Obsolete Objects in the Literary Imagination Francesco Orlando 2008-10-01 Translated here into English for the first time is a monumental work of literary history and criticism comparable in scope and achievement to Eric Auerbach's *Mimesis*. Italian critic Francesco Orlando explores Western literature's obsession with outmoded and nonfunctional objects (ruins, obsolete machinery, broken things, trash, etc.). Combining the insights of psychoanalysis and literary-political history, Orlando traces this obsession to a turning point in history, at the end of eighteenth-century industrialization, when the functional becomes the dominant value of Western culture. Roaming through every genre and much of the history of Western literature, the author identifies distinct categories into which obsolete images can be classified and provides myriad examples. The function of literature, he concludes, is to remind us of what we have lost and what we are losing as we rush toward the future.

Futurism Giovanni Lista 2001 "In this reference summing-up, the author reviews the different aesthetic stages of the movement, from "plastic dynamism" in the 1910s to aeropainting in the 1930s, and examines the relationship, long the object of controversy, between the movement and the Italian Fascist government."--BOOK JACKET.

History of the Italian Agricultural Landscape Emilio Sereni 2014-07-14 Emilio Sereni's classic work is now available in an English language edition. *History of the Italian Agricultural Landscape* is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and

technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. *History of the Italian Agricultural Landscape* first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

La Grande Italia Emilio Gentile 2009 *La Grande Italia* traces the history of the myth of the nation in Italy along the curve of its rise and fall throughout the twentieth century. Starting with the festivities for the fiftieth anniversary of the unification of Italy in 1911 and ending with the centennial celebrations of 1961, Emilio Gentile describes a dense sequence of events: from victorious Italian participation in World War I through the rise and triumph of Fascism to Italy's transition to a republic. Gentile's definition of "Italians" encompasses the whole range of political, cultural, and social actors: Liberals and Catholics, Monarchists and Republicans, Fascists and Socialists. *La Grande Italia* presents a sweeping study of the development of Italian national identity in all its incarnations throughout the twentieth century. This important contribution to the study of modern Italian nationalism and the ambition to achieve a "great Italy" between the unification of Italy and the advent of the Italian Republic will appeal to anyone interested in modern European history, Fascism, and nationalism. Microclimate for Cultural Heritage Dario Camuffo 2019-06-28 *Microclimate for Cultural Heritage: Measurement, Risk Assessment, Conservation, Restoration, and Maintenance of Indoor and Outdoor Monuments*, Third Edition, presents the latest on microclimates, environmental issues and the conservation of cultural heritage. It is a useful treatise on microphysics, acting as a practical handbook for conservators and specialists in physics, chemistry, architecture, engineering, geology and biology who focus on environmental issues and the conservation of works of art. It fills a gap between the application of atmospheric sciences, like the thermodynamic processes of clouds and dynamics of planetary boundary layer, and their application to a monument surface or a room within a museum. Sections covers applied theory, environmental issues and conservation, practical utilization, along with suggestions, examples, common issues and errors. Incorporates research on the effects of climate change from *Climate for Culture*, the EU funded, five-year project focusing on climate change's impact on cultural heritage preservation Covers green lighting technology, like

LED and OLED, it's impacts on indoor microclimates, preservation and color rendering Includes a case study on sea level issues and cultural heritage in Venice

Learning Democracy in School and Society: Education, Lifelong Learning, and the Politics of Citizenship Gert J.J. Biesta 2011-10-21 This book explores the relationships between education, lifelong learning and democratic citizenship. It emphasises the importance of the democratic quality of the processes and practices that make up the everyday lives of children, young people and adults for their ongoing formation as democratic citizens. The book combines theoretical and historical work with critical analysis of policies and wider developments in the field of citizenship education and civic learning. The book urges educators, educationalists, policy makers and politicians to move beyond an exclusive focus on the teaching of citizenship towards an outlook that acknowledges the ongoing processes and practices of civic learning in school and society. This is not only important in order to understand the complexities of such learning. It can also help to formulate more realistic expectations about what schools and other educational institutions can contribute to the promotion of democratic citizenship. The book is particularly suited for students, researchers and policy makers who have an interest in citizenship education, civic learning and the relationships between education, lifelong learning and democratic citizenship. Gert Biesta (www.gertbiesta.com) is Professor of Education at the School of Education, University of Stirling, UK.

