Pathways to Power T. Douglas Price 2010-08-20 There are few questions more central to understanding the prehistory of our species than those regarding the institutionalization of social inequality. Social inequality is manifested in unequal access to goods, information, decision-making, and power. This structure is essential to higher orders of social organization and basic to the operation of more complex societies. An understanding of the transformation from relatively egalitarian societies to a hierarchical organization and socioeconomic stratification is fundamental to our knowledge about the human condition. In a follow-up to their 1995 book *Foundations of Social Inequality*, the Editors of this volume have compiled a new and comprehensive group of studies concerning these central questions. When and where does hierarchy appear in human society, and how does it operate? With numerous case studies from the Old and New World, spanning foraging societies to agricultural groups, and complex states, *Pathways to Power* provides key historical insights into current social and cultural questions.

Guns, Germs, and Steel: The Fates of Human Societies Jared Diamond 1999-04-17 "Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York

Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

The European Iron Age John Collis 2003-09-16 This ambitious study documents the underlying features which link the civilizations of the Mediterranean - Phoenician, Greek, Etruscan and Roman - and the Iron Age cultures of central Europe, traditionally associated with the Celts. It deals with the social, economic and cultural interaction in the first millennium BC which culminated in the Roman Empire. The book has three principle themes: the spread of iron-working from its origins in Anatolia to its adoption over most of Europe; the development of a trading system throughout the Mediterrean world after the collapse of Mycenaean Greece and its spread into temperate Europe; and the rise of ever more complex societies, including states and cities, and eventually empires. Dr Collis takes a new look at such key concepts as population movement, diffusion,

trade, social structure and spatial organization, with some challenging new views on the Celts in particular.

Culture and Change in Central European Prehistory Helle

Vandkilde 2007-12-31 This book is a cohesive overview of Central

European prehistory from the introduction of agriculture around

6000 BC to the state-forming processes that began to emerge

during the first millennium BC. A complex mosaic of culture,

society and processes is mirrored in the material world and in

certain periods involves a large part of the Eurasian continent.

Culture and change must be understood as both localised and

macro-regional: the book is a cultural-historical tale - inspired by,

for example, the attempts of French historians to integrate

different levels of history. Emphasis is laid on the eventful boom

periods where innovations and cross-cultural interaction

intensified in such a way that history's mainly reproductive

pattern was broken. Important turning points are attached,

among other things, to the first production of food, copper- and

bronze metallurgy, and the sword as a weapon and symbol. These

technical innovations were part of a complicated interaction with

social and cultural processes, which in many cases are connected

in a pattern that can be followed in time and space.

Writing, Kingship, and Power in Anglo-Saxon England Rory

Naismith 2018 This book brings together new research that

represents current scholarship on the nexus between authority

and written sources from Anglo-Saxon England. Ranging from the

seventh to the eleventh century, the chapters in this volume offer

fresh approaches to a wide range of linguistic, historical, legal,

diplomatic and palaeographical evidence.

The Oxford Handbook of the European Iron Age Colin Haselgrove

2023-10-03 The Oxford Handbook of the European Iron Age

presents a broad overview of current understanding of the

archaeology of Europe from 1000 BC through to the early historic

periods, exploiting the large quantities of new evidence yielded by

the upsurge in archaeological research and excavation on this

period over the last thirty years. Three introductory chapters situate the reader in the times and the environments of Iron Age Europe. Fourteen regional chapters provide accessible syntheses of developments in different parts of the continent, from Ireland and Spain in the west to the borders with Asia in the east, from Scandinavia in the north to the Mediterranean shores in the south. Twenty-six thematic chapters examine different aspects of Iron Age archaeology in greater depth, from lifeways, economy, and complexity to identity, ritual, and expression. Among the many topics explored are agricultural systems, settlements, landscape monuments, iron smelting and forging, production of textiles, politics, demography, gender, migration, funerary practices, social and religious rituals, coinage and literacy, and art and design.

The Archaeology of Celtic Art D.W. Harding 2007-06-11 More wide ranging, both geographically and chronologically, than any previous study, this well-illustrated book offers a new definition of Celtic art. Tempering the much-adopted art-historical approach, D.W. Harding argues for a broader definition of Celtic art and views it within a much wider archaeological context. He re-asserts ancient Celtic identity after a decade of deconstruction in English-language archaeology. Harding argues that there were communities in Iron Age Europe that were identified historically as Celts, regarded themselves as Celtic, or who spoke Celtic languages, and that the art of these communities may reasonably be regarded as Celtic art. This study will be indispensable for those people wanting to take a fresh and innovative perspective on Celtic Art.

