"From the smallest genome to the loftiest vision, man's totality is an unsurpassed vessel of potential. One of the reasons being the ability to transcend immediate communication. In every use of communication by proxy lies individual will ingrained. Love charms and jewellery, cave paintings and sympathetic tribal hopes, Luther's German translation of the Bible as an act of monocultural defiance, fairytales as moral education, Picasso's "Guernica" as an act of war against war itself... This desire to formulate emotion and will through generalised expressions, along with the capacity for suicide, may be the most fundamentally human trait. If we, for some reason, are incapable of expressing ourselves, we actively seek out resonance with those who are capable. Their works arouse the spirit of Gemeinschaft, of being a part of the human community rather than a single solitaire grain of sand in a scorchingly hot desert."- Carl Abrahamsson, from the chapter "Someone is messing with the Big Picture."

The Evolutionary Mind Rupert Sheldrake 1998 Stimulating and often startling discussions between three friends, all highly original thinkers: Rupert Sheldrake, controversial biologist, Terence McKenna, psychedelic visionary, and Ralph Abraham, chaos mathematician. Their passion is to break out of paradigms that retard our evolution and to explore new possibilities. Through challenge and synergy they venture where few have gone before, leading their readers on an exciting journey of discovery. Their discussions focus on the evolution of the mind, the role of psychedelics, skepticism, the psychic powers of animals, the structure of time, the life of the heavens, the nature of God, and transformations of consciousness. "Three fine thinkers take us plunging into the universe of chaos, mind, and spirit. Instead of leaving us lost, they bring us back with startling insights and more wonder than we knew we had." -Matthew Fox, "Original Blessing and Sheer Joy" "A jam-session of the mind, an intellectual movable feast, an on-going conversation that began over twenty years ago and remains as lively and relevant today as it ever was. Sadly, Terence had to leave the conversation a little earlier than planned. But the appearance of this book of trialogues at this critical, historical juncture is a reaffirmation of the potency of the optimistic vision that the trialogues express." -Dennis McKenna, brother of the late Terence McKenna Rupert Sheldrake is a biologist and author of many books including "The Sense of Being Stared At, And Other Aspects of the Extended Mind." Ralph Abraham is a mathematician, one of the pioneers of chaos theory and the author of several books including "Chaos, Gaia, Eros: A Chaos Pioneer Uncovers the Three Great Streams

of History." The late Terence McKenna was a scholar of shamanism, ethno-botanist, psychedelic researcher and author of many books including "Food of the Gods and True Hallucinations."

How to Change Your Mind Michael Pollan 2018-05-15 "Pollan keeps you turning the pages . . . cleareyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

Homo Monkey & Cyborg Jorg Horst Otto Thimoreit 2020-12-24 My books are about one thing and that is the mind. 1. Where did our mind come from in a natural point of facts. 2. What did our mind do during its historical, cultural existence for the past 100.000 years. 3. Who owns and who controls our mind. We don't actually control our mind and makes Free Will an ambition and not a fact. The Centers of Power control our mind for the last 5.000 years, we have made simulations about believing in a god and call it religion. We have made simulations about society in believing in governments, laws and politician and call it statism. 4. In my books I explore solutions to live as a free individual and that is only possible if we all live in a free world, without the political, financial and religious oppressors I call the Centers of Power. How can this work out for me, if I am in love with mental slavery, how do I unslave? Am I a monkey with an Ego or am I a cosmic, archaic mind? Being involved in natural philosophy to answer questions on where I come from, who I am, where I am going and to stand up for it, challenge authority, lead me into prison for over 10 years. How I became the enemy of the German state, a danger to its citizens and to my five children, will be covered in my two books. People that are dangerous to the system are tending to be removed. I look at the Centers of Power, its origin and the way it divides the people in order to enslave them and it makes me think is it monkeys running society? So how do we unite and make love win - to change the system and push for peace? We are now living in historical times and, like it or not, the choices that we will make over the next few years will have profound implications to the future of the entire human race. Corona-Plandemic: Whether or not to wear the mask. Whether or not to take the vaccine. Whether or not to get the health app. Whether or not to fill out the digital visitor card. Whether or not to take the digital money chip. In any case the attempt by the Centers of Power to reset global society leads eventually to a global awakening of the truth. My journey is to go back to the foundations to get things right. To discover truth, the cosmos has to be first debugged and to make a model of the cosmos. Typically large groups of intellect don't get it right, because they are consensus orientated, like in politics. It is not truth orientated, in the past we have only found this by the outsiders; there we find intellectual progress. The

