The Imperative of Responsibility Hans Jonas 1984 Hans Jonas here rethinks the foundations of ethics in light of the awesome transformations wrought by modern technology: the threat of nuclear war, ecological ravage, genetic engineering, and the like. Though informed by a deep reverence for human life, Jonas's ethics is grounded not in religion but in metaphysics, in a secular doctrine that makes explicit man's duties toward himself, his posterity, and the environment. Jonas offers an assessment of practical goals under present circumstances, ending with a critique of modern utopianism.

The Guggenheims John H. Davis 1989-12 This definitive portrait of one of America's wealthiest, most influential dynasties traces their dynamic and often tragic lives. 'The Guggenheims': Meyer Guggenheim, the penniless immigrant whose genius for business and penchant for taking risks made the family fortune; Solomon Guggenheim, the pioneer art patron who commissioned Frank Lloyd Wright to build the revolutionary piece of modern architecture, The Guggenheim Museum, opening the doors of contemporary art to America; Peggy Guggenheim, self-styled 'first liberated woman' who built a Venetian palace for her art but lost both her daughter and her lover to suicide; Daniel & Harry Guggenheim, whose financial interest in rocket science supported the Apollo moon landing and the growth of America's modern space program; Roger W Straus Jr, grandson of Daniel Guggenheim, who became America's foremost literary publisher, bringing numerous Nobel Prize Winning authors to the world's bookshelves. Updated with the latest from the heirs to the Guggenheim dynasty and illustrated throughout with rare family photos, John Davis has chronicled the saga of one of America's first families of philanthropy.

Dialogues on architecture Emilio Faroldi 2022-01-20 he dialogue, as "the talking of the soul with itself" that constitutes the act of thinking (Plato), has been selected as the ideal form through which to vividly and accurately convey the thinking of a number of protagonists of Italian modern

architecture. Knowledge remains a latent legacy of the soul until a given stimulus reawakens its memory: architecture, more than sophia (wisdom), becomes philo-sophia, i.e. love of knowledge. A reading of the architectural phenomenon aimed at faithfully bringing out its complexity cannot help but involve the stories directly told by the protagonists, and the micro-stories of individual episodes, in order to explore the relationship that exists between the poetic and the technical-scientific spheres, underlining their complementary and conflictual nature. The disciplinary tools of exegesis of design and its materialization stimulate a form of critique of criticism driven by the rejection of an angle of interpretation of architecture oriented exclusively towards its results. Method and result constitute the inseparable terms: the direct testimony of certain protagonists of Italian architecture makes it possible to reconnect the interrupted threads of a narrative that has often been rendered syncopated and unilateral by excessively superficial explanation. The Dialogues on Architecture explore the interaction between idea, design and construction, revealing different operative and conceptual modes through which to achieve the finished work. Franco Albini, Lodovico B. Belgiojoso, Guido Canella, Aurelio Cortesi, Roberto Gabetti & Aimaro Isola, Ignazio Gardella, Vittorio Gregotti, Vico Magistretti, Enrico Mantero, Paolo Portoghesi, Aldo Rossi, Giuseppe Terragni, Vittoriano Viganò are the authors of this narrative.

Dreams and Visions in the World of Islam Elizabeth Sirriyeh 2015-01-28 People in Western societies have long been interested in their dreams and what they mean. However, few non-Muslims in the West are likely to seek interpretation of those dreams to help them make life-changing decisions. In the Islamic world the situation is quite different. Dreaming and the import of visions are here of enormous significance, to the degree that many Muslims believe that in their dreams they are receiving divine guidance: for example, on whether or not to accept a marriage proposal, or a new job opportunity. In her authoritative new book, Elizabeth Sirriyeh offers the first concerted history of the rise of dream interpretation in Islamic culture, from medieval times to the present. Central to the book is the figure of the Prophet Muhammad - seen to represent for Muslims the perfect dreamer, visionary and interpreter of dreams. Less benignly, dreams have been exploited in the propaganda of Islamic militants in Afghanistan, and in apocalyptic visions relating to the 9/11 attacks. This timely volume gives an important, fascinating and overlooked subject the exploration it has long deserved.

