Imagining the American West through Film and Tourism Warwick Frost 2015-06-05 The West is one of the strongest and most enduring place images in the world and its myth is firmly rooted in popular culture - whether novels, film, television, music, clothing and even video games. The West combines myth and history, rugged natural scenery and wide open spaces, popular culture and promises of transformation. These imagined places draw in tourists, attracted by a cultural heritage that is part fictional and mediatised. In turn, tourism operators and destination marketing organisations refashion what they present to fit these imagined images. This book explores this imagining of a mythic West through three key themes, travel, film and frontiers to offer new insight into how the imagination of the West and popular culture has influenced the construction of tourism. In doing so, it examines the series of paradoxes that underlie the basic appeal of the West: evocative frontier, a boundary zone between civilisation and wilderness and between order and lawlessness. It draws on a range of films and literature as well as varying places from festivals to national parks to

showcase different aspects of the nexus between travel, film and frontiers in this fascinating region. Interdisciplinary in character, it includes perspectives from cultural studies, American studies, tourism and film studies. Written by leading academics, this title will be valuable reading for students, researchers and academics in the fields of cultural studies, tourism, film studies and media studies and all those interested in film tourism.

Lake Tourism C. Michael Hall 2006-05-03 Lakes are an essential element of some of the world's most popular tourism destinations. However, increased pressure from visitors and the tourism industry as well as from other, sometimes competing, land and water uses has made the sustainable development of lakes increasingly problematic. This book represents the first attempt to bring together some of the key elements of lake tourism within a single volume in order to present the urgent need for an integrated approach to lacustrine tourism systems management. The book presents comprehensive overviews of lake tourism including branding and marketing, visitor management and planning, historical and cultural dimensions, and environmental quality. The volume is international in scope with cases from Europe, North America and Oceania. The book concludes by noting that tourism needs to be established as a complimentary land and water use at a time when lakes and their watersheds are facing challenges in the form of climate and environmental change, increasing numbers of visitors as well as an overall increase in competing demands for water.

Real Tourism Claudio Minca 2012-08-06 Over the past decade, tourism studies has broken out of its traditional institutional affiliation with business and management programs to take its legitimate place as an interdisciplinary social science field of cutting edge scholarship. The field has emerged as central to ongoing debates in social theory concerning such diverse topics as postcolonialism,

mobility, and postmodernism, to name just a few. While there has been a diverse body of empirical research on this transformation the theoretical discussions in tourism studies remain largely attached to theories of modernity and Anglo-centric assumptions about tourism. There is a need for the field to come to terms theoretically with the contemporary and future realities of tourism as a truly global phenomenon. *Real Tourism* is a significant volume which sets this new theoretical agenda, engaging directly with what tourism does in practice and in place and demonstrates the need for a theoretical intervention that moves tourism scholarship beyond the province of Anglophone thinking. The volume achieves this by explicitly bridging 'western' and 'non-western' scholarship on tourism; reframing theoretical discussions around 'real practices' instead of abstract typologies; and radically delinking tourism theory from the grand narratives of modernity and assumptions about authenticity, identity, tradition, and development. The book brings together leading academics in the field and provides provocative multidisciplinary and multi-contextual reflection on the future of tourism. This original, timely and compelling volume puts forward new post modernist ideas and arguments about tourism today and in the future. It is essential reading for students, researchers and academics interested in Tourism.

Understanding and Managing Tourism Impacts Colin Michael Hall 2009 This book discusses the complexity of understanding how tourism impacts the world and how the world impacts tourism - from the global scale to the local and individual scale.

Slum Tourism Fabian Frenzel 2012 This multidisciplinary collection is unique both in its conceptual and empirical breadth.

Positive Tourism in Africa Mucha Mkono 2019-03-20 Positive Tourism in Africa provides a crucial counter-narrative to the prevailing colonial and reductionist perspective on Africa's tourism

trajectory and future. It offers a uniquely optimistic outlook for tourism in Africa whilst acknowledging the many challenges that African countries continue to grapple with. By examining broad and localized empirical studies, conceptual frameworks, culturally centered paradigms, and innovative methodological approaches for African contexts, this book showcases the many facets of tourism in Africa that illustrate hope, resilience, growth, and survival. This volume explores themes such as community-based tourism, wildlife tourism, tourism governance and leadership, crisis recovery, regional integration, the role of indigenous knowledge, event tourism and the impact of smart technologies. It acknowledges the challenges and opportunities for growth that exist in these various contexts and explores how tourism creates value for the spectrum of its participants. Including a wide selection of contributions from diverse authors, many of them African, this book offers an Afro-centric interpretation of tourism phenomena. It will be of great interest to students, researchers and academics in the field of Tourism and African Studies, as well as Development Studies and Geography.

