Chianti Classico Bill Nesto 2016-09-20 This book tells the story of the ancient land named Chianti and the modern wine appellation known as Chianti Classico. In 1716, Tuscany's penultimate Medici ruler, Cosimo III, anointed the region of Chianti, along with three smaller areas in the Florentine State, as the world's first legal appellations of origin for wine. In the succeeding centuries, this milestone was all but forgotten. By the late nineteenth century, the name Chianti, rather than signifying this historic region and its celebrated wine, identified a simple Italian red table wine in a straw-covered flask. É In the twenty-first century, Chianti Classico emerged as one of Italy's most dynamic and fashionable wine zones. Chianti Classico relates the fascinating evolution of Chianti as a wine region and reveals its geographic and cultural complexity. Bill Nesto, MW, and Frances Di Savino explore the townships of Chianti Classico and introduce readers to the modern-day winegrowers who are helping to transform the region. The secrets of Sangiovese, the principal vine variety of Chianti, are also revealed as the book unlocks the myths and mysteries of one of Italy's most storied wine regions. The publication of Chianti Classico coincides with the three hundredth anniversary of the Medici decree delimiting the region of Chianti on September 24, 1716.

The Opera of Bartolomeo Scappi (1570) Terence Scully 2011-01-22 Bartolomeo Scappi (c. 1500-1577) was arguably the most famous chef of the Italian Renaissance. He oversaw the preparation of meals for several Cardinals and was such a master of his profession that he became the personal cook for two Popes. At the culmination of his prolific career he compiled the largest cookery treatise of the period to instruct an apprentice on the full craft of fine cuisine, its methods, ingredients, and recipes. Accompanying his book was a set of unique and precious engravings that show the ideal kitchen of his day, its operations and myriad utensils, and are exquisitely reproduced in this volume. Scappi's Opera presents more than one thousand recipes along with menus that comprise up to a hundred dishes, while also commenting on a cook's responsibilities. Scappi also included a fascinating account of a pope's funeral and the complex procedures for feeding the cardinals during the ensuing conclave. His recipes inherit medieval culinary customs, but also anticipate modern Italian cookery with a segment of 230 recipes for pastry of plain and flaky dough (torte, ciambelle, pastizzi, crostate) and pasta (tortellini, tagliatelli, struffoli, ravioli, pizza). Terence Scully presents the first English translation of the work. His aim is to make the recipes and the broad experience of this sophisticated papal cook accessible to a modern English audience interested in the culinary expertise and gastronomic refinement within the most civilized niche of Renaissance society.

Food is Culture Massimo Montanari 2006 Elegantly written by a distinguished culinary historian, Food Is Culture explores the innovative premise that everything having to do with food--its capture, cultivation, preparation, and consumption--represents a cultural act. Even the "choices" made by primitive hunters and gatherers were determined by a culture of economics (availability) and medicine (digestibility and nutrition) that led to the development of specific social structures and traditions. Massimo Montanari begins with the "invention" of cooking which allowed humans to transform natural, edible objects into cuisine. Cooking led to the creation of the kitchen, the adaptation of raw materials into utensils, and the birth of written and oral guidelines to formalize cooking techniques like roasting, broiling, and frying. The transmission of recipes allowed food to acquire its

own language and grow into a complex cultural product shaped by climate, geography, the pursuit of pleasure, and later, the desire for health. In his history, Montanari touches on the spice trade, the first agrarian societies, Renaissance dishes that synthesized different tastes, and the analytical attitude of the Enlightenment, which insisted on the separation of flavors. Brilliantly researched and analyzed, he shows how food, once a practical necessity, evolved into an indicator of social standing and religious and political identity. Whether he is musing on the origins of the fork, the symbolic power of meat, cultural attitudes toward hot and cold foods, the connection between cuisine and class, the symbolic significance of certain foods, or the economical consequences of religious holidays, Montanari's concise yet intellectually rich reflections add another dimension to the history of human civilization. Entertaining and surprising, *Food Is Culture* is a fascinating look at how food is the ultimate embodiment of our continuing attempts to tame, transform, and reinterpret nature.