All'ombra dei Lumi: Jacques-André Naigeon philosophe Mario Cosenza 2020-07-29 [Italiano]: Il presente lavoro costituisce una biografia intellettuale di Jacques-André Naigeon (1735-1810), importante figura del secolo dei Lumi francese. Biografo e primo editore di Diderot, Naigeon fu testimone privilegiato delle innumerevoli vicende politiche, sociali e culturali che sconvolsero la società francese. Ateo convinto, editore infaticabile, fine conoscitore della letteratura clandestina, il giovane Naigeon fece in tempo a collaborare agli ultimi volumi dell'Encyclopédie e a partecipare, con il barone d'Holbach, alla propagazione di numerosi scritti eterodossi, materialisti e ferocemente anti-clericali; dopo la Rivoluzione - la quale lo spinse alla riflessione ma non ad un'attività politica propriamente detta - fu integrato dalla cultura "ufficiale" tramite l'elezione presso l'Institut de France: ma nonostante alcuni lavori editoriali di grande pregio, Naigeon resterà esclusivamente la testimonianza vivente di una stagione culturale ormai irripetibile ./[English]:This work aims at being an intellectual biography of Jacques-André Naigeon (1735-1810), an important figure of French Enlightenment. Not only was he very close to Diderot - of whom he was biographer and editor - but he was also a privileged witness of the countless political, social and cultural events that led to the French Revolution. Besides being a convinced atheist, a tireless publisher, a fine connoisseur of Clandestine literature, Naigeon had the opportunity to collaborate in writing the last volumes of the Encyclopédie and to participate in the propagation of heterodox, materialistic and fiercely anti-clerical writings. After the Revolution - at the beginning of which he tried in vain to make himself heard by the Assemblée Nationale - he was then integrated into the "official" culture through the election at the Institut de France: however, even if he is the author of some prestigious works,

Naigeon remains exclusively the living testimony of a now unrepeatable cultural season.

If Venice Dies Salvatore Settis 2016-09-10 In the tradition of Jane Jacobs' *The Death and Life of Great American Cities* comes an urgent plea from internationally renowned art historian Salvatore Settis to preserve Venice's future. What is Venice worth? To whom does this urban treasure belong? Venetians are increasingly abandoning their hometown — there's now only one resident for every 140 visitors — and Venice's fragile fate has become emblematic of the future of historic cities everywhere as it capitulates to tourists and those who profit from them. In *If Venice Dies*, a fiery blend of history and cultural analysis, internationally renowned art historian Salvatore Settis argues that "hit-and-run" visitors are turning landmark urban settings into shopping malls and theme parks. He warns that Western civilization's prime achievements face impending ruin from mass tourism and global cultural homogenization. This is a passionate plea to secure Venice's future, written with consummate authority, wide-ranging erudition, and élan.

Paradigms for a Metaphorology Hans Blumenberg 2011-04-27 What role do metaphors play in philosophical language? Are they impediments to clear thinking and clear expression, rhetorical flourishes that may well help to make philosophy more accessible to a lay audience, but that ought ideally to be eradicated in the interests of terminological exactness? Or can the images used by philosophers tell us more about the hopes and cares, attitudes and indifferences that regulate an epoch than their carefully elaborated systems of thought? In *Paradigms for a Metaphorology*, originally published in 1960 and here made available for the first time in English translation, Hans Blumenberg (1920-1996) approaches these questions by examining the relationship between metaphors and concepts. Blumenberg argues for the existence of "absolute metaphors" that cannot be translated back into conceptual language. "Absolute metaphors" answer the supposedly naïve, theoretically unanswerable questions whose relevance lies quite simply in the fact that they cannot be brushed aside, since we do not pose them ourselves but find them already posed in the ground of our existence. They leap into a void that concepts are unable to fill. An afterword by the translator, Robert Savage, positions the book in the intellectual context of its time and explains its continuing importance for work in the history of ideas.