Medical Tourism Colin Michael Hall 2013 Medical and health tourism is a significant area of growth in the export of related services. This text addresses the substantial political, philosophical and ethical issues that arise out of these transnational practices.

Overtourism and Cruise Tourism in Emerging Destinations on the Arabian Peninsula Manuela Gutberlet 2023-07-31 Cruise tourism is one of the fastest growing sectors worldwide. This book is the first of its kind to provide in-depth insights into the emergence of mega-cruise tourism in destinations on the Arabian Peninsula and its impacts on local communities, their spaces, cultures, identities and tourist experiences. It offers a micro-sociological analysis, calling for holistic, participatory, mindful approaches and to rethink current exploitative tourism planning and

development. It assumes a high political, social and economic importance within globalization. It draws on a long-term field study in an under-researched region in Asia that developed large-scale tourism recently to diversify the economy. The book provides insights on the destination development from a state of continuous growth to a sudden fall in tourism activities due to a sudden shock, caused by the global health pandemic and its resilience. It explores the sociocultural, economic and spatial challenges faced in international tourism development and its power relations analysed from different perspectives and within time. It analyses time-space compression, overtourism, urban tourism, nature-based tourism, enclavization, social capital, imaginaries, Cultural Ecosystem Services, slow tourism as well as just tourism. The book provides an innovative contribution to the planning and development of tourism destinations, communities and their spaces in which tourism operates in a fast pace. It will be of interest to academics, undergraduate and postgraduate students in the field of tourism and hospitality management, geography, sociology, anthropology, urban planning and environmental sciences. Moreover, the book will be useful for practitioners and policymakers around the globe, as well as all those interested in the fast emergence and the impacts of mega-cruise tourism.

Liminal Landscapes Hazel Andrews 2012-05-04 Ideas and concepts of liminality have long shaped debates around the uses and practices of space in constructions of identity, particularly in relation to different forms of travel such as tourism, migration and pilgrimage, and the social, cultural and experiential landscapes associated with these and other mobilities. The ritual, performative and embodied geographies of borderzones, non-places, transitional spaces, or 'spaces in-between' are often discussed in terms of the liminal, yet there have been few attempts to problematize the concept, or to rethink how ideas of the liminal might find critical resonance with contemporary

developments in the study of place, space and mobility. *Liminal Landscapes* fills this void by bringing together variety of new and emerging methodological approaches of liminality from varying disciplines to explore new theoretical perspectives on mobility, space and socio-cultural experience. By doing so, it offers new insight into contemporary questions about technology, surveillance, power, the city, and post-industrial modernity within the context of tourism and mobility. The book draws on a wide range of disciplinary approaches, including social anthropology, cultural geography, film, media and cultural studies, art and visual culture, and tourism studies. It brings together recent research from scholars with international reputations in the fields of tourism, mobility, landscape and place, alongside the work of emergent scholars who are developing new insights and perspectives in this area. This timely intervention is the first collection to offer an interdisciplinary account of the intersection between liminality and landscape in terms of space, place and identity. It therefore charts new directions in the study of liminal spaces and mobility practices and will be valuable reading for range of students, researchers and academics interested in this field.

Political Ecology of Tourism Mary Mostafanezhad 2016-01-08 Why has political ecology been assigned so little attention in tourism studies, despite its broad and critical interrogation of environment and politics? As the first full-length treatment of a political ecology of tourism, the collection addresses this lacuna and calls for the further establishment of this emerging interdisciplinary subfield. Drawing on recent trends in geography, anthropology, and environmental and tourism studies, *Political Ecology of Tourism: Communities, Power and the Environment* employs a political ecology approach to the analysis of tourism through three interrelated themes: Communities and Power, Conservation and Control, and Development and Conflict. While geographically broad in scope—with chapters that span Central and South America to Africa, and

South, Southeast, and East Asia to Europe and Greenland—the collection illustrates how tourism-related environmental challenges are shared across prodigious geographical distances, while also attending to the nuanced ways they materialize in local contexts and therefore demand the historically situated, place-based and multi-scalar approach of political ecology. This collection advances our understanding of the role of political, economic and environmental concerns in tourism practice. It offers readers a political ecology framework from which to address tourism-related issues and themes such as development, identity politics, environmental subjectivities, environmental degradation, land and resources conflict, and indigenous ecologies. Finally, the collection is bookended by a pair of essays from two of the most distinguished scholars working in the subfield: Rosaleen Duffy (foreword) and James Igoe (afterword). This collection will be valuable reading for scholars and practitioners alike who share a critical interest in the intersection of tourism, politics and the environment

