Transforming Acquisitions and Collection Services Michelle Flinchbaugh 2019-09-15 This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director, awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

Regressive Taxation and the Welfare State Junko Kato 2003-09-01 Government size has attracted much scholarly attention. Political economists have considered large public expenditures a product of leftist rule and an expression of a stronger representation of labour interest. Although the size of the government has become the most important policy difference between the left and right in post-war politics, the formation of the government's funding base is also important. Junko Kato finds that the differentiation of tax revenue structure is path dependent upon the shift to regressive taxation. Since the 1980s, the institutionalisation of effective revenue raising by regressive taxes during periods of high growth has ensured resistance to welfare state backlash during budget deficits and consolidated the diversification of state funding capacity among industrial democracies. This book challenges the conventional wisdom that progressive taxation goes hand-in-hand with large public expenditures in mature welfare states and qualifies the partisan centred explanation that dominates the welfare state literature.

The Exchequer effect of the 50 per cent additional rate of income tax Great Britain: H.M. Revenue & Customs 2012-03-21 This is one of the accompanying documents to the 2012 Budget (ISBN 9790102976045) and examines the impact to the Exchequer of the 50% additional rate of income tax, introduced on 6 April 2010. The report seeks to provide the first comprehensive ex-post assessment of the additional rate yield using a range of evidence including 2010-11 Self Assessment returns. Analysis shows that there was a considerable behavioural response to the income tax rate change, including a substantial amount of forestalling, with an estimated £16 to £18 billion of income brought forward to the 2009-10 to avoid the tax increase. The net result of such actions is that the underlying yield from the additional rate was much lower than forecast. The report also describes how the impact of introducing the additional rate may extend well beyond the Exchequer, with the view that higher tax rates make the tax system less competitive and therefore less attractive to establish a business. The publication is divided into six chapters with three annexes.

A mission to inform Marilyn Clark 2020-10-12 Police intimidation, legal harassment, defamation and intimidation campaigns offline and increasingly online, pressure - economic or otherwise - from editors or media owners and sponsors, detentions, threats and physical violence: journalists are constantly exposed to these threats by those who feel threatened by their work. The murder of investigative journalist Daphne Caruana Galizia in October 2017 sent shock waves through Europe. Violence and acts of harassment against journalists have become alarmingly frequent, as was laid bare in the Council of Europe's 2017 survey of 940 journalists across the continent. This follow-up study is about the human cost to journalists who seek to hold the powerful to account. It is based on in-depth interviews with 20 journalists who use their reporting skills to expose corruption, injustice and abuses, often putting their safety at risk. They share their insights into the realities of practising cutting-edge journalism while facing aggression, intimidation and vicious cyber-attacks. Too often the necessary protections fail and crimes against journalists go unpunished. The freedom of the media to report without censorship or fear of reprisals is an essential pre-condition of democratic societies. This study represents a call for action to the 47 member states of the Council of Europe, with practical and forward-looking recommendations for ways to establish effective protection for journalists to enable them to safely fulfil their vital public watchdog role.

Managing Climate Risk in the U.S. Financial System Leonardo Martinez-Diaz 2020-09-09 This publication serves as a roadmap for exploring and managing climate risk in the U.S. financial system. It is the first major climate publication by a U.S. financial regulator. The central message is that U.S. financial regulators must recognize that climate change poses serious emerging risks to the U.S. financial system, and they should move urgently and decisively to measure, understand, and address these risks. Achieving this goal calls for strengthening regulators' capabilities, expertise, and data and tools to better monitor, analyze, and quantify climate risks. It calls for working closely with the private sector to ensure that financial institutions and market participants do the same. And it calls for policy and regulatory choices that are flexible, open-ended, and adaptable to new information about climate change and its risks, based on close and iterative dialogue with the private sector. At the same time, the financial community should not simply be reactive—it should provide solutions. Regulators should recognize that the financial system can itself be a catalyst for investments that accelerate economic resilience and the transition to a net-zero emissions economy. Financial innovations, in the form of new financial products, services, and technologies, can help the U.S. economy better manage climate risk and help channel more capital into technologies essential for the transition. <https://doi.org/10.5281/zenodo.5247742>

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Negative Emissions Technologies and Reliable Sequestration National Academies of Sciences, Engineering, and Medicine 2019-04-08 To achieve goals for climate and economic growth, "negative emissions technologies" (NETs) that remove and sequester carbon dioxide from the air will need to play a significant role in mitigating climate change. Unlike carbon capture and storage technologies that remove carbon dioxide emissions directly from large point sources such as coal power plants, NETs remove carbon dioxide directly from the atmosphere or enhance natural carbon sinks. Storing the carbon dioxide from NETs has the same impact on the atmosphere and climate as simultaneously preventing an equal amount of carbon dioxide from being emitted. Recent analyses found that deploying NETs may be less expensive and less disruptive than reducing some emissions, such as a substantial portion of agricultural and land-use emissions and some transportation emissions. In 2015, the National Academies published *Climate Intervention: Carbon Dioxide Removal and Reliable Sequestration*, which described and initially assessed NETs and sequestration technologies. This report acknowledged the relative paucity of research on NETs and recommended development of a research agenda that covers all aspects of NETs from fundamental science to full-scale deployment. To address this need, *Negative Emissions Technologies and Reliable Sequestration: A Research Agenda* assesses the benefits, risks, and "sustainable scale potential" for NETs and sequestration. This report also defines the essential components of a research and development program, including its estimated costs and potential impact.

Inquiry-based discussion prompts challenge students to examine scenarios that they are likely to encounter in professional public service careers. Critics of the public sector often use the analogy that government should be run more like a business. Issues such as profitability versus social value preclude the public sector from becoming a mirror image of the private sector; however, ethical decision making in fiscal administration is an important concern across sectors. Using examples drawn from the public and nonprofit arenas, Ethics in Fiscal Administration: An Introduction will help prepare future budget managers and other public administrators for the important work of upholding the public financial trust.
