Unshockable Love John Burke 2014-08-26 Why were sinners so attracted to Jesus yet repelled by the religious? It had everything to do with the heart of Jesus. They sensed that Jesus was for them--not against them. When broken, sinful people feel repelled by Christians, we must assess whether our hearts reveal the heart of God or reflect the heart of the Pharisees. Through this engaging study of Jesus's encounters with imperfect people, combined with real-life stories of ordinary people having Christlike impact, readers will learn how to show unshockable love toward those around them.

Principles of Cancer Biotherapy R.K. Oldham 2012-12-06 At the time of the first edition of Principles of Cancer Biotherapy, this book represented the first comprehensive textbook on biological therapy. Whereas in 1991, when the second edition was published, there was still some doubt on the part of many oncologists and cancer researchers as to the therapeutic value of these new approaches, it is now generally agreed that biopharmaceuticals are producing major opportunities for new cancer therapies. Cancer biotherapy has truly matured into the fourth modality of cancer treatment. The third edition is now needed as a result of the tremendous progress that has been made in recent years using biologicals in cancer treatment. The book summarizes an evolving science and a rapidly changing medical practice. As we near the millennium, it now becomes possible to envision a much more diversified system of cancer research and treatment that will afford greater opportunities for patients. Some forms of cancer biotherapy use the strategy of tumour stabilization and control through continued biological therapy, akin to the use of insulin in the treatment of diabetes. This textbook illustrates new methods of thinking and new strategies for control of cancer. It is always difficult to move from past dogma to future opportunity, but this third edition of Principles of Cancer Biotherapy illustrates why it is so important to the patients, for researchers and clinicians to explore and apply these new opportunities in cancer biotherapy.

The Bifidobacteria and Related Organisms Paola Mattarelli 2017-09-20 The Bifidobacteria and Related Organisms: Biology, Taxonomy, Applications brings together authoritative reviews on all aspects of Bifidobacteria and related genera. Their place within the Phylum Actinobacteria is discussed first, and this is followed by descriptions of the genera Bifidobacterium, Alloscardovia, Aeriscardovia, Bombiscardovia, Gardnerella, Metascardovia, Parascardovia and Scardovia and the currently accredited species within those genera. The increased availability of genome sequences and molecular tools for studying bifidobacteria provides important information about their taxonomy, physiology and interactions with their host. Also considerations about common bifidobacterial core maintenance during the mutual coevolution of a host and its intestinal microbes could be relevant for health claims for the ability of symbiotic gut bacteria to provide health benefits to their host, and for evaluating such claims in scientifically valid experiments. Chemotaxonomy is important to our understanding of these genera and so is considered along with physiological and biochemical aspects before proceeding to examine clinical and other practical aspects. The ability to maintain pure cultures and to grow cells in industrial quantities when required for applications requires that the cells' environmental and nutritional needs are well understood. Some species are important clinically and as animal digestive tract symbionts—and even play a part in honey production—so these matters are considered along with milk oligosaccharides' roles in gut flora development in neonates. Presents information on all bacteria in this group in one place Provides applications and technological considerations placed alongside more academic matters such as nomenclature and phylogeny Includes basic information on the beneficial role of bifidobacteria in the human gut, with particular importance for infants Provides information on genomic and gene modification technologies

Brands of Faith Mara Einstein 2007-09-14 In a society overrun by commercial clutter, religion has become yet another product sold in the consumer marketplace, and faiths of all kinds must compete with a myriad of more entertaining and more convenient leisure activities. Brands of Faith argues that in order to compete effectively faiths have had to become brands - easily recognizable symbols and spokespeople with whom religious prospects can make immediate connections Mara Einstein shows how religious branding has expanded over the past twenty years to create a blended world of

commerce and faith where the sacred becomes secular and the secular sacred. In a series of fascinating case studies of faith brands, she explores the significance of branded church courses, such as Alpha and The Purpose Driven Life, mega-churches, and the popularity of the televangelist Joel Olsteen and television presenter Oprah Winfrey, as well as the rise of Kaballah. She asks what the consequences of this religious marketing will be, and outlines the possible results of religious commercialism – good and bad. Repackaging religion – updating music, creating teen-targeted bibles – is justifiable and necessary. However, when the content becomes obscured, religion may lose its unique selling proposition – the very ability to raise us above the market.

Can Learner Strategy Instruction Succeed? G. M. Jacobs 1997 Previous research on learner strategy instruction has produced mixed results. This article reports a study in which two classes of 32 Singapore upper secondary school second language users of English participated. Both classes had the same teacher. One class received instruction in asking higher order questions; the other class did not. Higher order questions are related to the development of thinking skills. Participants' questions and responses to questions during small group discussions were tape recorded before and after the 10-week treatment. While there were no significant pre-instruction differences, after the instruction, the treatment class asked significantly more higher order questions and provided significantly more elaborated responses. A 0.05 alpha level was used. These findings are discussed in light of theory and previous research on issues of learner strategy instruction, the teaching of thinking skills, and learners' use of questions. [This article was published in "System" v25 n4 p561-570 1997 (EJ558291).].

Vertical Marriage Dave Wilson 2019-01-29 For anyone who is married, preparing for marriage, or desperate to save a relationship teetering on the brink of divorce, marriage coaches Dave and Ann Wilson offer hope and strategies gleaned from personal experience and Scripture that really work. Vertical Marriage will give you the insight, applications, and inspiration to transform your marriage into everything you hoped it would be. Honest to the core and laugh-out-loud funny, Dave and Ann Wilson share the one secret that brought them from the brink of divorce to a healthy and vibrant relationship. If you had asked Dave how their marriage was doing on the night of their tenth wedding anniversary, Dave would have rated it a 9.8 out of 10, and he would have even guaranteed that Ann would say the same. But instead of giving him a celebratory kiss, Ann whispered, "I've lost my feelings for you." Divorce seemed inevitable for the Wilsons, but starting that night, God began to reveal to Dave and Ann the most overlooked secret of getting the marriage we are looking for: a horizontal marriage relationship just doesn't work until your vertical relationship with Christ is first. As founders of a multi-campus church and marriage coaches with 30 years of experience, Dave and Ann share the hard-earned but easy-to-apply biblical principles that ensure a strong marriage. Written in a highly relatable dialogue between both husband and wife, Vertical Marriage will guide you toward building a vibrant relationship at every level, giving you the tools you need to embrace: Effective communication Fair conflict True romance A deeper connection Through their unique perspectives, Dave and Ann share an intimate, sometimes hilarious, and at times deeply poignant narrative of one couple's journey to reconnecting with God and discovering the joy and power of a vertical marriage.

Inside Alpha James Heard 2012-06-01 UK church attendance hemorrhaging and one course is hailed as the most effective tool for "turning back the tide." From small beginnings in the early 1970s, Alpha has grown to become a global success. Churches from across the denominational spectrum have enthusiastically seized upon the course, seeing it as the remedy for declining church attendance. Inside Alpha explores such claims through richly grounded qualitative research on six Alpha courses. It assesses Alpha's primary aim of converting non-churchgoers and its longer-term goal of spiritual maturity (Colossians 1:28-29). It questions whether the Alpha program is as successful as it claims at uniting evangelism and discipleship, mission and spiritual formation. This is an invaluable study for those--in the academy and the church--who have an interest in ecclesiology and mission. How exactly is one to understand conversion? What is it to "be Christian"? How does ambiguity and doubt fit within one's journey of faith? The importance of this work is in discovering--through an engagement with Alpha--how people might appropriately be initiated into and disciplined within the Christian faith in contemporary culture.

How to Revive Evangelism Craig Springer 2021-02-23 Christians need a compelling way to share their faith that combines the timeless practices of

Jesus with timely perspectives about our post-everything era. In a post-Christian, post-modern, post-truth society where Jesus followers aren't often well regarded, modern evangelism methods and efforts are eroding and increasingly ineffective. Christians often talk more than we listen, confront when we should converse, and demand that people believe before they belong. Author and Executive Director of Alpha US Craig Springer believes that reaching non-Christians is possible, but only if we are willing to shift our perspectives, abandon ineffective methodologies, and consider the unique cultural moment in which we live. In *How to Revive Evangelism*, he shares the often-overlooked evangelistic approaches of Jesus himself and demonstrates how returning to these fundamentals are the key to reviving evangelism in the 21st century. Incorporating groundbreaking and often startling data, Springer offers Christians seven shifts in how to share their faith--with friends and family members, neighbors and coworkers--that create greater potential for life change and interest in Jesus.

How Do Emotions and Feelings Regulate Physical Activity? Darko Jekauc 2017-09-12 Up to date the scientific discussion about how frequency and regularity of physical activity can be increased is dominated by social-cognitive models. However, increasing evidence suggests that emotions and feelings have greater influence on physical activity than originally assumed (Rhodes, Fiala, & Conner, 2009). Generally speaking, humans possess an evaluative system with a basic action tendency to approach pleasurable events and to avoid aversive ones (Cacioppo & Berntson, 1999). Evaluative responses to a behavior and associated emotional states may influence a decision regarding whether or not to repeat being physically active. Generally, behavior associated with positive evaluations has a higher probability of being repeated than behaviors without such an association. On the contrary, an association with negative evaluations tends to decrease the probability of repeating to be physically active. Hence, evaluative responses to physical activity or the related situation can be an important aspect in the process of physical activity maintenance (McAuley et al., 2007). Several social-cognitive models of behavior change and maintenance were recently extended to take the influence of affective responses into account, in a way that variables already included in the models (e.g. outcome expectancies or attitudes) were more clearly articulated into their cognitive and affective components. For example, with regard to Social Cognitive Theory, Gellert, Ziegelmann and Schwarzer (2012) proposed to distinguish between affective and health-related outcome expectancies, and in the Theory of Planned Behavior, researchers suggested to differentiate between cognitive and affective attitudes (Lawton, Conner, & McEachan, 2009). The results of these and other studies suggest that affective components make a unique contribution to the explanation of the physical activity behavior (Brand, 2006). Other examples come from social cognition research, where it was shown that automatic evaluative responses are part of our everyday life and that they decisively influence health behavior (Hofmann, Friese, & Wiers, 2008). Accordingly, there is evidence that people who exercise regularly hold more positive automatic evaluations with exercise than non-exercisers (Bluemke, Brand, Schweizer, & Kahlert, 2010). Although significant progress has been made in showing that evaluative responses to physical activity and associated emotional states are important predictors of physical activity underlying psychological processes are far from being fully understood. Some important issues still remain to be resolved. Which role play affective states compared to concrete emotions when influencing physical activity? How do affective states and emotions interact with cognitive variables such as intentions? Are evaluative processes before, during or after physical activity important to predict future physical activity? Do negative and positive

evaluations interact antagonistically or rather synergistically when physical activity as a new behavior shall be adopted? Future research will help us to resolve these and a lot of other so far unresolved issues.