Myth and Symbol in Ancient Egypt Robert Thomas Rundle Clark 1978 This classic study remains the best single introduction to the Egyptian mythological world. The Egyptians lived apart from the rest of the ancient world, and it is this isolation that makes their ideas so difficult to appreciate and interpret. Egyptian thought was presented in terms of mythology: myth was used to convey insights into the workings of nature and the ultimately indescribable realities of the soul ...

Narrative of Voyages to Explore the Shores of Africa, Arabia and Madagascar William Fritz William Owen 1833

Architourism Joan Ockman 2005 This sumptuously illustrated book looks at why the world's most interesting buildings are becoming the hottest destinations for today's travelers. In the last few decades architecture has become a major focus for travelers, rather than merely a part of a larger itinerary. Illustrated with nearly one hundred color photographs, this series of provocative essays and contributions by leading scholars, critics, architects, and artists explores the role of architecture in the contemporary tourist imagination. From Mont Saint Michel and the Taj Mahal to Bilbao's Guggenheim Museum and the Blur Building in Switzerland's Lake Neuchâtel, the authors focus on how certain iconic buildings have found their way into the cultural consciousness. At the same time they offer insights as to why other buildings, such as Minnesota's Mall of America and the faux architecture of Las Vegas, have become integral to their regions' tourist economy-and postulate how this success will influence architecture of the future. Death Comes to Pemberley P. D. James 2013-11-01 The year is 1803, and Darcy and Elizabeth have been married for six years. There are now two handsome and healthy sons in the nursery, Elizabeth's beloved sister Jane and her husband Bingley live nearby and the orderly world of Pemberley seems unassailable. But all this is threatened when, on the eve of the annual autumn ball, as the guests are preparing to retire for the night a chaise appears, rocking down the path from Pemberley's wild woodland. As it pulls up, Lydia Wickham - Elizabeth's younger, unreliable sister - stumbles out screaming that her husband has been murdered.

Acts of Discovery Matt Edgeworth 2003 In this revised thesis Matt Edgeworth views archaeological theory and practice through the eyes of an ethnographer. He examines the act of fieldwork for example as a craft that can be recorded and analysed as an ethnographer would treat his subject.

Revolt Against the Modern World Julius Evola 2018-07-13 With unflinching gaze and uncompromising intensity Julius Evola analyzes the spiritual and cultural malaise at the heart of Western civilization and all that passes for progress in the modern world. As a gadfly, Evola spares

no one and nothing in his survey of what we have lost and where we are headed. At turns prophetic and provocative, *Revolt against the Modern World* outlines a profound metaphysics of history and demonstrates how and why we have lost contact with the transcendent dimension of being. The revolt advocated by Evola does not resemble the familiar protests of either liberals or conservatives. His criticisms are not limited to exposing the mindless nature of consumerism, the march of progress, the rise of technocracy, or the dominance of unalloyed individualism, although these and other subjects come under his scrutiny. Rather, he attempts to trace in space and time the remote causes and processes that have exercised corrosive influence on what he considers to be the higher values, ideals, beliefs, and codes of conduct--the world of Tradition--that are at the foundation of Western civilization and described in the myths and sacred literature of the Indo-Europeans. Agreeing with the Hindu philosophers that history is the movement of huge cycles and that we are now in the Kali Yuga, the age of dissolution and decadence, Evola finds revolt to be the only logical response for those who oppose the materialism and ritualized meaninglessness of life in the twentieth century. Through a sweeping study of the structures, myths, beliefs, and spiritual traditions of the major Western civilizations, the author compares the characteristics of the modern world with those of traditional societies. The domains explored include politics, law, the rise and fall of empires, the history of the Church, the doctrine of the two natures, life and death, social institutions and the caste system, the limits of racial theories, capitalism and communism, relations between the sexes, and the meaning of warriorhood. At every turn Evola challenges the reader's most cherished assumptions about fundamental aspects of modern life. A controversial scholar, philosopher, and social thinker, JULIUS EVOLA (1898-1974) has only recently become known to more than a handful of English-speaking readers. An authority on the world's esoteric traditions, Evola wrote extensively on ancient civilizations and the world of Tradition in both East and West. Other books by Evola published by Inner Traditions include *Eros and the Mysteries of Love*, *The Yoga of Power*, *The Hermetic Tradition*, and *The Doctrine of Awakening*.

