Traditional Forms and Cosmic Cycles René Guénon 2003 René Guénon (1886-1951) is undoubtedly one of the luminaries of the twentieth century, whose critique of the modern world has stood fast against the shifting sands of recent philosophies. His oeuvre of 26 volumes is providential for the modern seeker: pointing ceaselessly to the perennial wisdom found in past cultures ranging from the Shamanistic to the Indian and Chinese, the Hellenic and Judaic, the Christian and Islamic, and including also Alchemy, Hermeticism, and other esoteric currents, at the same time it directs the reader to the deepest level of religious praxis, emphasizing the need for affiliation with a revealed tradition even while acknowledging the final identity of all spiritual paths as they approach the summit of spiritual realization. *Traditional Forms and Cosmic Cycles* is a wide-ranging collection of articles that could just as well have been called *Fragments of an Unknown History*. Although they must remain fragments, as Guénon did not return to many of these themes again, it would have been regrettable to leave such fascinating articles buried in old journals, and so this posthumous collection is now offered to Anglophone readers for the first time. The book opens with the key article 'The Doctrine of Cosmic Cycles', followed by two pieces on Atlantis and Hyperborea. Two sections follow, concerned respectively with the Hebrew Tradition and the Egyptian Tradition. The former comprises five articles concerned primarily with the Kabbalah and the Science of Numbers, and the latter includes three articles on Hermes and the Hermetic Tradition. Book reviews are inserted at relevant points. To lend the collection coherence, no other spiritual Traditions are here represented. A list of the Collected Writings of René Guénon has been provided for those who wish to investigate Guénon's metaphysical expositions on such topics as Christianity, Islam, the Greco-Latin Traditions, Celtism, etc.

Architecture and Embodiment Harry Francis Mallgrave 2013-06-26 In recent years we have seen a number of dramatic discoveries within the biological and related sciences. Traditional arguments such as "nature versus nurture" are rapidly disappearing because of the realization that just as we are affecting our environments, so too do these altered environments restructure our cognitive abilities and outlooks. If the biological and technological breakthroughs are promising benefits such as extended life expectancies, these same discoveries also have the potential to improve in significant ways the quality of our built environments. This poses a compelling challenge to conventional architectural theory... This is the first book to consider these new scientific and humanistic models in architectural terms. Constructed as a series of five essays around the themes of beauty, culture, emotion, the experience of architecture, and artistic play, this book draws upon a broad range of discussions taking place in philosophy, psychology, biology, neuroscience, and anthropology, and in doing so questions what implications these discussions hold for architectural design. Drawing upon a wealth of research, Mallgrave argues that we should turn our focus away from the objectification of architecture (treating design as the creation of objects) and redirect it back to those for whom we design: the people inhabiting our built environments.

What Makes Your Brain Happy and Why You Should Do the Opposite David Disalvo 2011-11-15 This book reveals a remarkable paradox: what your brain wants is frequently not what your brain needs. In fact, much of what makes our brains "happy" leads to errors, biases, and distortions, which make getting out of our own way extremely difficult. Author David DiSalvo presents evidence from evolutionary and social psychology, cognitive science, neurology, and even marketing and economics. And he interviews many of the top thinkers in psychology and neuroscience today. From this research-based platform, DiSalvo draws out insights that we can use to identify our brains' foibles and turn our awareness into edifying action. Ultimately, he argues, the research does not serve up ready-made answers, but provides us with actionable clues for overcoming the plight of our advanced brains and, consequently, living more fulfilled lives.

Cultivating Ch'i Kaibara Ekiken 2013-04-09 Discover a different side of Japanese swordsmanship through this fascinating treatise by a samurai doctor on how to maintain a healthy mind, body, and spiritual life Samurai are best known for taking life—but here is a samurai doctor's prescription for how to preserve life, and to make yours a long and healthy one. Unlike other samurai of his time, the samurai Kaibara Ekiken (1630–1714) was concerned less with swordsmanship than with how to maintain and nurture the healthy mind and body upon which martial techniques and philosophy depended. While serving as the chief medical doctor and healer to the Kuroda clan, he came to a holistic view of how the physical, mental, and spiritual lives of his patients were connected. Drawing from his medical practice, the principles of traditional Chinese medicine, and his life experience, Ekiken created this text as a guide to sustaining health and stamina from youth to old age. Ekiken's advice regarding moderation, food and drink, sleep, sexual activity, bathing, and therapeutic practices is still amazingly intuitive and appropriate nearly three hundred years after this book was written.

