**Invitation to Draw** Jean Van't Hul 2021-06-15 Help children draw and think more creatively by inspiring them with interesting and challenging art prompts and questions. *Invitation to Draw* offers 99 open-ended drawing prompts, each one proposing a question to investigate that encourages children to free associate and problem solve. The perforated pages make it easy to tear out prompts for on-the-go activities or allowing multiple kids to draw at the same time. A blank cake provides the chance to decorate a dream confection, an empty house inspires stories about who lives there, and a grid of triangles supplies the chance to explore abstract art. What might be hiding in that tree? What sort of robot can you design? The possibilities are endless! Drawing prompts inspire and encourage kids to think and draw differently, and sometimes more creatively, than they might when faced with a blank page. By offering constraints such as a pair of eyes or an empty car and asking a question, children begin thinking about the

possibilities and answering the question in their heads even before they put pen (or marker or crayon!) to paper. And through the act of drawing and observing the drawing unfold, the brain continues to think and problem solve, opening up all kinds of creative possibilities around that specific idea.

The Curve Of Time M. Wylie Blanchet 2016-01-27 "Time did not exist; or if it did it did not matter. Our world then was both wide and narrow—wide in the immensity of the sea and mountain; narrow in that the boat was very small, and we lived and camped, explored and swam in a little realm of our own making..." This is the fascinating true adventure story of a woman who packed her five children onto a twenty-five-foot boat and explored the coastal waters of British Columbia summer after summer in the 1920s and 1930s. Acting single-handedly as skipper, navigator, engineer and of course, mother, Muriel Wylie Blanchet saw her crew through exciting—and sometimes perilous—encounters with fog; rough seas, cougars, bears and whales, and did so with high spirits and courage. On these pages an independent woman with a deep respect for the native cultures of a region, and a refreshing wonderment about the natural world, comes to life. In *The Curve of Time*, she has left us with a sensitive and lyrically written account of their journeys and a timeless travel memoir not to be missed.

*Mega-beasts* Robert Sabuda 2007 A collection of more than 35 pop-ups showing prehistoric animals.

**Book of the Dark** Anna MILBOURNE 2018-10-30 This is a book about a child who is afraid of the dark. The book follows the little boy as he tells the reader all about the approaching darkness one evening, revealing his fear as he goes to bed, showing shapes in his bedroom that look like monsters (which change into ordinary things when he switches the light on). When the boy goes on a camping trip, he comes to realize that the dark has its place, and perhaps isn't so terrible after all. After all, it's only when it's truly dark, that you can see the stars. With a playful, clever and beautiful use of laser-cut holes, the book shows shadows getting bigger and taking over the boy's world, the dark bedroom shapes looking like monsters, and then transforming, in the turn of a page, to be just ordinary things in the boy's bedroom, and a breath-taking scene of hundreds of stars in the night sky.

**The Great Dinosaur Discoveries** Darren Naish 2009 This elegantly illustrated volume is a journey through more than two centuries of remarkable discovery. Books on dinosaurs are usually arranged by classification or epoch, but this unique work tells the story chronologically, in order of the key finds that shaped our understanding and brought these creatures to life for the public. From the fragmentary remains of giant extinct animals found in the early 1800s to the dinosaur wars in the American West to the amazing near-complete skeletons found around the world today, Darren Naish tells how these discoveries have led not only to the recognition of new species and whole new groups, but also to new theories of evolutionary history. Along the way, we encounter dinosaurs both familiar and obscure—including Tyrannosaurus rex, the giant sauropods, and most recently, the feathered dinosaurs of China. As he describes these significant finds, Naish explains in clear, accessible language, how our ideas about dinosaur appearance, biology, and behavior have developed and changed over time, and what the state of knowledge is today. - Discusses each major dinosaur group - Illuminates the human side of fossil discoveries by describing explorers, scientists, and artists - Beautifully designed pages feature extensive captions, engaging text, and sidebars throughout on select topics of interest - Almost 200 illustrations include historical and contemporary photographs, art works, drawings, and maps
