APC In Search of Green Life - Environment Studies - Class 4

Sunita Jaisingh Environmental studies is a multidisciplinary subject that integrates the study of environment with social studies and sciences. The present series In Search of Green Life aims to develop an understanding of one's surroundings along with respect for local, national and global environment. We feel it is important for children to be aware and sensitive to contrasting opportunities and constraints under which people live. The focus has been on developing independent thinking through a number of activities, Project Work has been provided in each unit to inculcate collaborative learning and communication skills among students. The book is interactive in nature as it provides for a lot of Fun Facts, Learning by Doing and ideas for discussion.

Texas Aquatic Science Rudolph A. Rosen 2014-11-19 This classroom resource provides clear, concise scientific information in an understandable and enjoyable way about water and aquatic life. Spanning the hydrologic cycle from rain to watersheds, aquifers to springs, rivers to estuaries, ample illustrations promote understanding of important concepts and clarify major ideas. Aquatic science is covered comprehensively, with relevant principles of chemistry, physics, geology, geography, ecology, and biology included throughout the text. Emphasizing water sustainability and conservation, the book tells us what we can do personally to conserve for the future and presents job and volunteer opportunities in the hope that some students will pursue careers in aquatic science. Texas Aquatic Science, originally developed as part of a multi-faceted education project for middle and high school students, can also be used at the college level for non-science majors, in the home-school environment, and by anyone who educates kids about nature and water. kids urgently need,” an outdoor activity guide to keep kids happy and healthy (Daily Telegraph). Adventure is out there—you just have to go and find it! Childhood obesity is increasing year on year. Happiness and well-being levels in children are on the decline too. Children spend less time outside and more time in front of screens: computers, phones, games, television. 100 Family Adventures provides a valuable resource bank of tried and tested outdoor activities to enjoy with children, swapping “screen time” for “green time.” Particularly inspiring for people who want to get started, but don’t know how, the book shows how any family can enjoy time together outdoors. Activities are grouped into themes: Woodland, Water, Close to Home, Hills and Mountains, Exploring, By the Sea, Extreme Weather. Within each section is a range in difficulty, from making a rope swing to scrambling up a stream, from spending a day without electricity to going on a charity bike ride, from exploring a rockpool to camping on an uninhabited island. Packed with inspiring photos, sensible but enthusiastic instructions from parents Tim and Kerry combine with remarks and advice (and jokes!) from children Amy and Ella.

Rivers Paul Raven 2019-01-24 Throughout British history rivers have been of profound economic, social and cultural importance – yet as we see with increasing frequency they have the potential to wreak great destruction. This book describes the natural and not-so-natural changes that have affected British rivers since the last ice age and looks at the many plants and animals that live along, above and within them. Detailed case studies of the Meon, Dee and Endrick illustrate the incredibly varied nature of our river ecosystems, and the natural and human factors that make each one different. Written by two widely respected river ecologists, the book looks not only at rivers as they were and are but also at how they can be managed and cared for. Full of interesting facts and stunning images, *Rivers* is essential reading for anyone professionally involved in rivers and for the naturalist, conservationist and layman alike. It is the one book you need to understand this singularly important and often contentious feature of the British landscape.
