*Patologie della politica* Maria Donzelli 2003

La voce spezzata Fabio Scotto 2013-02-08T00:00:00+01:00 Praticato fin dal Rinascimento, è con il Romanticismo tedesco che il frammento assurge a genere vero e proprio, divenendo quell'«assoluto letterario» al quale la poesia affida la sua speranza di cristallizzare l'unicità dell'esperienza, forse il modello stesso della scrittura moderna. L'ampio percorso tracciato da questo libro di Fabio Scotto, il primo che affronti la questione dalla prospettiva delle poetiche e non della mera teoria di genere, si colloca nell'evoluzione storica delle forme che ha nell'avvento del «poème en prose» simbolista il suo momento apicale e nell'eterodossia espressiva d'inizio Novecento un fecondo laboratorio di soluzioni immaginarie. Delineando da Nietzsche a Barthes l'orizzonte estetico fondativo novecentesco, Scotto prende in esame alcune delle figure maggiori della poesia francese contemporanea, da Char a Michaux, da Ponge a Leiris, o più appartate come Perros e Jourdan (e nel caso di Cioran troppo restrittivamente ascritte alla sola filosofia), fino alle cosiddette scritture lacunari, ovvero quella frangia del formalismo negativo che ha puntato alla cancellazione del soggetto autoriale e della figuralità poetica per elaborare una scrittura apparentemente priva di nessi causali e di pathos sentimentale o melodico. Ma la poesia, anche quando franta o ellittica, mantiene sempre un rapporto con l'immediatezza sensibile che ne fa una respirazione mentale, un silenzio teso fra una parola e l'altra, malgrado la sordità dei tempi, o l'urlo che lacera, come in Artaud, l'indifferenza del mondo con una parola arcaica resa puro suono. Ne emerge un universo ricco e vitale nel quale istanze formali radicali s'alternano ad approcci più sensibilmente vicini all'esperienza del vivere, in un'intermittenza del continuo vocale qui esplorato fino al limite indiscernibile fra l'ordine e il disordine, che è poi il magma odierno.

*Global Citizenship Education and the Crises of Multiculturalism* Massimiliano Tarozzi 2016-08-11 The notion of global citizenship education (GCE) has emerged in the international education discourse in the context of the United Nations Education First Initiative that cites developing global citizens as one of its goals. In this book, the authors argue that GCE offers a new educational perspective for making sense of the existing dilemmas of multiculturalism and national citizenship deficits in diverse societies, taking into account equality, human rights and social justice. The authors explore how teaching and research may be implemented relating to the notion of global citizenship and discuss the intersections between the framework of GCE and multiculturalism. They address the three main topics which affect education in multicultural societies and in a globalized world, and which represent unsolved dilemmas: the issue of diversity in relation to creating citizens, the issue of equality and social justice in democratic societies, and the tension between the global and the local in a globalized world. Through a comparative study of the two prevailing approaches - intercultural education within the European Union and multicultural education in the United States - the authors seek what can be learned from each model. Global Citizenship Education and the Crises of Multiculturalism offers not only a unifying theoretical framework but also a set of policy recommendations aiming to link the two approaches.

**L'acqua: risorsa e minaccia. La gestione delle risorse idriche e delle inondazioni in Europa** Elisabetta Bini 2023-05-22 [Italiano]: Ogni civiltà ha sviluppato saperi e tecniche per gestire e sfruttare l'acqua, elemento essenziale per la vita umana, ma anche per difendersi dalle minacce che possono derivare dalla convivenza con essa. In età preindustriale, la necessità di gestire un bene così prezioso ha condotto allo sviluppo di tecnologie, alla costruzione d'infrastrutture, alla creazione di magistrature apposite, ma ha anche alimentato conflitti tra soggetti che pretendevano un accesso privilegiato o esclusivo alle risorse idriche. Inoltre, i rischi derivanti dalla prossimità di corsi d'acqua o di bacini lacustri hanno spesso indotto le società a sviluppare tecniche e pratiche di prevenzione. Questo spettro di problemi è al centro dei saggi raccolti in questo volume, che studiano varie città medie e grandi dell'Europa centro-occidentale - dalla Valle del Reno alla Penisola iberica, da Parigi a Palermo - tra il XIV e il XIX secolo./[English]:Every civilization has developed different forms of knowledge and techniques to manage and exploit water, an essential element for human life, but also to defend itself from the threats that can derive from it. In preindustrial times, the need to manage such a precious commodity led to the development of different technologies, the construction of infrastructures, the creation of special judiciaries, but it also fuelled conflicts between subjects who claimed privileged or exclusive access to water resources. In addition, the risks posed by the proximity of waterways or lake basins often led societies to develop prevention techniques and practices. This range of issues is at the heart of the essays collected in this volume, which examine various medium and large cities located in Central Western Europe - from the Rhine Valley to the Iberian Peninsula, from Paris to Palermo - between the fourteenth and the nineteenth centuries.

**Gender Diversity in European Sport Governance** Agnes Elling 2018-08-06 Gender equality is one of the founding democratic principles of the EU. However, recent studies of the Federation of Olympic Sports in

Europe have shown that women occupy only fourteen percent of decision-making positions in sport organizations. This book presents a comprehensive and comparative study of how various regions and countries of Europe have addressed this lack of gender diversity, discussing which strategies have brought about change and to what extent these changes have been successful. With contributions from leading sport sociologists, covering countries such as Germany, Hungary, Norway, Poland, Spain, Turkey and the UK, it provides a foundation for future policymaking, methodological analyses and theoretical developments that can result in sustainable gender equality in European sport governance. Gender Diversity in European Sport Governance is important reading for scholars and students in the fields of sociology of sport, sport management, sociology, gender studies and studies of organization, management and leadership. It is also a valuable resource for policy makers in the EU, as well as national sport organizations and activists.

