**The Parisi** Peter Halkon 2013-10-01 According to the ancient Greek geographer Ptolemy, the Parisi tribe occupied the area of the present-day East Riding of Yorkshire during the Roman period. **Post-medieval Pottery, 1650-1800** Jo Draper 2008-03-04 The period from 1650 to 1800 is the most interesting and complex time in the development of English ceramics, with new types of pottery being developed all through that period, and with porcelain being made in Britain for the first time. Wares ranged from the simple, everyday earthenwares of the local potters up to the sophisticated products of Staffordshire and the porcelain factories. This book combines the art-historical or collector's approach with archaeologically excavated material. Methods of production and decoration are explained, and contemporary imports discussed. Over a hundred pots are illustrated, and a further reading list is included . About the author Jo Draper was born in Hampshire. She has published many archaeological reports, and an even larger number of pottery reports. Archaeologically excavated pottery led her to an interest in all ceramics, especially those of the post-medieval period. Her work includes archaeology, museums, creating exhibitions and writing.

**Thames Mudlarking** Jason Sandy 2021-02-18 A beautifully illustrated introduction to mudlarking which tells the incredible, forgotten history of London through objects found on the foreshore of the River Thames. Often seen combing the shoreline of the River Thames at low tide, groups of archaeology enthusiasts known as 'mudlarks' continue a tradition that dates back to the eighteenth century. Over the years they have found a vast array of historical artefacts providing glimpses into the city's past. Objects lost or discarded centuries ago - from ancient river offerings such as the Battersea Shield and Waterloo Helmet, to seventeenth-century trade tokens and even medals for bravery - have been discovered in the river. This book explores a fascinating assortment of finds from prehistoric to modern times, which collectively tell the rich and illustrious story of London and its inhabitants - illustrated with and array of photographs taken of the items in situ in the mud and gravel of the Thames estuary, at the same time both gritty and glimmering.

The Romano-British Villa at Castle Copse, Great Bedwyn E. P. Allison 1997 These efforts have shed light not only on the history of the villa itself, but also on the shifting focus of power over the course of a millennium at the sites associated with Castle Copse in the immediate region - the Iron Age hillfort of Chisbury, a post-Roman settlement, and a Saxon village destined to become an urban center.

detailed archaeological account of the first decade of one of the best-excavated cities in the Roman Empire. Delving into the artefact and structural reports from all excavations of pre-Boudican levels in London, she brings together vast quantities of data which are discussed and illustrated according to a novel methodology that address both the difficulties and complexity of 'grey literature' and urban excavation.

England Timothy Darvill 2002 Travelling around England is in many senses a journey back in time. On all sides, and sometimes even under the road or footpath itself, there are fragments of the ancient past side by side with the clutter of the modern world. Medieval villages, castles, ancient churches, and Roman villas are commonplace and take us back to the time of Christ. Far older, yet equally abundant, are the barrows, hillforts, stone circles, camps, standing stones, trackways, and other relics of prehistoric times that have survived for several thousand years. This Guide is all about these ancient remains: the prehistoric, Roman, and medieval sites which date from the time between the first appearance of people in what we now call England during the last Ice Age and the end of medieval times around 1600 AD.

Age of Tyrants Christopher A. Snyder 2010-11-01 By the waning of Roman rule, Britain was called a "province fertile with tyrants". Christopher Snyder's history of Britain during the two centuries after Rome's withdrawal reveals a hybrid society of Celtic, Roman, and Christian elements and documents the transition from magisterial to monarchical power. An appendix explores the Arthur and Merlin myths. 30 illustrations.

The Finds of Roman Britain Guy De la Bédoyère 1989 In the ancient world the Roman Empire was not only a great military power but also a trading and industrial one. This was no less true in Britain where in archaeological terms Roman levels are distinguished from prehistoric and post-Roman ones by the sheer mass of finds - pottery, coins, brooches, tools and all sorts of everyday objects - made of almost every material known at the time. Excavations since the 19th century have produced a vast amount of information and artefacts from the Roman period.