other reason why it is so hard to find objective truth is that our brain is operating just like a computer on bio-chemical algorithms by electricity and hormones running the hardware to simulate software. When we experience pleasure or pain, when we see, hear, smell the outside world it is always an interpretation, a simulation, but never the actual objective truth or the reality of the outside world. The cosmos can be computed by us in a simulation (Matrix) and so can our society be computed, but so far no human has understood the underlying structures of that Matrix. A society like ours to discuss truth can be a very dangerous place, if you question authority. I found it hard to fit in the academic system as a scientific philosopher, so I started the path of knowledge without the academic prison and in order to finance this I started my own companies in the USA, Germany and the Netherlands; where I eventually ended up in a German prison. That happened primarily because I used psychedelic (magic) mushrooms to detach me from the general agendas of a slave in society. I present the theory that we are not living in a mechanical cosmos and a material world, but a computational cosmos - a simulation made by our mind, just as it makes a dream work, or a believer of a god that lives in the clouds called heaven. We are a dream state in the body of a monkey, becoming awake that we are neither monkey, nor a sentient being. To wake up from those dream simulations is probably the hardest accomplishment and usually happens late in our life. I doubt that reading a book, following a guru, god or scientist will help in this endeavor. In my case the search for objective truth, reality and the knowledge of relevant information, in combination with the magic mushrooms did the switch of perspective ... probably also a bit of luck, called non-linear dynamics and chaos. What I really was surprised by from the awakening aspect was altruistic, unconditional love. This concept is not naturally accepted by our Ego-self driven software - however it turns out that this energy is a force that can only be activated once we achieve a Free Will of Thought. That is what makes some of us unlike any other living organism on this planet; to forgive your enemy, to love your enemy are concepts of meme that contradict the animal mind of most humans. Well once we understand that we are like a computer thinking with bio-chemical algorithms it is not a surprise that we start life with an Unfree Will of Thought ...a simulation of the brain looking for food, sex and all the other things that feed our Ego-Self telling us how great and wonderful we, our simulation of the Me actually is. I have never experienced that a person is really evil or that he and she wants something evil. What people do can be horrible, and the mess they make can have an incredibly destructive potential. But if you look closely at what's going on, it may not stop, but if you condemn it, it will stop even less. When one works through it, accepts it, perceives it - then a light of love shines out. There are no bad and evil people at all, there are only people who are on the way, whom one must invite and pick up... □ Evolution on how cosmic space-time creates meme and life, how it drives to ever more complexity we might call consciousness. □ Evolution from a living organism called ape with a brain that does interpretation (simulations) of colors and sounds from the outside world, communication between us; but unlike any other brain on this planet, it can simulate also altruistic love, mathematics, arts, morals and ethics. □ Evolution from a hunter & gatherer tribe to a complex, modern civilization; still being an animal with universal power ambitions of the Ego-Self. □ To understand consciousness and enlightenment and our part we take in the cosmic, archaic mind we call nature. □ Using computer science artificial intelligence (AGI) to understand how our consciousness works in living organisms and especially in the human brain. To perceive the simulations that make up our worlds we make up in politics, religion and business. □ The internet becomes mightier than the sword of the oppressors. Now we have access to meme, to information directly, without the editing or censoring of an official cultural gate keeper. What it does to freedom and change during 2020 is the main topic of the book, to predict what 2030 will look like when governments start a direct war against their citizens. □ The deep state within governments, as the global Center of Power and their agenda of a Great Reset. □ The rise of slavery, capitalism and democracy. □ Central banks, IMF and World create FIAT Money (out of thin air) and therefore have control over third world countries, with their imposed conditions of these loans. □ Representative Democracy is a plutocracy of the very few ruling over their (sovereign citizens). We need a direct democracy right now. □ Outline cases where the media-propaganda has served

political agendas, like false flag attacks on Libya, Iran, Syria, Iraq, 9/11 and Corona. □ Who runs global politics and societies since the 18th century? The Wall Street financed wars; Rockefeller, Rhodes & Co financed Adolf Hitler to prevent a United Europe with Russia. We have a 147 corporations that control the economy and the media, but do we have another power-center-cult? □ The New World Order (Great Reset) is coming and we can be sure that the global elite will be successful in that. □ The most powerful spell on humanity is electoral democracy. The answer to that problem is not a new political party, but rather local community building, spread true information on the internet and the Resistance.

