

The Anthropology Of Latin America And The Caribbean

The Anthropology of Disasters in Latin America Virginia García-Acosta 2019-12-09 This book offers anthropological insights into disasters in Latin America. It fills a gap in the literature by bringing together national and regional perspectives in the study of disasters. The book essentially explores the emergence and development of anthropological studies of disasters. It adopts a methodological approach based on ethnography, participant observation, and field research to assess the social and historical constructions of disasters and how these are perceived by people of a certain region. This regional perspective helps assess long-term dynamics, regional capacities, and regional-global interactions on disaster sites. With chapters written by prominent Latin American anthropologists, this book also considers the role of the state and other nongovernmental organizations in managing disasters and the specific conditions of each country, relative to a greater or lesser incidence of disastrous events. Globalizing the existing literature on disasters with a focus on Latin America, this book offers multidisciplinary insights that will be of interest to academics and students of geography, anthropology, sociology, and political science.

Ethnographic Insights on Latin America and the Caribbean Melanie A. Medeiros 2023-02-27 Ethnographic Insights on Latin America and the Caribbean offers a compelling introduction to the region by providing a series of ethnographic case studies that examine the most pressing issues communities are facing today. These case studies address key topics such as inequities during the COVID-19 pandemic, anti-Black racism, resistance against extractive industries, migration and transnational families, revitalization of Indigenous languages, art and solidarity in the wake of political violence, resilience in the face of climate change, and recent social movements. Designed for courses in a variety of disciplines, this expansive volume is organized in thematic sections, with introductions that draw important connections between chapters. The first section provides essential background on ethnography, archaeology, and history, while chapters in the following sections center local perspectives, strategies, and voices. Each chapter ends with reflection and discussion questions, key concepts with definitions, and resources to explore further. Presenting a snapshot of life during the early decades of the twenty-first century, Ethnographic Insights on Latin America and the Caribbean illuminates the structural forces and human agency that are determining the future of the region and the world.

Race and Nation in Modern Latin America Nancy P. Appelbaum 2003-11-20 This collection brings together innovative historical work on race and national identity in Latin America and the Caribbean and places this scholarship in the context of interdisciplinary and transnational discussions regarding race and nation in the Americas. Moving beyond debates about whether ideologies of racial democracy have actually served to obscure discrimination, the book shows how notions of race and nationhood have varied over time across Latin America's political landscapes. Framing the themes and questions explored in the volume, the editors' introduction also provides an overview of the current state of the interdisciplinary literature on race and nation-state formation. Essays on the postindependence period in Belize, Brazil, Colombia, Cuba, Mexico, Panama, and Peru consider how popular and elite racial constructs have developed in relation to one another and to processes of nation building. Contributors also examine how ideas regarding racial and national identities have been gendered and ask how racialized constructions of nationhood have shaped and limited the citizenship rights of subordinated groups. The contributors are Sueann Caulfield, Sarah C. Chambers, Lillian Guerra, Anne S. Macpherson, Aims McGuinness, Gerardo Renique, James Sanders, Alexandra Minna Stern, and Barbara Weinstein.

Gender's Place L. Frazier 2003-05-02 This collection brings together key theoretical issues and rich ethnographic cases in the feminist anthropology of Latin America in order to explore the ways that 'place' - understood both geographically and metaphorically - can serve as a key vehicle for analyzing the cultural, social, and historical specificity of gender relations and ideologies. Like Dorothy Hodgson's volume, *Gendered Modernities*, the book seeks to unite ethnographic specificity with theoretical cohesion in a way that demonstrates the unique contribution that anthropology can make to gender and area studies.

The Chinese in Latin America and the Caribbean Walton Look Lai 2010 The Chinese migration to the Latin America/Caribbean region is an understudied dimension of the Asian American experience. There are three distinct periods in the history of this migration: the early colonial period (pre-19th century), when the profitable three-century trade connection between Manila and Acapulco led to the first Asian migrations to Mexico and Peru; the classic migration period (19th to early twentieth centuries), marked by the coolie trade known to Chinese diaspora studies; and the renewed immigration of the late 20th century to the present. Written by specialists on the Chinese in Latin America and the Caribbean, this book tells the story of Asian migration to the Americas and contributes to a more comprehensive understanding of the Chinese in this important part of the world.

