The Story of Tönle Mario Rigoni Stern 1998 Mario Rigoni Stern was born in 1921 in Asiago, in the mountains of northeastern Italy. Throughout his literary career, he has remained deeply attached to the region of his birth, its peasant customs, its dialect, its seasonal cycles and shifting historical fortunes. Tonle Bintarn's story takes place in the mountains of the Veneto region, which once bordered the Austro-Hungarian Empire and where smuggling was a means of subsistence for the peasant population. Having run afoul of a patrol of revenue agents, Tonle must seek refuge beyond the frontier in Central Europe, where year after year he lives by doing odd jobs and working, among other things, as an itinerant print peddler, a horse trainer in Hungary, and a gardener in a Prague castle. But every winter he returns secretly to his home and family, until finally a pardon is granted. By now his children are grown and he has little to do but tend his sheep. Meanwhile, the times are changing, social values are disintegrating under the impact of modernization, and Europe moves ever closer to disaster. During the devastation of the First World War, the occupation and ultimate destruction of his village, and his own internment in an Austrian camp, it is Tonle's loyalty to his roots and his stubborn devotion to his task as a shepherd that persist and make him a quiet symbol of heroism and human endurance.

Patient Engagement Guendalina Graffigna 2016-01-01 Patient engagement should be envisaged as a key priority today to innovate healthcare services delivery and to make it more effective and sustainable. The experience of engagement is a key qualifier of the exchange between the demand (i.e. citizens/patients) and the supply process of healthcare services. To understand and detect the strategic levers that sustain a good quality of patients' engagement may thus allow not only to improve clinical outcomes, but also to increase patients' satisfaction and to reduce the organizational costs of the delivery of services. By assuming a relational marketing perspective, the book offers practical insights about the developmental process of patients' engagement, by suggesting concrete tools for assessing the levels of patients' engagement and strategies to sustain it. Crucial resources to implement these strategies are also the new technologies that should be (1) implemented according to precise guidelines and (2) designed according to a user-centered design process. Furthermore, the book describes possible fields of patients' engagement application by describing the best practices and experiences matured in different fields

Toxic truths Thom Davies 2020-07-14 This electronic version has been made available under a

Creative Commons (BY-NC-ND) open access license. Debates over science, facts, and values are pivotal in the struggle for environmental justice. For decades, environmental justice activists have campaigned against the misuse of science, engaging in community-led citizen science that champions knowledge produced by and for ordinary people living with environmental risks and hazards. However, post-truth politics have threatened science itself. *Toxic truths* examines the relationship between environmental justice and citizen science, focusing on enduring issues and new challenges in a post-truth age. The volume features a range of community-based participatory environmental health and justice research projects that seek to establish different ways of sensing, witnessing, and interpreting environmental injustice. From struggles in American hog country and contaminated indigenous communities, to local environmental controversies in Spain and China, this volume examines political strategies for seeking environmental justice. With international, interdisciplinary contributions from distinguished authors, emerging scholars and community activists, *Toxic truths* is essential reading for those seeking to understand the cutting edge of citizen science and activism around the world.

Detailing new strategies, this first-of-its-kind handbook shows how smarter urban design and management can be strong deterrents to many site-specific crimes.

The Sustainability Curriculum Cedric Cullingford 2013-06-17 The links between education and sustainable development are deepening, although subject to much controversy and debate. The success of the sustainability discourse depends both on the pedagogic and research functions of higher education. Similarly, for higher education itself to remain relevant and engaged it faces pressure not only to integrate the insights and lessons drawn from the perspective of sustainable development, but also to be responsive to scrutiny of its own practices in relation to sustainability. Among professionals in higher education, sustainable development has its supporters and detractors. It is embraced by some individuals and departments while being perceived by others as a threat to the coherence of particular disciplines. Although it is not currently an academic discipline in its own right, increasing public and professional familiarity with the term, and the increasing urgency of global calls for the implementation of sustainable development mean that this is rapidly changing. This volume analyses the impact of the concepts and practices of sustainability and sustainable development on various academic disciplines, institutional practices, fields of study and methods of enquiry. The contributors, drawn from a wide-range of disciplines, perspectives, educational levels and institutional contexts, examine the purpose of the modern university and the nature of sustainable education, which includes exploring links to social movements for sustainability projects, curriculum change, culture and biodiversity, values relating to gender equality and global responsibility, and case studies on the transformation, or otherwise, of some specific disciplines.

The Gap Thomas Suddendorf 2013-11-12 There exists an undeniable chasm between the capacities of humans and those of animals. Our minds have spawned civilizations and technologies that have changed the face of the Earth, whereas even our closest animal relatives sit unobtrusively in their dwindling habitats. Yet despite longstanding debates, the nature of this apparent gap has remained unclear. What exactly is the difference between our minds and theirs? In *The Gap*, psychologist Thomas Suddendorf provides a definitive account of the mental qualities that separate humans from other animals, as well as how these differences arose. Drawing on two decades of research on apes, children, and human evolution, he surveys the abilities most often cited as uniquely human -- language, intelligence, morality, culture, theory of mind, and mental time travel -- and finds that two traits account for most of the ways in which our minds appear so distinct: Namely, our open-ended ability to imagine and reflect on scenarios, and our insatiable drive to link our minds together. These two traits explain how our species was able to amplify qualities that we inherited in parallel with our animal counterparts; transforming animal communication into language, memory into mental time

travel, sociality into mind reading, problem solving into abstract reasoning, traditions into culture, and empathy into morality. Suddendorf concludes with the provocative suggestion that our unrivalled status may be our own creation -- and that the gap is growing wider not so much because we are becoming smarter but because we are killing off our closest intelligent animal relatives. Weaving together the latest findings in animal behavior, child development, anthropology, psychology, and neuroscience, this book will change the way we think about our place in nature. A major argument for reconsidering what makes us human, *The Gap* is essential reading for anyone interested in our evolutionary origins and our relationship with the rest of the animal kingdom.

Political Culture and Conflict Resolution in the Arab Middle East Benjamin MacQueen 2009
Political Culture and Conflict Resolution in the Arab Middle East develops a method for examining the explanatory capacity of political culture in relation to the issues of civil war and conflict resolution in Lebanon and Algeria. How perception, shaped by values and assumptions, affects political behaviour presents scholars with potentially valuable but also dangerous possibilities. Namely, seeking to explore the explanatory capacity of the nebulous concept of political culture can prospectively lead to the cul de sacs of essentialism or relativism. In an attempt to engage with the concept of political culture, this book develops a method for examining the explanatory capacity of political culture in relation to the issues of civil war and conflict resolution in Lebanon and Algeria. Applying strict limits on the implementation of political culture in an explanatory capacity, namely its role as a secondary, relational and comparative concept, this book demonstrates how political culture operates to shape the form and affect the legitimacy of conflict resolution processes. This is applied to two peace agreements, Lebanon's Taef Agreement and Algeria's Civil Concord. Here, the importance of 'contextuality' is emphasised in developing a space where political culture can provide explanatory capacity whilst remaining connected to 'macro' theoretical concepts.

Spirits of the Air Kurt Diemberger 2015-06-05 Kurt Diemberger belongs to an elite mountaineering club. He is one of only two climbers to have made first ascents of two 8,000-metre peaks - Broad Peak and Dhaulagiri. His Broad Peak ascent was the first eight-thousander climbed in alpine style without oxygen. He had climbed the major Alps north faces (the Eiger, Matterhorn and Grandes Jorasses) by 1958 and was awarded the fifth Piolets d'Or lifetime achievement award. But Diemberger's adventures revolve around more than climbing, as *Spirits of the Air* reveals. Of course, there is plenty of mountaineering - expeditions to Makalu and Everest, America and the Hindu Kush. But there are also rickety aeroplanes which inevitably crash, anacondas to wrestle and bar-room meetings with Reinhold Messner. And there is Diemberger's filmmaking. A pioneering filmmaker, he has shot on the top of Everest and in the Arctic circle, making several mountaineering film firsts and becoming one of the best cameramen of the genre. In *Spirits of the Air* Diemberger describes his life and adventures after the 1986 K2 disaster, which affected him greatly, and some earlier episodes. He reflects on the contrasts between his life in Europe and the always-beckoning Himalaya, and on family, loves and friendships. Describing his experiences with a tremendous zest for life that is both endearing and compelling, Diemberger creates a very readable and very different mountaineering autobiography.

Prepping Enzo Maolucci 2016-06-09T00:00:00+02:00 Le città sono sempre più spesso sotto assedio: cambiamenti climatici, catastrofi ambientali, attacchi terroristici. Tali situazioni richiedono tecniche di sopravvivenza specifiche, diverse da quelle in uso nell'outdoor. Prepping significa attivare una logistica preventiva delle catastrofi e del dopo catastrofe. Mentre il survival studia le situazioni in cui noi ci troviamo in ambienti ostili e diversi dalla nostra quotidianità e ha una vocazione per lo più individuale, il prepping studia situazioni, soprattutto di gruppo, in cui il nostro ambiente muta e vede cambiare i parametri della qualità della vita e delle risorse a disposizione. In questo senso il prepper tende a restare nel suo ambiente anche quando esso si modifica. L'anomalia è portata dal cambiamento, che rende più ostile o pericoloso il contesto ecologico e sociale. Per garantire la propria sopravvivenza e quella dei suoi prossimi, il prepper punta a prevedere le crisi e quindi agisce prima del cambiamento, crea o accumula preventivamente le risorse, sviluppa competenze di cui potrebbe avere bisogno, soprattutto progetta e prepara anche il dopo.

Education's Epistemology Harvey Siegel 2017 Education's Epistemology extends and further defends Harvey Siegel's "reasons conception" of critical thinking. It analyzes and emphasizes both the epistemic quality, and the dispositions and character traits that constitute the "critical spirit," that are central to a proper account of critical thinking; argues that that epistemic quality must be

understood ultimately in terms of epistemic rationality; defends a conception of rationality that involves both rules and judgment; and argues that critical thinking has normative value over and above its instrumental tie to truth. Siegel also argues, contrary to currently popular multiculturalist thought, for both transcultural and universal philosophical ideals, including those of multiculturalism and critical thinking themselves.

