Japan's Colonization of Korea Alexis Dudden 2006-12-18 From its creation in the early twentieth century, policymakers used the discourse of international law to legitimate Japan's empire. Although the Japanese state aggrandizers' reliance on this discourse did not create the imperial nation Japan would become, their fluent use of its terms inscribed Japan's claims as legal practice within Japan and abroad. Focusing on Japan's annexation of Korea in 1910, Alexis Dudden gives long-needed attention to the intellectual history of the empire and brings to light presumptions of the twentieth century's so-called international system by describing its most powerful—and most often overlooked—member's engagement with that system. Early chapters describe the global atmosphere that declared Japan the legal ruler of Korea and frame the significance of the discourse of early twentieth-century international law and how its terms became Japanese. Dudden then brings together these discussions in her analysis of how Meiji leaders embedded this discourse into legal precedent for Japan, particularly in its relations with Korea. Remaining chapters explore the limits of these 'universal' ideas and consider how the international arena measured Japan's use of its terms. Dudden squares her examination of the legality of Japan's imperialist designs by discussing the place of colonial policy studies in Japan at the time, demonstrating how this new discipline further created a common sense that Japan's empire accorded to knowledgeable practice. This landmark study greatly enhances our understanding of the intellectual underpinnings of Japan's imperial aspirations. In this carefully researched and cogently argued work, Dudden makes clear that, even before Japan annexed Korea, it had embarked on a legal and often legislating mission to make its colonization legitimate in the eyes of the world.

Single-Molecule Magnets Malgorzata Holynska 2019-02-11 Concise overview of synthesis and characterization of single molecule magnets Molecular magnetism is explored as an alternative to conventional solid-state magnetism as the basis for ultrahigh-density memory materials with extremely fast processing speeds. In particular single-molecule magnets (SMM) are in the focus of current research, both because of their intrinsic magnetization properties, as well as because of their potential use in molecular spintronic devices. SMMs are fascinating objects on the example of which one can explain many concepts. Single-Molecule Magnets: Molecular Architectures and Building Blocks for Spintronics starts with a general introduction to single-molecule magnets (SMM), which helps readers to understand the evolution of the field and its future. The following chapters deal with the current synthetic methods leading to SMMs, their magnetic properties and their characterization by methods such as high-field electron paramagnetic resonance, paramagnetic nuclear magnetic resonance, and magnetic circular dichroism. The book closes with an overview of radical-bridged SMMs, which have shown application potential as building blocks for high-density memories. Covers a hot topic - single-molecule magnetism is one of the fastest growing research fields in inorganic chemistry and materials science Provides researchers and newcomers to the field with a solid foundation for their further work Single-Molecule Magnets: Molecular Architectures and Building Blocks for Spintronics will appeal to inorganic chemists, materials scientists, molecular physicists, and electronics engineers interested in the rapidly growing field of study.

Silent Stars Jeanine Basinger 2012-10-17 From one of America's most renowned film scholars: a revelatory, perceptive, and highly readable look at the greatest silent film stars -- not those few who are fully appreciated and understood, like Chaplin, Keaton, Gish, and Garbo, but those who have been misperceived, unfairly dismissed, or forgotten. Here is Valentino, "the Sheik," who was hardly the effeminate lounge lizard he's been branded as; Mary Pickford, who couldn't have been further from the adorable little creature with golden ringlets that was her film persona; Marion Davies, unfairly pilloried in Citizen Kane; the original "Phantom" and "Hunchback," Lon Chaney; the beautiful Talmadge sisters, Norma and Constance. Here are the great divas, Pola Negri and Gloria Swanson; the great flappers, Colleen Moore and Clara Bow; the great cowboys, William S. Hart and Tom Mix; and the great lover, John Gilbert. Here, too, is the quintessential slapstick comedienne, Mabel Normand, with her Keystone Kops; the quintessential all-American hero, Douglas Fairbanks; and, of course, the quintessential all-American dog, Rin-Tin-Tin. This is the first book to anatomize the major silent players, reconstruct their careers, and give us a sense of what those films, those stars, and that Hollywood were all about. An absolutely essential text for anyone seriously interested in movies, and, with more than three hundred photographs, as much a treat to look at as it is to read.