Archäologisches Korrespondenzblatt 1999

Kelten-Einfälle an der Donau Konrad Spindler 2007 The guiding principle of the Linz Celtology Meeting 2005 (Linzer Keltologentagung 2005) was that Celtology should not be considered an extension of Indo-European Studies, nor a discipline that should be classified under Prehistoric and Early History. To the greatest extent possible, research on the Celts should apply the true meanings of "integrated" and "interdisciplinary", thus encompassing the most important and the largest number of Celtic cultural manifestations possible. Not only those ethnic groups that, in ancient times, were considered Celts or belonging to the Celts should be taken into account, but also those that have been described as (Island) Celts since the

early modern period, namely those from the British Isles, Ireland and Brittany, as based on their common original language. Thus the volume deals with evidence and problems concerning archaeology, history, linguistics, literature and the history of religions, although methodological questions and more general questions of ethno-genesis, gender, the reception of the Celts, etc. are also included. In order to create an all-around picture of the Celts, forty-eight internationally known German-speaking representatives of the Celtic scientific community, from Russia to Ireland, have submitted their work. A broad picture of Celtology as based on cultural studies is thereby presented. Then again, there are also clashing and contradictory research results, revealing Celtology to be a very lively field. Thus the anthology, with its broad and solidly discussed range of topics, should speak to many interested parties. It will soon "tempt" more questions and will become an essential handbook for all those interested in research on the Celts.

The Collapse of Complex Societies Joseph Tainter 1988 Dr Tainter describes nearly two dozen cases of collapse and reviews more than 2000 years of explanations. He then develops a new and far-reaching theory.

Mimbres Mogollon Archaeology Anne I. Woosley 1995 Published here for the first time, this important work provides evidence of long occupation at Wind Mountain - an occupation that spanned the Early and Late Pit House periods at a site that evolved ultimately into a Mimbres pueblo. Woosley and McIntyre provide physical and historical context and introduce a detailed chronology for the site. Included are analyses of architectural and ceramic materials, as well as an examination of mortuary treatments of human and animal remains. Specialized studies by contributors appear as technical appendices.

Retrospektive II Manfred K. H. Eggert 2023 Die in »Retrospektive II: Archäologisch-kulturwissenschaftliche Essays 1977-2016« zusammengestellten Beiträge des Archäologen Manfred K. H.

Eggert bieten einen weiteren Einblick in vier Jahrzehnte seiner Forschungstätigkeit. In diesem Sammelband wird ein breites Spektrum von Themen zwischen Archäologie und Kulturanthropologie erörtert. Dabei spielen Grundfragen der Feldarchäologie und Quellenanalyse eine ebenso große Rolle wie die allgegenwärtige Deutung archäologischer Funde und ihrer Auffindungskontexte. Mehrere Arbeiten sind darüber hinaus erkenntnistheoretischen und fachübergreifenden Aspekten aus einer Sicht gewidmet, die die Ur- und Frühgeschichtliche Archäologie als Historische Kulturwissenschaft versteht. Auch das für historische Fächer wesentliche Konzept der Zeit wird in seinen beiden Ausprägungen von relativer und absoluter Datierung behandelt. BiographicalNote>

Iron Age Slaving and Enslavement in Northwest Europe

Karim Mata 2019-12-20 Can slaving and enslavement be seen as a significant transformative phenomena in Iron Age Europe and, if so, how would this affect the interpretation of (old and new) archaeological evidence? This exploratory study of the dynamics of Iron Age slaving and enslaving in Northwest Europe contributes to a complex but neglected topic.

History of Humanity UNESCO 1996-12-31 The second volume covers the first two and a half thousand years of recorded history, from the start of the Bronze Age 5,000 years ago to the beginnings of the Iron Age. The Ancient Celts, Second Edition Barry Cunliffe 2018-04-14 Fierce warriors and skilled craftsmen, the Celts were famous throughout the Ancient Mediterranean World. They were the archetypal barbarians from the north and were feared by both Greeks and Romans. For two and a half thousand years they have

continued to fascinate those who have come into contact with them, yet their origins have remained a mystery and even today are the subject of heated debate among historians and archaeologists. Barry Cunliffe's classic study of the ancient Celtic world was first published in 1997. Since then huge advances have taken place in our knowledge: new finds, new ways of using DNA records to understand Celtic origins, new ideas about the proto-urban nature of early chieftains' strongholds, All these developments are part of this fully updated , and completely redesigned edition. Cunliffe explores the archaeological reality of these bold warriors and skilled craftsmen of barbarian Europe who inspired fear in both the Greeks and the Romans. He investigates the texts of the classical writers and contrasts their view of the Celts with current archaeological findings. Tracing the emergence of chiefdoms and the fifth- to third-century migrations as far as Bosnia and the Czech Republic, he assesses the disparity between the traditional story and the most recent historical and archaeological evidence on the Celts. Other aspects of Celtic identity such as the cultural diversity of the tribes, their social and religious systems, art, language and law, are also examined. From the picture that emerges, we are — crucially — able to distinguish between the original Celts, and those tribes which were 'Celtized', giving us an invaluable insight into the true identity of this ancient people.

