*The Lending Policy Of The World Bank In The 1970s* Bettina S. Hurni 2020-01-08 This pilot study - the first to analyze the World Bank's lending policy in the Second United Nations Development Decade - concentrates on the Bank's shift in emphasis from traditional infrastructure projects to "new style" projects, especially in the area of rural development, and on the resulting changes in lending criteria in the 1970s. Basing her conclusions on two years of independent research and access to confidential materials, Dr. Hurni evaluates the World Bank's work; gives a good overall view of current development problems - including implementation of the "growth with equity" strategy - and their possible solutions; shows the effects of the new development goals in borrower and creditor countries, as well as on the institutional decision-making process; and offers recommendations for improvement of the Bank's evaluation methodology and operational structures. She presents a clear picture of the positive and negative aspects of the World Bank as a multilateral investment model and shows its bridge-building function in the great North-South controversy.

*Investment Project Design* Lech Kurowski 2011-03-01 Make more informed project investment decisions by knowing what issues to examine in the planning process and how to analyze their impacts Poor or insufficient planning is primarily responsible for the inordinate number of idle and rusting capital facilities around the world, with investment decisions often made on the basis of either intuition or inadequate analysis. Investment Project Design: A Guide to Financial and Economic Analysis with Constraints alerts potential investors and other stakeholders to precipitous changes in the investment milieu as a result of constraints on resources and infrastructure, economic and political turmoil, and population growth. The guide Includes descriptions of specific methods of financial and economic analysis for new investments and for expansion of an existing enterprise Covers project risk assessment, mitigation and avoidance Provides real-life case studies, adapted for presentation, and addresses the design of projects large and small, as well as those in both private and public sectors Features spreadsheet layouts and computations Investment Project Design is the ultimate resource in the methods of designing and appraising investment projects

*Private Foreign Investment in Developing Countries* H.C. Bos 2013-06-29 This study is the result of research undertaken by the Netherlands Economic Institute, Division Balanced International Growth, Rotterdam, under the auspices of the O.E.C.D. Development Centre. In the division of labour agreed with professor Grant L. Reuber, who directed a parallel study under the auspices of the Centre', the N.E.I. research deals with the evaluation of economic effects of private foreign investment in developing countries. The effects studied are confined to macro-economic effects which are quantifiable. The lack of a satisfactory methodology for the assessment of these effects seemed to justify this limitation in the approach to the evaluation of private foreign investment. The study is organized as follows. Part I reviews briefly and critically the literature about the evaluation of private foreign investment and suggests the need for an appropriate macro-economic methodology. Part II develops the principles and techniques for such a methodology which is applied empirically to data for five developing countries in Part III. While Parts II and III are concerned with the effects of aggregated volumes of private foreign investment of the previous parts, the appraisal of investment, Part IV considers, independently projects financed through foreign investment and discusses the special features of social benefit-cost analysis of such projects.

*Cost-benefit Analysis and Project Appraisal in Developing Countries* Colin H. Kirkpatrick 1996-01-01 The techniques and methods of project appraisal in developing countries have been considerably expanded and refined since they were first introduced in the late 1960s. This up-to-date and authoritative survey volume demonstrates the ways in which cost-benefit analysis has developed in response to changes in economic circumstances and conditions over the past three decades. An international group of academic and professional economists covers areas including problems in the practical application of cost-benefit techniques by international agencies, the treatment of income distribution, discounting, the effects method, the logical framework as a complement to project appraisal, aid tying, risk criteria in decision making, benefit valuation in the water sector, the appraisal of technical assistance projects, privatization in transition economies and shadow pricing in transition economies. Professor Kirkpatrick and Professor Weiss have prepared an insightful overview essay introducing the broad selection of work presented in this volume.

*Guidelines for Project Evaluation* Partha Dasgupta 1972 This publication represents the cumulative experience of UNIDO in the methodology and practice of national benefit-cost analysis for industrial project preparation and evaluation. UNIDO's work in this field began with the Interregional Symposium on Project Preparation and Evaluation held in Prague in 1965. On the basis of the recommendations of this symposium, UNIDO undertook to develop a set of guidelines which the developing countries could use for incorporating the evaluation and approval of new industrial projects into their over-all industrial planning mechanism.

