressing key issues at the forefront of contemporary political and academic debate as: Do nation states matter in the globalizing telecommunications industry? Does the common challenge of techno-global telecommunications restructuring elicit different national responses? What is the significance of a single-speed or multi-speed Europe in implementing telecommunications governance regimes?

## **The Dynamics of Industrial Location** Roger Hayter 1997-05-30

A modern textbook on industrial geography that systematically explores the location dynamics of factories, firms and production systems within the context of the problem of industrial transformation. The most comprehensive treatment of contemporary industrial geography, including new approaches to factory location and the geography of the firm, and discussions of industrial districts, flexible specialisation, restructuring, truncated economies and de-industrialization. Adopts a clear but elegant structure in which the factory, the firm and the production system, provide related and progressively complex building blocks. Well written and clearly illustrated with case studies and examples from all over the world which explicitly integrate the geographical and organizational dimensions of industrial change. The Dynamics of Industrial Location is a cornerstone text for the teaching of economic geography which effectively incorporates the results of the transformation of manufacturing in the past decade, the impact of de-industrialization, post-Fordism and the globalization of production in a way that previous textbooks were unable to do. Policy issues are addressed throughout the book. Roger Hayter has written a modern text that is the first student level treatment of 'new industrial spaces'. He brings together the conceptual idea and the empirical example. The book brims with interesting real world illustrations, along with insightful applications of theory. This is quite simply the first choice adoptable textbook for second (and upper) level industrial geography courses. It will also be of considerable relevance for regional, community and environmental planners and for students in urban studies, business and regional economics.

benefits.

**International Trade Theory** Murray Kemp 2008-05-12 Murray C. Kemp is one of Australia's foremost economists. He has held positions across the world including London School of Economics, U.C. Berkeley, Columbia University, McGill University, MIT, and latterly Macquarie University. Kemp was a Member of Council for the Econometric Society and was a Distinguished Fellow of the Economics Society of Australia. He has served as President of the International Economics and Finance Society. In 1987 he was awarded the Humboldt Foundation Prize. This book brings together several essays on the current state of the theory of international trade. As the book's title suggests, the essays are critical of several major components of the existing theory; thus, the Ricardian principle of comparative advantage, the ancient and widely accepted belief that international free trade is potentially beneficial for all countries, and the more recently developed normative analysis of international transfers (foreign aid, war indemnities) are shown to be seriously defective.

**Emerging Business Ventures under Market Socialism** Ping Zheng 2013-12-17 The rapidly changing market environment in China requires more research to understand fully the empirical processes of management practice and the business landscape in which they operate. Based on longitudinal case study research between 2005 and 2010, this book explores the distinctive characteristics of emerging forms of economic enterprise under market socialism in China. Adopting a holistic view, it explores how rapid environmental and institutional changes in economic reforms are impacting upon their practice, and assesses the role of government policy in shaping their ownership and management processes. Through the changing patterns in the development of business ventures, it outlines the dynamics of industrial and organizational change under the transitional phases of a market socialist economy, and explores the tensions which emerge. This comparative perspective will be of interest to

academics, researchers and advanced students of business growth and enterprise management, particularly those wishing to explore China, Chinese business and emerging economies.

### **New Multinational Enterprises from Korea and Taiwan**

Roger van Hoesel 2013-01-11 This volume represents the first substantive study of emerging multinationals (MNEs) from Asian economies, drawing on the unique experiences of South Korea and Taiwan. Combining an econometric investigation with detailed case studies of leading Korean and Taiwanese electronics companies, it aims to demystify the nature and theoretical implications of these dynamic economic regions. The author argues that many of these 'new multinationals' do not possess the characteristics typically ascribed to MNEs, such as technological leadership, strong marketing positions or advanced managerial capabilities. This is highlighted by documentation of recent developments in outward investment from Korea and Taiwan at both micro and macro level. The implications of the recent Asian crisis for the internationalization of Korean and Taiwanese firms are also explored.

### **International Management and Language** Susanne Tietze

2013-01-11 Globalization processes have resulted in the emergence of business and management networks in which the sharing of knowledge is of crucial importance. Combining two contemporary and important subject areas - namely that of international management and also language and communication in multi-language contexts - the author of this book presents a wealth of ideas, examples and applications taken from international and global contexts, which show that 'language matters' in the pursuit of international business affairs. The book establishes the theoretical core of its main ideas by introducing two orientations (social construction and linguistic relativity) and demonstrates how they can be drawn on to frame and understand the activities of managers. Highly innovative and topical, Susanne Tietze's book will appeal to students of international management

and international human resource management as well as those studying intercultural communication. It is also useful for managers and practitioners who work internationally.

**Indian Journal of Economics** 2001 Vol. 2-33 include Papers read at the annual conference of the Indian Economic Association.

**The Art of Economic Catch-Up** Keun Lee 2019-05-16 In his previous Schumpeter Prize-winning work, Lee analysed the 'middle-income trap', in which a developing country grows strongly only to plateau at a certain point. Yet certain developing countries, most significantly China, have managed to escape this trap. Building on the conception of the ladder from developing to developed countries being kicked away, this book suggests alternative ways, such as 'leapfrogging', in which latecomers can catch up with their forerunners. Providing policy solutions for development challenges in non-technical terms, Lee frames his theories with insightful and inventive allegories. In doing so, Lee also accounts for the catch-up paradox, in which one cannot conclusively catch-up if they are continually trying to follow the path of those ahead. He argues that eventual catch-up and overtaking require pursuing a path that differs from that taken by forerunners. This highly original and accessible book will appeal to students, scholars, practitioners, and anyone interested in economic development and innovation.

*Foreign Direct Investment* Bijit Bora 2002-06 Foreign Direct Investment examines the different approaches to explaining the growth and distribution of FDI in the world. Pulling together contributions from an array of international experts, this study combines theoretical with empirical work on issues such as computable general equilibrium modelling, trade, intellectual property, environment, labour, services and development. By analysing different aspects of the growth and impact of FDI this book is able to balance areas where research is well advanced with areas, such as the role of FDI in development, where many

questions remain. This insightful and important text will be useful to students of development economics as well as policy makers and researchers.

*The Evolution of Economic Development in Africa* Francis K.

Mbroh 2021-07-11 Within the theoretical framework of the trade-growth and structural transformation-growth nexuses, the book examines the evolution of African (goods and service) trade in terms of value and share of global commerce relative to other regions during the period 1948-2017. It also identifies and discusses discernible changes in the composition and structure of African exports and imports between 1995 and 2015 and their implications for economic development in Africa. The study attributes Africa's laggard trade performance during the period primarily to sub-optimal macroeconomic policies and lack of bold export development policies and initiatives, among other factors. It also offers an incisive discussion of several inhibitions to the structural transformation of African exports and imports, including lack of finance, globalization, tariff, and non-tariff measures in global markets. The discussion of the evolution of African trade during the period 1948-2017 based on statistics and publications of international organizations, including the UNCTAD, the World Bank, and the African Development Bank, among others, is the first of its kind in terms of scope and depth of review of African trade. The analyses of cross-border trade

during 1948–2017 and their implications for Africa’s economic development prospects constitute a useful reference material for academics and students of African and development studies and African and international policymakers.
