La ricerca che cambia Mauro Marzo 2015-11-11 Costruzioni, emergenze, futuri, paesaggi, patrimoni, politiche, processi, scale, storie, teorie. L'e-book si articola intorno a queste dieci parole-chiave, presentando in forma di saggi brevi temi e oggetti di studio delle ricerche dottorali di circa 60 giovani studiosi. Esito del primo convegno nazionale dei dottorati dell'architettura, della pianificazione e del design, svoltosi presso l'Università Iuav di Venezia nel novembre 2014, il libro intreccia vari punti di vista, attivando un confronto a partire dai problemi e dalle questioni, piuttosto che dalle compartimentazioni dei settori disciplinari. Saggi introduttivi di Monica Centanni, Lorenzo Fabian, Alberto Ferlenga e Mauro Marzo.

Patologia e avversità dell'alveare Emanuele Carpana 2014-06-14 In questo volume vengono descritti i numerosi aspetti della patologia delle api con prospettive diverse e molteplici, tali da raggiungere destinatari diversi: l'apicoltore, il tecnico addetto all'assistenza sanitaria, il veterinario, il naturalista, il ricercatore, lo studente. Accanto alle nozioni più aggiornate, infatti, sono sempre presenti un gran numero di indicazioni operative. A un livello tecnico-scientifico vengono affrontate tutte le patologie conosciute delle api e, più in generale, le problematiche sanitarie dell'apicoltura: dall'epidemiologia alla normativa, dalle avversità ambientali ai residui nei prodotti dell'alveare. Le indicazioni tecniche, soprattutto nel campo della profilassi, rendono questo volume particolarmente interessante anche dal punto di vista pratico, anche grazie a un apparato iconografico particolarmente ricco.

La ricerca che cambia Lorenzo Fabian 2018-03-29 Questo libro raccoglie gli atti del secondo Convegno nazionale dei dottorati italiani dell'architettura, della pianificazione e del design La ricerca che cambia, svoltosi il 1° e il 2 dicembre 2016 presso la Scuola di dottorato dell'Università Iuav di Venezia. L'obiettivo che si pone è duplice: da una parte lasciare una traccia, sia pur sintetica, di quanto è stato esposto e dibattuto nelle sessioni plenarie del convegno e nei workshop dei coordinatori, dall'altra dare ampio spazio alle questioni affrontate dalle tesi di dottorato selezionate attraverso un processo di selezione anonima e presentate in tavoli di discussione paralleli. Sono otto i temi che, in maniera trasversale alle diverse discipline, costituiscono i fuochi di interesse intorno a cui si articolano i vari capitoli di questo e-book: cambiamenti, luoghi, modelli, narrazioni, riusi, spazi, storie, strutture. I saggi affrontano questioni che attengono a tali temi secondo gli specifici punti di vista dei molti settori disciplinari che spaziano dall'ICAR/10 all'ICAR/21. Per quanto distanti possano sembrare specializzazioni e competenze di questi settori, essi hanno le stesse radici e sono sicuramente ancora dialoganti. È il progetto - il fare ricerca attraverso il progetto - ad accomunare queste discipline ed è per questo che, nel quadro generale sempre più instabile e mutevole nel quale i dottorati si trovano a operare, il libro prova a sollevare una domanda: qual è il progetto dei dottorati che del progetto si occupano? A imbastire prime possibili risposte sono i contributi di dottorandi e dottori di ricerca, e i saggi di: Benno Albrecht, Sara Basso, Cristina Bianchetti, Renato

Bocchi, Francesca Castanò, Giuseppe D'Acunto, Lorenzo Fabian, Alberto Ferlenga, Laura Fregolent, Luca Guerrini, Fabrizia Ippolito, Giovanni Leoni, Antonio Longo, Mauro Marzo, Luca Monica, Corinna Nicosia, Domenico Patassini, Massimo Perriccioli, Marco Pretelli, Michelangelo Russo, Antonino Saggio, Michelangelo Savino, Maria Chiara Tosi, Alessandra Tosone.

AGREP Commission of the European Communities 1980 The Permanent Inventory of Agricultural REsearch Projects (AGREP) is an information system on current projects in agriculture and related fields in the Member States of the European Communities (Belgium, Denmark, Federal Republic of Germany, France, Ireland, Italy, Luxembourg, the Netherlands and the United Kingdom). Its creation is based upon a regulation of the Council of Ministers of the European Communities concerning the coordination of agricultural research (Council Regulation No 1728174 of 27 June, 1974). AGREP covers agriculture in an extensive sense of the word, i.e. including fields like fisheries and forestry, land use and development, conservation of nature, veterinary medicine, food science and technology, as well as agricultural economics and rural sociology. A detailed scope description is given in the subject classification facets "fields of research" and "subject areas" as presented on the introductory pages of the two printed volumes. The data base is fully computerized. It is available in printed form and on magnetic tape. On-line access is offered by EURONETIDIANE (DIrect Access Network for Europe). The data base is updated annually. The ,1980 issue of AGREP contains about 21.000 title citations of agricultural research projects. AGREP is a cooperative system. The national focal points (NFPs) collect input and provide it in an agreed format to the Commission which sponsors the management of the system and the provision of output to the Member Countries.