Architecture Versus Housing Martin Pawley 1971

Advances in Cartography J. C. Müller 1991 This volume provides an overview of existing and future research in cartography and Geographic Information Systems (GIS). Although the focus is clearly on cartographic issues, those are often related to GIS issues also, such as the storage, management and analysis of spatial data or the role of institutions in promoting or defeating new technological practices. It summarizes the joint effort of a group of international experts dealing with issues regarding the design, management, exploitation, representation and communication of spatial information. Each chapter provides a practitioner's summary which states the achievements to this date, and a projective summary which gives an outline of research in the field of cartography and GIS required in the future. There are eleven chapters, covering three main areas: 1. Design and development of geographic information, 2. Exploitation including management and standards, and 3. Applications including navigation, representation and communication. The book should be of interest to anyone involved in the production or usage of spatial information and may help to identify research priorities in Research and Development organizations relating to cartography and GIS.

The Rocket Mass Heater Builder's Guide Erica Wisner 2016-06-01 Home heating that's safe, clean, efficient, and uses 70 to 90 percent less fuel than a typical woodstove A rocket mass heater is an earthen masonry heating system which provides clean, safe and efficient warmth for your home, all while using 70-90% less fuel than a traditional woodstove. These unique and beautiful installations provide luxurious comfort year-round. In cold weather a few hours of clean, hot burning can provide 20 or more hours of steady warmth, while the unit's large thermal mass acts as a heat sink, cooling your home on sizzling summer days. Packed with hard-to-find information, *The Rocket Mass Heater Builder's Guide* includes: Comprehensive design, construction and installation instructions combined with detailed maintenance and troubleshooting advice Brick-by-brick layouts, diagrams, and architectural plans augmented with detailed parts drawings and photographs for clarity Relevant and up-to-date code information and standards to help you navigate the approval process with local building departments. Earthen masonry heating systems are well-suited for

natural and conventional builders alike. A super-efficient, wood-burning, rocket mass heater can help you dramatically reduce your energy costs while enhancing the beauty, value and comfort of your home.

Building with Earth Gernot Minke 2012-10-02 For a number of years, the healthy and environment-friendly building material earth, in common use for thousands of years, has been enjoying increasing popularity, including in industrialized nations. In hot dry and temperate climate zones, earth offers numerous advantages over other materials. Its particular texture and composition also holds great aesthetic appeal. The author's presentation reflects the rich and varied experiences gained over thirty years of building earth structures all over the world. Numerous photographs of construction sites and drawings show the concrete execution of earth architecture.

Energia Solare in Architettura E Pianificazione Urbana Norbert Kaiser 1996 Within this context a survey of important buildings and projects from recent years provides concrete examples of the use of solar energy and often reveals entirely new interpretations of it. The work of some 50 architectural practices, which includes housing, schools, offices, exhibition centres and urban plans, is represented. The survey concludes with some of the latest products and skin systems which have been produced to meet the needs of solar architecture.

Ending Terrorism in Italy Anna Cento Bull 2013-06-07 Ending Terrorism in Italy analyses processes of disengagement from terrorism, as well as the connected issues of reconciliation, truth and justice. It examines in a critical and original way how terrorism came to an end in Italy (Part I), and the legacy it has left behind (Part II). The book interrogates a wide array of published memoirs and a considerable number of new face-to-face interviews with both former terrorists and first and second generation victims In the last two decades, and especially in recent years, former extreme-right terrorists in Italy have started to talk about their past involvement in terrorist violence, including, for the first time, acts of violence which have for decades been considered taboo, that is to say, bomb attacks against innocent civilians. These narratives add to the perspectives offered by members of left-wing terrorist groups, such as the Red Brigades and Prima Linea. Surprisingly, these narratives have not been systematically examined, yet they form a unique and extremely rich source of first-hand testimony, providing invaluable insights into processes of youth radicalization and de-radicalization, the social re-integration of ex-terrorists, as well as personal and collective healing. Even less attention has been paid to the victims' narratives or stories. Indeed, the views and activities of the victims and their associations have been seriously neglected in the scholarly literature on terrorism, not just in Italy, but elsewhere in Europe. The book therefore examines the perspectives of the victims and relatives of victims of terrorism, who over the years have formed dedicated associations and campaigned relentlessly to obtain justice through the courts, with little or no support from the state and, especially in the case of the bombing massacres, with increasing awareness that the state played a role in thwarting the course of justice. Ending Terrorism in Italy will be of interest to historians, social scientists and policy makers as well as students of political violence and post-conflict resolution. .