General Psychopathology Karl Jaspers 1997-11-27 In his most important contribution to the Heidelberg school, a founder of existentialism critiques the scientific aspirations of psychotherapy. In 1910, Karl Jaspers wrote a seminal essay on morbid jealousy in which he laid the foundation for the psychopathological phenomenology that through his work and the work of Hans Gruhle and Kurt Schneider, among others, would become the hallmark of the Heidelberg school of psychiatry. In *General Psychopathology*, his most important contribution to the Heidelberg school, Jaspers critiques the scientific aspirations of psychotherapy, arguing that in the realm of the human, the explanation of behavior through the observation of regularity and patterns in it (*Erklärende Psychologie*) must be supplemented by an understanding of the "meaning-relations" experienced by human beings (*Verstehende Psychologie*).

Planning on the Edge Nick Gallent 2006-09-27 More than a tenth of the land mass of the UK comprises 'urban fringe': the countryside around towns that has been called 'planning's last frontier'. One of the key challenges facing spatial planners is the land-use management of this area, regarded by many as fit only for locating sewage works, essential service functions and other un-neighbourly uses. However, to others it is a dynamic area where a range of urban and rural uses collide. *Planning on the Edge* fills an important gap in the literature, examining in detail the challenges that planning faces in this no-man's land. It presents both problems and solutions, and builds a vision for the urban fringe that is concerned with maximising its potential and with bridging the physical and cultural rift between town and country. Its findings are presented in three sections: the urban fringe and the principles underpinning its management sectoral challenges faced at the urban fringe (including commerce, energy, recreation, farming, and housing) managing the urban fringe more effectively in the future. Students, professionals and researchers alike will benefit from the book's structured approach, while the global and transferable nature of the principles and ideas underpinning the study will appeal to an international audience.

Culinary Capital Peter Naccarato 2013-07-18 TV cookery shows hosted by celebrity chefs. Meal prep kitchens. Online grocers and restaurant review sites. Competitive eating contests, carnivals and fairs, and junk food websites and blogs. What do all of them have in common? According to authors Kathleen LeBesco and Peter Naccarato, they each serve as productive sites for understanding the role of culinary capital in shaping individual and group identities in contemporary culture. Beyond providing sustenance, food and food practices play an important social role, offering status to individuals who conform to their culture's culinary norms and expectations while also providing a means of resisting them. *Culinary Capital* analyzes this phenomenon in action across the landscape of contemporary culture. The authors examine how each of the sites listed above promises viewers and consumers status through the acquisition of culinary capital and, as they do so, intersect with a range of cultural values and ideologies, particularly those of gender and economic class.

The Consumer Society Jean Baudrillard 2016-12-13 Jean Baudrillard's classic text was one of the first to focus on the process and meaning of

consumption in contemporary culture. Originally published in 1970, the book makes a vital contribution to current debates on consumption. The book includes Baudrillard's most organized discussion of mass media culture, the meaning of leisure, and anomie in affluent society. A chapter on the body demonstrates Baudrillard's extraordinary prescience for flagging vital subjects in contemporary culture long before others. This English translation begins with a new introductory essay.

The Limitless City Oliver Gillham 2002-03 One of the great debates of our time concerns the predominant form of land use in America today -- the all too familiar pattern of commercial and residential development known as sprawl. But what do we really know about sprawl? Do we know what it is? Where did it come from? Is it really so bad? If so, what are the alternatives? Can anything be done to make it better? The Limitless City offers an accessible examination of those and related questions. Oliver Gillham, an architect and planner with more than twenty-five years of experience in the field, considers the history and development of sprawl and examines current debates about the issue. The book: offers a comprehensive definition of sprawl in America traces the roots of sprawl and considers the factors that led to its preeminence as an urban and suburban form reviews both its negative impacts (loss of open space, increased pollution, gridlock) as well as its positive aspects (economic development, personal freedom, privacy) considers responses to sprawl including "smart growth," urban growth boundaries, regional planning, and the New Urbanism looks at what can be done to improve and counterbalance sprawl The author argues that whether we like it or not, sprawl is here to stay, and only by understanding where it came from and why it developed will we be able to successfully address the problems it has created and is likely to create in the future. The Limitless City is the first book to provide a realistic look at sprawl, with a frank recognition of its status as the predominant urban form in America, now and into the near future. Rather than railing against it, Gillham charts its probable future course while describing critical efforts that can be undertaken to improve the future of sprawl and our existing urban core areas.