Electroanalysis in Biomedical and Pharmaceutical Sciences Sibel A. Ozkan 2015-07-08 Through this monograph, the pharmaceutical chemist gets familiar with the possibilities electroanalytical methods offer for validated analyses of drug compounds and pharmaceuticals. The presentation focuses on the techniques most frequently used in practical applications, particularly voltammetry and polarography. The authors present the information in such a way that the reader can judge whether the application of such techniques offers advantages for solving a particular analytical problem. Basics of individual electroanalytical techniques are outlined using as simple language as possible, with a minimum of mathematical apparatus. For each electroanalytical technique, the physical and chemical processes as well as the instrumentation are described. The authors also cover procedures for the identification of electroactive groups and the chemical and electrochemical processes involved. Understanding the principles of such processes is essential for finding optimum

analytical conditions in the most reliable way. Added to this is the validation of such analytical procedures. A particularly valuable feature of this book are extensive tables listing numerous validated examples of practical applications. Various Indices according to the drug type, the electroactive group and the type of method as well as a subject and author index are also provided for easy reference.

Diversity Oriented Synthesis Andrea Basso 2019-03-22 Has the concept of Diversity Oriented Synthesis remained unchanged over these two decades, or do we observe improvements or deviations from the original guidelines drawn by the pioneers? The aim of this Research Topic is to collect contributions on the state-of-the-art and progress of Diversity Oriented Synthesis, and to foresee its shape in the next decade.

Fukuzawa Yukichi's Bourgeois Liberalism Minhyuk Hwang 2020-08-14 Fukuzawa Yukichi's Bourgeois Liberalism introduces readers to the East Asian Enlightenment led by Fukuzawa Yukichi, one of the most important figures in the intellectual history of modern Japan. Despite his impact on political theory and modern Japanese history, Fukuzawa remains under-researched in Western academia, and while a few English-language books have been written about Fukuzawa, none have dealt with his political theory. This book describes Fukuzawa as a character with universal relevance and a unique view of the Enlightenment tradition. Emphasizing the power of bourgeois liberalism and the debate regarding its potential for transforming the strict class-caste society of Tokugawa Japan, Hwang discusses Fukuzawa's belief in the significance of individual autonomy, progress, and liberal rule of law in developing his project of the East Asian enlightenment, as well as his supposed "betrayal" of his early commitments due to his existential desire for Western recognition of Japan's greatness. The book ends with an analysis of the complex relation between liberalism and progress in the East Asian context.

The Star Machine Jeanine Basinger 2009-01-06 From one of our most distinguished film scholars, comes a rich, penetrating, amusing book about the golden age of movies and how the studios worked to manufacture stars. With revelatory insights and delightful asides, Jeanine Basinger shows us how the studio "star machine" worked when it worked, how it failed when it didn't, and how irrelevant it could sometimes be. She gives us case studies focusing on big stars groomed into the system: the "awesomely beautiful" (and disillusioned) Tyrone Power; the seductive, disobedient Lana Turner; and a dazzling cast of others. She anatomizes their careers, showing how their fame happened, and what happened to them as a result. Deeply engrossing, full of energy, wit, and wisdom, *The Star Machine* is destined to become a classic of the film canon.

The South Korean Film Renaissance Jinhee Choi 2011-07-21 For the past decade, the Korean film industry has enjoyed a renaissance. With innovative storytelling and visceral effects, Korean films not only have been commercially viable in the domestic and regional markets but also have appealed to cinephiles everywhere on the international festival circuit. This book provides both an industrial and an aesthetic account of how the Korean film industry managed to turn an economic crisis—triggered in part by globalizing processes in the world film industry—into a fiscal and cultural boom. Jinhee Choi examines the ways in which Korean film production companies, backed by affluent corporations and venture capitalists, concocted a variety of winning production trends. Through close analyses of key films, Choi demonstrates how contemporary Korean cinema portrays issues immediate to its own Korean audiences while incorporating the transnational aesthetics of Hollywood and other national cinemas such as Hong Kong and Japan. Appendices include data on box office rankings, numbers of films produced and released, market shares, and film festival showings.

The Abacus and the Sword Peter Duus 1995 "This is a major historical work that, in the field of Japanese imperialism, will set a standard for careful and comprehensive analysis. *The Abacus and the Sword* is the handiwork of a master historian."—Mark R. Peattie, author of *Nan'yo: The Rise and Fall of the Japanese in Micronesia, 1885-1945* "This book . . . deserves a wide readership, especially among East Asia history specialists, for it represents difficult and complex scholarship at its best. . . . It is clear from an analysis of his documentation that he put solid study into the Japan-Korea relationship problem, one of the most complex in modern East Asian history—the equivalent perhaps of the English-Irish relationship in Western History. . . . This book is . . . well worth reading, not only for East Asian specialists but for anyone fascinated by the mysteries of history." Hilary Conroy, *American Academy of Political Science*

Action Speaks Louder Eric Lichtenfeld 2007-04-27 The action movie has been the film genre that most represents Hollywood to the world, as action films find blockbuster success at box offices internationally. Studying its trends, key components, and visual excesses, this edition traces the genre's evolution to reveal how it has come to assume its place of prominence in American culture.