Inner Paths to Outer Space Rick Strassman 2008-03-27 An investigation into experiences of other realms of existence and contact with otherworldly beings • Examines how contact with alien life-forms can be obtained through the “inner space” dimensions of our minds • Presents evidence that other worlds experienced through consciousness-altering technologies are often as real as those perceived with our five senses • Correlates science fiction’s imaginal realms with psychedelic research For thousands of years, voyagers of inner space--spiritual seekers, shamans, and psychoactive drug users--have returned from their inner imaginal travels reporting encounters with alien intelligences. Inner Paths to Outer Space presents an innovative examination of how we can reach these other dimensions of existence and contact otherworldly beings. Based on their more than 60 combined years of research into the function of the brain, the authors reveal how psychoactive substances such as DMT allow the brain to bypass our five basic senses to unlock a multidimensional realm of existence where otherworldly communication occurs. They contend that our centuries-old search for alien life-forms has been misdirected and that the alien worlds reflected in visionary science fiction actually mirror the inner space world of our minds. The authors show that these “alien” worlds encountered through altered states of human awareness, either through the use of psychedelics or other methods, possess a sense of reality as great as, or greater than, those of the ordinary awareness perceived by our five senses.

DMT: The Spirit Molecule Rick Strassman 2000-12-01 A clinical psychiatrist explores the effects of DMT, one of the most powerful psychedelics known. • A behind-the-scenes look at the cutting edge of psychedelic research. • Provides a unique scientific explanation for the phenomenon of alien abduction experiences. From 1990 to 1995 Dr. Rick Strassman conducted U.S. Government-approved and funded clinical research at the University of New Mexico in which he injected sixty volunteers with DMT, one of the most powerful psychedelics known. His detailed account of those sessions is an extraordinarily riveting inquiry into the nature of the human mind and the therapeutic potential of psychedelics. DMT, a plant-derived chemical found in the psychedelic Amazon brew, ayahuasca, is also manufactured by the human brain. In Strassman's volunteers, it consistently produced near-death and mystical experiences. Many reported convincing encounters with intelligent nonhuman presences, aliens, angels, and spirits. Nearly all felt that the sessions were among the most profound experiences of their lives. Strassman's research connects DMT with the pineal gland, considered by Hindus to be the site of the seventh chakra and by Rene Descartes to be the seat of the soul. DMT: The Spirit Molecule makes the bold case that DMT, naturally released by the pineal gland, facilitates the soul's movement in and out of the body and is an integral part of the birth and

death experiences, as well as the highest states of meditation and even sexual transcendence. Strassman also believes that "alien abduction experiences" are brought on by accidental releases of DMT. If used wisely, DMT could trigger a period of remarkable progress in the scientific exploration of the most mystical regions of the human mind and soul.

Entheogens and the Future of Religion Robert Forte 2012-01-25 A study of the importance of psychedelic plants and drugs in religion and society • With contributions by Albert Hofmann, R. Gordon Wasson, Jack Kornfield, Terence McKenna, the Shulgins, Rick Strassman, and others • Explores the importance of academic and religious freedom in the study of psychedelics and the mind • Exposes the need for an organized spiritual context for entheogen use in order to fully realize their transformative and sacred value We live in a time when a great many voices are calling for a spiritual renewal to address the problems that face humanity, yet the way of entheogens--one of the oldest and most widespread means of attaining a religious experience--is forbidden, surrounded by controversy and misunderstanding. Widely employed in traditional shamanic societies, entheogens figure prominently in the origins of religion and their use continues today throughout the world. They alter consciousness in such a profound way that, depending on the set and setting, they can produce the ultimate human experiences: union with God or revelation of other mystical realities. With contributions by Albert Hofmann, Terence McKenna, Ann and Alexander Shulgin, Thomas Riedlinger, Dale Pendell, and Rick Strassman as well as interviews with R. Gordon Wasson and Jack Kornfield, this book explores ancient and modern uses of psychedelic drugs, emphasizing the complementary relationship between science and mystical experience and the importance of psychedelics to the future of religion and society. Revealing the mystical-religious possibilities of substances such as psilocybin mushrooms, mescaline, and LSD, this book exposes the vital need for developing an organized spiritual context for their use in order to fully realize their transformative and sacred value. Stressing the importance of academic and religious freedom, the authors call for a revival of scientific and religious inquiry into entheogens so they may be used safely and legally by those seeking to cultivate their spiritual awareness.