Der Mythos vom "germanischen" Königtum Stefanie Dick
2008-12-10 Die vorliegende Studie fragt nach der Entstehung des Königturns bei den germanischsprachigen Barbaren. Im Zentrum steht dabei zunächst die längst überfällige methodische Auseinandersetzung mit jener älteren Forschungsmeinung, nach der das völkerwanderungszeitliche Königturn als Heerkönigturn anzusprechen und von einem älteren, sakral fundierten Volkskönigturn zu unterscheiden ist. Ausgehend von neueren Forschungen und unter Einbeziehung archäologischer Befunde

wird anschließend eine neue Perspektive auf die Herrschaftsentwicklung innerhalb der barbarischen Gesellschaften entwickelt.

The Human Body in Early Iron Age Central Europe Katharina Rebay-Salisbury 2016-12-08 Identities and social relations are fundamental elements of societies. To approach these topics from a new and different angle, this study takes the human body as the focal point of investigation. It tracks changing identities of early Iron Age people in central Europe through body-related practices: the treatment of the body after death and human representations in art. The human remains themselves provide information on biological parameters of life, such as sex, biological age, and health status. Objects associated with the body in the grave and funerary practices give further insights on how people of the early Iron Age understood life and death, themselves, and their place in the world. Representations of the human body appear in a variety of different materials, forms, and contexts, ranging from ceramic figurines to images on bronze buckets. Rather than focussing on their narrative content, human images are here interpreted as visualising and mediating identity. The analysis of how image elements were connected reveals networks of social relations that connect central Europe to the Mediterranean. Body ideals, nudity, sex and gender, aging, and many other aspects of women's and men's lives feature in this book. Archaeological evidence for marriage and motherhood, war, and everyday life is brought together to paint a vivid picture of the past.

Societies in Transition in Early Greece Alex R. Knodell 2021-05-25

Situated at the disciplinary boundary between prehistory and history, this book presents a new synthesis of Late Bronze Age and Early Iron Age Greece, from the rise and fall of Mycenaean civilization to the emergence of city-states in the Archaic period.

These centuries saw the growth and decline of varied political systems and the development of networks across local, regional, and Mediterranean scales. As a groundbreaking study of landscape, interaction, and sociopolitical change, *Societies in Transition in Early Greece* systematically bridges the divide

between the Mycenaean period and the Archaic Greek world to shed new light on an often-overlooked period of world history.

“This book reconfigures our understanding of early Greece on a regional level, beyond Mycenaean 'palaces' and across temporal boundaries. Alex Knodell's sophisticated arguments enable a fresh reading of the emergence of early Greek polities, revealing the microregions that put to the test overarching 'Mediterranean' models. His detailed study makes a convincing return to a comparative framework, integrating a 'small world' network and its trajectory with the larger picture of ancient complex societies.”

SARAH MORRIS, Steinmetz Professor of Classical Archaeology and Material Culture, University of California, Los Angeles “A comprehensive, thoughtful treatment of the time period before the crystallization of the ancient Greek city states.”

WILLIAM A. PARKINSON, Curator and Professor, The Field Museum and University of Illinois at Chicago “An important and must-read account. The strength of this book lies in its close analysis of the important different regional characteristics and

evolutionary trajectories of Greece as it transforms into the Archaic and, later, the Classical world.” DAVID B. SMALL, author *Ancient Greece: Social Structure and Evolution*.

Ritual in Late Bronze Age Ireland Katherine Leonard 2015-12-01

This text develops a new perspective on Late Bronze Age (LBA) Ireland by identifying and analysing patterns of ritual practice in the archaeological record. The bookends of this study are the introduction of the bronze slashing sword to Ireland at around 1200 BC and the introduction and proliferation of iron technology beginning around 600 BC.

Preclassical and indigenous nonwestern military institutions and methods of warfare are the chief subjects of this annotated bibliography of works published 1967–1997. Emphasis is on historical studies of military organization and the relationships between military and other social institutions.