Tourism and Development in Sub-Saharan Africa Marina Novelli 2015-09-16 Over the past 20 years, the perception of tourism as an effective contributor to socio-economic development in the developing world has propagated, with many viewing tourism as a provider for poverty alleviation and towards other UN Millennium Development Goals. Over the same period, readers have become familiar with the paradoxes, complexities and inequalities of tourism in relation to development, wealth creation, growth, redistribution, governance and ‘hosts-guests’ relationships. This volume further extends this critical debate with a much-needed cohesive publication on Sub-Sahara Africa (SSA). In an era of fluctuating tourist arrivals at global level, the growth of tourism in SSA requires deeper consideration in terms of its inconsistent and questionable implications at local level. Taking as a central theme the debate on whether tourism should be used in development efforts, this book

examines the way in which tourism has controversially become the way forward to development in several SSA locations and assesses bottlenecks to sustainable development as well as dilemmas and challenges faced by those SSA destinations seeking to achieve development through tourism. It offers an explicit set of chapters adopting a multi-disciplinary approach, drawing upon tourism studies, human geography, sociology, anthropology, political economy, development and environmental studies, and integrates case studies authored by local African practitioners and academics to produce a book that gave voice to local experts on local realities. Combining an overview of key theories, concepts, contemporary issues and debates as well as practical insights from a wide range of regions in SSA, this book will be a valuable resource for those investigating the role of tourism in development.

An Introduction to Visual Research Methods in Tourism Tijana Rakić 2011-07-27 "An Introduction to Visual Research Methods in Tourism", is the first book to present, discuss and promote the use of a range of visual methods, including still images (such as photographs, postcards, drawings) and moving images (such as video) within the context of tourism research. The book focuses on key issues important for students, researchers and academics actively doing visual tourism research or those who are contemplating using these methods. These range from the questions surrounding philosophical approaches, (inter)disciplinary location, range and choice of methods, implementation and data analysis techniques to provide an essential guide to using visual methods in tourism research. While recognising that visual methods are predominantly employed within qualitative research, this text will discuss various philosophical approaches and academic disciplines indicating how these influence a particular choice of visual method, mode of implementation and type of analysis. In this regard this book will incorporate perspectives from a range of disciplines including

anthropology, geography and sociology, demonstrating how these might be applied within the context of studies in tourism. The discussions surrounding these key issues are supplemented with international case studies from existing research to show how these methods are used in practice. In addition to this practical tip boxes are included to help avoid some of the pitfalls associated with visual research. This book is an essential guide for tourism students, academics and researchers embarking on research using visual methodology in this field.

The Routledge Handbook of Tourism Impacts Dogan Gursoy 2019-04-29 This handbook explores and critically examines both positive and negative impacts of tourism development focusing on the past, present and future issues, challenges and trends from a multidisciplinary global perspective. Through a comparative approach involving international case studies, this book explores our understanding of tourism impacts and contributes to the theoretical development on relationships between tourism impacts and community support for tourism development. This handbook focuses on a variety of geographical locations, drawing from the knowledge and expertise of highly regarded academics from around the world. Specifically, it explores the adoption and implementation of various tourism development and impact management approaches in a wide range of global contexts, while identifying their trends, issues and challenges. It addresses strategies relating to innovation, sustainability and social responsibility, and critically reviews the economic, sociocultural, environmental, political and technological impacts of tourism. The text also identifies future trends and issues, as well as exploring the methods used to study tourism impacts. Conveying the latest thinking and research, this handbook will be a key reference for students, researchers and academics of tourism, as well as development studies, geography, cultural studies, sustainability and business, encouraging dialogue across disciplinary boundaries and areas of study.

Scientific Tourism Susan Slocum 2015-05-15 As researchers in emerging economies, scientists are often the first foreign visitors to stay in remote rural areas and, on occasion, form joint venture ecotourism and community tourism projects or poverty alleviation schemes between local agencies or NGOs, the local community, and their home institution or agency. They therefore can contribute to avenues for the conservation of natural resources and the development of rural communities as well as influencing the future tourism development through its perceived legitimacy and the destination image it promotes. This book for the first time critically reviews tourism debates surrounding this emerging market of scientific and research oriented tourism. It is divided into three inter-related sections. Section 1 sets the stage of the discourse of scientific research in tourism; Section 2 evaluates the key players of scientific tourism looking particularly at the roles of NGOs, government agencies and university academic staff and Section 3 contains case studies documenting the niche of researchers as travelers in a range of geographical locations including Tanzania, Australia, Chile, Peru and Mexico. The title's multidisciplinary approach provides an informed, interesting and stimulating addition to the existing limited literature and raises many issues and associated questions including the role of science tourism in tourism development and expansion, the impacts of scientific and research-based tourism, travel behaviors and motivations of researchers to name but a few. This significant volume will provide the reader with a better understanding of scientists as travelers, their relationship to the tourism industry, and the role they play in community development around tourism sites. It will be valuable reading for students and academics across the fields of Tourism, Geography and Development Studies as well as other social science disciplines.

