Trajectories of State Formation Across Fifteenth-century Islamic West-Asia Jo Van Steenbergem 2020
Constructed around seven extensively contextualized case studies, *Trajectories of State Formation across Fifteenth-Century Islamic West-Asia* offers a critical trans-dynastic understanding of the socio-political histories and historiographies of the Sultanates of Cairo and of the Timurid, Turkmen and early Ottoman

Greeks And Barbarians Harrison Thomas Harrison 2019-07-30 How did the Greeks view foreign peoples? This book considers what the Greeks thought of foreigners and their religions, cultures and politics, and what these beliefs and opinions reveal about the Greeks. The Greeks were occasionally intrigued by the customs and religions of the many different peoples with whom they came into contact; more often they were disdainful or dismissive, tending to regard non-Greeks as at best inferior, and at worst as candidates for conquest and enslavement. Facing up to this less attractive aspect of the classical tradition is vital, Thomas Harrison argues, to seeing both what the ancient

world was really like and the full nature of its legacy in the modern. In this book he brings together outstanding European and American scholarship to show the difference and complexity of Greek representations of foreign peoples - or barbarians, as the Greeks called them - and how these representations changed over time. The book looks first at the main sources: the Histories of Herodotus, Greek tragedy, and Athenian art. Part II examines how the Greeks distinguished themselves from barbarians through myth, language and religion. Part III considers Greek representations of two different barbarian peoples - the allegedly decadent and effeminate Persians, and the Egyptians, proverbial for their religious wisdom. In part IV three chapters trace the development of the Greek-barbarian antithesis in later history: in nineteenth-century scholarship, in Byzantine and modern Greece, and in western intellectual history. Of the twelve chapters six are published in English for the first time. The editor has provided an extensive general introduction, as well as introductions to the parts. The book contains two maps, a guide to further reading and an intellectual chronology. All passages of ancient languages are translated, and difficult terms are explained.

Conflict, Culture, and History Stephen J. Blank 2002-06-01 Five specialists examine the historical relationship of culture and conflict in various regional societies. The authors use Adda B. Bozeman's theories on conflict and culture as the basis for their analyses of the causes, nature, and conduct of war and conflict in the Soviet Union, the Middle East, Sinic Asia (China, Japan, and Vietnam), Latin America, and Africa. Drs. Blank, Lawrence Grinter, Karl P. Magyar, Lewis B. Ware, and Bynum E. Weathers conclude that non-Western cultures and societies do not reject war but look at violence and conflict as a normal and legitimate aspect of sociopolitical behavior.

Searching for Sappho: The Lost Songs and World of the First Woman Poet Philip Freeman

2016-02-15 An exploration of the fascinating poetry, life, and world of Sappho, including a complete translation of all her poems. For more than twenty-five centuries, all that the world knew of the poems of Sappho—the first woman writer in literary history—were a few brief quotations preserved by ancient male authors. Yet those meager remains showed such power and genius that they captured the imagination of readers through the ages. But within the last century, dozens of new pieces of her poetry have been found written on crumbling papyrus or carved on broken pottery buried in the sands of Egypt. As recently as 2014, yet another discovery of a missing poem created a media stir around the world. The poems of Sappho reveal a remarkable woman who lived on the Greek island of Lesbos during the vibrant age of the birth of western science, art, and philosophy. Sappho was the daughter of an aristocratic family, a wife, a devoted mother, a lover of women, and one of the greatest writers of her own or any age. Nonetheless, although most people have heard of Sappho, the story of her lost poems and the lives of the ancient women they celebrate has never been told for a general audience. Searching for Sappho is the exciting tale of the rediscovery of Sappho's poetry and of the woman and world they reveal.

The Rise of the West William H. McNeill 2009-07-30 The Rise of the West, winner of the National Book Award for history in 1964, is famous for its ambitious scope and intellectual rigor. In it, McNeill challenges the Spengler-Toynbee view that a number of separate civilizations pursued essentially independent careers, and argues instead that human cultures interacted at every stage of their history. The author suggests that from the Neolithic beginnings of grain agriculture to the present major social changes in all parts of the world were triggered by new or newly important foreign stimuli, and he presents a persuasive narrative of world history to support this claim. In a retrospective essay titled "The Rise of the West after Twenty-five Years," McNeill shows how his book was shaped by the time and place in which it was written (1954-63). He discusses how historiography subsequently developed and suggests how his portrait of the world's past in The Rise of the West should be revised to reflect these changes. "This is not only the most learned and the most intelligent, it is also the most stimulating and fascinating book that has ever set out to recount and explain the whole history of mankind. . . . To read it is a great experience. It leaves echoes to reverberate, and seeds to germinate in the mind."—H. R. Trevor-Roper, New York Times Book Review