Hollywood Ambitions Marsha Gordon 2008 Working with a varied and untraditional cast of characters—Wyatt Earp, Jack London, Clara Bow, Gertrude Stein, and Ida Lupino—author Marsha Orgeron examines the Hollywood ambitions of a fading western legend, a successful popular author, a poor Brooklyn girl turned flapper icon, a self-proclaimed avant-garde genius, and a frustrated actress on her way to becoming a director. Investigating their separate involvements with the expanding film industry, Orgeron illustrates the implications of film celebrity during the era in which cinema's impact was first felt. The aspirations of these individuals demonstrate the unifying role that the American motion picture capital played in shaping cultural notions of reputation, success, glamour, and visibility. Through extensive and unprecedented primary research and illuminating analyses of films, texts, and personal writings, each chapter provides new insight into its subject's dealings in the mythic city. *Hollywood Ambitions* affords a unique understanding of the tremendous diversity of the Hollywood experience and its allure in the first half of the cinematic century.

Physical Evidence Kent Jones 2007-09-28 The first collection from this distinguished American movie critic An expert writer and thinker on movie history and directorial style, Kent Jones is among the most notable film critics of his generation. His sharp, informed analyses and cogent assessments of cinema and its practitioners have made him a significant voice both in America and internationally. Jones' inaugural collection brings together the best of his reviews (on films including *In the Mood for Love*, *A History of Violence*, and *The New World*), evaluations of specific filmmakers (Wes Anderson, John Cassavetes, and the Coen brothers), polemics (on summer blockbusters, digital cinema, and Hollywood politics), and appreciations of other film critics. Several of these pieces are published here in English for the first time, having previously appeared only in the French journals *Cahiers du Cinéma* and *Trafic*. *Physical Evidence* is a penetrating and personal examination of contemporary and classic cinema, one that values nothing so much as seeing on the screen the proof—the physical evidence—of the filmmaker's own personal quest.

Liang Ch'i Ch'ao and the Mind of Modern China Joseph R. Levenson 2018-12-12 The distinction between "history" and "value" is the ground of this penetrating work. Liang Ch'i-ch'ao began writing in the 1890's, as one who was straining against his tradition intellectually, seeing value elsewhere, but still emotionally tied to it, held by his history. How history contrived such a tension, how its release in Liang went together with the release of Confucian China from life, is the grand subject. And in drawing the times out of Liang's intellectual life, Mr. Levenson contributes much of more general interest—a new understanding of the concepts of anachronism, analogy, contemporaneity, the generation, historical relativism, historical context, cultural and national identity, personal identity, and the distinction (crucial to comprehension of why ideas ever change) between "thinking" and "thought." "A brilliant study of the life and work of an exceptional writer who shaped the political thought of modern China...Told with a humanist understanding far removed from the dry-as-

dust manner usually ascribed to front-rank historians...this detailed account of a maker of modern China will interest not only the scholar in Far Eastern affairs, but will hold enthralled all students of the human mind in its never-ending quest for adjustment in a world of change."—Asia Major "Why was the Confucian tradition found wanting? Why was westernization rejected? Why was Nationalism not enough for China? To these and many similar questions Liang's life and writings provide the best answer. Mr. Levenson has interpreted them with real insight into the nature of Chinese civilization."—Times Literary Supplement "Advances enough brilliant and challenging hypotheses to invigorate studies of Chinese intellectual history for a long time to come...[Levenson's study] shows throughout a compassionate understanding of the harsh dilemmas, the bitter tragedies that the last century has brought to all Chinese."—Arthur F. Wright

The Films of Samuel Fuller Lisa Dombrowski 2015-05-15 A cigar-chomping storyteller who signaled "Action!" by shooting a gun, Samuel Fuller has been lionized as one of the most distinctive writer/directors ever to emerge from Hollywood. In such films as *The Steel Helmet*, *Pickup on South Street*, *Shock Corridor*, and *The Big Red One*, Fuller gleefully challenged classical and generic norms—and often standards of good taste—in an effort to shock and arouse audiences. Tackling war, crime, race, and sexuality with a candor rare for any period, Fuller's maverick vision was tested by Hollywood's transition from the studio system to independent filmmaking. Now, in the first full account of all of the director's audaciously original work, author Lisa Dombrowski brings his career into new relief. *The Films of Samuel Fuller* features close analysis of Fuller's pictures and draws on previously untapped production and regulatory files, script notes, and interviews to explore how artistic, economic, and industrial factors impacted Fuller's career choices and shaped the expression of his personal aesthetic. Fans of Fuller and American cinema will welcome this in-depth study of a provocative director who embodied both the unique opportunities and challenges of postwar filmmaking.