Tourism and Leisure Mobilities Jillian Rickly 2016-07-15 This book reframes tourism, as well as

leisure, within mobilities studies to challenge the limitations that dichotomous understandings of home/away, work/leisure, and host/guest bring. A mobilities approach to tourism and leisure encourages us to think beyond the mobilities of tourists to ways in which tourism and leisure experiences bring other mobilities into sync, or disorder, and as a result re-conceptualizes social theory. The proposed anthology stretches across academic disciplines and fields of study to illustrate the advantages of multi-disciplinary conversation and, in so doing, it challenges how we approach studies of movement-based phenomena and the concept of scale. Part One examines the ways in which mobility informs and is informed by leisure, from everyday practices to leisure-inspired mobile lifestyles. Part Two investigates individuals and communities that become entrepreneurial in the face of changing tourism contexts and reflects on the performance of work through multiple mobilities. Part Three turns to issues of development, with attention to the cultural politics that frame development encounters in the context of tourism. The varied ways that people move into and out of development projects is mediated by geopolitical discourses that can both challenge and perpetuate geographic imaginations of tourism destinations.

Managing and Interpreting D-Day's Sites of Memory Geoffrey Bird 2016-03-02 More than seventy years following the D-Day Landings of 6 June 1944, Normandy's war heritage continues to intrigue visitors and researchers. Receiving well over two million visitors a year, the Normandy landscape of war is among the most visited cultural sites in France. This book explores the significant role that heritage and tourism play in the present day with regard to educating the public as well as commemorating those who fought. The book examines the perspectives, experiences and insights of those who work in the field of war heritage in the region of Normandy where the D-Day landings and the Battle of Normandy occurred. In this volume practitioner authors represent a range of

interrelated roles and responsibilities. These perspectives include national and regional governments and coordinating agencies involved in policy, planning and implementation; war cemetery commissions; managers who oversee particular museums and sites; and individual battlefield tour guides whose vocation is to research and interpret sites of memory. Often interviewed as key informants for scholarly articles, the day-to-day observations, experiences and management decisions of these guardians of remembrance provide valuable insight into a range of issues and approaches that inform the meaning of tourism, remembrance and war heritage as well as implications for the management of war sites elsewhere. Complementing the Normandy practitioner offerings, more scholarly investigations provide an opportunity to compare and debate what is happening in the management and interpretation at other World War II related sites of war memory, such as at Pearl Harbor, Okinawa and Portsmouth, UK. This innovative volume will be of interest to those interested in remembrance tourism, war heritage, dark tourism, battlefield tourism, commemoration, D-Day and World War II.

Volunteer Tourism Jim Butcher 2015-06-05 Just a generation ago the notion that holidays should be invested with ethical and political significance would have sounded odd. Today it is part of the lifestyle political landscape. Volunteer tourism is indicative of the growth of lifestyle strategies intended to exhibit care and responsibility towards others less fortunate, strategies aligned closely with developing one's ethical identity and sense of global responsibility. It sits alongside telethons, pay-per-click, Fair Trade and ethical consumption generally as a way to "make a difference". Volunteer tourism involves a personal mission to address the political question of development. It draws upon the private virtues of care and responsibility and disavows political narratives beyond this. Critics argue that this leaves the volunteers as unwitting carriers of damaging neoliberal or

postcolonial assumptions, whilst advocates see it as offering creative and practical ways to build a new ethical politics. By contrast, this volume analyses volunteer tourism as indicative of a retreat from public politics into the realm of private experience, and as an expression of diminished political and moral agency. This thought provoking book draws on development, political and sociological theory and is essential reading for students, researchers and academics interested in the phenomenon of volunteer tourism and the politics of lifestyle that it represents.

Contested Spatialities, Lifestyle Migration and Residential Tourism Michael Janoschka 2013-08-22

Lifestyle Migration and Residential Tourism represent a major trend in individualized societies worldwide, which is attracting a rapidly growing interest from the academic community. This volume for the first time, critically analyses the spatial, social and political consequences of such leisure-oriented mobilities and migrations. The book approaches the topic from a multidisciplinary and international perspective, unifying different branches of research, such as lifestyle migration, amenity migration, retirement migration, and second home tourism. By covering a variety of regions and landscapes such as mountain and coastal areas, rural and inland communities this volume productively engages with the formal and analytical variations of the phenomenon resulting in an enriching debate at the intersection of different areas of research. Amongst others, topics like political contest and civic participation of lifestyle migrants, their impacts on local communities, social tensions and inequalities induced by the phenomenon, as well as modes of transnational living, home and belonging will be thoroughly explored. This thought provoking volume will provide deep analytical and conceptual insights into the contested geographies of lifestyle migration and further knowledge into the spatial, social and political consequences of leisure-oriented mobilities. It will be valuable reading for students, researchers and academics from a plethora of academic

disciplines.