The Yellow Emperor's Classic of Internal Medicine 2015-12-15 The Yellow Emperor's Classic of Internal Medicine has become a landmark in the history of Chinese civilization. Written in the form of a dialogue in which the emperor seeks information from his minister Ch'I-Po on questions of health and the art of healing, it is the oldest known document in Chinese medicine. Ilza Veith's extensive introduction and monumental translation, first published in 1949, make available the historical and philosophical foundations of traditional practices that have seen a dynamic revival in China and throughout the West. A new foreword by Linda L. Barnes places the translation in its historic contexts, underlining its significance to the Western world's understanding of Chinese medical practice.

The Doctrine of Awakening Julius Evola 2018-07-13 In a probing analysis of the oldest Buddhist texts, Julius Evola places the doctrine of liberation in its original context. The early teachings, he suggests, offer the foremost example of an active spirituality that is opposed to the more passive, modern forms of theistic religions. This sophisticated, highly readable analysis of the theory and practice of Buddhist asceticism, first published in Italian in 1943, elucidates the central truths of the eightfold path and clears away the later accretions of Buddhist doctrine. Evola describes the techniques for conscious liberation from the world of maya and for achieving the state of transcendence beyond dualistic thinking. Most surprisingly, he argues that the widespread belief in reincarnation is not an original Buddhist tenet. Evola presents actual practices of concentration and visualization, and places them in the larger metaphysical context of the Buddhist model of mind and universe. *The Doctrine of the Awakening* is a provocative study of the teachings of the Buddha by one of Europe's most stimulating thinkers.

The Superhuman Life of Gesar of Ling Alexandra David-Neel 2001-05-01 King Gesar, renowned throughout Tibet and Central Asia, represents the ideal warrior—the principle of all-victorious confidence. As the central force of sanity, he conquers all his enemies, the evil forces of the four directions, who turn people's minds away from the true teachings of Buddhism. These enemies graphically represent the different manifestations of cowardly mind. As Chögyam Trungpa explains in the Foreword: "When we talk here about conquering our enemy, it is important to understand that we are not talking about aggression. The genuine warrior does not become resentful or arrogant . . . It is absolutely necessary for the warrior to subjugate his own ambition to conquer at the same time that he is subjugating his other more obvious enemies. Thus the idea of warriorship altogether is that by facing all our enemies fearlessly, with gentleness and intelligence, we can develop ourselves thereby attaining self-realization." The legends of Gesar usually take weeks for a bard to recount. Filled with magic, adventure, and the triumphs of this great warrior-king, the stories will delight all—young and old alike.

Christianity/Islam Frithjof Schuon 2008 The work of influential, award-winning interior designer Thomas Pheasant is best described as "contemporary classical" and simply serene. Celebrated interior designer Thomas Pheasant is best known for his seamless melding of tradition and the contemporary. His spaces are fresh and of the age yet also enduringly timeless. Balancing classical elements, like recessed paneling, pilasters, crown moldings, and carved plaster garlands, Pheasant introduces modern details, sometimes including such flourishes and surprising complements as a scroll coffee table and a room screen of ribbed, translucent glass. Unafraid of combining pieces from various traditions, he achieves a sense of harmony and balance. This lavish offering of his work gives the reader a sensible, artful approach to interior design, presenting models of great aesthetic subtlety and beauty. Based in Washington, D.C., Thomas Pheasant works around the globe. Recent projects include the redesign of Blair House, the President's guest house on Pennsylvania Avenue across from the White House, and apartments in Washington, New York, Paris, and Moscow. Never a strict by-the-book traditionalist, Pheasant responds to and sees in classicism its rational order, its quietude, its serenity.