**Evaluating Transnational Programs in Government and Business** Vincent E. McHale 2013-10-22 Evaluating Transnational Programs in Government and Business is a collection of papers presented at a symposium entitled "Evaluating Transnational Programs," conducted at Case Western Reserve University during the 1977-1978 academic year. The symposium was organized to address the various issues and controversies surrounding adequate methods for effective policy evaluation and assessment at the transnational level. The book explores the conceptual, methodological, bureaucratic, political, and organizational factors that hinder sound evaluation of government and private programs with transnational implications. This monograph consists of 11 chapters and opens with an introduction to methodological issues in the transnational field. It then reviews the development of various world modeling activities and compares them from the standpoints of characteristics, structure, methodological underpinnings, applications, and criticisms. The World Integrated Model is used to assess United States policy options regarding agricultural exports and oil imports by placing them in a broader transnational context. The following chapters focus on various problems in the evaluation of U.S. foreign economic policies, including foreign trade and investment policies. The criteria used by development banks in the processing of loan requests are also considered, along with non-economic objectives in economic development assistance programs; the role of multinational corporations as agents of technology transfer and their effects on changing U.S. policies regarding foreign investment. The final chapter deals with the growing need for transnational appraisal of the impacts of institutions on basic human values. This book will be of interest to business and government officials as well as social and political scientists.

**Design and Evaluation** United Nations. Industrial Development Organization 1984

*Social and Economic Dimensions of Project Evaluation* 1977 Social evaluation of industrial projects according to UNIDO's Guidelines for project evaluation; The implementation of a multiple objective approach to project evaluation.

*Model for the Evaluation of Project Funding in Emerging Markets* Carlos Cerrato 2000-12 Funding private projects in emerging markets - in a safely manner - requires a thorough evaluation and analysis of several aspects that are constituent to the project itself, to the specific country where it is located, and to the project owners. The author has studied the functioning of Financial Markets in developing countries for several years, compared them to International Financial Markets, and has come to the conclusion that the contributions made in the past do not cover all the information required in order to judge and secure the viability of projects in these countries. By developing a model and researching its components breakdown, the author has attempted to fulfill all the requirements necessary to accomplish this purpose. The methodology used was basically a result of a detailed research throughout years of experience, to verify and analyze documentation related to different types of projects recommended for funding located in several developing countries. The collected data during the verification process of each project have been significant to their outcome and have assisted me for the development of the model presented in this Dissertation. In addition, related studies by professionals in the field (Bankers, Economists, Financial Analysts, etc.) have been examined and partially incorporated in this Dissertation in order to make a significant parallel to the components of the model.

**Project management** Raghbir Dayal 1996

*PROJECT MANAGEMENT AND CONTROL* SUBHASH CHANDRA DAS 2011-11-03 This comprehensive book gives a conceptual, analytical and evaluative study of the principles and practices of Project Management and Control systems in a student-friendly manner. The book provides an overview of project management, and gives a detailed analysis of project life cycle and its different phases, identification of project opportunities, and sources of project ideas. It describes in detail various considerations and priorities in setting up projects at macro and micro levels, project appraisal, and various types of organisation structures. Besides, the book also explains the different ways and means of financing projects, the sources of finance nationally and internationally, the need for estimation of project cost, and different aspects of post-project review. Finally, the book dwells on computer aided project management to demonstrate how the computer can help the management in handling all project activities efficiently. Primarily intended as a text for the postgraduate students of commerce and management, the book can also be authoritatively used by the researchers, project managers, consultants, and corporate policy and decision makers. KEY FEATURES : Describes various aspects of contract management in great detail with live examples. Explains the risks encountered by MNCs in an international project and the remedies available to handle these risks effectively. Contains a Glossary to explain the core concepts. Provides a large number of graphs, charts, tables, illustrative examples and appendices to help readers in analytical understanding of the subject.