Dreams and Visions Nancy van Deusen 2010-01-13 An essential historical topos, *Dreams and Visions*--the second in a series that projects past issues into the present--brings significant contributions from an interdisciplinary spectrum of standpoints in order to discover fresh insights. Perhaps this is the essence, in any case, of "Vision"--to discover new, fresh, ways of conceptualizing a problem, topic, or historical inquiry, which is the goal of this volume.

Enrico Fermi, Physicist Emilio Segrè 2019-08-09 In this biography of Enrico Fermi (1901-54), who

won the Nobel Prize in physics in 1938 for his work on radioactivity by neutron bombardment and his discovery of transuranic elements and who achieved the first controlled nuclear chain reaction in Chicago in 1942, his student, collaborator, fellow Nobel Prize winner and lifelong friend Emilio Segrè presents the scientist, and explains in nontechnical terms Fermi's work and his achievements. "Segrè's description of Fermi's early life and his involvement with and commitment to physics is extremely interesting... Segrè understands and describes very clearly the outstanding characteristics of Fermi's theoretical work: clarity and completeness... Segrè has succeeded admirably in describing Fermi's entire scientific career, and this book is strongly recommended." — M. L. Goldberger, *Science* "We must thank Emilio Segrè for this authoritative, revealing and inspiring book. It covers in a masterly fashion the most exciting thirty years of modern physics and the character and activities of one of its greatest contributors." — *Nature* "A rich, well-rounded portrait of [Fermi] the scientist, his methods, intellectual history, and achievements. Explaining in nontechnical terms the scientific problems Fermi faced or solved, *Enrico Fermi, Physicist* contains illuminating material concerning Fermi's youth in Italy and the development of his scientific style." — *Physics Today* "All that might be hoped for in a biography of one Nobel Prize winner in physics by another has been realized in Emilio Segrè's biography of his friend, Enrico Fermi... A truly masterly drawing of Fermi's character, along with his physics and the events through which he moved, Segrè has provided us with a brilliant appreciation of one of the most pre-eminent figures of modern physics." — *Physics Bulletin* "This excellent biography, written by one of the original group who worked with him during the 1930s at Rome, catches beautifully the style and spirit of its subject... With Fermi's passing the age of the universal experimental and theoretical physicist is gone. Segrè's book tells the story of this heroic age of physics and of its principal actor; it is a delight to read, and I recommend it heartily." — *American Scientist* "Here we meet the man at work and we see the meticulous scientist... This book also shows us another facet of Fermi: that of the conscientious scientist torn between his love of pure research and his love of teaching." — V. Barocas, *Annals of Science* "Segrè is a sensitive biographer, responsive to all problems that can plague the creative scientist; he shows, above all, Fermi's dedication, zeal, and extraordinary talents. Segrè has provided more than sympathy. Much that is new about Fermi's youth in Italy appears here... [A] very rewarding book... Every physicist will want to read this biography, along with every reader who has an interest in intellectual developments during the 1920-1960 era." — J. Z. Fullmer, *The Ohio Journal of Science*

Managing the Risks of Organizational Accidents James Reason 2016-01-29 Major accidents are rare events due to the many barriers, safeguards and defences developed by modern technologies. But they continue to happen with saddening regularity and their human and financial consequences are all too often unacceptably catastrophic. One of the greatest challenges we face is to develop more effective ways of both understanding and limiting their occurrence. This lucid book presents a set of common principles to further our knowledge of the causes of major accidents in a wide variety of high-technology systems. It also describes tools and techniques for managing the risks of such organizational accidents that go beyond those currently available to system managers and safety professionals. James Reason deals comprehensively with the prevention of major accidents arising from human and organizational causes. He argues that the same general principles and management techniques are appropriate for many different domains. These include banks and insurance companies just as much as nuclear power plants, oil exploration and production companies, chemical process installations and air, sea and rail transport. Its unique combination of principles and practicalities make this seminal book essential reading for all whose daily business is to manage, audit and regulate hazardous technologies of all kinds. It is relevant to those concerned with understanding and controlling human and organizational factors and will also interest academic readers and those working in industrial and government agencies.