Celtic Culture John T. Koch 2005-12-16 This encyclopedia covers the entirety of the Celtic world, both through time and across geography. Although emphasizing the areas where Celtic languages and traditions survive into the present, the work does not slight the reaches of the Celtic empire, which was the largest language and cultural group on earth prior to the rise of Rome. In some 1,500 articles, many representing original research by the finest Celtic scholars, the work covers the Celts from prehistory to the present, giving comprehensive treatment to all topics from myth to music, religion to rulers, literature to language, government to games, and all topics in between.

The Cambridge Prehistory of the Bronze and Iron Age

Mediterranean A. Bernard Knapp 2015-01-12 The Cambridge Prehistory of the Bronze and Iron Age Mediterranean offers new insights into the material and social practices of many different Mediterranean peoples during the Bronze and Iron Ages, presenting in particular those features that both connect and distinguish them. Contributors discuss in depth a range of topics

that motivate and structure Mediterranean archaeology today, including insularity and connectivity; mobility, migration, and colonization; hybridization and cultural encounters; materiality, memory, and identity; community and household; life and death; and ritual and ideology. The volume's broad coverage of different approaches and contemporary archaeological practices will help practitioners of Mediterranean archaeology to move the subject forward in new and dynamic ways. Together, the essays in this volume shed new light on the people, ideas, and materials that make up the world of Mediterranean archaeology today, beyond the borders that separate Europe, Africa, and the Middle East.

Reimagining Regional Analyses Tina L. Thurston 2009-10-02
Reimagining Regional Analysis explores the interplay between different methodological and theoretical approaches to regional analysis in archaeology. The past decades have seen significant advances in methods and instrumental techniques, including geographic information systems, the new availability of aerial and satellite images, and greater emphasis on non-traditional data, such as pollen, soil chemistry and botanical remains. At the same time, there are new insights into human impacts on ancient environments and increased recognition of the importance of micro-scale changes in human society. These factors combine to compel a reimagining of regional archaeology. The authors in this volume focus on understanding individual trajectories and the historically contingent relationships between the social, the economic, the political and the sacred as reflected regionally. Among topics considered are the social construction of landscape; use of spatial patterning to interpret social variability; paleoenvironmental reconstruction and human impacts; and social memory and social practice. This book opens a discourse around the spatial patterning of the contingent, recursive relationships between people, their social activities and the environment.

From Chieftdom to State in Early Ireland D. Blair Gibson

2012-08-27 This book tracks the development of social complexity in Ireland from the late prehistoric period on into the Middle Ages. Using a range of methods and techniques, particularly data from settlement patterns, Blair Gibson demonstrates how Ireland evolved from constellations of chiefdoms into a political entity bearing the characteristics of a rudimentary state. This book argues that early medieval Ireland's highly complex political systems should be viewed as amalgams of chiefdoms with democratic procedures for choosing leaders rather than kingdoms. Gibson explores how these chiefdom confederacies eventually transformed into recognizable states over a period of 1,400 years.

Celtic from the West Barry W. Cunliffe 2012 This book is an exploration of the new idea that the Celtic languages originated in the Atlantic Zone during the Bronze Age, approached from various perspectives pro and con, archaeology, genetics, and philology. This Celtic Atlantic Bronze Age theory represents a major departure from the long-established, but increasingly problematical scenario in which the story of the Ancient Celtic languages and that of peoples called Keltoi Celts are closely bound up with the archaeology of the Hallstatt and La Tène cultures of Iron Age west-central Europe. The Celtic from the West proposal was first presented in Barry Cunliffe's *Facing the Ocean* (2001) and has subsequently found resonance amongst geneticists. It provoked controversy on the part of some linguists, though is significantly in accord with John Koch's findings in *Tartessian* (2009). The present collection is intended to pursue the question further in order to determine whether this earlier and more westerly starting point might now be developed as a more robust foundation for Celtic studies. As well as having this specific aim, a more general purpose of *Celtic from the West* is to bring to an English-language readership some of the rapidly unfolding and too often neglected evidence of the pre-Roman peoples and languages of the western Iberian Peninsula. Celtic

from the West is an outgrowth of a multidisciplinary conference held at the National Library of Wales in Aberystwyth in December 2008. As well as the 11 chapters, the book includes 45 distribution maps and a further 80 illustrations. The conference and collaborative volume mark the launch of a multi-year research initiative undertaken by the University of Wales Centre for Advanced Welsh and Celtic Studies [CAWCS]: Ancient Britain and the Atlantic Zone [ABrAZo].
