Colour Rudolf Steiner 2013-04-03 Building on the achievements of Goethe in his Theory of Colour, Rudolf Steiner shows how colour affects us in many areas of life, including our health, our sense of well-being, and our feelings. Distinguishing between 'image' and 'lustre' colours, he lays the foundation, based on his spiritual-scientific research, for a practical technique of working with colour that leads to a new direction in artistic creativity. His many penetrating remarks on some of the great painters of the past are supplemented by a deep concern to see a cultural, spiritual renewal emerge in the present time. 'If you realize', he states, 'that art always has a relation to the spirit, you will understand that both in creating and appreciating it, art is something through which one enters the spiritual world.' This volume is the most comprehensive compilation of Rudolf Steiner's insights into the nature of colour, painting and artistic creation. It is an invaluable source of reference and study not only for artists and therapists but for anyone interested in gaining an appreciation of art as a revelation of spiritual realities.

*Surrounded by Water* Andrea Corsale 2016-02-08 This work provides insights into the physical and human geography of Sardinia, the second largest Mediterranean island, with its complex, varied,

changing and often hidden features. The title, “Surrounded by Water”, recalls the identity of a land whose coastlines and surrounding seas have symbolically represented social, economic, political, cultural bridges or walls, meeting or colliding places, over its long and difficult history. Landscapes, seascapes and cityscapes are presented and analysed, together with other aspects, through a descriptive focus and original contributions provided by some local experts, in order to offer scholars and students across the globe a complex and multi-dimensional view of the reality of Sardinia through the lens of its geography. Each chapter of the book offers an in-depth and concise analysis of a specific topic, through the description of its characteristics and its current variations within the territory of the island. These descriptive aspects will be complemented with insights related to the research experiences and findings provided by the authors. This book will contribute to stirring new and modern interest about Sardinia, about further regional geographic studies, and about academic, scientific and cultural exchanges, among peoples and countries with both similar and different histories, identities, issues and hopes.

*The Body Where I was Born* Guadalupe Nettel 2015-06-16 The first novel to appear in English by one of the most talked-about and critically acclaimed writers of new Mexican fiction. From a psychoanalyst's couch, the narrator looks back on her bizarre childhood—in which she was born with an abnormality in her eye into a family intent on fixing it. In a world without the time and space for innocence, the narrator intimately recalls her younger self—a fierce and discerning girl open to life's pleasures and keen to its ruthless cycle of tragedy. With raw language and a brilliant sense of humor, both delicate and unafraid, Nettel strings together hard-won, unwieldy memories—taking us from Mexico City to Aix-en-Provence, France, then back home again—to create a portrait of the

artist as a young girl. In these pages, Nettel's art of storytelling transforms experience into inspiration and a new startling perception of reality. "Nettel's eye...gives rise to a tension, subtle but persistent, that immerses us in an uncomfortable reality, disquieting, even disturbing—a gaze that illuminates her prose like an alien sun shining down on our world." —Valeria Luiselli, author of *Sidewalks and Faces in the Crowd* "It has been a long time since I've found in the literature of my generation a world as personal and untransferable as that of Guadalupe Nettel." —Juan Gabriel Vásquez, author of *The Sound of Things Falling* "Nettel reveals the subliminal beauty within beings...and painstakingly examines the intimacies of her soul." —Magazine *Littéraire* "Guadalupe Nettel's storytelling power is majestic."—*Typographical Era In Praise of Natural Histories* "Five flawless stories..." —*The New York Times* "Nettel's stories are as atmospheric and emotionally battering as Chekhov's."—*Asymptote*

Straphanger Taras Grescoe 2012-04-24 Taras Grescoe rides the rails all over the world and makes an elegant and impassioned case for the imminent end of car culture and the coming transportation revolution "I am proud to call myself a straphanger," writes Taras Grescoe. The perception of public transportation in America is often unflattering—a squalid last resort for those with one too many drunk-driving charges, too poor to afford insurance, or too decrepit to get behind the wheel of a car. Indeed, a century of auto-centric culture and city planning has left most of the country with public transportation that is underfunded, ill maintained, and ill conceived. But as the demand for

petroleum is fast outpacing the world's supply, a revolution in transportation is under way. Grescoe explores the ascendance of the straphangers—the growing number of people who rely on public transportation to go about the business of their daily lives. On a journey that takes him around the world—from New York to Moscow, Paris, Copenhagen, Tokyo, Bogotá, Phoenix, Portland, Vancouver, and Philadelphia—Grescoe profiles public transportation here and abroad, highlighting the people and ideas that may help undo the damage that car-centric planning has done to our cities and create convenient, affordable, and sustainable urban transportation—and better city living—for all.