Psychoanalysis and the Unconscious and Fantasia of the Unconscious D. H. Lawrence 2012-03-27 "Extraordinary. Certainly a landmark in the history of psychoanalysis."--Kenneth Rexroth This volume features two profound essays by one of the English language's most famous and controversial authors. D. H. Lawrence wrote *Psychoanalysis and the Unconscious and Fantasia of the Unconscious* in the early 1920s, during his most productive period. Initially intended as a response to psychoanalytic criticism of his novel *Sons and Lovers*, these works progressed into a counterproposal to the Freudian psychoanalytic theory of the unconscious and the incest motive. They also voice Lawrence's concepts of education, marriage, and social and political action. "This pseudo-philosophy of mine," explained Lawrence, "was deduced from the novels and poems, not the reverse. The absolute need one has for some sort of satisfactory mental attitude towards oneself and things in general makes one try to abstract some definite conclusions from one's experiences as a writer and as a man." With these two essays, the author articulates his insights into the mental

struggle to rationalize and reconcile the polarity that exists between emotional and intellectual identities. Critical to understanding Lawrence's other works, they offer a bold synthesis of literary theory and criticism of Freudian psychology.

The Psychosomatic Assessment Fava 2012 Expands and refines the psychosomatic approach in clinical practice Psychosomatic medicine has developed methods to increase diagnostic accuracy and improve targeted therapeutic approaches in all fields of medicine. In this context, clinimetrics, the science of clinical measurements, provides unprecedented opportunities for psychosomatic assessment. This volume illustrates how this approach can be translated into everyday practice complementing and improving the medical interview. The most sensitive and reliable clinical methods are presented for evaluating specific psychosocial aspects of disease, i.e. childhood adversities, life events and chronic stress, lifestyle, sexual function, subclinical and affective disturbances, personality, illness behavior, well-being and family dynamics. Each chapter provides practical illustrations as to how crucial information can be obtained with specific methods individualized according to the patients' needs. A hyperlink is provided to a website that contains many of the instruments assessed in the volume. This book enables the reader to understand the value of the psychosomatic approach in clinical practice. It is intended to expand and refine the skills of clinicians who work in general and specialized medicine and psychiatry, whether physicians, psychologists or other health professionals.

Authentic Movement Patrizia Pallaro 1999-05-01 Patrizia Pallaro's second volume of essays on Authentic Movement, eight years after her first, is a tour de force. It is indeed "an extraordinary array of papers", as Pallaro puts it, and an immensely rich, moving and highly readable sweep through the landscapes of Authentic Movement, "this form of creative expression, meditative discipline and/or psychotherapeutic endeavour". You don't need to practice Authentic Movement to get a lot out of this book, but it certainly helps! I defy anyone to read the first two sections and not be curious to have their own experience.' - Sesame Institute 'Authentic Movement can be seen as a means by which analysts can become more sensitive to unconscious, especially pre-verbal aspects of themselves and their patients.' - Body Psychotherapy Journal Newsletter 'This book is a collection of articles, some of which are interviews, brought together for the first time. It is very valuable to have them all together in one place...It is a wonderful collection of articles on topics you have always wanted to read, such as the role of transference in dance therapy or Jung and dance therapy. The book also includes scripts for exercises.' - Somatics Authentic Movement, an exploration of the unconscious through movement, was largely defined by the work of Mary Starks Whitehouse, Janet Adler and Joan Chodorow. The basic concepts of Authentic Movement are expressed for the first time in one volume through interviews and conversations with these important figures, and their key papers. They emphasize the importance of movement as a means of communication, particularly unconscious or 'authentic' movement, emerging when the individual has a deep, self-sensing awareness - an attitude of 'inner listening'. Such movement can trigger powerful images, feelings and kinesthetic sensations arising from the depths of our stored childhood memories or connecting our inner selves to the transcendent. In exploring Authentic Movement these questions are asked: - How does authentic movement differ from other forms of dance and movement therapy? - How may 'authentic' movement be experienced?