Diet, Nutrition, and the Prevention of Chronic Diseases World Health Organization 1990 Winner of the 1993 PEN Book-of-the-Month Club Translation Prize Published in 1776 and considered the first Polish novel ever written, *The Adventures of Mr. Nicholas Wisdom* is a picaresque tale following the naïve title character's coming of age. Having conquered (and fled) sophisticated Warsaw, Nicholas enjoys many adventures across Europe, South America, and the high seas. He finally lands among the natives of an unknown isle who reject his allegedly superior European ways and instead tutor him for an "enlightened" existence. Resonant with Enlightenment ideas, *The Adventures of Mr. Nicholas Wisdom* provides a sly portrait of the era's Polish society and a fascinating perspective on the broader problems of eighteenth-century European culture.

Etruscans Morgan Llywelyn 2010-04-01 In the early days of the Roman Empire, the noble Etruscan civilization in Italy is waning, Vesi, a young Etruscan noblewoman, is violated by a renegade supernatural being. Outcast then from Etruria, Vesi bears Horatrim, a child who carries inexplicable knowledge and grows to manhood in only six years. But a savage Roman attack leaves Vesi unresponsive and Horatrim homeless and vulnerable, and he travels to Rome where his talents confound powerful businessman Propertius, who arranges to adopt Horatrim as a son, changing his name to Horatius. And all the while his demon father is seeking him to kill him, for Horatius is a conduit through which the demon might be found and destroyed. The Architecture of Pica Ciamarra Associati Antonietta Iolanda Lima 2019-04 Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlights the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embrace innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life.

History of the Italian Agricultural Landscape Emilio Sereni 2014-07-14 Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, The Original Characteristics of French Rural History. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Myth and Symbol in Ancient Egypt Robert Thomas Rundle Clark 1978 This classic study remains the best single introduction to the Egyptian mythological world. The Egyptians lived apart from the rest of the ancient world, and it is this isolation that makes their ideas so difficult to appreciate and interpret. Egyptian thought was presented in terms of mythology: myth was used to convey insights into the workings of nature and the ultimately indescribable realities of the soul ...

Daily Life of the Etruscans Jacques Heurgon 2002 The Etruscans were the most important--and remarkable--of the peoples who inhabited early Italy. But when the Romans gained supremacy, the distinctive Etruscan culture gradually disappeared. This masterly re-creation of the lives of a now-forgotten people lifts the veil from every aspect of their civilization--origins, language, religion, and art.

Politics and Culture in Renaissance Naples Jerry H. Bentley 2014-07-14 Examining the cultural history of Renaissance Naples with an emphasis on humanism, the author also evaluates Naples in the broader context of fifteenth-century Italy and Renaissance Europe in general. He addresses several prominent themes of Renaissance history: patron-client relationships, the development of a realistic, Machiavellian approach to matters of statecraft and diplomacy, and the influence of Neapolitan humanists on European culture in general. Xenophon and His World Vincent Azoulay 2004 These twenty-four papers originated at a conference held in 1999 which was dedicated to Xenophon's writings and to the many areas of Greek life for which he is a major source. The contributions, which also reflect the problems of recreating a life that we have so few facts for, are divided into seven sections which discuss: Xenophon's life; Xenophon and Socrates; Xenophon and the barbarian world; Sparta; religion and politics; Anabasis ; Hellenica . These wide-ranging papers are specialised, often based on a close reading on Xenophon's texts, and not all of the Greek is translated. Eighteen papers, plus the introduction, are in English; the remaining papers are in Italian or German.

Global Status Report on Noncommunicable Diseases 2014 World Health Organization 2014 This global status report on prevention and control of NCDs (2014), is framed around the nine voluntary global targets. The report provides data on the current situation, identifying bottlenecks as well as opportunities and priority actions for attaining the targets. The 2010 baseline estimates on NCD mortality and risk factors are provided so that countries can report on progress, starting in 2015. In addition, the report also provides the latest available estimates on NCD mortality (2012) and risk factors, 2010-2012. All ministries of health need to set national NCD targets and lead the development and implementation of policies and interventions to attain them. There is no single pathway to attain NCD targets that fits all countries, as they are at different points in their progress in the prevention and control of NCDs and at different levels of socioeconomic development. However all countries can benefit from the comprehensive response to attaining the voluntary global targets presented in this report.--Publisher description.

