The book also includes an analytical study of important issues of environment and sustainable development. A Short History of Ethics and Economics J. E. Alvey 2011 'This is an important and timely work that addresses the moral crisis of contemporary economics. Alvey not only provides an excellent narrative of classical Greek economics, but his arguments are aimed at restoring the central role that ethics played in the long tradition of economic thought. This is an invaluable scholarly resource for academics and students of political economy as well as the history of political thought.' Benjamin Wong, Nanyang Technological University, Singapore Arising from a disenchantment with mainstream economics a dissatisfaction that is widespread today *A Short History of Economics and Ethics* sketches the emergence and decline of the ethical tradition of economics and the crisis of modern economics. In doing so, James Alvey focuses on four of the leading ancient Greek thinkers: Socrates, Xenophon, Plato and Aristotle. The author uses insights from Amartya Sen's Capabilities approach as well as other sources to retrieve the ethical tradition of economics. Five aspects of this tradition which seem to lie outside of mainstream economics are identified: an ethical methodology; some notion of a just price; an understanding that ethical motivations are relevant to human action; a rich understanding of human well-being; and some notion of distributive justice related to human well-being. Creating a forum for further debate and research opportunity, this book will appeal to students, scholars and historians of economic thought, as well as to all those interested in the intersection of ethics with economics.

Development Economics Debraj Ray 1998-01-12 The study of development in low-income countries is attracting more attention around the world than ever before. Yet until now there has been no comprehensive text that incorporates the huge strides made in the subject over the past decade. Development Economics does precisely that in a clear, rigorous, and elegant fashion. Debraj Ray, one of the most accomplished theorists in development economics today, presents in this book a synthesis of recent and older literature in the field and raises important questions that will help to set the agenda for future research. He covers such vital subjects as theories of economic growth, economic inequality, poverty and undernutrition, population growth, trade policy, and the markets for land, labor, and credit. A common point of view underlies the treatment of these subjects: that much of the development process can be understood by studying factors that impede the efficient and equitable functioning of markets. Diverse topics such as the new growth theory, moral hazard in land contracts, information-based theories of credit markets, and the macroeconomic implications of economic inequality come under this common methodological umbrella. The book takes the position that there is no single cause for economic progress, but that a combination of factors--among them the improvement of physical and human capital, the reduction of inequality, and institutions that enable the background flow of information essential to market performance--consistently favor development. Ray supports his arguments throughout with examples from around the world. The book assumes a knowledge of only introductory economics and explains sophisticated concepts in simple, direct language, keeping the use of mathematics to a minimum. Development Economics will be the definitive textbook in this subject for years to come. It will prove useful to researchers by showing intriguing connections among a wide variety of subjects that are rarely discussed together in the same book. And it will be an important resource for policy-makers, who increasingly find themselves dealing with complex issues of growth, inequality, poverty, and social welfare.

Economic Development in the Twenty-first Century Matthew Kofi Ocran 2019-04-27 This book uses lessons from history to help African countries take charge of their own economic development agenda. History is an important part of Africa's economic development narrative, and Ocran investigates how the development outcomes between Africa and Western Europe became so divergent when in the early medieval period average income levels and economic development in the two regions differed only marginally. The sixteenth century marked a turning point, with the emergence of Western European mercantilism and capitalism and their associated exploitation of other countries. In understanding Africa's economic development, it is crucial to recognise that Africa has not always been poor. Examining 400 years of enslavement and colonisation, this book takes us to present day Africa and economic issues affecting the continent. With selected case studies from Hong Kong, Taiwan, and Singapore to South Korea and China, Ocran proposes ways to break out of the economic development quandary Africa currently faces.

Red Swan Sebastian Heilmann 2018-07-15 The resilience of the Communist party-state, in combination with a rapidly expanding economy, represents a significant deviant case for the debate about models of

development. This book focuses on the manner in which China's governmental system can be developed, formulated, implemented, adjusted, and revised. Policy-making is seen as an open ended process with an uncertain outcome, driven by conflicting interests, recurrent interactions, and continuous feedback, rather than determined by history, regime type, or institutions. Key to this are the capacity to deal with both existing and emerging challenges, correction mechanisms when conflicts arise, and adaptive capabilities in a changing economic or international context.

Key lessons on challenges and issues faced by port managers, developers and regulators are highlighted and discussed using a combination of professional insights and publicly available information sources. The aim is to illustrate the decision-making process with the purpose of contributing to better outcomes for the industry, government and the public at large. Anyone who is approaching the subject matter will gain utmost understanding of how ports are critical in the global economy and societal well-being.