Comparative Perspectives on Afro-Latin America Kwame Dixon 2012-03-11 Comparative Perspectives on Afro-Latin America offers a new, dynamic discussion of the experience of blackness and cultural difference, black political mobilization, and state responses to Afro-Latin activism throughout Latin America. Its thematic organization and holistic approach set it apart as the most comprehensive and up-to-date survey of these populations and the issues they face currently available.

The Politics and Performance of Mestizaje in Latin America Paul K Eiss 2018-12-07 The term "mestizaje" is generally translated as race mixture, with races typically understood as groups differentiated by skin color or other physical characteristics. Yet such understandings seem contradicted by contemporary understandings of race as a cultural construct, or idea, rather than as a biological entity. How might one then approach mestizaje in a way that is not definitionally predicated on 'race,' or at least, on a modernist formulation of race as phenotypically expressed biological difference? The contributors to this volume provide explorations of this question in varied Latin American contexts (Mexico, Guatemala, Bolivia, Colombia, Peru), from the 16th century to the present. They treat 'mestizo acts' neither as expressions of pre-existing social identities, nor as ideologies enforced from above, but as cultural performances enacted in the in-between spaces of social and political life. Moreover, they show how 'mestizo acts' not only express or reinforce social hierarchies, but institute or change them - seeking to prove - or to dismantle - genealogies of race, blood, sex, and language in public and political ways. The chapters in this book originally published as a special issue of Latin American and Caribbean Ethnic Studies.

The Routledge Handbook of Urban Studies in Latin America and the Caribbean Jesús M. González-Pérez 2022-07-19 This handbook presents the great contemporary challenges facing cities and urban spaces in Latin America and the Caribbean. The content of this multidisciplinary book is organized into four large sections focusing on the histories and trajectories of urban spatial development, inequality and displacement of urban populations, contemporary debates on urban policies, and the future of the city in this region. Scholars of diverse origins and specializations analyze Latin American and Caribbean cities showing that, despite their diversity, they share many characteristics and challenges and that there is value in systematizing this knowledge to both understand and explain them better and to promote increasing equity and sustainability. The contributions in this handbook enhance the theoretical, empirical and methodological study of urbanization processes and urban policies of Latin America and the Caribbean in a global context, making it an important reference for scholars across the world. The book is designed to meet the interdisciplinary study and consultation needs of undergraduate and graduate students of architecture, urban design, urban planning, sociology, anthropology, political science, public administration, and more.

Psychoanalysis as Social and Political Discourse in Latin America and the Caribbean Paola Bohórquez 2022-06-16 This book offers a regional, intersectional, and transnational perspective of psychoanalysis in Latin America and the Caribbean that illuminates psychoanalysis's role as social and political discourse through a collection of original interventions in the fields of psychoanalysis, cultural studies, psychology, anthropology, health sciences, history, and philosophy. The authors contribute to discussions about the applicability of psychoanalytic concepts to reading Latin American and Caribbean sociopolitical phenomena as well as how these regionally specific dimensions challenge and transform traditional psychoanalytic notions. Firstly, the book offers a regional overview of psychoanalysis as a discourse that reflects on the imbrication between the psychic and the sociopolitical. Secondly, it showcases intersectional perspectives that illuminate psychoanalysis's potentials and limitations in addressing contemporary problematics around race, gender, sexuality, and class. Finally, the book attests to the area's role in advancing psychoanalysis as a transnational discipline. By providing both a balanced regional overview and an interdisciplinary perspective, the volume will be essential for all psychoanalysts and scholars wanting to understand the place of psychoanalysis in Latin American and Caribbean discourse.

Cultures of Anti-racism in Latin America and the Caribbean Peter Wade 2019 Latin America's long history of showing how racism can co-exist with racial mixture and conviviality offers useful ammunition for strengthening anti-racist stances. This volume asks whether cultural production has a particular role to play within discourses and practices of anti-racism in Latin America and the Caribbean. The contributors analyse music, performance, education, language, film and art in diverse national contexts across the region. The book also places Latin American and Caribbean racial formations within a broader global context and sets out the premise that the region provides valuable opportunities for thinking about anti-racism when recent political events have made ever more fragile the claims that, at least in Europe and the United States, we exist in a 'post-racial' world.