More on Mediterranean Diets Artemis P. Simopoulos 2007 "This book is an update of the previous volume on Mediterranean diets published in 2000, which provided extensive reviews of the various diets existing in the Mediterranean region. Since then, a number of studies have been

published on the relationship between a 'Mediterranean-type' diet and chronic diseases. However, because the 'diet score' used in those studies does not provide any information on the nutritional composition or quality of the diet, this publication takes an entirely different approach: Particular attention is given to the nutritional factors and their mechanisms in cardiovascular disease, cancer, metabolic syndrome and obesity, and the results of decreasing the [omega]-6:[omega]-3 ratio and its anti-inflammatory effects on several biomarkers are evaluated. Moreover, the effects of olive oil, relative to its antioxidant properties, and the anti-inflammatory and anticarcinogenic aspects of melatonin from plants and fruits common in the Mediterranean region are discussed."--BOOK JACKET.

This Bridge Will Not Be Gray Dave Eggers 2018-03-13 A "witty [and] compelling" true story for kids about San Francisco's Golden Gate Bridge—and why it's orange—by the New York Times–bestselling author! (Fast Company). In this delightfully original nonfiction book, National Book Award and Pulitzer Prize finalist Dave Eggers tackles one of the most famous architectural monuments in the world: the Golden Gate Bridge—and all the arguments and debates about building it and what it should look like. Cut-paper illustrations by Tucker Nichols enliven the tale, and this revised edition also includes real-life letters from local constituents making the case for keeping the bridge orange. With sly humor and lots of fascinating historical facts, this is an accessible, enjoyable read for kids (or adults), transporting readers to the glorious Golden Gate no matter where they live. "Eggers's featherlight humor provides laughs throughout." —Publishers Weekly (starred review). "A love letter to infrastructure." —The New York Times "A story compelling enough to keep adults interested as they read it (and re-read it and re-read it) each night at bedtime." —Fast Company

Medieval Callings Jacques Le Goff 1995-12-18 These essays by eleven internationally renowned historians present nuanced profiles of the major social and professional groups—the callings-of the Middle Ages. The contributors focus on attitudes of medieval men and women toward their own society. Through a variety of techniques, from a reading of the Song of Roland to a reading of administrative records, they identify characteristic viewpoints of members of the fighting class, the clergy, and the peasantry. Along with vivid descriptions of what life was like for warrior knights, monks, high churchmen, criminals, lepers, shepherds, and prostitutes, this innovative approach offers a valuable new perspective on the complex social dynamics of feudal Europe. "Very useful discussions of texts, both learned and literary."—Christopher Dyer, Times Literary Supplement

Prevention of Coronary Heart Disease: Diet, Lifestyle and Risk Factors in the Seven Countries Study Daan Kromhout 2012-10-23 In the 1940s I was struck by reports about many apparently healthy middle-aged men who dropped dead instantly from heart attacks. The causes of these sudden deaths were unknown. I was interested to discover physio-chemical characteristics of individuals with predictive value for the occurrence of these fatal heart attacks. The discovery of preventive variables would point ways to prevent this disease. In order to find relationships between mode of life and susceptibility to heart disease contrasting populations had to be studied. Variety - not a high degree of homogeneity in culture and habits - must be sought. After exploratory surveys in countries with supposed differences in dietary patterns, lifestyle and heart disease rates in the early 1950s, the Seven Countries Study took off in 1958. This study established relationships between risk factors and development of heart disease in middle-aged men in health examined in countries with cultures we demonstrated to contrast in diet and lifestyle. The results obtained in the Seven Countries Study from its inception till now are presented in this book entitled: "Prevention of coronary heart disease. Diet, lifestyle and risk factors in the Seven Countries Study. " Long ago I realized that our concern should not be restricted to the prevention of coronary heart disease but should be extended to all diseases and premature death.

