Here, There and Everywhere Geoff Emerick 2006-03-16 An all-access, firsthand account of the life and music of one of history's most beloved bands--from an original mastering engineer at Abbey Road Geoff Emerick became an assistant engineer at the legendary Abbey Road Studios in 1962 at age fifteen, and was present as a new band called the Beatles recorded their first songs. He later worked with the Beatles as they recorded their singles "She Loves You" and "I Want to Hold Your Hand," the songs that would propel them to international superstardom. In 1964 he would witness the transformation of this young and playful group from Liverpool into professional, polished musicians as they put to tape classic songs such as "Eight Days A Week" and "I Feel Fine." Then, in 1966, at age nineteen, Geoff Emerick became the Beatles' chief engineer, the man responsible for their distinctive sound as they recorded the classic album Revolver, in which they pioneered innovative recording techniques that changed the course of rock history. Emerick would also engineer the monumental Sgt. Pepper and Abbey Road albums, considered by many the greatest rock recordings of all time. In Here, There and Everywhere he reveals the creative process of the band in the studio, and describes how he achieved the sounds on their most famous songs. Emerick also brings to light the personal dynamics of the band, from the relentless (and increasingly mean-spirited) competition between Lennon and McCartney to the infighting and frustration that eventually brought a bitter end to the greatest rock band the world has ever known.

Maintenance Architecture Hilary Sample 2016-12-09 An inventive examination of a crucial but neglected aspect of architecture, by an architect writing to architects. Maintenance plays a crucial role in the production and endurance of architecture, yet architects for the most part treat maintenance with indifference. The discipline of architecture values the image of the new over the lived-in, the photogenic empty and stark building over a messy and labored one. But the fact is: homes need to be cleaned and buildings and cities need to be maintained, and architecture no matter its form cannot escape from such realities. In Maintenance Architecture, Hilary Sample offers an inventive examination of the architectural significance of maintenance through a series of short texts and images about specific buildings, materials, and projects. Although architects have seldom choose to represent maintenance—imagining their work only from conception to realization—artists have long explored subjects of endurance and permanence in iconic architecture. Sample explores a range of art projects—by artists including Gordon Matta-Clark, Jeff Wall, and Mierle Laderman Ukeles—to recast the problem of maintenance for architecture. How might architectural design and discourse

change as a building cycle expands to include “post-occupancy”? Sample looks particularly at the private home, exhibition pavilion, and high-rise urban building, giving special attention to buildings constructed with novel and developing materials, technologies, and precise detailing in relation to endurance. These include Buckminster Fuller's Dymaxion House (1929), the Lever House (1952), the U.S. Steel Building (1971), and the O-14 (2010). She considers the iconography of skyscrapers; maintenance workforces, both public and private; labor-saving technology and devices; and contemporary architectural projects and preservation techniques that encompass the afterlife of buildings. A selection of artworks make the usually invisible aspects of maintenance visible, from Martha Rosler's *Cleaning the Drapes* to Inigo Manglano-Ovalle's *The Kiss*.

Delayed Pilgrims Rudi Binder 2004-09-01 *Delayed Pilgrims* is the story of two Austrian physician immigrants, Walt and Linda Wagner. In the United States they first worked in medical centers and soon found themselves caught in a web of infighting among superiors. Tired of the whims of departmental intrigues, the Wagners left and after overcoming numerous obstacles, practiced medicine in the countryside. In an occasionally bumpy yet enduring marriage they raised two boys who asked many questions about the meaning of human existence. With subtle humor the story shows their struggle to find a niche in the New World.