Tourism and Archaeology Cameron Walker 2016-09-16 The global popularity and lucrative potential of tourism has made sustainability a major concern for archaeologists, site managers, politicians, local communities, tourism officials, and other stakeholders. This book establishes new, interdisciplinary ground for tourism and archaeology that will foster a new generation of sustainable thinking and practice. First, three teams of co-authors from both disciplines tackle key conceptual dilemmas: exploration vs. exploitation, education vs. entertainment, and cultural sensitivity vs. embeddedness. Then, international case studies examine site development, marketing, community relations, and other on-the-ground examples of heritage work. The volume launches an important new era of collaboration in this growing field.

Ethnotourismus in der Kalahari Jennifer Scheffler 2016 Kultureller Tourismus zu indigenen Gruppen hat sich neben Natur- und Safaritourismus als ein wichtiger Bestandteil der Reisebranche im südlichen Afrika etabliert. Dieses Buch bietet einen Überblick über die aktuelle Situation des Phänomens Ethnotourismus zu sansprachigen Gruppen in der Region, beschreibt und vergleicht deren Angebote und Strukturen. Dabei wird auch auf die Tourismus- und der Minderheitenpolitiken der einzelnen Länder Bezug genommen. Anhand eines Fallbeispiels in Botswana werden die Praktiken vor Ort analysiert und diese mit dem Bild der "Buschmänner", das in tourismusspezifischen Medien diskursiv erzeugt wird, in Verbindung gebracht.

Tourism and the Anthropocene Martin Gren 2015-11-06 This book brings the field of tourism into dialogue with what is captured under the varied notions of the Anthropocene. It explores issues and challenges which the Anthropocene may pose for tourism, and it offers significant insights into how it might reframe conceptual and empirical undertakings in tourism research. Furthermore, through

the lens of the Anthropocene this book also spurs thinking of the role of tourism in relation to sustainable development, planetary boundaries, ethics (and what is framed as geo-ethics) and refocused tourism theory to make sense of tourism's earthly entanglements and thinking tourism beyond Nature-Society. The multidisciplinary nature of the material will appeal to a broad academic audience, such as those working in tourism, geography, anthropology and sociology.

The Practice of Sustainable Tourism Michael Hughes 2015-06-19 Sustainable tourism is a widely used term that has accumulated considerable attention from researchers and policy makers over the past two decades. However, there is still an apparently wide gap between theory and practice in the area. Recent scholarly research has tended to focus on niche areas of alternative tourism rather than address the broader issues and vagaries and paradoxes that appear to plague the broader notion of sustainable tourism. As such, there is a need for a new and pragmatic analysis of sustainable tourism as an overarching idea and how this manifests in practice. The Practice of Sustainable Tourism fulfils this need by offering a fresh perspective on sustainable tourism as an umbrella concept with inherent tensions. It presents a way of thinking about tourism based on the notion of finding common ground using the dialectic tradition of philosophy. Dialectics focusses on resolving opposing viewpoints by recognising they have common elements that can be combined into a rational and practical solution over time. As part of this approach, the book examines the strongly apparent tensions within alternative tourism as well as the paradox of continuing growth and other mass tourism related issues. It is divided into three parts, Part I includes chapters discussing the general concept of sustainable tourism, its history, current status and possible futures; Part II includes a range of destination case studies exploring how sustainable tourism has been applied and Part III includes perspectives from the tourism operator view. Given the international content and

challenging themes, the book will be appealing internationally to students, researchers and academics in the fields of tourism, geography, sustainability and social science.

Tourism, Religion and Pilgrimage in Jerusalem Kobi Cohen-Hattab 2014-08-07 Jerusalem is a city with a singular nature. Home to three religions, it contains spiritual meaning for people the world over; it is at once a tourist destination and a location with a complex political reality. Tourism, therefore, is an integral part of Jerusalem's development and its political conflicts. The book traces tourism and pilgrimage to Jerusalem from the late Ottoman era, through the British Mandate, during the period of the divided city, and to the reunification of the city under Israeli rule. Throughout, the city's evolution is shown to be intertwined with its tourist industry, as tourist sites, accommodations, infrastructure, and services transform the city's structures and open spaces. At the same time, tourism is wielded by various parties in an effort to gain political recognition, to bolster territorial control, or to garner support. The city's future and the role tourism can play in it are examined. While the construction of a "security fence" will have many implications on Jerusalem's tourist industry, steps are proposed to minimize the effects of the security fence and optimize tourism. Written by leading academics, this title will be valuable reading for students, academics, and researchers in the fields of tourism, religious studies, geography, history, cultural studies, and anthropology.

