The Problematic Structure of Management of Co-Owned Properties in Turkish Law and Pursuance of Solutions Eylem Apaydin 2011-01-18 This book provides a critical evaluation of the statutory framework for co-ownership regulations in Turkish law and it acquaints Turkish jurists with the existence of trust of land in English law. It is posited upon the argument that solutions to the problems observed in the administration and enjoyment of co-owned properties in Turkish law may be overcome by the introduction of a new institution, which is inspired by the trust mechanism in English law. This renders the existing Turkish regulation for the management of the co-owned properties outdated, unreasonably complex, and extremely artificial with some assumptions. After successfully establishing that the Turkish system is currently inadequate to provide an efficient system, this book provides the indications for a solution. Being aware of the limitations of the Turkish legal system and the restricted possibility of the direct reception of trust, this book examines to what extent the current institutions in Turkish law would replace the functions of trust in the context of co-ownership. This examination results in searching for a new system as it is concluded that any of the trust-like devices in the current Turkish law could not effectively and comprehensively serve the purposes that the English trust does. Therefore, this book suggests that a new mechanism, inspired by the English trust of land, would provide the required mechanisms for an efficient managerial system for co-owned properties. Rather than asserting to solely focus on a comprehensive new system, this book discusses the possible solutions and urges further research about the matter. Hence, the so-called alien system, trust of land, and its capability to provide an alternative but efficient and productive solution to the managerial problems of the co-owned properties, would be made familiar with the Turkish jurists.

The Canadian Teacher ... Gideon E. Henderson 1900

American Slavers Sean M. Kelley 2023-05-30 The first telling of the unknown story of America’s two-hundred-year history as a slave-trading nation. A total of 305,000 enslaved Africans arrived in the New World aboard American vessels over a span of two hundred years as American merchants and mariners sailed to Africa and to the Caribbean to acquire and sell captives. Using exhaustive archival research, including many collections that have never been used before, historian Sean M. Kelley argues that slave trading needs to be seen as integral to the larger story of American slavery. Engaging with both African and American history and addressing the trade over time, Kelley examines the experience of captivity, drawing on more than a hundred African narratives to offer a portrait of enslavement in the regions of Africa frequented by American ships. Kelley also provides a social history of the two American ports where slave trading was most intensive, Newport and Bristol, Rhode Island. In telling this tragic, brutal, and largely unknown story, Kelley corrects many misconceptions while leaving no doubt that Americans were a nation of slave traders.

Plural Ownership Roger John Smith 2005 Plural Ownership is a thorough and thought-provoking analysis focusing on the principles underlying two areas of property law: concurrent ownership and successive ownership. Smith first considers the range of rights recognised by the law and the ways in which these rights operate, (in particular severance of joint tenancies). The book then moves on to survey the regulation of these rights, principally by statute, providing a detailed examination of the Trusts of Land and Appointment of Trustees Act 1996, and exploring the principles behind the Act. He provides an in-depth investigation of this legislation, together with the cases discussing it, and the ways in which it relates to earlier principles and authorities.