International Trade and Sustainable Development Bob Milward 2019-11-19 The contemporary orthodox view of world trade has centred, generally unchallenged, on the ideas of free trade, based on the theoretical construct of comparative advantage. This book will engage in a critique of the orthodox position based on the underlying theoretical economic construct, the historical development of the now developed economies and the morally unsustainable position of the free-trade regime. The author examines alternatives such as Most Favoured Nation and Preferential Trading Agreements before making the argument in favour of Asymmetric Trading, where the underdeveloped economies can develop behind tariff barriers and quotas, whilst the triadic nations maintain a lack of barriers to the exports of these economies. He outlines how such a trading regime would be mutually beneficial in the long term, in the sense that development through industrialisation takes place and the increase in GDP per capita would allow markets for exports to be sustainable, thus widening the market for the goods and services of the developed economies. However, the author demonstrates that free trade actually increases the development gap by maintaining the status quo in terms of the underdeveloped economies specialising in and exporting low value-added primary products and importing high value-added manufactures. The book analyses contemporary and historical data to illustrate how an alternative trading regime can be truly advantageous to both the developed and underdeveloped regions of the world: a global trading regime that is capable of increasing GDP in a sustainable manner without transferring a surplus from the poor to the rich nations and without a long-term commitment on the part of the developed nations to altruism.

This collection of new essays rigorously analyzes those frontier development issues--including democracy, leadership, the economy, poverty alleviation through microfinance schemes, food security, education, health and political instability--and offers prescriptions that differ from the dominant neoliberal solutions.

Malaysia and the Muslim World: Harnessing the OIC Market Through Trade and Islamic Finance (UUM Press) Irwan Shah Zainal Abidin 2021-03-01 As the collective voice of the Muslim world and as the second largest inter-governmental organisation after the United Nations, the Organisation of Islamic Cooperation (OIC) is, without doubt, the best platform for the Muslim community, or the Ummah to address issues which have afflicted them in so many ways, be it politically, economically, or socially. Since September 11, 2001, Islam and the Islamic community worldwide has been attacked into so many unjust accusations, which is now known as Islamophobia. The basic premise of this book is that one of the main factors which caused this unnecessary prejudice, hate, and fear against Islam and the Muslim world is the fact that the Muslim community has failed to optimally harness its economic potentials to build a greater and stable political and social community which they have all the capacities to become. This book argues that one of the solutions to overcome this state of affair is for a few like-minded countries in the OIC, like Malaysia, to initiate policies and programmes of economic empowerment for the Muslim world. This can be done by enhancing Malaysia-OIC trade and investment linkages and promoting crucial sectors, such as Islamic finance and Islamic social finance. This book is not merely to provide detailed discussions on these issues based on the empirical results, but also highlighted some policy implications and provides future directions for Malaysia to play a crucial role in unlocking the economic potentials of the Ummah so that it can be strengthened further for the betterment of the Muslim world at large.

[Handbook of Research on Sustainable Development and Governance Strategies for Economic Growth in Africa](#) Teshager Alemu, Kassa 2018-02-09 Despite increasing reports across the globe on renewable development and maintenance, little is known regarding what strategies are required for improved economic growth and prosperity in Africa. What is so Austrian about Austrian Economics? Steven Horwitz 2010-08-12 The volume gathers together papers presented at the second biennial Wirth conference on Austrian economics, held in October 2008 when the crisis of Fall 2008 was still new and shocking. This coincidence of timing makes policy issues and crisis management a kind of leitmotif of the volume.

Trade Liberalisation and Poverty Minh Son Le 2015-08-11 This book uses Alan Winters' analytical framework to investigate the effects of trade liberalisation on economic growth and poverty in Vietnam. The country launched a programme of economic and trade reforms, known as Doi Moi, in the mid-1980s which placed the economy on a transitional path from central planning to a market economy. Since then Vietnam has attained a number of remarkable achievements in terms of economic growth and poverty reduction. Although some formidable problems (such as inequality and inflation) remain, it is apparent that trade liberalisation has been associated with a big reduction in poverty. The analysis in the book focuses on the microeconomic (household) level, and there is an emphasis on tracing the effects of trade liberalisation through the four separate channels identified by Winters. Such in-depth and micro-level analyses yield new insights that support important policy lessons and recommendations for Vietnam in particular and, more generally, for similar developing countries.

Normative Conditions to Make WTO Law More Responsive to the Needs of Developing Countries Philipp Scheuermann 2010

Conflicting Philosophies and International Trade Law Michael Burkard 2017-10-17 This book reveals how conflicting worldviews are at the root of public controversies on policy and trade issues. It highlights the particularly controversial disputes at the level of the World Trade Organization in the case of regulating beef-hormones and GMOs, aiming to show how negotiators of international agreements, members of dispute settlement bodies, and policy makers in general could have recourse to concepts of other disciplines such as epistemology and philosophy in order to address deadlocked legal disputes. Ultimately, the book is a manifesto for independent and critical research.