Trust, Tourism Development and Planning Robin Nunkoo 2014-08-07 The dynamics of trust and distrust are central to understanding modern society, social relations, and development processes. However, numerous studies suggest that societal trust and citizen's trust in government and its institutions are on the decline, challenging the legitimacy of government and leading to an undemocratic and unsustainable form of development. Recognizing its importance, the authors for

the first time situate trust within the context of tourism development and planning. This volume discusses trust in tourism from different yet intrinsically connected perspectives. Chapters review how diminishing societal trust may have adversely affected tourism planning systems, the role of trust in good tourism governance and sustainable tourism, how trust can be used as a facilitator of participatory tourism planning, political trust in tourism institutions, power and how tourism development can be a basis for trust creation among society members by using social capital theory. In addition, a final section on 'Researching Trust in Tourism Development' means that readers are not only provided a thorough theoretical framework on trust and an understanding of its importance for sustainable tourism and good governance of the sector, but also methodological aspects of research on trust in the context of tourism development and planning. This significant volume is valuable reading for students, academics and researchers interested in tourism development and planning.

Tourism Geography Stephen Williams 2014-09-16 *Tourism Geography* develops a critical understanding of how different geographies of tourism are created and maintained. Drawing on both historical and contemporary perspectives, the discussion connects tourism to key geographical concepts relating to globalization, mobility, new geographies of production and consumption, and post-industrial change. The new edition has been fully updated to have an international focus, with global case studies and broader based content.

Tourism in Pacific Islands Stephen Pratt 2015-02-20 Pacific Island Countries have been shown to be especially vulnerable to such external influences as natural disasters, political unrest and downturns in the global economy and their tourism industries have been notably affected. In particular, they typically have a narrow resource base and a fragile and often vulnerable natural

environment. While there is some research on islands and small states, there is a dearth of information on the South Pacific and very little research is being undertaken in the region compared to other geographical regions in the world. This volume brings together current work in Pacific Island tourism. In this collection, three main themes arise: Images of the South Pacific; Socio-economic Impacts of Tourism; and Pacific Island Countries and the Outside World. The first focus is on the question of image, namely, stereotypes of a destination held by tourists and potential tourists, the extent to which residents, for their part, really welcome visitors, and the role tourism might play in changing pre-established images. The second theme is tourism's impacts, notably the economic and socio-cultural effects of international tourism's intrusion in the region which, though often hotly debated, have attracted relatively little empirical research. The third focus is on the challenges of how PICs articulate with their external geo-political and physical environment. These involve existing relations with formal colonial centres, geographical isolation, the need for greater air access to the outside world and for more tourists, and the continuing threat to several PICs of global warming, which increased air travel will inevitably exacerbate. This text will be of interest to tourism students, researchers and academics in the fields of tourism, development studies and cultural studies.

Understanding and Governing Sustainable Tourism Mobility Scott A. Cohen 2014-03-26 Despite a growing contribution to climate change, tourist and traveller behaviour is currently not acknowledged as an important sector within the development of climate policy. Whilst tourists may be increasingly aware of potential impacts on climate change there is evidence that most are unwilling to modify their actual behaviours. Influencing individual behaviour in tourism and

informing effective governance is therefore an essential part of climate change mitigation. This significant volume is the first to explore the psychological and social factors that may contribute to and inhibit sustainable change in the context of tourist and traveller behaviour. It draws on a range of disciplines to offer a critical review of the psychological understandings and behavioural aspects of climate change and tourism mobilities, in addition to governance and policies based upon psychological, behavioural and social mechanisms. It therefore provides a more informed understanding of how technology, infrastructure and cost distribution can be developed in order to reach stronger mitigation goals whilst ensuring that resistance from consumers for socio-psychological reasons are minimized. Written by leading academics from a range of disciplinary backgrounds and regions this ground breaking volume is essential reading for all those interested in the effective governance of tourism's contribution to climate change now and in the future.

Tourism and Crisis Gustav Visser 2013 This book analyses the relationship between tourism and crises ranging from dramatic acts of terror to natural disasters, as well as the most significant economic recession since the late 1920s. The volume focuses on the roles and potential of tourism for development and relations between tourism, environment and broad global process of change at different levels of analysis, highlighting different types of "crisis". In particular it questions the general conviction that tourism-led development is a sustainable and necessarily solid platform from which to develop local, national and regional economies from a range of perspectives.