The Tourism Encounter Florence Babb 2010-08-30 This book considers the recent growth of tourism in transitional societies in Latin America and the Caribbean. Research in Cuba, Mexico, Nicaragua, and Peru reveals that tourism often takes up where social transformation leaves off and may even benefit from the formerly off-limits status of nations that have undergone periods of conflict or rebellion.

The Jewish Diaspora in Latin America and the Caribbean Kristin Ruggiero 2005 Since the 1970s, the Latin American Jewish Diaspora has been recognized as a unique phenomenon in diasporic studies, due to the development of new ways of thinking about internationalism and globalization. Important works of the 1980s and 1990s established the critical role of Jews in Latin America. This collection moves the field forward by providing an interdisciplinary and comparative view of Jewish experiences through history, literature, painting, anthropology, poetry, sociology, and politics. The contributors have been impacted and shaped by their own or their families' memories of the Holocaust and the lived horrors of anti-Semitism in Latin America. The goal of the collection, each chapter in its own medium, is to explore and celebrate what it means to have and live memories of an individual and a collective Jewishness, and to uncover and recover the historical fragments of the Jewish experience in Latin America and the Caribbean.

Indigenous Languages, Politics, and Authority in Latin America Alan Durston 2018-05-30 This volume makes a vital and original contribution to a topic that lies at the intersection of the fields of history, anthropology, and linguistics. The book is the first to consider indigenous languages as vehicles of political orders in Latin America from the sixteenth century to the present, across regional and national contexts, including Peru, Mexico, Guatemala, and Paraguay. The chapters focus on languages that have been prominent in multiethnic colonial and national societies and are well represented in the written record: Guarani, Quechua, some of the Mayan languages, Nahuatl, and other Mesoamerican languages. The contributors put into dialogue the questions and methodologies that have animated anthropological and historical approaches to the topic, including ethnohistory, philology, language politics and ideologies, sociolinguistics, pragmatics, and metapragmatics. Some of the historical chapters deal with how political concepts and discourses were expressed in indigenous languages, while others focus on multilingualism and language hierarchies, where some indigenous languages, or language varieties, acquired a special status as mediums of written communication and as elite languages. The ethnographic chapters show how the deployment of distinct linguistic varieties in social interaction lays bare the workings of social differentiation and social hierarchy. Contributors: Alan Durston, Bruce Mannheim, Sabine MacCormack, Bas van Doesburg, Camilla Townsend, Capucine Boidin, Angélica Otazú Melgarejo, Judith M. Maxwell, Margarita Huayhua.

Persistence and Emergencies of Inequalities in Latin America Pablo Vommaro 2022-02-21 This book adopts a multidimensional approach to analyze both the historical and emerging factors that contribute to make Latin America and the Caribbean the most unequal region in the world. Social inequality is a historical characteristic of the region, but at the beginning of the 21st century, a handful of progressive governments seemed to be adopting policies that could reduce this historical trend. Many of these efforts, however, were blocked or reversed by the COVID-19 pandemic, which both exposed the persistence of historical trends and contributed to the emergency of new forms of inequality in the region. The different chapters in this contributed volume adopt a multidimensional, intersectional, perspective to analyze both the persistence and the emergency of social devices of production and reproduction of inequalities in the diverse Latin American and Caribbean temporal spatialities. The issues analyzed in the different chapters revolve around four main axes: a) persistence of generational and intergenerational inequalities; b) structural gender inequality; c) intertwined social inequalities: race, class and social structure and; c) historical and economic dimension of inequality. Persistence and Emergencies of Inequalities in Latin America: A Multidimensional Approach will be of interest to researchers interested in the study of social inequality and social justice in different fields of the human and social sciences, such as sociology, political science, history, economics, anthropology and education. It will also be a valuable tool for policy makers and social activists engaged in the discussion, advocacy and implementation of public policies aimed at reducing social inequalities.