The Flavors of Modernity Gian-Paolo Biasin 2017-03-14 From Rabelais's celebration of wine to Proust's madeleine and Virginia Woolf's boeuf en daube in *To the Lighthouse*, food has figured prominently in world literature. But perhaps nowhere has it played such a vital role as in the Italian novel. In a book flowing with descriptions of recipes, ingredients, fragrances, country gardens, kitchens, dinner etiquette, and even hunger, Gian-Paolo Biasin examines food images in the modern Italian novel so as to unravel their function and meaning. As a sign for cultural values and social and economic relationships, food becomes a key to appreciating the textual richness of works such as Lampedusa's *The Leopard*, Manzoni's *The Betrothed*, Primo Levi's *Survival in Auschwitz*, and Calvino's *Under the Jaguar Sun*. The importance of the culinary sign in fiction, argues Biasin, is that it embodies the oral relationship between food and language while creating a sense of materiality. Food contributes powerfully to the reality of a text by making a fictional setting seem credible and coherent: a Lombard peasant eats polenta in *The Betrothed*, whereas a Sicilian prince offers a monumental macaroni timbale at a dinner in *The Leopard*. Similarly, Biasin shows how food is used by writers to connote the psychological traits of a character, to construct a story by making the protagonists meet during a meal, and even to call attention to the fictionality of the story with a metanarrative description. Drawing from anthropology, psychoanalysis, sociology, science, and philosophy, the author gives special attention to the metaphoric and symbolic meanings of food. Throughout he blends material culture with observations on thematics and narrativity to enlighten the reader who enjoys the pleasures of the text as much as those of the palate. The Homecoming Party Carmine Abate 2010 It is Christmas Eve. Sitting on the steps of the village church, a father and son exchange stories. The father speaks of life as an emigrant from Italy, in perpetual limbo between his departure and return home. The son tells of an idyllic childhood spent in a vivid, enchanting land marred only by his father's long absences. Each hides an awful secret concerning the fate of a mysterious man whose affair with the boy's older sister changed their lives. On this night of nights, as the long-buried details seep through each man's story, a shared truth

will finally emerge.

The Land of Hunger Piero Camporesi 1996 In this highly original book, Camporesi explores the two worlds of feast and famine in early modern Europe. Camporesi brings together a mosaic of images from Italian folklore: phantasmagoric processions of giants, pigs, vagabonds, down-trodden rogues, charlatans and beggars in rags. He reconstructs a world inhabited by the strange forces of peasant culture, and describes the various rituals - carnivals, festivities, competitions and funerals - in which food played a central role. Camporesi's description alternates between the lives of the "haves" and the "have-nots". He moves from the starving underworld of "criminalized poverty", where people were forced to develop the art of living at the expense of others simply in order to survive, to the gastronomic culture of the well-fed, with their excessive eating habits, oily foods and colourful table manners. "The Land of Hunger" is a graphic and engaging journey into the folk culture of early modern Europe. It will consolidate Camporesi's reputation as one of the most original and imaginative historians of our time.

Books That Cook Jennifer Cognard-Black 2014-09-04 Organized like a cookbook, *Books that Cook: The Making of a Literary Meal* is a collection of American literature written on the theme of food: from an invocation to a final toast, from starters to desserts. All food literatures are indebted to the form and purpose of cookbooks, and each section begins with an excerpt from an influential American cookbook, progressing chronologically from the late 1700s through the present day, including such favorites as *American Cookery*, *The Joy of Cooking*, and *Mastering the Art of French Cooking*. The literary works within each section are an extension of these cookbooks, while the cookbook excerpts in turn become pieces of literature--forms of storytelling and memory-making all their own. Each section offers a delectable assortment of poetry, prose, and essays, and the selections all include at least one tempting recipe to entice readers to cook this book. Including writing from such notables as Maya Angelou, James Beard, Alice B. Toklas, Sherman Alexie, Nora Ephron, M.F.K. Fisher, and Alice Waters, among many others, *Books that Cook* reveals the range of ways authors incorporate recipes--whether the recipe flavors the story or the story serves to add spice to the recipe. *Books that Cook* is a collection to serve students and teachers of food studies as well as any epicure who enjoys a good meal alongside a good book.