Building with Straw Gernot Minke 2005 Economical, ecological: designing and building with straw. Building with straw bales is a technique pioneered a century ago in the state of Nebraska. In recent years there has been a renaissance in the use of straw as a building material largely in the American Southwest, but also in Canada, France, Holland, Germany, Austria and China. Straw is a renewable resource with excellent insulating properties. It is a cheap and easy-to-use option for self-builders, and even large-scale structures can be erected using timber frame-work filled with straw. This book is a practical, hands-on guide to building with straw. Fire safety, protection against moisture, damp, pests and parasites are treated in detail. Numerous on-site photos document the process of assembly and construction step by step. 30 exemplary international projects illustrate the wide spectrum of design possibilities with straw.

The Birth of Purgatory Jacques Le Goff 1986-12-15 Noting that the doctrine of Purgatory does not appear in the Latin theology of the West before the late twelfth century, the author identifies the profound social and intellectual changes which caused its widespread acceptance.

The Day After Roswell Philip Corso 2012-12-11 Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history.

Urban Memory Mark Crinson 2005 This multi-authored work considers the increasingly vital concept of urban memory, approaching the issue from different perspectives across art, culture, architecture and human consciousness, with studies on contemporary urban spaces worldwide.

Building with Straw Bales Barbara Jones 2009 Straw bale building is a radically different approach to the process of building. Like all innovative ideas, it has been pioneered by the passionate, and used experimentally by those with the vision to see its potential. It is firmly based in that sustainable, 'green building' culture that has brought to the construction industry many new and useful ideas about energy efficiency and responsibility towards the environment. As a building material, straw excels in the areas of cost-effectiveness and energy efficiency. This practical guide has been written by the most experienced straw bale builder in the UK. It gives details of all the main construction methods, and includes: * bale specifications * plans * walls and foundations * doors and windows * plastering * building regulations and planning permission * frequently asked questions * construction drawings. This fully revised and updated edition includes new construction drawings, standard details for best practice design, examples of off-the-peg drawings for small buildings such as summer-houses and studios, and designs for affordable houses. These designs meet Building Regulations Code 6 for sustainable homes, and have a carbon rating of less than zero.

Gemmotherapy, and the Scientific Foundations of a Modern Meristemotherapy Marcello Nicoletti 2020-08-27 This book reports on the current state of meristemotherapy (also called gemmotherapy or budtherapy) and its possible future directions. Meristemotherapy focuses on the growth of plants, and is based on analytical studies, pre-clinic research, clinical trials and activity tests. The book investigates the determination of preparation methods, collateral effects, posology, and administration methods.

Architecture in Britain, 1530 to 1830 John Summerson 1977 In this book Sir John Summerson charts the development of architectural theory and practice from Elizabeth I to George IV. Questions of style, technology, and the social framework of architecture are resolved as separable but always essential components of the building world. Men of genius and buildings of fame emerge: Inigo Jones, Wren, Vanbrugh, Adam, Soane; Hampton Court, St Paul's Cathedral, London squares and the terraces and crescents of Bath. Appendices deal with Scottish architecture before the union and buildings in the thirteen colonies of America. The book is a companion to Ellis Waterhouse's *Painting in Britain 1530-1830* and Margaret Whinney's *Sculpture in Britain 1530-1830*; colour plates have been added to this new edition. Book jacket.

The Hempcrete Book William Stanwix 2014-10-09 A comprehensive practical manual for

professionals and self-builders, this innovative book explains the many benefits of building with hempcrete. Hempcrete is a building material with excellent, environmentally friendly properties. It's made from lime and hemp shivs (a waste product from hemp fibre growing) and can be used for walls, floor and roof insulation. Hempcrete is breathable, absorbing and emitting moisture; this helps regulate internal humidity, avoiding trapped moisture and mould growth, and creating healthier buildings. It provides excellent acoustic and thermal insulation, and it is lightweight, which reduces construction costs. Whether you're working on a new build or are planning a renovation, The Hempcrete Book tells you everything you need to know to get started with hempcrete. It describes how to source and mix it, and provides a detailed account of construction techniques, highlighting potential pitfalls and how to avoid them. With fully illustrated design notes and examples of completed builds, this book is a powerful tool for any eco-builder.

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted text.

They are highly compatible but lack advanced formatting features.

Choosing the right Forni In Terra Cruda Manuale Pratico Illustrato Di Autocostruzione eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:
