Science and Conservation for Museum Collection Bruno Fabbri 2017-06-06 The idea of the book “Science and Conservation for Museum Collections” was born as a result of the experience made by CNR-ISTEC (Faenza) in the implementation of a course for Syrian restorers at the National Museum in Damascus. The book takes into consideration archaeological artefacts made out of the most common materials, like stones (both natural and artificial), mosaics, ceramics, glass, metals, wood and textiles, together with less diffuse artefacts and materials, like clay tablets, goldsmith artefacts, icons, leather and skin objects, bones and ivory, coral and mother of pearl. Each type of material is treated from four different points of view: composition and processing technology; alteration and degradation causes and mechanisms; procedures for conservative intervention; case studies and/or examples of conservation and restoration. Due to the high number of materials and to the great difference between their conservation problems, all the subjects are treated in a schematic, but precise and complete way. The book is mainly addressed to students, young restorers, conservators and conservation scientists all around the world. But the book can be usefully read by expert professionals too, because nobody can know everything and the experts often need to learn something of the materials not included in their specific knowledge. Twenty- two experts in very different fields of activity contributed with their experience for obtaining a good product. All they are Italian experts, or working in Italy, so that the book can be seen as an exemplification on how the conservation problem of Cultural Heritage is received and tackled in Italy.

The Conservatory of Santa Teresa Bilenchi, Romano 2015-10-22 This volume is the first translation of Romano Bilenchi's 1940 masterpiece to appear in English. This is surprising since The Conservatory of Santa Teresa is much more than an invaluable historical document of life in provincial Tuscany around the time of the First World War. It is truly one of the most important works of fiction published in Italy under Fascism. In telling of the pre-adolescent Sergio's encounter with the larger world of sex, politics, and the violence and cruelty of adult life, Bilenchi succeeds in representing a universal paradigm, that of the clash of innocence with experience. But what makes Sergio's trajectory unique is that he goes through it in the company of three extraordinary women who are at once femmes fatales and benevolent guides: his mother, his aunt, and his tutor, all almost unbearably beautiful, as least in Sergio's eyes. These women, plus the dazzling landscape of the Sieneese countryside as captured by Bilenchi, make Sergio's journey an enviable even if sometimes painful and bewildering experience.

Law and Intersystemic Communication Assoc Prof Gorm Harste 2013-04-28 With contributions from experts in the field of sociology of law, this book provides an overview of current perspectives on socio-legal studies. It focuses particularly on the relationship between law and society described in recent social systems theory as 'structural coupling'. The first part of the book presents a reconstruction of theoretical tendencies in the field of socio-legal studies, characterised by the emergence of a transnational model of legal systems no longer connected to territorial borders and culturally specific aspects of single legal orders. In the following parts of the book, the contributions analyse some concrete cases of interrelation between law and society from an empirical and theoretical perspective.

Cleaning Painted Surfaces Richard Wolbers 2000 This book contributes significantly to the selection of appropriate and controllable cleaning methods for varnished and unvarnished paint surfaces. It is a distillation of many years' experience of formulating a cleaning treatment for any given object. The general principles of the chemistry and the practical applications are described. The methods are applicable to the surface cleaning of both traditional and modern paint media found on sculptures, ethnographic materials, paintings, gilded surfaces and furniture. Aqueous methods are

certainly worth considering for those surfaces which cannot be cleaned safely by methods based on solvents.

The Originality of the Avant-Garde and Other Modernist Myths Rosalind E. Krauss 1986-07-09 Co-founder and co-editor of October magazine, a veteran of Artforum of the 1960s and early 1970s, Rosalind Krauss has presided over and shared in the major formulation of the theory of postmodernism. In this challenging collection of fifteen essays, most of which originally appeared in October, she explores the ways in which the break in style that produced postmodernism has forced a change in our various understandings of twentieth-century art, beginning with the almost mythic idea of the avant-garde. Krauss uses the analytical tools of semiology, structuralism, and poststructuralism to reveal new meanings in the visual arts and to critique the way other prominent practitioners of art and literary history write about art. In two sections, "Modernist Myths" and "Toward Postmodernism," her essays range from the problem of the grid in painting and the unity of Giacometti's sculpture to the works of Jackson Pollock, Sol Lewitt, and Richard Serra, and observations about major trends in contemporary literary criticism.

Ravenna Dominante Teseo Francesco Dal Corno 2009-01-11 In 3D con gli opportuni riferimenti ipertestuali, l'affascinante storia di Ravenna nei primi tre secoli dalla caduta di Roma, quando sola, resse le sorti della Civiltà in occidente; con la descrizione dei monumenti ora catalogati dall'UNESCO come patrimonio dell'umanità. Da non perdere la dettagliata biografia di tutti gli Esarchi che ivi ressero le sorti della civiltà confrontantesi con l'irrompere delle invasioni barbariche. Acquista anche:

The Beginning of the Use of Metals and Alloys Robert Maddin 1988 These thirty original essays form a landmark contribution to the history of metallurgy: together they present the first systematic survey of the beginning of the use of metals and alloys throughout the world. What distinguishes the book as a whole is the orientation of the writers toward seeing the objects they uncover in human-historical terms, reminding us that at all stages in history and in every part of the world, cultural change and advances in the use of metals are often closely intertwined. The articles are arranged in roughly chronological-geographical order; some are specific studies of sites, objects, and processes; others examine more general aspects of archaeometallurgy within a general field that has come to be called "archaeometry"; and still others are interpretive and reflective essays on human history and cultural change (a particularly fine example of this approach is Heather Lechtman's essay on Central Andean metalworking). Archaeologists, historians, metallurgists, chemists, and geologists cover topics as diverse as iron trade in northern Scandinavia, the fabrication of gold foil in Japan, copper mining in eastern India, prehistoric metallurgy in Thailand, iron bloomery in Africa, early copper smelting in Palestine, and Chinese techniques for casting old belt plaques. And in his Foreword, Cyril Stanley Smith proposes structural metaphors that describe the historical reworkings of human society in terms of the transformations of materials. Robert Maddin is Honorary Curator of Archaeological Sciences, Peabody Museum of Archaeology and Ethnology, Harvard University. *The Beginning of the Use of Metals and Alloys* was derived from the second international conference on the subject, held in Zhengzhou, China in 1986.

Encompassing the Globe Jay A. Levenson 2007-09 Portugal's contacts with the venerable kingdoms and empires of Africa and Asia, and later with the vast expanse of Brazil, led to unprecedented examples of cultural exchange, including the creation of strikingly beautiful and highly original works of art. Encompassing the Globe features more than 250 full-color reproductions of extraordinary creations that demonstrate how the Portuguese forged links among the continents and began cross-cultural dialogues. Essays by leading authorities shed light on the principal personalities of the period, the economic and religious motivations behind Portuguese expansion, and the technological advances that made the new sea routes navigable.

Conservation Concerns Konstanze Bachmann 2012-01-11 Written in accessible, nontechnical language, this book's twenty-three essays provide invaluable conservation guidelines for a variety of materials and media. Focusing also on proper storage techniques and environmental control, contributors offer information on emergency planning, disaster management, and identifying damages that may require professional treatment.

The Theatrical Instinct Sharon Marie Carnicke 1989 Nikolai Evreinov, a major force in the Russian avant-garde theatre, won international fame in the 1920's. His harlequinades were produced by such greats as Dullin in France, Pirandello in Italy, and the Theatre Guild on Broadway. As playwright, director, and theorist, Evreinov anticipated major developments in the twentieth century theatre: metatheatrical plays, environmental staging, and the study of performance through anthropology, ritual, and role-playing in everyday life. Carnicke examines Evreinov's theories in light of the artistry of his plays. She clarifies his most influential ideas and reclaims his central role in modern theatre history.

Privacy-Aware Knowledge Discovery Francesco Bonchi 2010-12-02 Covering research at the frontier of this field, Privacy-Aware Knowledge Discovery: Novel Applications and New Techniques presents state-of-the-art privacy-preserving data mining techniques for application domains, such

as medicine and social networks, that face the increasing heterogeneity and complexity of new forms of data. Renowned authorities from prominent organizations not only cover well-established results—they also explore complex domains where privacy issues are generally clear and well defined, but the solutions are still preliminary and in continuous development. Divided into seven parts, the book provides in-depth coverage of the most novel reference scenarios for privacy-preserving techniques. The first part gives general techniques that can be applied to various applications discussed in the rest of the book. The second section focuses on the sanitization of network traces and privacy in data stream mining. After the third part on privacy in spatio-temporal data mining and mobility data analysis, the book examines time series analysis in the fourth section, explaining how a perturbation method and a segment-based method can tackle privacy issues of time series data. The fifth section on biomedical data addresses genomic data as well as the problem of privacy-aware information sharing of health data. In the sixth section on web applications, the book deals with query log mining and web recommender systems. The final part on social networks analyzes privacy issues related to the management of social network data under different perspectives. While several new results have recently occurred in the privacy, database, and data mining research communities, a uniform presentation of up-to-date techniques and applications is lacking. Filling this void, *Privacy-Aware Knowledge Discovery* presents novel algorithms, patterns, and models, along with a significant collection of open problems for future investigation.

Modern Conflict and the Senses Nicholas J. Saunders 2017-03-16 *Modern Conflict and the Senses* investigates the sensual worlds created by modern war, focusing on the sensorial responses embodied in and provoked by the materiality of conflict and its aftermath. The volume positions the industrialized nature of twentieth-century war as a unique cultural phenomenon, in possession of a material and psychological intensity that embodies the extremes of human behaviour, from total economic mobilization to the unbearable sadness of individual loss. Adopting a coherent and integrated hybrid approach to the complexities of modern conflict, the book considers issues of memory, identity, and emotion through wartime experiences of tangible sensations and bodily requirements. This comprehensive and interdisciplinary collection draws upon archaeology, anthropology, military and cultural history, art history, cultural geography, and museum and heritage studies in order to revitalize our understandings of the role of the senses in conflict.