Ethics, Politics, Subjectivity Simon Critchley 1999 In *Ethics-Politics-Subjectivity*, Simon Critchley takes up three questions at the centre of contemporary theoretical debate: What is ethical experience? What can be said of the subject who has this experience? What, if any, is the relation of ethical experience to politics? These questions are approached by way of a critical confrontation with a number of major thinkers, including Lacan, Genet, Blanchot, Nancy, Rorty and, in particular, Levinas and Derrida. Critchley offers a critical reconstruction of Levinas's notion of ethical experience and, questioning the religious pietism and political conservatism of the dominant interpretation of Levinas's work, develops an ethics of finitude which, far from being tragic, opens on to an experience of humour and the comic. Using this reading of Levinas as a way of unlocking the rich ethical potential of Derrida's work, Critchley outlines and defends the political possibilities of deconstruction. On the basis of Derrida's recent work, Critchley attempts to rethink notions of friendship, democracy, economics and technology.

Belief Gianni Vattimo 1999 In this highly personal book, one of Europe's foremost contemporary philosophers confronts the theme of faith and religion. He argues that there is a substantial link between the history of Christian revelation and the history of nihilism, in particular as the latter

appears in the work of Nietzsche and Heidegger, Vattimo's philosophical specialty. Tracing the relation between his response to these two thinkers and his own life as a devout Catholic, Vattimo shows how his interpretation of Heidegger's work and his conceptions of "weak thought" and "weak ontology" can be seen as closely linked to a rediscovery of Christianity. Vattimo speaks here in the first person--a risk that results in a disarmingly open exploration of the themes of charity, truth, dogmatism, morality, and sin, viewed through the lens of his own life and his own return to Christianity. While deeply critical of institutionalized religion and the Church, Vattimo discovers in the Christian tradition a voice (not a distinct message) whose interpretation is still being played out around us. Shaped by his readings of Nietzsche and Heidegger, Vattimo's decision to affirm his formation within the Christian tradition provides an original and engaging contribution to the contemporary debate on religion. At the center of this book is the enigma of belief. Freed by modernity from its Platonic subordination to knowledge, belief is recovered as a crucial and inevitable feature of our cultural and personal lives. "Do you believe?" Vattimo is asked. "I believe so," he replies.

Chaos, Gaia, Eros Ralph H. Abraham 2011-06 Untitled Document Chaos, Gaia, Eros: A Chaos Pioneer Uncovers the Three Great Streams of History The History of the World According to Chaos Theory In this eclectic and interdisciplinary work, chaos pioneer Ralph Abraham traces the history of consciousness through a rediscovery of the three forces that drive it: chaos, gaia, and eros--the mind, body, and spirit of evolution. With startling originality and clarity of vision, Abraham employs photographs, timelines, charts, and an engaging format to sweep the reader along on this wild ride through math, science, mythology, philosophy, and the whole of history. Sure to fascinate the poet, scientist, philosopher, and historian in all of us, Chaos, Gaia, Eros is a mind-bending masterwork that reunites the chaotic and mythological forces of human history and blows the doors off existing modes of thought. "Chaos, Gaia, Eros deliteralizes history so we see it not only as a sequence of events, but as a flow of ideas and cultural myths... This is an important book for understanding the past, living in the present, and shaping the future." -David Fideler, founder of Phanes Press and editor of *Alexandra: The Journal of the Western Cosmological Traditions* "This extraordinary work is a veritable Rosetta stone, unlocking the past, present and future." -Joan Halifax, author of *The Fruitful Darkness*. "Ralph Abraham has] his own highly original ideas about the application of chaos theory to changes in history and consciousness, making for a rich and provocative blend" -Riane Eisler, author of *The Chalice and the Blade*. "Ralph Abraham is the most readable and delightful of mathematical pioneers. He is in the great tradition of Poincaré and Whitehead, a true mathematical humanist. Chaos, Gaia, Eros is destined to be a voice shaping the new millennium." -Terence McKenna, author of *True Hallucinations*, *The Invisible Landscape*, *Archaic Revival* and *Food of the Gods*. ----- Ralph Abraham is a world renowned chaos theorist and professor emeritus of mathematics at the University of California, Santa Cruz.