Dark Tourism and Place Identity Leanne White 2013 This timely book is the first to explore the physical and intangible legacies of historic and contemporary dark tourism sites, and the contribution such sites make to place identity. It achieves this by critically reviewing the marketing, management and interpretation of contemporary and historic sites associated with death, disaster, atrocity and related events from a wide range of geographical locations. In doing so the book proposes a compose model for discussing place identity and dark tourism which will provide further understanding about these increasingly popular destinations.

Resilient Destinations and Tourism Jarkko Saarinen 2018-12-21 Sustainability is one of the most important issues currently facing the tourism sector. Recently, the role of resilience thinking has been highlighted in sustainable development discussions as an alternative perspective. This book approaches these concepts as interwoven processes and looks at change through a socioecological lens. Instead of seeing resilience and sustainability as alternative approaches, *Resilient Destinations and Tourism* argues that resilience should be understood as a fundamental part of sustainable tourism thinking for destination systems, and calls for better governance in implementation and management. Improving governance is the key issue in sustainable tourism development. The chapters in this edited collection focus on resilient destinations from a governance perspective, in which tourism resilience is contextualized as an integral part of pathway creation in the process of moving towards sustainable tourism. The contributions to the book represent a range of theoretical and empirical approaches with a wide international scope. *Resilient Destinations and Tourism* calls for rethinking the meaning of sustainable development in tourism and looks at how sustainability and resilience could be integrated. This book will appeal to a wide range of research disciplines and students whose modules focus on the relationship between tourism and sustainability planning, governance, the environment, and hazards and disasters.

The Politics and Power of Tourism in Palestine Rami K. Isaac 2015-12-14 Tourism in Palestine has been receiving an increasingly important profile given its economic and religious importance and the significant role it plays in Israeli-Palestinian relations, representation of Palestinian statehood and identity, and wider Middle Eastern politics. Nevertheless, Palestine, like much of the Middle East as a whole, remains extremely underrepresented in tourism literature. This title aims to fill this void by being the first book dedicated to exploring the significance of tourism in relationship

to Palestine. The book examines the role of tourism in Palestine at three main levels. First, it provides an overview of destination management and marketing issues for the tourism industry in Palestine and addresses not only the visitor markets and the economic significance of tourism but also the realities of the difficulties of destination management, marketing and promotion of the Palestinian state. Second, it provides a series chapters and case studies that interrogate not only the various forms of tourism in Palestine but also its economic, social, environmental and spiritual importance. This section also conveys a dimension to tourism in Palestine that is not usually appreciated in the Western mainstream media. The third section indicates the way in which tourism in Palestine highlights broader questions and debates in tourism studies and the way in which travel in the region is framed in wider discourses. A significant dimension of the book is the attention it gives to the different voices of stakeholders in Palestinian tourism at varying levels of scale. This timely volume will offer the reader significant insight into the challenges and issues of tourism in this area now and in the future. It will benefit those interested in tourism, Middle East studies, politics, economics, development studies and geography.

Sexuality, Women, and Tourism Susan Frohlick 2013 This book is the first to focus on why and how foreign Western women engage in cross-border sexual and intimate relations as tourists travelling, or temporarily dwelling, in a Central American country. The book combines descriptions of women's travels and sexual relations across racial and class boundaries with feminism, postcolonial theory, and poststructuralist theories of gender and sexuality, to show how tourism as a wide range and set of desires serves as a central shaping force in the formation of women's sexual subjectivities in contemporary life in postindustrial capitalism. In doing so it offers new insights into how tourist women express heterosexuality shaped by gender, race, class, and identities.

Social Memory and Heritage Tourism Methodologies Stephen P. Hanna 2015-02-11 The examination of social memory and heritage tourism has grown considerably over the past few decades as scholars have critically re-examined the relationships between past memories and present actions at international, national, and local scales. Methodological innovation and reflection have accompanied theoretical advances as researchers strive to understand representations, experiences, thoughts, emotions and identities of the various actors involved in the reproduction of social memory and heritage landscapes. *Social Memory and Heritage Tourism Methodologies* describes and demonstrates innovations - including qualitative, quantitative, and mixed method approaches - for analysing the process and politics of remembering and touring the past through place. An introductory chapter looks at the history of social memory and heritage tourism research and the particular challenges posed by these fields of study. In subsequent chapters, the reader is lead through the varying methodologies employed by presenting them in the context of an in-depth case study from range of geographical locations. The resulting volume showcases innovative research in social memory and heritage tourism and provides the reader with insights into how they can successfully conduct their own research while avoiding common pitfalls. This title will be useful reading for scholars, professionals and students in tourism, geography, anthropology and museum studies who are preparing to conduct research on the reproduction of social memory in particular landscapes and places or are interested in investigating heritage tourism practices and representations.