**The Celtic World** Miranda Green 2012-12-06 The Celtic World is a detailed and comprehensive study of the Celts from the first evidence of them in the archaeological and historical record to the early post-Roman period. The strength of this volume lies in its breadth - it looks at archaeology, language, literature, towns, warfare, rural life, art, religion and myth, trade and industry, political organisations, society and technology. The Celtic World draws together material from all over pagan Celtic Europe and includes contributions from British, European and American scholars. Much of the material is new research which is previously unpublished. The book addresses some important issues - Who were the ancient Celts? Can we speak of them as the first Europeans? In what form does the Celtic identity exist today and how does this relate to the ancient Celts? For anyone interested in the Celts, and for students and academics alike, The Celtic World will be a valuable resource and a fascinating read.

*Later Celtic Art in Britain and Ireland* Lloyd Laing 1987

**Human Bones in Archaeology** Ann Stirland 2008-03-04 The human skeleton, often ignored or even discarded by early archaeologists, has become of great interest and importance to their modern counterparts. Known as physical anthropology, the study of skeletons is a vital part of environmental archaeology. Human bones provide accurate evidence for the physical characteristics of a previous community, and are a major source of evidence for diseases that scar bone, such as tuberculosis, leprosy, and syphilis, and their subsequent evolution within populations. Ann Stirland describes human skeletons and their variations as a result of diet, environment, and disease, along with the effects on the bones of various burial conditions and rituals. Guidance is offered on methods of excavation, treatment, recording and analysis, and numerous illustrations show the reader what to look for.

**Villages in Roman Britain** Robin Hanley 2000 This book discusses the variety of village settlements in Roman Britain and includes origins, development, affluence and economic activity, as well as possible administrative and military roles.

**A Corpus of Roman Pottery from Lincoln** Margaret Darling 2014-01-31 This is the first major analysis of the Roman pottery from excavations in Lincoln (comprising more than 150,000 sherds). The pottery is presented in seven major ware groups. Fine wares include a modest range of imports and are dominated by Nene Valley products. Oxidised wares are mostly local products with a few imports as are the shell- and calcite-tempered wares and reduced wares. The final three are the standard specialised wares: mortaria, mostly of German and Mancetter-Hartshill manufacture; amphorae (80% Spanish Dressel 20) and samian, mostly from Les Martres/Lezoux and 75% undecorated! The discussion explores the chronological range of the entire ceramic assemblage across the three discrete parts of the Roman fortress and later colonia.

Later Celtic Art Lloyd Laing 2008-03-04 During the fifth and sixth centuries AD a magnificent art flowered in Britain and Ireland. Arguably it was the most accomplished ever to emerge out of barbarian Europe. The art is astonishing, exuberant yet based on careful geometric layout. First developed in Britain, it reached its greatest heights in Ireland from the seventh century onwards and was revitalised by the Vikings, to survive in both Ireland and Britain until the Normans. This book, which was the first to deal exclusively with the art of the period in both Britain and Ireland, discusses both metalwork and manuscripts, and sets them in the wider perspective of the artistic traditions of the time.

**From Hunter-Gatherers to Early Christians** Julian Maxwell Heath 2023-03-31 Jutting out some thirty miles into the Irish Sea, from the western edge of Snowdonia, the Llŷn Peninsula, in north-west Wales, is renowned for its stunning beaches and countryside, with much of its landscape designated as an Area of Outstanding Natural Beauty. The peninsula is also home to a remarkable and abundant collection of archaeological sites and monuments, some of national importance, which bear witness to the ancient societies who once inhabited this narrow finger of land on the western fringe of Britain. This abundantly illustrated book examines this rich corpus of archaeological evidence, beginning with the faint but fascinating traces that Mesolithic hunter-gatherers have left in the landscape of the Llŷn Peninsula and ending in the early medieval period, with about 9,000 years of human habitation thus covered in its pages. In the course of the book, we will encounter a wealth of fascinating archaeological evidence, which includes impressive megalithic tombs and an axe 'factory' from the Neolithic; burial mounds and mysterious standing stones from the Early Bronze Age; rural settlements and magnificent hillforts occupied in the Iron Age and Romano-British period; and memorial stones erected by early Christian communities. Much more besides will be found in the pages of this volume, which throws considerable light on the ancient peoples of the Llŷn Peninsula, and the rich archaeological heritage of this special part of the United Kingdom, which has much to offer those who are interested in the distant lives of our ancestors.