The History of Philosophy A. C. Grayling 2019-11-05 "A witty, learned, authoritative survey of philosophical thought." —The New York Times Book Review The first authoritative and accessible single-volume history of philosophy to cover both Western and Eastern traditions, from one of the world's most eminent thinkers The story of philosophy is an epic tale, spanning civilizations and

continents. It explores some of the most creative minds in history. But not since the long-popular classic by Bertrand Russell, *A History of Western Philosophy*, published in 1945, has there been a comprehensive and entertaining single-volume history of this great, intellectual, world-shaping journey. With characteristic clarity and elegance, A. C. Grayling takes the reader from the age of the Buddha, Confucius, and Socrates through Christianity's capture of the European mind, from the Renaissance and Enlightenment on to Mill, Nietzsche, Sartre and, finally, philosophy today. Surveying in tandem the great philosophical traditions of India, China, and the Persian-Arabic world, and astonishing in its range and accessibility, Grayling's *The History of Philosophy* is destined to be a landmark work.

Aspects of Western Civilization Perry McAdow Rogers 1988 0C-0, 0-13-083203-0, Rogers, Perry M., *Aspects of Western Civilization, Vol. II, 4/E*/* = A two-volume chronologically arranged compilation of primary and some secondary sources in Western Civilization organized around eight major themes. The book presents readers with basic questions regarding historical development, human nature, moral action and practical necessity while incorporating a wide variety of political, social, economic, religious, intellectual and scientific issues in an effort to present history as a vehicle for better understanding in the present rather than a stagnant observation of past societies. Earliest Civilizations, The Greek, Roman and Medieval Worlds, Transitions to the Modern World, Foundations of the Modern World, The Era of Revolution, and the Twentieth Century. For anyone interested in western civilization especially historians.

"The Turk" in the Czech Imagination (1870s-1923) Jitka Malečková 2020 "In "The Turk" in the Czech Imagination (1870s-1923), Jitka Malečková describes Czechs' views of the Turks in the last half century of the existence of the Ottoman Empire and how they were influenced by ideas and trends in other countries, including the European fascination with the Orient, images of "the Turk," contemporary scholarship, and racial theories. The Czechs were not free from colonial ambitions either, as their attitude to Bosnia-Herzegovina demonstrates, but their viewpoint was different from that found in imperial states and among the peoples who had experienced Ottoman rule. The book convincingly shows that the Czechs mainly viewed the Turks through the lenses of nationalism and Pan-Slavism - in solidarity with the Slavs fighting against Ottoman rule"--

Humour and Laughter in History Elisabeth Cheauré 2014 Humour can be used as a »weapon« or as a means of coping with problematic historical events, especially in times of war and crisis. The book presents examples from different cultures (Russia, Europe, USA), from different historical epochs (from the Napoleonic era up to the current time) and from different medias (caricature, journalism, film). By looking at the individual cases it becomes possible to recognize some general structural patterns and to gain a deeper insight into the »functioning« of humour and laughter.

Mystifying the Monarch Jeroen Deploige 2006 The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority. In *Mystifying the Monarch*, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages to the present day. They demonstrate that, rather than a linear progression where perceptions of rulers moved inexorably from the sacred to the banal, in reality the history of monarchy has been one of constant tension between mystification and demystification.

Religion and Power Nicole Maria Brisch 2008 This volume represents a collection of contributions presented during the Third Annual University of Chicago Oriental Institute Seminar Religion and Power: Divine Kingship in the Ancient World and Beyond, held at the Oriental Institute, February 23-24, 2007. The purpose of this conference was to examine more closely concepts of kingship in various regions of the world and in different time periods. The study of kingship goes back to the roots of fields such as anthropology and religious studies, as well as Assyriology and Near Eastern

archaeology. More recently, several conferences have been held on kingship, drawing on cross-cultural comparisons. Yet the question of the divinity of the king as god has never before been examined within the framework of a cross-cultural and multi-disciplinary conference. Some of the recent anthropological literature on kingship relegates this question of kings who deified themselves to the background or voices serious misgivings about the usefulness of the distinction between divine and sacred kings. Several contributors to this volume have pointed out the Western, Judeo-Christian background of our categories of the human and the divine. However, rather than abandoning the term divine kingship because of its loaded history it is more productive to examine the concept of divine kingship more closely from a new perspective in order to modify our understanding of this term and the phenomena associated with it.

The West: A New History David A Bell 2018-07-01 This beautifully written history recenters the West and rekindles the past in a vivid narrative crafted for beginning students. Grafton and Bell tell the epic story of a West engaged in a continuing search for order across politics, society, and culture, driven by internal tensions and global influences. They deliver the past not as a path to the present but as it was lived at the time, grounded in a balanced, comprehensive, chronological narrative. Combined with rich digital resources to instill practical history skills, *The West* establishes a dynamic NEW foundation for teaching the Western Civilizations course.