Contemporary Issues in Cultural Heritage Tourism Jamie Kaminski 2013-12-13 The perceived quality of a destination's cultural offering has long been a significant factor in determining tourist choices of destination. More recently, the need to present touristic offerings that include cultural experiences

and heritage has become widely recognised, that this aspect of the tourism experience is an important differentiator of destinations, as well as being amongst the most manageable. This has also led to an increase in the management of such experiences through special exhibitions, events and festivals, as well as through ensuring more routine and controlled access to heritage sites. Reflecting the increasing application of cultural heritage as a driver for tourism and development, this book provides for the first time a cohesive volume on the subject that is theoretically rich, practically applied and empirically grounded. Written by expert scholars and practitioners in the field, the book covers a broad range of theoretical perspectives of cultural heritage tourism; regeneration, policy, stakeholders, marketing, socio-economic development, impacts, sustainability, volunteering and ICT. It takes a broad view, integrating international examples of sites, monuments as well as intangible cultural heritage, motor vehicle heritage events and modern art museums. This significant book furthers knowledge of the theory and application of tourism within the context of cultural heritage and will be of interest to students, researchers and practitioners in a range of disciplines.

Ecotourism as a Tool for Sustainable Rural Community Development and Natural Resources Management in the Tonle Sap Biosphere Reserve Neth Baromey 2008

The Routledge Handbook of Tourism and Sustainability C. Michael Hall 2015-02-11 Routledge Handbook of Tourism and Sustainability from C. Michael Hall, Stefan Gössling, Daniel Scott is one of the winners of the ITB BookAwards 2016 in the category Specialist tourism literature! Sustainability remains one of the major issues in tourism today. Concerns over climate and environmental change, the fallout from the global economic and financial crisis, and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to

tourism, however they be defined. Given the centrality of sustainability in tourism curricula, policies, research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability. This timely Handbook of Tourism and Sustainability is developed from specifically commissioned original contributions from recognised authors in the field, providing a systematic guide to the current state of knowledge on this area. It is interdisciplinary in coverage and international in scope through its authorship and content. The volume commences with an assessment of tourism's global environmental, e.g. climate, emissions, energy use, biodiversity, water use, land use, and socio-economic effects, e.g. economic impacts, employment and livelihoods, culture. This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability, management tools and approaches, and the approaches used in different tourism and travel industry sectors. The book concludes by examining emerging and future concerns in tourism and sustainability such as peak-oil, post-carbon tourism, green economy and transition tourism. This is essential reading for students, researchers and academics interested in the possibilities of sustainable forms of tourism and tourism's contribution to sustainable development. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability of tourism will be measured for years to come.

Medical Tourism C. Michael Hall 2012-08-21 Medical and health tourism is a significant area of growth in the export of medical, health and tourism services. Although spas and improved well-being have long been part of the tourist experience, health tourism now includes travel for medical purposes ranging from cosmetic and dental surgery through to transplants and infertility treatment. Many countries including China, Cuba, Hungary, India, Thailand, Malaysia and Singapore actively

promote and compete for the medical tourist dollar, while many developed countries also provide niche private services. However, the field of medical tourism is increasingly being subject to scrutiny and debate, particularly as a result of concerns over regulatory, ethical and wider health issues. Drawing on a range of theoretical and methodological perspectives, this book is one of the first to critically address the substantial political, philosophical and ethical issues that arise out of the transnational practices of medical tourism. Through a series of chapters the book engages with key issues such as the role of regulatory and policy structures in influencing medical and health tourism related mobilities. These issues are investigated by considering range of developing and developed countries, medical systems and health economic perspectives. The book adopts a multi-layered perspective to not only investigate the business and marketing practices of medical and health tourism but places these within a broader framework of contemporary globalisation, policy and practice. By doing so it opens up debate of the ethical space in which medical and health tourism operates as well as reinforce the wide ranging perspectives that exist on the subject in both the public and academic imagination. This significant contribution will be of interest to students, academics in tourism and medical policy, trade and economic development fields.

Destination Resilience Elisa Innerhofer 2018-01-17 This book calls for rethinking the meaning of sustainable development in tourism and explores how sustainability and resilience could be integrated. It argues that these concepts should be seen as interwoven processes, rather than alternative approaches. Resilience should be understood as a fundamental part of sustainable tourism thinking for destination systems. This can be achieved by calling for better governance in implementation and management. With insights from leading experts, chapters focus on resilient destinations from this governance perspective, in which tourism resilience is contextualized as an

integral part of pathway creation in the process of moving towards sustainable tourism. The chapters represent a range of theoretical and empirical approaches with a wide international scope to demonstrate how governance is the key issue in sustainable tourism development. This book will appeal to a wide range of research disciplines and students whose modules focus on the relationship between tourism with respect to sustainability planning, governance, environment, and hazards and disasters.