Reading Acquisition Philip B. Gough 2017-11-27 Originally published in 1992. This book brings together the work of a number of distinguished international researchers engaged in basic research on beginning reading. Individual chapters address various processes and problems in learning to read - including how acquisition gets underway, the contribution of story listening experiences, what is involved in learning to read words, and how readers represent information about written words in memory. In addition, the chapter contributors consider how phonological, onset-rime, and syntactic awareness contribute to reading acquisition, how learning to spell is involved, how reading ability can be explained as a combination of decoding skill plus listening comprehension skill, and what causes reading difficulties and how to study these causes.

Supports N.J. Habraken 2021-07-29 First translated in English ten years after its original Dutch publication in 1962, this book has inspired practitioners for generations. It's proposal to distinguish the infill from the support - what users can individually decide in a housing process from what users share - has turned out to be feasible in practice. The Natural Relation - the interaction of people with their immediate environment and the central concept of the book - is the result of that distinction. It is essential to the well-being of everyday environment regardless of function or available resources.

Structural Anthropology Claude Lévi-Strauss 2008-08-05 The "structural method," first set forth in this epoch-making book, changed the very face of social anthropology. This reissue of a classic will reintroduce readers to Lévi-Strauss's understanding of man and society in terms of individuals—kinship, social organization, religion, mythology, and art.

Education Outside the Classroom Great Britain. Parliament. House of Commons. Education and Skills Committee 2005 The Committee's report examines the wide range of outdoor learning experiences, from lessons held within school grounds to residential expeditions abroad, and considers the place of outdoor learning in the curriculum from foundation stage to higher education. Issues discussed include: the value of outdoor learning and the decline of opportunities for educational opportunities outside the classroom; the barriers that deter schools from teaching outside the classroom, including perceptions of risks in school trips, the resources and curriculum time available for such trips, availability and costs involved; policy options for the Department for Education and Skills to help encourage schools improve and expand provision for outdoor learning; and funding implications. The Committee's recommendations include that the DfES should issue a Manifesto for Outdoor Learning which gives all students the right to outdoor learning and which should attract a similar funding level to the music manifesto (around £30 million) in order to deliver real change.

Modernism in Italian Architecture, 1890-1940 Richard A. Etlin 1991 Winner, category of Architecture and Urban Studies in the 1991 Professional/Scholarly Publishing Annual Awards Competition presented by the Association of American Publishers, Inc. and Winner, Alice Davis Hitchcock Award, Society of Architectural Historians. Richard Etlin's sweeping, generously illustrated study explores the changing idea of modernism in Italian architecture over the five crucial decades that saw the birth and crystallization of modern architecture. Systematically treating the major architects and movements of the period - such as Raimondo D'Aronco and Art Nouveau, Antonio Sant'Elia and Futurism, Marcello Piacentini and the modern vernacular, Giovanni Muzio and the Novecento, Giuseppe Terragni and Italian Rationalism - this book also explores the ways in which the original ideals of the various movements were transformed by working for the Fascist state. *Modernism in Italian Architecture* examines the legacy of the romantic revolution, which confronted architects with the dilemma of how to create an architecture that was both modern and national. It challenges accepted opinion on a variety of issues. Etlin argues against too close an association of Sant'Elia's architecture and manifesto with Futurism by demonstrating a broader context for its themes. His study of Novecento architecture chronicles a movement whose use of classical detailing created a "postmodernism" contemporaneous with the pioneering buildings of the International Style elsewhere in Europe and preceding its arrival in Italy. Etlin undermines the

notion that the architects of Italian Rationalism blindly followed an antihistorical credo, by bringing to fight the profoundly contextual nature of the abstract geometries of the best Rationalist architecture. The final section, devoted to Fascism, focuses on Terragni's famous Casa del Fascio in Como and the Danteurn project by Terragni and Lingeri. Etlin concludes with a consideration of the anti-Semitic attacks on modern architecture during the Fascist racial campaign of 1938. Richard Etlin is Professor in the School of Architecture at the University of Maryland.