Globalization and Development Volume III Shigeru Thomas Otsubo 2015-10-05 *Globalization and Development* is a "cross-national study" on the "interstate dispersion" of the impacts (on growth, inequality and poverty) that international economic integration provides to the economies of the developing countries. In order to present the "Leading Issues in Development with Globalization" in a balanced manner, to identify differences and commonalities among "Country Experiences" in development with globalization, and to introduce diversified development paradigms with forward-looking discussions "In Search of a New Development Paradigm" for the post-MDGs era, this publication consists of three volumes and four main parts. Volume III (Part IV) presents the diversified development paradigms such as the GNH (Bhutan), the sufficiency economy (Thailand), the reform and opening up paradigm (China), the African and Latin American paradigms, and the Islamic development paradigm. The Concluding Chapter presents the evolution of development paradigms in the global development cooperation community after World War II, and then offers a glimpse into new development paradigms for the post-MDG era. This book intends to serve as a unique and comprehensive guide for those in the international development community on the subjects of diversified development paradigms/paths under globalization and other challenges in the post-MDG era.

Infrastructure Investments in Developing Economies Giang Dang 2014-10-18 This book aims to provide knowledge on how infrastructure is planned and built in a typical developing country, and what key variables are there in the system limiting the efficient use of public investments in infrastructure. The book begins with a comprehensive literature review on construction and economic development, and trade and economic development. The focus of the book is on the case of Vietnam, with lessons drawn for other developing economies. The book employs the mixed use of data to provide a stronger basis for analysis and interpretation of related government policies. Based on the research findings, the book recommends significant capacity building work for Vietnam to develop capacities that would remove constraints on the efficient use of public investments in infrastructure. The general principles of significant capacity building work which are useful for policy implications are introduced in the book. Analysts, academics, public and private communities in developing countries can adopt the research findings as guiding principles to bring about changes in their current use of public investments in infrastructure, thus supporting their trade and economic growth in the long term.

Agricultural Adaptation to Climate Change in Africa Cyndi Spindell Berck 2018-03-05 A changing climate is likely to have a drastic impact on crop yields in Africa. The purpose of this book is to document the effects of climate change on agriculture in Africa and to discuss strategies for adaptation to hotter weather and less predictable rainfall. These strategies include promoting opportunities for farmers to adopt technologies that produce optimal results in terms of crop yield and income under local agro-ecological and socioeconomic conditions. The focus is on sub-Saharan Africa, an area that is already affected by changing patterns of heat and rainfall. Because of the high prevalence of subsistence farming, food insecurity, and extreme poverty in this region, there is a great need for practical adaptation strategies. The book includes empirical research in Ethiopia, Kenya, South Africa, Tanzania, and other Sub-Saharan countries, and the conclusion summarizes policy-relevant findings from the chapters. It is aimed at advanced students, researchers, extension and development practitioners, and officials of government agencies, NGOs, and funding agencies. It also will provide supplementary reading for courses in environment and development and in agricultural economics.

The Egyptian Economy in the Twenty-first Century Khalid Ikram 2022-11-29 A multi-faceted account of Egyptian economic development by nineteen internationally recognized authorities and the critical challenges the economy is likely to face in the next twenty years *The Egyptian Economy in the Twenty-first Century* addresses the question of why Egypt, despite possessing a plethora of assets—such as a fertile agriculture, a strategic geographic location, oil and gas deposits, innumerable tourist sites, a labor force prized by regional countries, and a diaspora that remits large amounts of funds—has seldom performed to its economic potential during the last sixty years. Indeed, economic weakness created political weakness, and often exposed the country to foreign diktats. What should the country do to change this state of affairs? Nineteen internationally recognized authorities on the Egyptian economy discuss the critical challenges that the Egyptian economy is likely to face in the next two to three decades, challenges which must be overcome in order to improve the life of Egypt's citizens and to protect the country from external pressures. Their analyses cover population and employment; development strategies; principal macroeconomic issues; development of a digital economy; fiscal and monetary matters; the external sector; poverty and income distribution; the enterprise structure; higher education; water availability; urbanization; institutional performance; and many others. The Economic Development of South Korea Seung-hun Chun 2018-01-29 How did a country with a dearth of natural resources, a sprawling population congested in a limited arable land transform itself to a modern industrial state within a generation? How could these have been achieved given the lingering geopolitical threats to its very survival as a state, as evidenced by the Korean War and the internecine aggressive posturing

of its neighbor from the north? This book looks at strategies, institutional arrangement, role of entrepreneurs and workers in this odyssey, and on how those factors have worked together through effective leadership to transform South Korea's economic fortunes.