Natural Disasters in Latin America and the Caribbean June Carolyn Erlick 2021-02-03 Natural Disasters in Latin America and the Caribbean: Coping with Calamity explores the relationship between natural disasters and civil society, immigration and diaspora communities and the long-term impact on emotional health. Natural disasters shape history and society and, in turn, their long-range impact is determined by history and society. This is especially true in Latin America and the Caribbean, where climate change is increasing the frequency and intensity of these extreme events. Ranging from pre-Columbian flooding in the Andes to the devastation of Hurricane Maria in Puerto Rico, this book focuses on long-range recovery and recuperation, rather than short-term disaster relief. Written in the time of the coronavirus pandemic, the author shows how

lessons learned about civil society, governance, climate change, inequality and trauma from natural disasters have their echoes in the challenges of today's uncertain world. This book is well-suited to the classroom and will be an asset to students of Latin American history, environmental history and historical memory.

Xenophobia and Nativism in Africa, Latin America, and the Caribbean Sabella Ogbobode Abidde 2024 "This book historicises and analyses the increasing incidence of xenophobia and nativism in Africa, Latin America, and the Caribbean. It examines how xenophobia and nativism impact the political cohesion and social fabric of states and societies in the regions and offers solutions to aid policy formation and implementation. Rather than utilising an overarching framework, individual theory is applied to chapters to analyse the diverse connections between xenophobia and nativism in the regions. The book explores the economic, nationalistic, political, social, cultural, and psychological triggers for xenophobia and nativism and their impact on an increasingly interconnected and interrelated world. In addition to the individual and comparative examination of these triggers, the book outlines how they can be decreased or altered and argues that Pan-Africanism and the unity of purpose among diverse groups in the western hemisphere is still an ideal to which Africa, Latin America, and the Caribbean can aspire. This book will be of interest to academics in the field of African history, African Studies, Caribbean and Latin American studies, cultural anthropology and comparative sociology"-

Black Women in Latin America and the Caribbean Melanie A. Medeiros 2023-08-11 *Black Women in Latin America and the Caribbean: Critical Research and Perspectives* employs an intersectional and interdisciplinary approach to examine Black cisgender women's social, cultural, economic, and political experiences in Latin America and the Caribbean. It presents critical empirical research emphasizing Black women's innovative, theoretical, and methodological approaches to activism and class-based gendered racism and Black politics. While there are a few single-authored books focused on Black women in Latin American and Caribbean, the vast majority of the scholarship on Black women in Latin America and the Caribbean has been published as theses, dissertations, articles, and book chapters. This volume situates these social and political analyses as interrelated and dialogic and contributes a transnational perspective to contemporary conversations surrounding the continued relevance of Black women as a category of social science inquiry. Many of the contributing authors are from Latin American and Caribbean countries, reflecting a commitment to representing the valuable observations and lived experiences of scholars from this region. When read together, the chapters offer a hemispheric framework for understanding the lasting legacies of colonialism, transatlantic slavery, plantation life, and persistent socio-economic and cultural violence.

The Specter of Races Anke Birkenmaier 2016-06-20 Arguing that race has been the specter that has haunted many of the discussions about Latin American regional and national cultures today, Anke Birkenmaier shows how theories of race and culture in Latin America evolved dramatically in the period between the two world wars. In response to the rise of scientific racism in Europe and the American hemisphere in the early twentieth century, anthropologists joined numerous writers and artists in founding institutions, journals, and museums that actively pushed for an antiracist science of culture, questioning pseudoscientific theories of race and moving toward more broadly conceived notions of ethnicity and culture. Birkenmaier surveys the work of key figures such as Cuban historian and anthropologist Fernando Ortiz, Haitian scholar and novelist Jacques Roumain, French anthropologist and museum director Paul Rivet, and Brazilian sociologist Gilberto Freyre, focusing on the transnational networks of scholars in France, Spain, and the United States to which they were connected. Reviewing their essays, scientific publications, dictionaries, novels, poetry, and visual arts, the author traces the cultural study of Latin America back to these interdisciplinary discussions about the meaning of race and culture in Latin America, discussions that continue to provoke us today.