**Historical Archaeologies of Transhumance across Europe** Eugene Costello 2018-03-05 Transhumance is a form of pastoralism that has been practised around the world since animals were first domesticated. Such seasonal movements have formed an important aspect of many European farming systems for several thousand years, although they have declined markedly since the nineteenth century. Ethnographers and geographers have long been involved in recording transhumant practices, and in the last two decades archaeologists have started to add a new material dimension to the subject. This volume brings together recent advances in the study of European transhumance during historical times, from Sweden to Spain, Romania to Ireland, and beyond that even Newfoundland. While the focus is on the archaeology of seasonal sites used by shepherds and cowherds, the contributions exhibit a high degree of interdisciplinarity. Documentary, cartographic, ethnographic and palaeoecological evidence all play a part in the examination of seasonal movement and settlement in medieval and post-medieval landscapes. Notwithstanding the obvious diversity across Europe in terms of livestock, distances travelled and socio-economic context, an extended introduction to the volume shows that cross-cutting themes are now emerging, including mobility, gendered herding, collective land-use, the agency of non-elite people and competition for grazing and markets. The book will appeal not only to archaeologists, but to historians, geographers, ethnographers, palaeoecologists and anyone interested in rural lifeways across Europe.

**Sacramental Theology** Herbert Vorgrimler 1992 Both resistance to and renewed interest in the sacraments mark current theological thought. This work acknowledges human limitations of the sacraments but stresses that God's relationship to human beings cannot be other than sacramental." Sacramental structures and events constitute salvation history, and thus permeate all theology. What makes this sacramental view comprehensible is faith; faith is an indispensable precondition for a sacramental theology. Therefore, the author first demonstrates the preconditions of faith on which sacramental theology rests, and what place it holds within the whole of theology. Following this, he briefly presents the concept of sacraments and the history of that concept, the teachings of Church tradition on sacraments in general, and the basic features of a sacramental theology. Next, he explains from a theological perspective the traditional sacraments of the Catholic Church, including related topics such as indulgences and sacramentals.

**Archaeogeophysics** Gad El-Qady 2018-07-11 This book describes the application of non-destructive geophysical methods in subsurface archaeological features. Such non-destructive methods are magnetometry, electrical resistance, electromagnetic conductivity, magnetic susceptibility and ground penetrating radar. This book also includes the last improvements in instrumentation, data processing, and interpretations of the collected data sets leading to the rapid progress in geophysical applications in the field of archaeological investigations. The book also provides complete case-studies and archaeological interpretation obtained our results carried out in different localities around the world.

**Leibniz, Humboldt, and the Origins of Comparativism** Tullio De Mauro 1990 Both Leibniz and Humboldt are scholars in whose work we find a passionate interest in the history and development of languages combined with a strong theoretical commitment. Linking their names to linguistic comparativism draws attention to the contribution these scholars have made to the history of comparativism and also promotes discussion of the relationship of theory and practice in linguistic research in more general terms. In September 1986, a conference on Leibniz, Humboldt and the Origins of Comparativism' was held in Rome. The papers included in this volume are revised versions of the papers presented at the conference.

**The Italian Economy** Vera Zamagni 2018 The legacies of two great civilizations--the Roman Empire and Renaissance city-states--are still apparent in today's Italian economy in its internationalization, strong regional cultures, tourism, and arts industries. Less appreciated is the country's status as continental Europe's second-largest industrial power, notwithstanding the disproportionate significance of SMEs in Italy. Vera Zamagni's survey of the Italian economy and its modern history outlines its unique shape and structure and how human factors explain its strengths in social networks, "niche capitalism," and well-being indicators, as well as its weaknesses reflected in regional imbalances, political instability, and recently in banking. Focusing on economic developments since 1945, Zamagni explains how the contemporary economy is the result of the contours of this longer history, of the country's geography--low on natural resources but blessed with good weather and shipping opportunities--and more recent factors such as the country's membership in the EU and the changing profile of Italian demography and the country's surprisingly measured response to the challenges of migration. Drawing upon both conventional and heterodox approaches, the book concludes with an assessment of the prospects for the Italian economy. The book provides a concise overview of value for students in politics, political economy, history, and economics and for professionals looking to understand the nature of recent Italian economic performance.

**Remote Sensing for Archaeology and Cultural Landscapes** Diofantos G. Hadjimitsis 2019-06-07 This book investigates the added value that satellite technologies and remote sensing could provide for a more sustainable mapping, monitoring and management of heritage sites, be it for purposes of regular maintenance or for risk mitigation in case of natural or man-caused hazards. One of the major goals of this book is to provide a clear overview on policy perspectives, regarding both space policy as well as heritage policy, and to provide possible suggestions for common ground of these two fields, in Europe and around the world. Readers will develop a good understanding of cutting-edge applications of remote sensing and geographic information science, and the challenges that affect heritage maintenance and protection. Particular attention is given to Earth observation and remote sensing techniques applied in different locations. This book brings together innovative technologies, concrete applications and policy perspectives that can lead to a more complete vision of cultural heritage as a resource for future development of our society as a whole.