*How the Other Half Lives* Jacob A. Riis 2011 Jacob Riis's famed 1890 photo-text addressed the problems of tenement housing, immigration, and urban life and work at the beginning of the Progressive era. David Leviatin edited this complete edition of *How the Other Half Lives* to be as faithful to Riis's original text and photography as possible. Uncropped prints of Riis's original photographs replace the faded halftones and drawings from photographs that were included in the 1890 edition. Related documents added to the second edition include a stenographic report of one of Riis's lantern-slide lectures that demonstrates Riis's melodramatic techniques and the reaction of his audience, and five drawings that reveal the subtle but important ways Riis's photographs were edited when they were reinterpreted as illustrations in the 1890 edition. The book's provocative introduction now addresses Riis's ethnic and racial stereotyping and includes a map of New York's Lower East Side in the 1890s. A new list of illustrations and expanded chronology, questions for consideration, and selected bibliography provide additional support.

**Community** Zygmunt Bauman 2013-05-08 'Community' is one of those words that feels good: it is good 'to have a community', 'to be in a community'. And 'community' feels good because of the meanings which the word conveys, all of them promising pleasures, and more often than not the kind of pleasures which we would like to experience but seem to miss. 'Community' conveys the image of a warm and comfortable place, like a fireplace at which we warm our hands on a frosty day.

Out there, in the street, all sorts of dangers lie in ambush; in here, in the community, we can relax and feel safe. 'Community' stands for the kind of world which we long to inhabit but which is not, regrettably, available to us. Today 'community' is another name for paradise lost - but for a paradise which we still hope to find, as we feverishly search for the roads that may lead us there. But there is a price to be paid for the privilege of being in a community. Community promises security but seems to deprive us of freedom, of the right to be ourselves. Security and freedom are two equally precious and coveted values which could be balanced to some degree, but hardly ever fully reconciled. The tension between security and freedom, and between community and individuality, is unlikely ever to be resolved. We cannot escape the dilemma but we can take stock of the opportunities and the dangers, and at least try to avoid repeating past errors. In this important new book, Zygmunt Bauman takes stock of these opportunities and dangers and, in his distinctive and brilliant fashion, offers a much-needed reappraisal of a concept that has become central to current debates about the nature and future of our societies.

*Mountain Landscapes* Massimo Sargolini 2015-04 According with the Alps and Carpathian Conventions, the European Landscape Convention, and the Birds, and Habitats Directives the research project "Access2Mountain", illustrated in this book, aims to promote the improvement of the accessibility in mountain areas, as a crucial factor for their social, economic and cultural sustainable development, with particular regard for tourism. In the meanwhile, it aims to enlight methods, models and tools for the containment and the reduction of negative impacts of traffic, infrastructures and tourist flows on the environment, landscape and natural-cultural heritage, particularly in the most sensitive areas of South-East Europe. The landscape vision becomes the way to approach the analysis, interpretation and design. It requires a trans-scale dimension, moving from

the local level, to the environmental component, the interested context and the model region. The final output is a "system of thinking" for the decision making processes in sensitive mountain landscapes.

