Water Resource Systems Planning and Management Daniel P. Loucks 2017-03-02 This book is open access under a CC BY-NC 4.0 license. This revised, updated textbook presents a systems approach to the planning, management, and operation of water resources infrastructure in the environment. Previously published in 2005 by UNESCO and Deltares (Delft Hydraulics at the time), this new edition, written again with contributions from Jerry R. Stedinger, Jozef P. M. Dijkman, and Monique T. Villars, is aimed equally at students and professionals. It introduces readers to the concept of viewing issues involving water resources as a system of multiple interacting components and scales. It offers guidelines for initiating and carrying out water resource system planning and management projects. It introduces alternative optimization, simulation, and statistical methods useful for project identification, design, siting, operation and evaluation and for studying post-planning issues. The authors cover both basin-wide and urban water issues and present ways of identifying and evaluating alternatives for addressing multiple-purpose and multi-objective water quantity and quality management challenges. Reinforced with cases studies, exercises, and media supplements throughout, the text is ideal for upper-level undergraduate and graduate courses in water resource planning and management as well as for practicing planners and engineers in the field.

Uncommon Valor Stephen L. Moore 2018-09-15 Uncommon Valor is a look into the formation and operation of an advanced Special Forces recon company during the Vietnam War. Code-named the Studies and Observations Group, SOG was the most covert U.S. military unit in its time and contained only volunteers from such elite units as the Army's Green Berets, Navy SEALs, and Air Force Air Commandos. SOG warriors operated in small teams, going behind enemy lines in Laos and Cambodia and along the Ho Chi Minh Trail, tasked with performing special reconnaissance, sabotaging North Vietnamese Army ammunition, attempting to rescue downed U.S. pilots and other black ops missions. During that time, Forward Operating Base-2's (FOB-2's) recon company became the most highly decorated unit of the Vietnam War, with five of its men earning the Medal of Honor and eight earning the Distinguished Service Cross-America's second highest military award for valor. Purple Hearts were earned by SOG veterans at a pace unparalleled in American wars of the twentieth century, with casualties at times exceeding 100 percent. One, Bob Howard, was wounded on fourteen different occasions, received eight Purple Hearts, was written up after three different missions for the Medal of Honor, and emerged from Vietnam as the most highly decorated soldier since World War II's Audie Murphy.

Glazes from a Potter's Perspective Steve Loucks 2018-02-14 Glazes from a Potter's Perspective: A Simple, Kitchen-Method Approach to Understanding Glaze Development is a book that demystifies and explains glazes from a potter's perspective. The book is filled with valuable information from the vast glazing experimentation and experience of master potter, Steve Loucks. His testing methods and approach differ from the scientific approach for making glazes where ceramic engineers think in terms of what and how many molecules of certain chemicals make up the glaze within their ratios and limits to Steve's approach that is from a potter's perspective. He goes right to the tests using the actual ingredients that are available from ceramic supply centers to make glazes. His simple, kitchen-method approach is easy to understand without the complicated use of mathematical, ceramic engineering calculations, or the need for software programs. It goes right to the glaze tests to see how much and to what extent an influencing ingredient has on a glaze, the actual instead of predicted results. His testing methods and processes, which are outlined and illustrated throughout the book, are easy to follow yielding effective, useful results while using the glaze materials in a resourceful manner to be environmentally responsible. The book begins by identifying the numerous characteristics that differentiate and distinguish the various glazes that he has worked with throughout his ceramics career to provide a common vocabulary for ceramic artists. Glazes are explained first in theory and then in reality. Further discussion outlines the component parts that make up a glaze to gain an understanding on how to evaluate a glaze to adjust its melting temperature, flow, and surface qualities. Then, the testing procedures are outlined and illustrated to accomplish those tasks. Additional information includes the influencing factors affecting a glaze, glaze application methods, and firing processes. A supplemental chapter lists the glaze recipes used on the pieces illustrated in the book of his and the contributing editor, Lynnette Hesser's work, including the glazing processes used on each piece. Steve's goal is to help ceramic artists gain a better understanding of glazes for greater success with their glazing, glaze development, and artwork.

The WPA Guide to Wyoming Federal Writers' Project 2013-10-31 During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. Published in 1941, on the fiftieth anniversary of the state, the WPA Guide to Wyoming is a thorough reflection of both the history of the state's pioneer routes as well an attempt to capture the beauty of the surrounding area in photographs. Descriptions of the Equality State's livestock and oil industries are included as well as pictorial documentation of the area's vast expanses of open land.