Chaos, Creativity, and Cosmic Consciousness Rupert Sheldrake 2001-11-01 Three of the most original thinkers of our time explore issues that call into question our current views of reality, morality, and the nature of life. • A wide-ranging investigation of the ecology of inner and outer space, the role of chaos theory in the dynamics of human creation, and the rediscovery of traditional wisdom. In this book of "dialogues," the late psychedelic visionary and shamanologist Terence McKenna, acclaimed biologist and originator of the morphogenetic fields theory Rupert Sheldrake, and mathematician and chaos theory scientist Ralph Abraham explore the relationships between chaos and creativity and their connection to cosmic consciousness. Their observations call into question our current views of reality, morality, and the nature of life in the universe. The authors challenge the reader to the deepest levels of thought with wide-ranging investigations of the ecology of inner and outer space, the role of chaos in the dynamics of human creation, and the resacralization of the world. Among the provocative questions the authors raise are: Is Armageddon a self-fulfilling prophecy? Are we humans the imaginers or the imagined? Are the eternal laws of nature still evolving? What is the connection between physical light and the light of consciousness? Part ceremony, part old-fashioned intellectual discussion, these dialogues are an invitation to a new

understanding of what Jean Houston calls "the dreamscapes of our everyday waking life."

The Invisible Landscape Terence McKenna 1994-04-22 A thoroughly revised edition of the much-sought-after early work by Terence and Dennis McKenna that looks at shamanism, altered states of consciousness, and the organic unity of the King Wen sequence of the I Ching.

DMT and the Soul of Prophecy Rick Strassman 2014-09-18 Naturally occurring DMT may produce prophecy-like states of consciousness and thus represent a bridge between biology and religious experience • Reveals the striking similarities between the visions of the Hebrew prophets and the DMT state described by Strassman's research volunteers • Explains how prophetic and psychedelic states may share biological mechanisms • Presents a new top-down "theoneurological" model of spiritual experience After completing his groundbreaking research chronicled in *DMT: The Spirit Molecule*, Rick Strassman was left with one fundamental question: What does it mean that DMT, a simple chemical naturally found in all of our bodies, instantaneously opens us to an interactive spirit world that feels more real than our own world? When his decades of clinical psychiatric research and Buddhist practice were unable to provide answers to this question, Strassman began searching for a more resonant spiritual model. He found that the visions of the Hebrew prophets--such as Ezekiel, Moses, Adam, and Daniel--were strikingly similar to those of the volunteers in his DMT studies. Carefully examining the concept of prophecy in the Hebrew Bible, he characterizes a "prophetic state of consciousness" and explains how it may share biological and metaphysical mechanisms with the DMT effect. Examining medieval commentaries on the Hebrew Bible, Strassman reveals how Jewish metaphysics provides a top-down model for both the prophetic and DMT states, a model he calls "theoneurology." Theoneurology bridges biology and spirituality by proposing that the Divine communicates with us using the brain, and DMT--whether naturally produced or ingested--is a critical factor in such visionary experience. This model provides a counterpoint to "neurotheology," which proposes that altered brain function simply generates the impression of a Divine-human encounter. Theoneurology addresses issues critical to the full flowering of the psychedelic drug experience. Perhaps even more important, it points the way to a renewal of classical prophetic consciousness, the soul of Hebrew Bible prophecy, as well as unexpected directions for the evolution of contemporary spiritual practice.

True Hallucinations Terence McKenna 1994-04-22 This mesmerizing, surreal account of the bizarre adventures of Terence McKenna, his brother Dennis, and a small band of their friends, is a wild ride of exotic experience and scientific inquiry. Exploring the Amazon Basin in search of mythical shamanic hallucinogens, they encounter a host of unusual characters -- including a mushroom, a flying saucer, pirate Mantids from outer space, an appearance by James and Nora Joyce in the guise of poultry, and translinguistic matter -- and discover the missing link in the development of human consciousness and language.

No System Vinca Petersen 1999 No System is Vinca Petersen's photographic document of her life as a modern nomad. She tells us in her introduction, "Different people's lives are based around different things, ours is based around music. "For the last few years she has been traveling with a group of young people through Europe, organizing illegal musical events and raves. Living between cities in old vans and buses, they scavenge for abandoned structures, often on the cusp between urban and rural areas, where they can dance to loud techno music. The photographs present a fascinating look at modern tribal life, where technology-driven equipment and music, discarded industrial frameworks, and a nomadic lifestyle, rooted in ancient history, all come together.