Dear Zealots Amos Oz 2018-11-13 The acclaimed author presents “three passionate lectures about the state of politics in Israel” in this “humorous, mournful, enraged, and uplifting” volume (Kirkus). A National Jewish Book Award Finalist Israeli author Amos Oz has won numerous awards for his

novels capturing the cultural and political complexities of his country, including the Frankfurt Peace Prize, the Primo Levi Prize, and the National Jewish Book Award. But these essays on the universal nature of fanaticism and its possible cures, on the Jewish roots of humanism and the need for a secular pride in Israel, and on the geopolitical standing of Israel in the wider Middle East and internationally, “may contain his most urgent message yet.” (Ruth Eglash, Washington Post). These essays were written, Oz states, “first and foremost” for his grandchildren: they are a patient, learned telling of history, religion, and politics, to be thumbed through and studied, clung to even, as we march toward an uncertain future. “Concise, evocative . . . Dear Zealots is not just a brilliant book of thoughts and ideas—it is a depiction of one man’s struggle, who for decades has insisted on keeping a sharp, strident and lucid perspective in the face of chaos and at times of madness.” —David Grossman, winner of the Man Booker International Prize

**Chianti Classico** Bill Nesto 2016-09-20 This book tells the story of the ancient land named Chianti and the modern wine appellation known as Chianti Classico. In 1716, Tuscany’s penultimate Medici ruler, Cosimo III, anointed the region of Chianti, along with three smaller areas in the Florentine State, as the world’s first legal appellations of origin for wine. In the succeeding centuries, this milestone was all but forgotten. By the late nineteenth century, the name Chianti, rather than signifying this historic region and its celebrated wine, identified a simple Italian red table wine in a straw-covered flask. È In the twenty-first century, Chianti Classico emerged as one of Italy’s most dynamic and fashionable wine zones. Chianti Classico relates the fascinating evolution of Chianti as a wine region and reveals its geographic and cultural complexity. Bill Nesto, MW, and Frances Di Savino explore the townships of Chianti Classico and introduce readers to the modern-day

winegrowers who are helping to transform the region. The secrets of Sangiovese, the principal vine variety of Chianti, are also revealed as the book unlocks the myths and mysteries of one of Italy's most storied wine regions. The publication of Chianti Classico coincides with the three hundredth anniversary of the Medici decree delimiting the region of Chianti on September 24, 1716.

**The Gap** Thomas Suddendorf 2013-11-12 There exists an undeniable chasm between the capacities of humans and those of animals. Our minds have spawned civilizations and technologies that have changed the face of the Earth, whereas even our closest animal relatives sit unobtrusively in their dwindling habitats. Yet despite longstanding debates, the nature of this apparent gap has remained unclear. What exactly is the difference between our minds and theirs? In *The Gap*, psychologist Thomas Suddendorf provides a definitive account of the mental qualities that separate humans from other animals, as well as how these differences arose. Drawing on two decades of research on apes, children, and human evolution, he surveys the abilities most often cited as uniquely human -- language, intelligence, morality, culture, theory of mind, and mental time travel -- and finds that two traits account for most of the ways in which our minds appear so distinct: Namely, our open-ended ability to imagine and reflect on scenarios, and our insatiable drive to link our minds together. These two traits explain how our species was able to amplify qualities that we inherited in parallel with our animal counterparts; transforming animal communication into language, memory into mental time

travel, sociality into mind reading, problem solving into abstract reasoning, traditions into culture, and empathy into morality. Suddendorf concludes with the provocative suggestion that our unrivalled status may be our own creation -- and that the gap is growing wider not so much because we are becoming smarter but because we are killing off our closest intelligent animal relatives. Weaving together the latest findings in animal behavior, child development, anthropology, psychology, and neuroscience, this book will change the way we think about our place in nature. A major argument for reconsidering what makes us human, *The Gap* is essential reading for anyone interested in our evolutionary origins and our relationship with the rest of the animal kingdom.

BiblioTech John Palfrey 2015-05-05 Libraries today are more important than ever. More than just book repositories, libraries can become bulwarks against some of the most crucial challenges of our age: unequal access to education, jobs, and information. In BiblioTech, educator and technology expert John Palfrey argues that anyone seeking to participate in the 21st century needs to understand how to find and use the vast stores of information available online. And libraries, which play a crucial role in making these skills and information available, are at risk. In order to survive our rapidly modernizing world and dwindling government funding, libraries must make the transition to a digital future as soon as possible—by digitizing print material and ensuring that born-digital material is publicly available online. Not all of these changes will be easy for libraries to implement. But as Palfrey boldly argues, these modifications are vital if we hope to save libraries and, through them, the American democratic ideal.