A Woman's View Jeanine Basinger 2013-09-04 Now, *Voyager*, *Stella Dallas*, *Leaver Her to Heaven*, *Imitation of Life*, *Mildred Pierce*, *Gilda*...these are only a few of the hundreds of "women's films" that poured out of Hollywood during the thirties, forties, and fifties. The films were widely disparate in subject, sentiment, and technique, they nonetheless shared one dual purpose: to provide the audience (of women, primarily) with temporary liberation into a screen dream—of romance, sexuality, luxury, suffering, or even wickedness—and then send it home reminded of, reassured by, and resigned to the fact that no matter what else she might do, a woman's most important job was...to be a woman. Now, with boundless knowledge and infectious enthusiasm, Jeanine Basinger illuminates the various surprising and subversive ways in which women's films delivered their message. Basinger examines dozens of films, exploring the seemingly intractable contradictions at the convoluted heart of the woman's genre—among them, the dilemma of the strong and glamorous woman who cedes her power when she feels it threatening her personal happiness, and the self-abnegating woman whose selflessness is not always as "noble" as it appears. Basinger looks at the stars who played these women and helps us understand the qualities—the right off-screen personae, the right on-screen attitudes, the right faces—that made them personify the woman's film and equipped them to make believable drama or comedy out of the crackpot plots, the conflicting ideas, and the exaggerations of real behavior that characterize these movies. In each of the films the author discusses—whether melodrama, screwball comedy, musical, film noir, western, or biopic—a woman occupies the center of her particular universe. Her story—in its endless variations of rags to riches, boy meets girl, battle of the sexes, mother love, doomed romance—inevitably sends a highly potent mixed message: Yes, you women belong in your "proper place" (that is, content with the Big Three of the women's film world—men, marriage, and motherhood), but meanwhile, and paradoxically, see what fun, glamour, and power you can enjoy along the way. *A Woman's View* deepens our understanding of the times and circumstances and attitudes out of which these movies were created.

The Anglo-Japanese Alliance Ian Nish 2012 "In this book Professor Nish deals with one of the most important aspects of far eastern politics in the critical period between 1894 and 1907. His object is to demonstrate how Britain and Japan, at first separately and later jointly, reacted to Russian encroachments in China and east Asia; he is concerned also with the policies of the other European powers and of the U.S., to whose hostility towards the Anglo-Japanese alliance after 1905 Britain showed herself increasingly sensitive. First published in 1966, this title is part of the Bloomsbury Academic Collections series."--Bloomsbury Publishing.

New Korean Cinema Darcy Paquet 2010-04-26 *New Korean Cinema* charts the dramatic transformation of South Korea's film industry from the democratization movement of the late 1980s to the 2000s new generation of directors. The author considers such issues as government censorship, the market's embrace of Hollywood films, and the social changes which led to the diversification and surprising commercial strength of contemporary Korean films. Directors such as Hong Sang-soo, Kim Ki-duk, Park Chan-wook, and Bong Joon-ho are studied within their historical context together with a range of films including *Sopyonje* (1993), *Peppermint Candy* (1999), *Oldboy* (2003), and *The Host* (2006).

Samurai Mitsuo Kure 2014-11-25 *Samurai: An Illustrated History* brings the violent, tumultuous, and, at the same time, elegant world of the medieval Japanese samurai to life. This book of Japanese history traces the story of a unique historical phenomenon: a period of 700 years—equivalent to the entire stretch of Western history between the reigns of the Crusader king Richard the Lionhearted and of Queen Victoria at the height of the British Empire—during which an enclosed civilization was dominated by a single warrior caste. The historical narrative of samurai history is supported by explanations of samurai armor, weapons, fortifications, tactics, and customs, and illustrated with nearly 800 fascinating color photographs, maps, and sketches, including ancient scroll paintings and surviving suits of armor preserved for centuries in Japanese shrines. From the 12th to the 19th centuries the history of Japan was effectively the history of the samurai—the class of professional fighting men. At first they were no more than lowly soldiery employed by the court aristocracy of Kyoto, but the growing power of the provincial warrior clans soon enabled them to brush aside the executive power of the imperial court and to form their own parallel military government. Though individual dynasties came and went in cycles of vigor and decadence, the dominance of the samurai as a class proved uniquely resilient.