Detours M. Bianet Castellanos 2019-11-05 Touring. Seeing. Knowing. Travel often evokes strong reactions and engagements. But what of the ethics and politics of this experience? Through critical, personal reflections, the essays in *Detours* grapple with the legacies of cultural imperialism that shape travel, research, and writing. Influenced by the works of anthropologists Ruth Behar and Renato Rosaldo, the scholars and journalists in this volume consider how first encounters—those initial, awkward attempts to learn about a culture and a people—evolved into enduring and critical engagements. Contemplating the ethics and racial politics of traveling and doing research abroad, they call attention to the power and privilege that permit researchers to enter people's lives, ask intimate questions, and publish those disclosures. Focusing on Latin America and the Caribbean, they ask, Why this place? What keeps us coming back? And what role do we play in producing narratives of inequality, uneven development, and global spectacle? The book examines the "politics of return"—the experiences made possible by revisiting a field site over extended periods of time—of scholars and journalists who have spent decades working in and writing about Latin America and the Caribbean. Contributors aren't telling a story of enlightenment and goodwill; they focus instead on the slippages and conundrums that marked them and raised questions of their own intentions and intellectual commitments. Speaking from the intersection of race, class, and gender, the contributors explore the hubris and nostalgia that motivate returning again and again to a particular place. Through personal stories, they examine their changing ideas of Latin America and the Caribbean and how those places have shaped the people they've become, as writers, as teachers, and as activists.

The Anthropology of Latin America and the Caribbean Harry Sanabria 2015-09-16 The first single-authored comprehensive introduction to major contemporary research trends, issues, and debates on the anthropology of Latin America and the Caribbean. The text provides wide and historically informed coverage of key facets of Latin American and Caribbean societies and their cultural and historical development as well as the roles of power and inequality. Cymeme Howe, Visiting Assistant Professor of Cornell University writes, "The text moves well and builds over time, paying close attention to balancing both the Caribbean and Latin America as geographic regions, Spanish and non-Spanish speaking countries, and historical and contemporary issues in the field. I found the geographic breadth to be especially impressive." Jeffrey W. Mantz of California State University, Stanislaus, notes that the contents "reflect the insights of an anthropologist who knows Latin America intimately and extensively."

Minor Omissions Tobias Hecht 2002-09-07 Latin American history—the stuff of wars, elections, conquests, inventions, colonization, and all those other events and processes attributed to adults—has also been lived and partially forged by children. Taking a fresh look at Latin American and Caribbean society over the course of more than half a millennium, this book explores how the omission of children from the region's historiography may in fact be no small matter. Children currently make up one-third of the population of Latin America and the Caribbean, and over the centuries they have worked, played, worshipped, committed crimes, and fought and suffered in wars. Regarded as more promising converts to the Christian faith than adults, children were vital in European efforts to invent loyal subjects during the colonial era. In the contemporary economies of Latin America and the Caribbean—where 23 percent of people live on a dollar per day or less—the labor of children may spell the difference between survival and starvation for millions of households. *Minor Omissions* brings together scholars of history, anthropology, religion, and art history as well as a talented young author who has lived in the streets of a Brazilian city since the age of nine. The book closes with the prophetic dystopian tale "The Children's Rebellion" by the noted Uruguayan writer Cristina Peri Rossi.

Discourses from Latin America and the Caribbean Eleonora Esposito 2018-09-13 This edited collection brings together the latest research on discourse and society in Latin America and Caribbean in one volume. Employing cross-cutting approaches to current political, institutional and media discourses, it bridges existing theoretical and analytical gaps between the socio-political macro issues and the micro aspects of linguistic analysis to provide fresh insights that deconstruct the complex socio-political power dynamics in Latin America and the Caribbean. Across eight chapters this volume explores the regions' thorny relationship with their complex histories of colonialism and slavery as well as the ongoing, multifaceted constructions of hegemonic and counter-hegemonic identities at the individual, regional and national levels. In doing so, it demonstrates the unique and rich particularities of these regions and why it is that they challenge many conventional dogmas and methods across the Social Sciences. This book will be of particular interest to scholars working in Discourse Studies, Sociology, Politics, Anthropology and Latin American and Caribbean Studies.