**Selecting Development Projects for the World Bank** Jean Baneth 1996-01-01 Presents a selection of topics of special interest and relevance to eight Pacific Island countries that are member of the World Bank (PMCs)--Fiji, Federated States of Micronesia, Kiribati, Marshall Islands, Solomon Islands, Tonga, Vanuatu, and Western Samoa. The themes selected are: the impact of recent changes in the external trading environment of the PMCs; economic diversification into tourism; improving the management of and getting better returns for natural resources such as fisheries and forestry; and regional cooperation. The report also includes profiles of these eight countries.

*Project Evaluation* Axel Sell 1991 This book aims to be an introduction and support to the carrying out of financial and economic analysis of a country's projects. It uses a case study of a joint venture between domestic and foreign investors in a developing country to show how the theoretical analysis relates to real life. The financial and economic analyzes are systematically linked. All aspects which are considered significant are treated in separate steps, thereby simplifying the evaluation process for the reader.

*Social and Economic Dimensions of Project Evaluation* Hugh H. Schwartz 1977

*Current Issues in Project Analysis for Development* John Weiss 2012-01-01 For over fifty years project analysis techniques have been applied in the assessment of development projects where poorly designed and appraised projects can waste scarce resources. This study examines the continued relevance of this approach, assesses methodological developments over this period and investigates current practical problems in the application of these techniques. This major work brings together authors with experience of both academic and operational project work to focus on issues such as the shadow exchange rate, the shadow wage, the discount rate and assessment of poverty impact and risk, as well as problems relating to specific sectors covering environmental projects, transport, education and health. There are also general chapters on the experience of semi-input-output-based estimation of shadow prices and the relevance of shadow pricing techniques to the context of developed economies in the EU. An overview by the editors sets out the evolution of the literature and highlights current issues. The general conclusion is that project analysis techniques remain relevant, albeit within a very different development context to that in which they were originally envisaged to be applied. With new perspectives on key economic parameters, this book will appeal to academics working on development, officials involved with project aid programmes, postgraduate students of development and professional economists working on development projects.

*Project Analysis in Developing Countries* S. Curry 1994-01-07 Investment projects are an important mechanism for economic development. However, their costs and benefits must be assessed to ensure that the resources committed are being used as productively as possible. This book explains the techniques available to assess the economic impact of projects in developing countries. It draws on the authors experience in

teaching and applying these techniques and combines relevant economic theory with a clear understanding of what can be done in practice. The book aims to make existing techniques readily accessible to both students and practitioners.

*Industrial Structure and Policy in Less Developed Countries* Colin Kirkpatrick 2012-08-06 First published in 1984, this textbook analyses, at both aggregate and micro economic levels, the contemporary industrial conditions in Third World countries and relates this to the process of economic growth and structural transformation. Drawing upon both industrial and development economics, the authors offer a comprehensive and integrated treatment of the different levels of industrial analysis in less developed countries, alongside a wealth of comparative data on industrial structure, business concentration and behaviour, and industrial policies in a cross-section of countries in Africa, Asia, the Far East and Latin America.

**The Political Economy of Evaluation** Jerker Carlsson 2016-07-27 Examines the economic impact of aid, but not in the sense that it questions the relevance of this objective, or tries to measure whether aid works or not. The focus of this book is on the evaluation process itself. Can aid evaluation be improved in order to increase the effectiveness of aid?

**Development Planning and Poverty Reduction** D. Potts 2003-06-10 The stated aim of much development assistance is the reduction of poverty. This book examines how development interventions might be more effectively targeted to achieve this aim. Part One provides an overview of planning for poverty reduction, and evidence on the extent and causes of poverty. Part Two examines participatory approaches to development planning. Part Three assesses macro-economic strategies and programmes for poverty reduction. Part Four concludes with a microeconomic analysis of the distribution of benefits from investment projects.

**The Economics of Project Analysis** William Augustus Ward 1991-01-01 'The Economics of Project Analysis: A Practitioner's Guide' is written for project practitioners, for instructors in agricultural project economic analysis, and for students of that subject.