The Legend of Santa Claus Kevin Thomas 2020-11-13 *The Legend of Santa Claus* was written to help teach children about the true meaning of Christmas, which is to celebrate the birth of our Savior Jesus Christ, while also being able to celebrate the secular tradition of Santa Claus. This story teaches what Santa is really about without dampening the whole magical tradition of Christmas. It provides a method for helping children understand the difference between the reality of Jesus Christ and the legend of Santa Claus. I didn't want my own children and grandchildren to be confused by the things we say and do at Christmas time that could bring serious misunderstandings in their minds.

Reclaiming the Enlightenment Stephen Eric Bronner 2004 In 1947 Horkheimer and Adorno connected the Enlightenment with totalitarianism. Since when the Left has drifted into the language and imagery of the European Counter-Enlightenment, the movement against 1776 and 1789. Bronner sets out to reclaim the heritage of progressive politics.

Tradition, Treaties, and Trade Kirk W. Larsen 2008 Relations between the Choson and Qing states are often cited as the prime example of the operation of the "tribute system." In contrast, this work contends that the motivations, tactics, and successes (and failures) of the late Qing Empire in Choson Korea mirrored those of other nineteenth-century imperialists. Between 1850 and 1910, the Qing attempted to defend its informal empire in Korea by intervening directly, not only to preserve its geopolitical position but also to promote its commercial interests. And it utilized the technology of empire—"treaties, international law, the telegraph, steamships, and gunboats. Although the transformation of Qing-Choson diplomacy was based on modern imperialism, this work argues that it is more accurate to describe the dramatic shift in relations in terms of flexible adaptation by one of the world's major empires in response to new challenges. Moreover, the new modes of Qing imperialism were a hybrid of East Asian and Western mechanisms and institutions. Through these means, the Qing Empire played a fundamental role in Korea's integration into regional and global political and economic systems.

Cognitive and Behavioral Phenotypes Susan L. Santangelo 2015-08-14 Over the past two decades, there has been a growing interest in cognitive phenotypes. A cognitive phenotype is a discrete cognitive or behavioral feature that can be quantitatively measured, be specified with some degree of precision in terms of its neurobiology, and aid in reliable diagnosis and classification of neuropsychiatric illness or in characterization of normal neuropsychological functioning. The subprocesses of response inhibition, working memory, contingency detection, and fear conditioning, are just some of many examples of cognitive phenotypes. This book attempts to lay out an organizing structure for cognitive phenotypes before moving on to sampling various specific cognitive phenotypes. It attempts to unify definition of cognitive phenotypes and offers a reference frame for future research while highlighting this important new trajectory in cognitive neuroscience.

A Splurc in the Kisser Sam Wasson 2010-03-01 With one of the longest and most controversial careers in Hollywood history, Blake Edwards is a phoenix of movie directors, full of hubris, ambition, and raving comic chutzpah. His rambunctious filmography remains an artistic force on par with Hollywood's greatest comic directors: Lubitsch, Sturges, Wilder. Like Wilder, Edwards's propensity for hilarity is double-helixed with pain, and in films like *Breakfast at Tiffany's*, *Days of Wine and Roses*, and even *The Pink Panther*, we can hear him off-screen, laughing in the dark. And yet, despite those enormous successes, he was at one time considered a Hollywood villain. After his marriage to Julie Andrews, Edwards's *Darling Lili* nearly sunk the both of them and brought Paramount Studios to its knees. Almost overnight, Blake became an industry pariah, which ironically fortified his sense of satire, as he simultaneously fought the Hollywood tide and rode it. Employing keen visual analysis, meticulous research, and troves of interviews and production files, Sam Wasson delivers the first complete account of one of the maddest figures Hollywood has ever known.

Biosensors in Environmental Monitoring Ursula Bilitewski 2000-05-30 During recent years both research activity and the number of reports on biosensor systems applied to environmental analysis have increased significantly. Compounds present in the environment have increasingly been shown to have effects on biological systems such as cells, enzymes, binding proteins, and DNA. In order to deal with the increasing demand for information about possible pollution of the environment there is need for improvements to analytical methods. Thus, biochemistry-based analytical methods should offer the possibility of monitoring these effects. This text provides an overview of existing biosensor principles, commercially available instruments, and related biochemical assays which have been developed and applied to environmental monitoring. Providing the reader with detailed information on methodology and a description of the practical application of selected sensors, this text also includes reports on established chemical methods for comparison. This volume presents fundamental principles together with examples of applications and discussion of drawbacks, and future developments. Of interest to all in the field of environmental analysis and biosensor technology, this text provides a comprehensive treatise on the latest research and developments in the field.