Architecture's Historical Turn Jorge Otero-Pailos 2013-11-30 Architecture's Historical Turn traces the hidden history of architectural phenomenology, a movement that reflected a key turning point in the early phases of postmodernism and a legitimating source for those architects who first dared to confront history as an intellectual problem and not merely as a stylistic question. Jorge Otero-Pailos shows how architectural phenomenology radically transformed how architects engaged, theorized, and produced history. In the first critical intellectual account of the movement, Otero-Pailos discusses the contributions of leading members, including Jean Labatut, Charles Moore, Christian Norberg-Schulz, and Kenneth Frampton. For architects maturing after World War II, Otero-Pailos contends, architectural history was a problem rather than a given. Paradoxically, their awareness of modernism's historicity led some of them to search for an ahistorical experiential constant that might underpin all architectural expression. They drew from phenomenology, exploring the work of Bachelard, Merleau-Ponty, Heidegger, and Ricoeur, which they translated for architectural audiences. Initially, the concept that experience could be a timeless architectural language provided a unifying intellectual basis for the stylistic pluralism that characterized postmodernism. It helped give theory—especially the theory of architectural history—a new importance over practice. However, as Otero-Pailos makes clear, architectural phenomenologists could not accept the idea of theory as an end in itself. In the mid-1980s they were caught in the contradictory and untenable position of having to formulate their own demotion of theory. Otero-Pailos reveals how, ultimately, the rise of architectural phenomenology played a crucial double role in the rise of postmodernism, creating the antimodern specter of a historical consciousness and offering the modern notion of essential experience as the means to defeat it.

Out of This Century: The Informal Memoirs of Peggy Guggenheim Peggy Guggenheim 2016-02-06 I have no memory. I always say to my friends, "Don't tell me anything you don't want repeated. I just can't remember not to." Invariably I forget and I repeat everything. In 1923 I began to write my memoirs. They began like this: "I come from two of the best Jewish families. One of my grandfathers was born in a stable like Jesus Christ or, rather, over a stable in Bavaria, and my other grandfather was a peddler." I don't seem to have gotten very far with this book. Maybe I had nothing to say, or possibly I was too young for the task which I had set myself. Now I feel I am ripe for it. By waiting too long I may forget everything I have somehow managed to remember. If my grandfathers started life modestly they ended it sumptuously. My stable-born grandfather, Mr. Seligman, came to America in steerage, with forty dollars in his pocket and contracted smallpox on board ship. He began his fortune by being a roof shingler and later by making uniforms for the Union Army in the Civil War. Later he became a renowned banker and president of Temple Emanu-el. Socially he got way beyond my other grandfather, Mr. Guggenheim the peddler, who was born in St. Gallen in German Switzerland. Mr. Guggenheim far surpassed Mr. Seligman in amassing an enormous fortune and buying up most of the copper mines of the world, but he never succeeded in attaining Mr. Seligman's social distinction. In fact, when my mother married Benjamin Guggenheim the Seligmans considered it a mésalliance. To explain that she was marrying into the well known smelting family, they sent a cable to their kin in Europe saying, "Florette engaged Guggenheim smelter." This became a great family joke, as the cable misread "Guggenheim smelt her." By the time I was born the Seligmans and the Guggenheims were extremely rich. At least the Guggenheims were and the Seligmans hadn't done so badly. My grandfather, James Seligman, was a very modest man who refused to spend money on himself and underfed his trained nurse. He lived sparsely and gave everything to his children and grandchildren. He remembered all our birthdays and, although he did not die until ninety-three, he never failed to make out a check on these occasions. The checks were