Redemption Song Chris Salewicz 2008-05-13 With exclusive access to Strummer's friends, relatives, and fellow musicians, music journalist Chris

Salewicz penetrates the soul of an rock 'n roll icon. The Clash was--and still is--one of the most important groups of the late 1970s and early 1980s. Indebted to rockabilly, reggae, Memphis soul, cowboy justice, and '60s protest, the overtly political band railed against war, racism, and a dead-end economy, and in the process imparted a conscience to punk. Their eponymous first record and London Calling still rank in Rolling Stone's top-ten best albums of all time, and in 2003 they were officially inducted into the Rock and Roll Hall of Fame. Joe Strummer was the Clash's front man, a rock-and-roll hero seen by many as the personification of outlaw integrity and street cool. The political heart of the Clash, Strummer synthesized gritty toughness and poetic sensitivity in a manner that still resonates with listeners, and his untimely death in December 2002 shook the world, further solidifying his iconic status. Salewicz was a friend to Strummer for close to three decades and has covered the Clash's career and the entire punk movement from its inception. He uses his vantage point to write *Redemption Song*, the definitive biography of Strummer, charting his enormous worldwide success, his bleak years in the wilderness after the Clash's bitter breakup, and his triumphant return to stardom at the end of his life. Salewicz argues for Strummer's place in a long line of protest singers that includes Woody Guthrie, John Lennon, and Bob Marley, and examines by turns Strummer's and punk's ongoing cultural influence.

Joseph Levy Escapes Death Rick Strassman 2019 Retired psychiatrist Joseph Levy gets a new crown, setting in motion a year of two near-fatal illnesses, a drug overdose, and two calamitous relationships. His dreams take on deeper meaning, while he relies on prayer, friends, and a new psychotherapist to see him through.

Tripping Charles Hayes 2000-11-01 A collection of transformational, awe-provoking psychedelic experiences. In *Tripping*, Charles Hayes has gathered fifty narratives about unforgettable psychedelic experiences from an international array of subjects representing all walks of life--respectable Baby Boomers, aging hippies, young ravers, and accomplished writers such as John Perry Barlow, Anne Waldman, Robert Charles Wilson, Paul Devereux, and Tim Page. Taking a balanced, objective approach, the book depicts a broad spectrum of altered states, from the sublime to the terrifying. Hayes's supplemental essays provide a synopsis of the history and culture of psychedelics and a discussion of the kinetics of tripping. Specially featured is an interview with the late Terence McKenna, who was perhaps the preeminent psychedelic spokesperson of our time. A storehouse of astonishing, often otherworldly tales, *Tripping* is a compendium of forbidden memories that enables readers to trip vicariously or compare notes on their own experiences.

Original Rude Boy Neville Staple 2013-07-08 1979. The dawn of Thatcher's Britain. It's a country crippled by strikes, joblessness and economic gloom, divided by race and class - and skanking to a new beat: 2-Tone. The unruly offspring of white boy punk and rude boy ska, the new music's undeniable leaders were The Specials. Bursting out of Coventry's concrete jungle, their lyrics spoke of failed marriages, petty violence, crowded dance floors, gangsters and race hate - but with a wit that outshone their angry punk forebears. On stage they were electric, and at the heart of this energy was the vocal chemistry of the ethereal Terry Hall and Jamaican rude boy Neville Staple. In 1961, aged only five, Neville was sent to England to live with his father - a man for whom discipline bordered on child abuse. Growing up black in the Midlands of the Sixties and Seventies wasn't easy, but then Nev was hardly an angel. His youth was marked by scuffles with skins, compulsive womanising, and a life of crime that led from shoplifting to burglary and eventually borstal and Wormwood Scrubs. But throughout there was music, and now Nev tells how a very bad boy became part of the most important band of the Eighties. He remembers sound system battles; the legendary 2-Tone tour with The Selecter, Madness and Dexy's - and their clashes with NF thugs. He recalls the band's increasing tensions and eventual split; his subsequent foray into bubblegum pop with Fun Boy Three; and a new found fame in America, as godfather to bands like Gwen Stefani's No Doubt. Finally he reflects on The Specials' reunion and how even now, thirty years on, they can't help tearing themselves apart. *Raucous and charming Original Rude Boy* is the story of a man who done

too much, much too young. Neville Staple was a frontman with The Specials, a member of the hugely successful pop trio Fun Boy Three and now tours the world with own his own ska act The Neville Staple Band. LSD, My Problem Child Albert Hofmann 2017-09-27 This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann, Ph.D. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. In LSD: My Problem Child, we follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experiences may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend "the wonder, the mystery of the divine, in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people." More than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.
