Edition is a modern and teachable casebook, offering comprehensive coverage and a mix of interdisciplinary materials. It compares innovative developments in some states with the reaffirmation of traditional principles in others, and does so in the context of a wider focus on family and the state, the role of mediating institutions, and the efficacy of law and particular methods of enforcing the law. The casebook deals with the complexity of family law both in the organization of the chapters—separate units on family contracts, jurisdiction, and practice, for example, can be shortened, skipped, or taught in almost any order—and the diversity of material within each chapter. Each unit combines primary cases with comprehensive notes, supplemented with academic and policy analyses that provide a foundation for evaluation. Detailed problems extend the coverage or apply the commentary to real world examples. Key Features: A streamlined and updated chapter on the legal significance of being married, including an updated section on reproductive rights to reflect the potential influence of *Whole Woman’s Health v. Hellersted* Major revisions to the chapters on marriage and informal domestic partnerships to reflect the impact of *Obergefell v. Hodges* A complete update of the parentage cases to incorporate the latest developments on same-sex partners, three parent recognition, third party visitation, adoption, and assisted reproduction Revised sections on the role of settlement agreements and out-of-court processes in divorce and the dissolution of relationships Coverage of cross-disciplinary topics, including financial principles, genetics/statistics, clinical psychology, social history, policy discussions, counseling, negotiation, ADR, and ethics

Landmark Cases in Family Law Stephen Gilmore 2011-07-01

There are a number of important (landmark) cases in the development of Family Law in England and Wales that deserve detailed examination and lend themselves particularly well to historical examination. Family law cases tend to raise highly controversial issues, often on striking facts, frequently provoking wider social debate and/or extensive publicity. Consequently, the landmark cases chosen for this collection provide considerable scope, not only for doctrinal analysis and explanation of the importance and impact of the decisions, but also for in-depth examination of the social or policy developments that influenced them. The stories behind the cases provide a fascinating insight into the complexities of family life and the drama that can be found in the family courts. In recent years, Family Law has seen enormous changes in law's engagement with the notion of 'family', with the enactment, for example, of the Civil Partnership Act 2004, the Gender Recognition Act 2004 and, more recently, the Human Fertilisation and Embryology Act 2008. As we begin to move forward into the new millennium, this is an excellent time to engage in detailed analyses and 'stock-taking' of the landmark decisions, many of which were decided in the 1970s, and which have shaped modern Family Law. This book provides a series of in-depth studies of the key leading cases, and will be of interest to students and lecturers alike.

Learning Legal Reasoning John Delaney 1987 Publisher description: This widely used book in many printings begins with answers to forty commonly asked questions of first-year law students. It specifies a six-step approach to briefing a case with specific guidelines for accomplishing each step. The process of briefing cases is then demonstrated with excellent and poor briefs of increasing complexity. Emphasis is placed initially on the techniques of briefing as an introduction to the learning of legal reasoning, the first priority of the first year of law school. In addition, the book also demonstrates the relevance of more advanced modes of legal reasoning, including positivist, pragmatic, policy oriented, natural-law and other perspectives applied in decoding and understanding cases. In its introduction