innumerable, as he had eleven children and fifteen grandchildren. Most of his children were peculiar, if not mad. That was because of the bad inheritance they received from my grandmother. My grandfather finally had to leave her. She must have been objectionable. My mother told me that she could never invite young men to her home without a scene from her mother. My grandmother went around to shopkeepers and, as she leaned over the counter, asked them confidentially, "When do you think my husband last slept with me?" My mother's brothers and sisters were very eccentric. One of my favorite aunts was an incurable soprano. If you happened to meet her on the corner of Fifth Avenue while waiting for a bus, she would open her mouth wide and sing scales trying to make you do as much. She wore her hat hanging off the back of her head or tilted over one ear. A rose was always stuck in her hair. Long hatpins emerged dangerously, not from her hat, but from her hair. Her trailing dresses swept up the dust of the streets. She invariably wore a feather boa. She was an excellent cook and made beautiful tomato jelly. Whenever she wasn't at the piano, she could be found in the kitchen or reading the ticker-tape. She was an inveterate gambler. She had a strange complex about germs and was forever wiping her furniture with lysol. But she had such extraordinary charm that I really loved her. I cannot say her husband felt as much. After he had fought with her for over thirty years, he tried to kill her and one of her sons by hitting them with a golf club. Not succeeding, he rushed to the reservoir where he drowned himself with heavy weights tied to his feet.

Naming the Witch Kimberly B. Stratton 2022-05-03 Kimberly B. Stratton investigates the cultural and ideological motivations behind early imaginings of the magician, the sorceress, and the witch in the ancient world. Accusations of magic could carry the death penalty or, at the very least, marginalize the person or group they targeted. But Stratton moves beyond the popular view of these accusations as mere slander. In her view, representations and accusations of sorcery mirror the complex struggle of ancient societies to define authority, legitimacy, and Otherness. Stratton argues that the concept "magic" first emerged as a discourse in ancient Athens where it operated part and parcel of the struggle to define Greek identity in opposition to the uncivilized "barbarian" following the Persian Wars. The idea of magic then spread throughout the Hellenized world and Rome, reflecting and adapting to political forces, values, and social concerns in each society. Stratton considers the portrayal of witches and magicians in the literature of four related periods and cultures: classical Athens, early imperial Rome, pre-Constantine Christianity, and rabbinic Judaism. She compares patterns in their representations of magic and analyzes the relationship between these stereotypes and the social factors that shaped them. Stratton's comparative approach illuminates the degree to which magic was (and still is) a cultural construct that depended upon and reflected particular social contexts. Unlike most previous studies of magic, which treated the classical world separately from antique Judaism, Naming the Witch highlights the degree to which these ancient cultures shared ideas about power and legitimate authority, even while constructing and deploying those ideas in different ways. The book also interrogates the common association of women with magic, denaturalizing the gendered stereotype in the process. Drawing on Michel Foucault's notion of discourse as well as the work of other contemporary theorists, such as Homi K. Bhabha and Bruce Lincoln, Stratton's bewitching study presents a more nuanced, ideologically

sensitive approach to understanding the witch in Western history.

The Periodic Table Primo Levi 1996-10-01 The Periodic Table is largely a memoir of the years before and after Primo Levi's transportation from his native Italy to Auschwitz as an anti-Fascist partisan and a Jew. It recounts, in clear, precise, unfailingly beautiful prose, the story of the Piedmontese Jewish community from which Levi came, of his years as a student and young chemist at the inception of the Second World War, and of his investigations into the nature of the material world. As such, it provides crucial links and backgrounds, both personal and intellectual, in the tremendous project of remembrance that is Levi's gift to posterity. But far from being a prologue to his experience of the Holocaust, Levi's masterpiece represents his most impassioned response to the events that engulfed him. The Periodic Table celebrates the pleasures of love and friendship and the search for meaning, and stands as a monument to those things in us that are capable of resisting and enduring in the face of tyranny.