International Perspectives on Spinal Cord Injury World Health Organization 2013 "Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: ---assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; ---make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

Survive--The Economic Collapse Piero San Giorgio 2021-12-03 "A valuable cram course in how to survive the rest of your life." - James Howard Kunstler. Author of *The Long Emergency*, *Too Much Magic*, *The Geography of Nowhere*, and *The World Made By Hand* For billions of people, the ongoing economic crisis has marked the end of the world as we know it. The "American Dream" (and ones like it) of a guaranteed job, a home, and a pension, has given way to the nightmare of unemployment, unpayable debt, depression, and uncertainty. In *Survive The Economic Collapse*, Piero San Giorgio looks behind the headlines and sound bites and demonstrates that today's economic crisis is no temporary "downturn," nor is it simply the result of bad policies. The crisis is the beginning of the end of a global paradigm when expectations of endless economic growth and progress crash up against the reality of scarcity and limited resources. The implications of the collapse cannot be ignored: a steep decline in living standards due to the evaporation of easy credit;

a new political landscape that might inspire nationalism, geopolitical reshuffling, and wars over resources; and, potentially, a reduction in global population. No mere doom-sayer, San Giorgio explains not just how to understand the crisis but overcome it to foster a resilient community, stay healthy, and become self-sufficient and productive in the "interesting times" that lie ahead. Packed with tactical information and resources, *Survive* is nothing less than a field manual for the apocalypse. This edition has been thoroughly reedited and includes an extensive postscript detailing global developments in the past decade.

The Farmer and the Obstetrician Michel Odent 2002 In his new book Michel Odent shows how farming and childbirth have been industrialized side by side during the 20th century - with dramatic and disturbing consequences. The similarities are striking. In both cases innovations have been presented as the long awaited solution to an old problem: the advent of powerful synthetic insecticides has, overnight, dramatically reduced the costs and increased agricultural productivity; the advent of the modern safe technique of caesarean section has offered serious new reasons to create gigantic obstetrical departments. In both spheres a small number of skeptics voiced doubts and fears concerning the negative long-term consequences of the widespread use of novel, little tested practices; although these repeated warnings initially went unheeded, they have motivated the development of "alternative" approaches and movements. At the turn of the new century the history of industrialized farming has suddenly speeded up. A collective global awareness has been sparked by a series of disasters, particularly "mad cow" and foot and mouth diseases. Industrialized childbirth has not yet reached the same phase of its history, but the parallels between these two industries suggest that there is more to link the farmer and the obstetrician than we had all realized..

TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies Giuseppe Costantino 2020-08-26 Ethnic minority children now comprise over 75 percent of students in 100 of the largest cities in the United States. However, these students have not been given equal access to, nor benefited from, the contemporary mental health system as have their non-minority peers. TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies examines the health/mental care system in which professional service providers, including psychologists, labor to offer quality care for youth in the United States. The authors ardently support the use of the TEMAS assessment instrument as a useful tool for diagnosis of all youngsters, particularly its use on the growing population of minority children and adolescents. Part I presents a rationale and context for employing TEMAS. Introductory chapters describe the mental health status of the population at-risk, as well as systems of care for youth where assessment and intervention are components. Topics to follow highlight a history of positive TEMAS test reviews with the detail required by instructors for preparing dedicated TEMAS courses. The volume thoroughly outlines cross-cultural studies and illustrates case examples of European-American, Hispanic/Latino, Asian-American, and forensic studies. TEMAS (Tell-Me-A-Story) Assessment in Multicultural Societies brings practical insight to instructors who teach standard assessment courses; clinicians, counselors, and school psychologists; assessment specialists; and administrators concerned with mental health services designed for children and adolescents.

The Relaxation Response Herbert Benson, M.D. 2009-09-22 In this time of quarantine and global uncertainty, it can be difficult to deal with the increased stress and anxiety. Using ancient self-care techniques rediscovered by Herbert Benson, M.D., a pioneer in mind/body medicine for health and wellness, you can relieve your stress, anxiety, and depression at home with just ten minutes a day. Herbert Benson, M.D., first wrote about a simple, effective mind/body approach to lowering blood pressure in *The Relaxation Response*. When Dr. Benson introduced this approach to relieving stress over forty years ago, his book became an instant national bestseller, which has sold over six million copies. Since that time, millions of people have learned the secret—without high-priced lectures or prescription medicines. *The Relaxation Response* has become the classic reference recommended by most health care professionals and authorities to treat the harmful effects of stress, anxiety, depression, and high blood pressure. Rediscovered by Dr. Benson and his colleagues in the laboratories of Harvard Medical School and its teaching hospitals, this revitalizing, therapeutic tack is now routinely recommended to treat patients suffering from stress and anxiety, including heart conditions, high blood pressure, chronic pain, insomnia, and many other physical and psychological ailments. It requires only minutes to learn, and just ten minutes of practice a day.