Economic Development: Tenth Edition Michael P. Todaro, Stephen C. Smith

Botswana – A Modern Economic History Ellen Hillbom 2018-03-14 Together with Mauritius, Botswana is often categorized as one of two growth miracles in sub-Saharan Africa. Due to its spectacular long-run economic performance and impressive social development, it has been termed both an economic success story and a developmental state. While there is uniqueness in the Botswana experience, several aspects of the country's opportunities and challenges are of a more general nature. Throughout its history, Botswana has been both blessed and hindered by its natural resource abundance and dependency, which have influenced growth periods, opportunities for economic diversification, strategies for sustainable economic and social development, and the distribution of incomes and opportunities. Through a political economy framework, Hillbom and Bolt provide an updated understanding of an African success story, covering the period from the mid-19th century, when the Tswana groups settled, to the present day. Understanding the interaction over time between geography and factor endowments on the one hand, and the development of economic and political institutions on the other, offers principle lessons from Botswana's experience to other natural resource rich developing countries.

Reflections on the Malaysian Economy Post-GE 14 : Issues and Challenges (UUM Press) Irwan Shah Zainal Abidin 2021-10-03 The victory of the Pakatan Harapan (PH), or the Alliance of Hope on May 9, 2018 in the Malaysian 14th General Election (GE14) was not just stunning, but historic. Moreover, the second comeback of Tun Dr. Mahathir Mohamad as the seventh Prime Minister of Malaysia was indeed impressive. The results of the GE14 were clearly against the tide as many political pundits and analysts had predicted a win for the Barisan Nasional (BN) coalition with differences only in matters of margins. Similar to Malaysia's 13th General Election (GE13), which was held on May 5, 2013, the main issue in the GE14 was also about the economy. The rise in cost of living was perhaps the mother of all issues which caused the downfall of the BN government for the first time since independence. Other crucial economic issues centered on alleged corruption practices and manifested through the 1Malaysia Development Berhad (1MDB) saga. As a new federal power for 22 months, the PH government had a daunting task not just to address economic issues mentioned above, but also the other alleged economic problems which they had highlighted in their election manifesto. On top of that, the PH government had the responsibility to maintain, if not to improve further what the BN government had done to the Malaysian economy in the past, of which World Bank economists described as a success story, "a very strong economy" and "growing towards a high-income." Post-GE14, what is the state of the Malaysian economy and its direction? What are lessons that can be learned from the PH economic management? And with the Perikatan Nasional (PN) government succeeding the federal power in March 2020 in the midst of the Covid-19 pandemic, what are the pressing issues and what needs to be done moving forward especially in the context of the economic challenges arising from the pandemic and post-Covid-19 era? These are some critical questions which this book is trying to address. The book essentially argues for the need to give greater focus to economic issues above anything else by envisioning a new national vision and engineering a new wave of economic structural reforms primarily based on insights from the vast Malaysian economic history lessons

The Paradigm of International Social Development Murli Desai 2013-10-30 This book takes a historical approach to analyse ideologies, policy approaches and development systems that have constructed the paradigm of international social development. It aims to review the social construction of "development" by tracing the historical dynamics of the modern ideologies and political economy of industrialization, colonization, the Cold War, and globalisation; to examine the process of reconstruction of development as "social development" based on alternate ideologies and alternate policy approaches and review the roles played by the development systems; and to trace the history of social policy approaches from welfare to rights-based, universal, comprehensive and preventative social policies for social development, and identify the roles played by non-government organizations and the social work profession.

Financing Africa's Development Diery Seck 2020-06-24 This book examines the impact of financing on Africa's economic development. By exploring various financial instruments including the role of alternative sources of funding like migrant remittances and illicit flows, it analyses the role of financing for Africa's macroeconomic development and other development indicators such as infrastructure, transport, global trade, industrialisation, social services, external indebtedness and governance. By presenting and examining case studies on various African countries and regions, the respective contributions investigate the capacity of institutions to facilitate and structure the economy's funding activities, and to strengthen the ties between finance and development. Furthermore, they discuss various regional aspects, such as the integration of infrastructure, harmonization of fiscal policy, integration of financial markets, and the facilitation of intra-regional trade and movement of capital. Given its scope, the book will appeal to scholars of economics and development studies with an interest in the economic development of Africa.

Managing Development in a Globalized World Habib Zafarullah 2017-09-25 Traditionally, development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations. However, historically, eclectic ideas and approaches often clash with existing long-established notions of progress and modes of realizing social and economic change. *Managing Development in a Globalized World: Concepts, Processes, Institutions* explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries. It underscores development as a continuous process that must be supported by sound policies and efficient management, supplying a wider understanding of the field. The authors argue that the

application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society. They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal/external actors and a host of stakeholders. An exploration of key sectors in development provides clear comprehension of problems and solutions. A careful synthesis of theoretical/conceptual and empirical literature, the book assesses real-world situations and provides insight into the operational dynamics of development policies, programs, and institutions. It focuses on goals, values, and dynamics of development management that are undergoing rapid changes and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter-regional and inter-institutional synergies. It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society.