After the Death of Childhood David Buckingham 2013-06-06 What will be the fate of childhood in the twenty-first century? Will children increasingly be living 'media childhoods', dominated by the electronic screen? Will their growing access to adult media help to abolish the distinctions between childhood and adulthood? Or will the advent of new media technologies widen the gaps between the generations still further? In this book, David Buckingham provides a lucid and accessible overview of recent changes both in childhood and in the media environment. He refutes simplistic moral panics about the negative influence of the media, and the exaggerated optimism about the 'electronic generation'. In the process, he points to the challenges that are posed by the proliferation of new technologies, the privatization of the media and of public space, and the polarization between media-rich and media-poor. He argues that children can no longer be excluded or protected from the adult world of violence, commercialism and politics; and that new strategies and policies are needed in order to protect their rights as citizens and as consumers. Based on extensive research, *After the Death of Childhood* takes a fresh look at well-established concerns about the effects of the media on children. It offers a challenging and refreshing approach to the perennial concerns of researchers, parents, educators, media producers and policy-makers.

The Holocaust and the Postmodern Robert Eaglestone 2004-12-09 Robert Eaglestone argues that postmodernism is a response to the Holocaust. He offers a range of new perspectives, including new ways of looking at testimony and at and recent Holocaust fiction; explores controversies in Holocaust history; looks at the importance of the Holocaust for recent philosophy; and asks what the Holocaust means for reason, ethics, and for being human.

Blood Brotherhoods John Dickie 2014-04-22 MAFIA. CAMORRA. 'NDRANGHETA. The Sicilian mafia, known as Cosa Nostra, is far from being Italy's only dangerous criminal fraternity. The country hosts two other major mafias: the camorra from Naples; and, from the poor and isolated region of Calabria, the mysterious 'ndrangheta, which has now risen to become the most powerful mob group active today. Since they emerged, the mafias have all corrupted Italy's institutions, drastically curtailed the life-chances of its citizens, evaded justice, and set up their own self-interested meddling as an alternative to the courts. Yet each of these brotherhoods has its own methods, its own dark rituals, its own style of ferocity. Each is uniquely adapted to corrupt and exploit its own specific environment, as it collaborates with, learns from, and goes to war with the other mafias. Today, the shadow of organized crime hangs over a country racked by debt, political paralysis, and widespread corruption. The 'ndrangheta controls much of Europe's wholesale cocaine trade and, by some estimates, 3 percent of Italy's total GDP. *Blood Brotherhoods* traces the origins of this national malaise back to Italy's roots as a united country in the nineteenth century, and shows how political violence incubated underworld sects among the lemon groves of Palermo, the fetid slums of Naples, and the harsh mountain villages of Calabria. *Blood Brotherhoods* is a book of breathtaking ambition, tracing for the first time the interlocking story of all three mafias from their origins to the present

day. John Dickie is recognized in Italy as one of the foremost historians of organized crime. In these pages, he blends archival detective work, passionate narrative, and shrewd analysis to bring a unique criminal ecosystem—and the three terrifying criminal brotherhoods that have evolved within it—to life on the page.

The Architecture of Pica Ciamarra Associati Antonietta Iolanda Lima 2019-04 Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlights the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embrace innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life.

The Museum of Non-Objective Painting Tracey R. Bashkoff 2009 Considering in depth the origins of the Solomon R. Guggenheim Museum when it was first known as the Museum of Non-Objective Painting, this volume reveals for the first time the museum's complex and sometimes twisted architectural history and the ambitious exhibition programme organized by Hilla Rebay, the museum's founding Director and Curator from 1939 to 1952. Through the extensive correspondence between Rebay and Rudolf Bauer the artist whose work Guggenheim collected exhaustively Karol Vail reveals the important role Bauer played in envisioning the collection and the museum. Fully illustrated throughout, and featuring extensive previously unpublished archival materials, this book provides essential reading and a rich reference of the Guggenheims' multifaceted and fascinating history.
