What if the colonization of a large portion of North America had been dominated by one of Europe's small nations instead of, as actually happened, by the great powers of France, Britain and Spain? Specifically, Denmark. In real history, Denmark did have a few small settlements in the Caribbean, but they never amounted to much. But what if, given the very different parameters of the power equations produced by the arrival of Grantville, Denmark had been able to dominate a large portion of what is today called "Canada"? The possible ramifications were fascinating to me. A nation like early 17th century Denmark didn't have the military power or the population to simply overwhelm the indigenous peoples of North America. Willy-nilly, whether they wanted to or not, Danish settlers would have to develop a modus vivendi with the people they encountered in the New World. The hybrid societies which the French settlements originally produced such as the metis, which were cut short by the British victory in the

Seven Years War, might have emerged and become more stable and long-lasting. Who could say? It seemed to me that Herb's project was interesting enough to support--and no matter what the final outcome, was bound to produce a number of good stories. So, here we are, with the second volume of that project. I hope you enjoy it.

From the arrival of the earliest humans to the very latest scientific controversies, the environmental history of Canada and Arctic North America is dramatic, diverse, and crucial for the very survival of the human race. Packed with key facts and analysis, this expert guide explores the complex interplay between human societies and the environment from the Aleutian Islands to the Grand Banks and from the Great Lakes to the Arctic Islands How has the challenging environment of America's most northerly regions—with some areas still dominated by native peoples—helped shape politics and trade? What have been the consequences of European contact with this region and its indigenous inhabitants? How did natives and newcomers cope with, and change this vast and forbidding territory? has set out to let you know in his short novel "The Danish Scheme." Christian IV, King of Denmark, Sir Thomas Roe, the English Ambassador to Christian's court, various elements of the extended Nasi/Abrabanel family have arranged an unusually well funded and well led expedition to North America. In addition to a new version of this story, which had previously been published in the Grantville Gazette, Eric Flint has added a short story which provides a view of the same events from Magdeburg. What does the Stearns administration make of all this? A worthy addition to the 1632 series, the first of a series of new books published under the imprint of the "Ring of Fire Press." to make available stories and information which there simply isn't time for in Baen's publishing schedule. These stories were simply too long to be included in any of the paper anthologies published by Baen Books. At the same time, we felt it would be useful (and hopefully popular) to put them together in unitary volumes so that people who want to re-read them, or read them for the first time, don't have to hunt for them scattered over a number of separate issues of the magazine.

Using documentary evidence and vivid first-hand accounts, it offers a new perspective on the often tragic, sometimes heroic, English attempts at settlement.