End of History and the Last Man Francis Fukuyama 2006-03-01 Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical

codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

Why the West Rules - For Now Ian Morris 2011-01-14 Why does the West rule? In this magnum opus, eminent Stanford polymath Ian Morris answers this provocative question, drawing on 50,000 years of history, archeology, and the methods of social science, to make sense of when, how, and why the paths of development differed in the East and West — and what this portends for the 21st century. There are two broad schools of thought on why the West rules. Proponents of "Long-Term Lock-In" theories such as Jared Diamond suggest that from time immemorial, some critical factor — geography, climate, or culture perhaps — made East and West unalterably different, and determined that the industrial revolution would happen in the West and push it further ahead of the East. But the East led the West between 500 and 1600, so this development can't have been inevitable; and so proponents of "Short-Term Accident" theories argue that Western rule was a temporary aberration that is now coming to an end, with Japan, China, and India resuming their rightful places on the world stage. However, as the West led for 9,000 of the previous 10,000 years, it wasn't just a temporary aberration. So, if we want to know why the West rules, we need a whole new theory. Ian Morris, boldly entering the turf of Jared Diamond and Niall Ferguson, provides the broader approach that is necessary, combining the textual historian's focus on context, the anthropological archaeologist's awareness of the deep past, and the social scientist's comparative methods to make sense of the past, present, and future — in a way no one has ever done before.

Machines as the Measure of Men Michael Adas 1990 This new edition of what has become a standard account of Western expansion and technological dominance includes a new preface by the

author that discusses how subsequent developments in gender and race studies, as well as global technology and politics, enter into conversation with his original arguments.

The Archaeology of Mobility Hans Barnard 2008-12-31 There have been edited books on the archaeology of nomadism in various regions, and there have been individual archaeological and anthropological monographs, but nothing with the kind of coverage provided in this volume. Its strength and importance lies in the fact that it brings together a worldwide collection of studies of the archaeology of mobility. This book provides a ready-made reference to this worldwide phenomenon and is unique in that it tries to redefine pastoralism within a larger context by the term mobility. It presents many new ideas and thoughtful approaches, especially in the Central Asian region.

World Civilizations Peter N. Stearns 2007 The primary goal of *World Civilizations* is to present a truly global history since the development of agriculture and herding to the present. Overview of World History. Readers interested in the history and development of civilization worldwide.

How Modern Science Came Into the World H. F. Cohen 2010 Once upon a time 'The Scientific Revolution of the 17th century' was an innovative concept that inspired a stimulating narrative of how modern science came into the world. Half a century later, what we now know as 'the master narrative' serves rather as a strait-jacket - so often events and contexts just fail to fit in. No attempt has been made so far to replace the master narrative. H. Floris Cohen now comes up with precisely such a replacement. Key to his path-breaking analysis-cum-narrative is a vision of the Scientific Revolution as made up of six distinct yet narrowly interconnected, revolutionary transformations, each of some twenty-five to thirty years' duration. This vision enables him to explain how modern science could come about in Europe rather than in Greece, China, or the Islamic world. It also

enables him to explain how half-way into the 17th century a vast crisis of legitimacy could arise and, in the end, be overcome.

A Study of History Arnold Toynbee 1934

Writing and Learning in Cross-national Perspective David Foster 2017-10-03 Despite the increasingly global implications of conversations about writing and learning, U.S. composition studies has devoted little attention to cross-national perspectives on student writing and its roles in wider cultural contexts. Caught up in our own concerns about how U.S. students make the transition

as writers from secondary school to postsecondary education, we often overlook the fact that students around the world are undergoing the same evolution. How do the students in China, England, France, Germany, Kenya, or South Africa--the educational systems represented in this collection--write their way into the communities of their chosen disciplines? How, for instance, do students whose mother tongue is not the language of instruction cope with the demands of academic and discipline-specific writing? And in what ways is U.S. students' development as academic writers similar to or different from that of students in other countries? With this collection, editors David Foster and David R. Russell broaden the discussion about the role of writing in various educational systems and cultures. Students' development as academic writers raises issues of student authorship and agency, as well as larger issues of educational access, institutional power relations, system goals, and students' roles in society. The contributors to this collection discuss selected writing purposes and forms characteristic of a specific national education system, describe students' agency as writers, and identify contextual factors--social, economic, linguistic, cultural--that shape institutional responses to writing development. In discussions that bookend these studies of different educational structures, the editors compare U.S. postsecondary writing practices and pedagogies with those in other national systems, and suggest new perspectives for cross-national study of learning/writing issues important to all educational systems. Given the worldwide increase in students entering higher education and the endless need for effective writing across disciplines and nations, the insights offered here and the call for further studies are especially welcome and timely.

The Decline of the West Oswald Spengler 1918 Spengler's work describes how we have entered into a centuries-long "world-historical" phase comparable to late antiquity, and his controversial ideas spark debate over the meaning of historiography.
